Part of
Public Record

RE: Docket No AB-290 (Sub-No. 346X), Norfolk Southern Railway Company -
Abandonment - in Lake County, Indiana

Dear Ms. Rutson:

On August 12, 2013 Norfolk Southern Railway Company ("NSR") sent the attached Environmental and Historic Report ("E&HR") to the relevant "consulting agencies" in anticipation of NSR's filing of an Abandonment Notice of Exemption pursuant to 49 CFR Part 1152, Subpart F¹. As indicated in the E&HR, NSR intends to abandon approximately 2.95 miles of rail line between railroad mileposts MQ 280.15 and MQ 283.10 in Lake County, Indiana.

Enclosed for your records is a copy of the E&HR describing the proposed action and its environmental and historic effects (if any), as well as a map of the affected area. The packet, also, includes responses from consulting agencies to our initial consultation inquiries.

We have requested that the consulting agencies respond to your office and to NSR if any information in the E&HR appears to be misleading or incorrect, if pertinent information appears to be missing, or if they have questions about the Board's environmental review process.

If you have any questions concerning this proposed abandonment and/or the attached E&HR, please contact LaWada Poarch at (757) 629-2803

Sincerely,

Marcellus C. Kirchner

CY - Robert Wimbish
Maquiling Parkerson

Enclosures

¹ Enclosed is a list of the consulting agencies to which the E&HR has been sent.

**Environmental and Historic Report
Certificate of Service**

Pursuant to the requirements of 49 C.F.R. § 1105 7(b) and 49 C.F.R. § 1105 8(c), the undersigned hereby certifies that a copy of the Combined Environmental and Historic Report in Docket No. AB-290 (Sub-No 346X) was mailed via first class mail on August 12, 2013 to the following parties.

RE: STB Docket No. AB-290 (Sub-No. 346X), Norfolk Southern Railway Company -
Abandonment – in Lake County, Indiana

Dear Sir/Madam

Norfolk Southern Railway Company (NSR) plans to request authority from the Surface Transportation Board (STB) to abandon a segment of rail line between MQ 280.15 and MQ 283 10 in Lake County, Indiana.

Enclosed is a Combined Environmental and Historic Report (Report) which describes the proposed abandonment and other pertinent information. A map of the proposed track abandonment can be found in **Appendix A** of this report. **Appendix B** of this report lists the various agencies receiving it.

The railroad does not anticipate adverse environmental impacts; however, if you identify any adverse environmental effects please describe the actions that would assist in alleviating them. Please provide us with a written response indicating any concerns or lack thereof, which will be included in the Report and sent to the Surface Transportation Board (STB).

This Report is being provided so that you may submit information that will form the basis for the STB's independent environmental analysis of the proceeding. If you believe any of the information is incorrect, if you think pertinent information is missing, or if you have any questions about the Board's Environmental Review process, please contact the Section of Environmental Analysis (SEA) by telephone at (202) 245-0295 or by mail to:

Surface Transportation Board,
395 E Street, S.W., Room 1106
Washington DC 20423-0001

Please refer to the above Docket when contacting the STB. Applicable statutes and regulations impose stringent deadlines for processing this action. For this reason your written comments (with a copy to us) would be appreciated within three weeks.

Your comments will be considered by the Board in evaluating the environmental impacts of the contemplated action. In order for us to consider your input prior to filing with the STB, we must receive your comments within three weeks. Please provide information to LaWada Poarch by email at Lawada.Poarch@nscorp.com, or by mail to:

**LaWada Poarch

**STB DOCKET NO. AB-290 (Sub-No. 346X)
NORFOLK SOUTHERN RAILWAY COMPANY
PROPOSED RAIL LINE ABANDONMENT
BETWEEN MILEPOST MQ 280.15 AND MILEPOST MQ 283.10
IN LAKE COUNTY, INDIANA**

Combined Environmental and Historic Report

Norfolk Southern Railway Company (NSR), submits this combined Environmental and Historic Report ("EHR") pursuant to 49 C.F.R. § 1105.7(e) and 49 C.F.R. § 1105.8(d), respectively, for an exempt abandonment of approximately 2.95 miles of rail line between Mileposts MQ 280.15 and MQ 283.10 in Lake County, Indiana.

