Part of  
Public Record

I am writing to express my support for the Texas Central project. This is an important private project of national significance, introducing a new high-speed rail option between the two largest metropolitan regions in Texas. This new high-speed rail service between Houston and North Texas is consistent with NARP's goals for improving passenger rail service and increasing connectivity among all forms of transportation. Connecting these two regions by passenger rail for the first time will have a significant, positive impact on the interstate rail network.

I encourage you to take jurisdiction over this project as a welcomed part of the interstate rail network, and to expedite your review of their application so this exciting project can move forward.

This is my second submission after serving the parties of record:

I certify that I have this day served copies of document upon all parties of record in this proceeding, by E-mail. Date Served: May 11, 2016