August 12, 2013

ENVIRONMENTAL REPORT

49 CFR 1105.7(e)(1) Proposed Action and Alternatives.

Describe the proposed action, including commodities transported, the planned disposition (if any) of any rail line and other structures that may be involved, and any possible changes in current operations or maintenance practices. Also describe any reasonable alternatives to the proposed action. Include a readable, detailed map and drawings clearly delineating the project.

RESPONSE: NSR proposes to abandon approximately 2.95 miles of rail line between Mileposts MQ 280.15 and MQ 283.10 in Lake County, Indiana. This line has been used recently to serve one shipper – Midwest Pipe. As of this past March, however, NSR reached an arrangement with Wisconsin Central Limited (WCL), a subsidiary of Canadian National Railway Company ("CN"), whereby WCL will assume the provision of direct switching service to Midwest Pipe. Under this arrangement, Midwest Pipe will retain access to NSR line-haul service under the terms of the NSR-WCL switching agreement.

Following abandonment, the line's rail and related track material will be salvaged. Salvage will consist of removing the rail and track material from the existing roadbed. The contour of the existing roadbed will remain as is, and existing drainage systems will remain intact. When the rail and track material are removed, the contractor will smooth the roadbed to a level surface. No ballast will be removed, and no soil disturbance will occur (and, accordingly, no National Pollutant Discharge Elimination System permit will be required). No digging or burying of any kind will be permitted. All salvaged steel components will either be reused or sold as scrap. Crossties may be reused in other railroad operations or they will be disposed of in accordance with applicable federal and

state laws and regulations. There are no bridges on the line segment.

The alternative to abandonment is to not abandon the line and retain the track in place. This alternative is not satisfactory. NSR would incur opportunity and other holding costs that would need to be covered by the now non-existent on-line shippers were this line segment to be retained.

A map depicting the line proposed for abandonment is attached as **Appendix A**. The railroad's letter to federal, state and local government agencies along with a list of the consulting agencies NSR has contacted is attached as **Appendix B**. Comments received as a result of NSR's written requests for feedback can be found in **Appendix C**.

49 CFR 1105.7(e)(2) Transportation system.

Describe the effects of the proposed action on regional or local transportation systems and patterns. Estimate the amount of traffic (passenger or freight) that will be diverted to other transportation systems or modes as a result of the proposed action.

RESPONSE: Effects of the proposed action on regional or local transportation systems and patterns would be positive. There is no rail freight or passenger traffic originating or terminating on the line segment proposed for abandonment, and the line segment has been rendered unnecessary because of a coordination of activities with WCL pursuant to which WCL will provide direct switching service to Midwest Pipe that will assure that the shipper retains access to NSR line-haul service.

49 CFR 1105.7(e)(3) Land use.

(i) Based on consultation with local and/or regional planning agencies and/or a review of the official planning documents prepared by such agencies, state whether the proposed action is consistent with existing land use plans. Describe any inconsistencies.

RESPONSE: An outline of future land use plans has been requested from the Towns of Munster and Schererville. These municipalities were also asked to comment on the consistency of the proposed abandonment with existing land use plans, and both fully support the abandonment. Copies of their responses are attached as part of **Appendix C.**

(ii) Based on consultation with the U.S. Soil Conservation Service, state the effect of the proposed action on any prime agricultural land.

RESPONSE: Consultation was requested from The United States Department of Agriculture, Natural Resources Conservation Service (NRCS). A copy of NRCS' response indicating the project area will not cause a conversion of prime farmland is attached as part of **Appendix C.**

(iii) If the action affects land or water uses within a designated coastal zone, include the coastal zone information required by Sec. 1105 9.

RESPONSE: Consultation was requested from Indiana Department of Natural Resources. A copy of their response is attached as part of **Appendix C.** Based on NSR's recent experience in another abandonment undertaking in Lake County, Indiana, involving a roughly adjacent rail line (see STB Docket No. AB-290 (Sub-No. 336X), NSR has no reason to believe that the proposed abandonment would be inconsistent with the coastal zone management plan.

(iv) If the proposed action is an abandonment state whether or not the right-of-way is suitable for alternative public use under 49 U.S.C. 10906 and explain why.

RESPONSE: The railroad may not have fee title to the entire right-of-way underlying the line segment proposed for abandonment, and so NSR may not have a contiguous corridor available for re-deployment for possible alternative public use(s). NSR does not know if there are any state and/or local plans that may be facilitated by the proposed abandonment, and NSR has no opinion about whether the right-of-way would be suitable for alternative public purposes.

49 CFR 1105.7(e)(4) Energy.

(i) Describe the effect of the proposed action on transportation of energy resources.

RESPONSE: Development and transportation of energy resources will not be affected by the abandonment. No freight or passenger traffic is moving over the line, and the line did not carry any energy resources when last operated.

(ii) Describe the effect of the proposed action on recyclable commodities.

RESPONSE: Movement or recovery of recyclable commodities will not be affected by the abandonment. No freight or passenger traffic is moving over the line, and the line did not carry recyclable commodities when last operated.

(iii) State whether the proposed action will result in an increase or decrease in overall energy efficiency and explain why.

RESPONSE: The proposed action involves the abandonment and salvage of rail line that no longer hosts any traffic by virtue of a recent switching arrangement with WCL that has diverted such traffic to an alternative route. As such, the proposed abandonment should not result in an increase or decrease in overall energy efficiency.

(iv) If the proposed action will cause diversions from rail to motor carriage of more than:

- (A) 1,000 rail carloads a year; or**
- (B) An average of 50 rail carloads per mile per year for any part of the affected line, quantify the resulting net change in energy consumption and show the data and methodology used to arrive at the figure given.**

RESPONSE: No traffic will be diverted from rail to motor carriage as a result of the proposed action, so the above thresholds will not be exceeded

49 CFR 1105.7(e)(5) Air.

- (i) If the proposed action will result in either**
 - (A) An increase in rail traffic of at least 100 percent (measured in gross ton miles annually) or an increase of at least eight trains a day on any segment of rail line affected by the proposal, or**
 - (B) An increase in rail yard activity of at least 100 percent (measured by carload activity), or**
 - (C) An average increase in truck traffic of more than 10 percent of the average daily traffic or 50 vehicles a day on any affected road segment, quantify the anticipated effect on air emissions.**

RESPONSE: The above thresholds will not be exceeded.

- (ii) If the proposed action affects a class I or nonattainment area under the Clean Air Act, and will result in either:**
 - (A) An increase in rail traffic of at least 50 percent (measured in gross ton miles annually) or an increase of at least three trains a day on any segment of rail line,**
 - (B) An increase in rail yard activity of at least 20 percent (measured by carload activity), or**
 - (C) An average increase in truck traffic of more than 10 percent of the average daily traffic or 50 vehicles a day on a given road segment, then state whether any expected increased emissions are within the parameters established by the State Implementation Plan.**

RESPONSE: The above thresholds will not be exceeded. For the record, however, Lake County, Indiana is in attainment for all National Ambient Air Quality Standard (NAAQS) pollutants according to the U.S. Environmental Protection Agency, with the exception of 8-hr. ozone.

- (iii) If transportation of ozone depleting materials (such as nitrogen oxide and Freon®) is contemplated, identify: the materials and quantity; the frequency of service; safety**

practices (including any speed restrictions); the applicant's safety record (to the extent available) on derailments, accidents and spills; contingency plans to deal with accidental spills; and the likelihood of an accidental release of ozone depleting materials in the event of a collision or derailment.

RESPONSE: Not applicable.

49 CFR 1105.7(e)(6) Noise.

If any of the thresholds identified in item (5)(i) of this section are surpassed, state whether the proposed action will cause:

(i) An incremental increase in noise levels of three decibels Ldn or more; or

(ii) An increase to a noise level of 65 decibels Ldn or greater.

If so, identify sensitive receptors (e.g., schools, libraries, hospitals, residences, retirement communities, and nursing homes) in the project area, and quantify the noise increase for these receptors if the thresholds are surpassed.

RESPONSE: The above thresholds will not be exceeded.

49 CFR 1105.7(e)(7) Safety.

(i) Describe any effects of the proposed action on public health and safety (including vehicle delay time at railroad grade crossings).

RESPONSE: Abandonment of the subject rail line segment will have no significant effect upon public health and safety.

(ii) If hazardous materials are expected to be transported, identify: the materials and quantity; the frequency of service; whether chemicals are being transported that, if mixed, could react to form more hazardous compounds; safety practices (including any speed restrictions); the applicant's safety record (to the extent available) on derailments, accidents and hazardous spills; the contingency plans to deal with accidental spills; and the likelihood of an accidental release of hazardous materials.

RESPONSE: Not applicable.

(iii) If there are any known hazardous waste sites or sites where there have been known hazardous materials spills on the right-of-way, identify the location of those sites and the types of hazardous materials involved.

RESPONSE: The railroad has no knowledge of hazardous waste sites or sites where there have been known hazardous material spills on the right-of-way or in adjacent areas.

49 CFR 1105.7(e)(8) Biological Resources.

(i) Based on consultation with the U.S. Fish and Wildlife Service, state whether the proposed action is likely to adversely affect endangered or threatened species or areas designated as a critical habitat, and if so, describe the effects.

RESPONSE: The railroad understands that no federally- listed endangered species or their habitats will be adversely affected. The railroad has requested input from the U.S. Fish and Wildlife Service (USFWS) to ascertain any impacts to surrounding habitats and species. USFWS has advised that they do not anticipate any impact on federally-listed endangered, threatened or candidate species or their habitats. The response of USFWS is attached as part of **Appendix C**.

(ii) State whether wildlife sanctuaries or refuges, National or State parks or forests will be affected, and describe any effects.

RESPONSE: The line segment proposed for abandonment does not appear to pass through state parks or forests, national parks or forests, or wildlife sanctuaries. No adverse effects on wildlife sanctuaries, national parks or forests, or state parks or forests are anticipated.

49 CFR 1105.7(e)(9) Water.

(i) Based on consultation with State water quality officials, state whether the proposed action is consistent with applicable Federal, State or local water quality standards. Describe any inconsistencies.

RESPONSE: The railroad does not intend to remove or alter the contour of the roadbed underlying the rail line to be abandoned by way of excavation or other ground-disturbance activity. Accordingly, no soils will be disturbed as a result of the proposed abandonment, and no storm water mitigation or National Pollutant Discharge Elimination System permits will be required. The line proposed for abandonment cross no major watercourses. There are no plans to undertake in-stream work, or dredge and/or use any fill materials in connection with the proposed abandonment, and for this reason also, the proposed abandonment will not result in water quality impacts.

Consultation has been requested from the Indiana Department of Natural Resources (IDNR) and from the United States Environmental Protection Agency (USEPA). A copy of the IDNR response is attached as part of **Appendix C**. IDNR's response states that aerial images and topographic maps indicate a small stream that crosses the right-of-way, which, if present, would be conveyed through a culvert.

(ii) Based on consultation with the U S. Army Corps of Engineers, state whether permits under section 404 of the Clean Water Act (33 U.S.C. 1344) are required for the proposed action and whether any designated wetlands or 100-year flood plains will be affected. Describe the effects.

RESPONSE: The geometry of the roadbed will not be altered and no in-stream work is contemplated. No discernible effects on either 100-year flood plains or adjacent wetlands are expected in connection with the proposed abandonment. Consequently, the railroad does not believe a Section 404 permit will be required in connection with the proposed abandonment. Consultation was requested from the U.S Army Corps of Engineers (USACE) by letter dated April 25, 2013. Their response dated June 17, 2013 states no impacts are expected to occur. A copy of the USACE response is included as

part of **Appendix C**.

(iii) State whether permits under section 402 of the Clean Water Act (33 U.S.C. 1342) are required for the proposed action.

RESPONSE: The railroad does not plan to remove or alter the roadbed underlying the line to be abandoned, to undertake in-stream work, or to dredge or use any fill materials. There will be no excavation or other ground-disturbance activity, and, because no soils will be disturbed, no storm water mitigation or National Pollutant Discharge Elimination System permit will be required. The railroad anticipates that the abandonment will not affect water quality or require the issuance of a Section 402 permit under the Federal Water Pollution Control Act. Nevertheless, NSR has requested input from the U.S. Environmental Protection Agency (USEPA) and the Indiana Department of Natural Resources (as indicated in a preceding section). A copy of their response is attached as part of **Appendix C**.

49 CFR 1105.7(e)(10) Proposed Mitigation.

Describe any actions that are proposed to mitigate adverse environmental impacts, indicating why the proposed mitigation is appropriate.

RESPONSE: Abandonment of the involved rail line is not expected to produce adverse environmental impacts for the reasons set forth above. Only minimal physical activity may occur as a result of the proposed abandonment, such as removal of rail, ties, and other railroad appurtenances. The railroad will undertake all reasonable mitigation associated with these activities as directed by the Board to assure the abandonment does not produce adverse environmental impacts.

HISTORIC REPORT

49 CFR 1105.8(d)

PROPOSED ACTION AND ALTERNATIVES

NSR proposes to abandon approximately 2.95 miles of rail line between Mileposts MQ 280.15 and MQ 283.10 in Lake County, Indiana. This line has been used recently to serve one shipper – Midwest Pipe. As of this past March, however, NSR reached an arrangement with Wisconsin Central Limited (WCL), a subsidiary of Canadian National Railway Company ("CN"), whereby WCL will assume the provision of direct switching service to Midwest Pipe. Under this arrangement, Midwest Pipe will retain access to NSR line-haul service under the terms of the NSR-WCL switching agreement.

Following abandonment, the line segment's rail and related track material will be salvaged. Salvage will consist of removing the rail and track material from the existing roadbed. The contour of the existing roadbed will remain as is, and existing drainage systems will remain intact. When the rail and track material are removed, the contractor will smooth the roadbed to a level surface. No ballast will be removed, and no soil disturbance will occur (and, accordingly, no National Pollutant Discharge Elimination System permit will be required). No digging or burying of any kind will be permitted. All salvaged steel components will either be reused or sold as scrap. Crossties may be reused in other railroad operations or they will be disposed of in accordance with applicable federal and state laws and regulations. There are no bridges on the line segment.

The alternative to abandonment is to not abandon the line and retain the track in place. This alternative is not satisfactory. The railroad would incur opportunity and other holding costs that would need to be covered by the now non-existent on-line shippers were this line segment to be retained. A map depicting the line proposed for abandonment is attached in **Appendix A**.

ADDITIONAL INFORMATION

- (1) **U.S.G.S. Topographic Map** - Maps were furnished to the Indiana Division of Historic Preservation and Archaeology.
- (2) **Written Description of Right-of-Way** - The right-of-way width ranges from 40 feet to 100 feet along the main track centerline. The proposed segment is between Mileposts MQ 280 15 and MQ 283.10. Pursuant to Surface Transportation Board (STB) policy, the railroad's right-of-way will constitute the Area of Potential Effect (APE) for this undertaking.
- (3) **Photographs** – There are no structures on the line.
- (4) **Date of Construction of Structures** – Not applicable.
- (5) **History of Operations and Changes Contemplated** – The railroad property that is the subject of the proposed abandonment consists of roughly 2.95 miles of rail line between mileposts MQ 280.15 and MQ 283.10 in Lake County, Indiana. This line has been rendered unnecessary because of a coordination of activities with WCL pursuant to which WCL will switch for NSR's benefit the sole remaining customer (Midwest Pipe) that NSR previously accessed via this line.

The line was originally constructed by the Pittsburgh, Cincinnati, Chicago and St.

Louis Railroad (PCC&StL), commonly known as the Panhandle Route. The PCC&StL was leased by the Pennsylvania Railroad (PRR) in 1921 and merged into PRR subsidiary Philadelphia, Baltimore and Washington Railroad in 1956. PRR combined with the New York Central Railroad (NYC) to form Penn Central Transportation Company (Penn Central) in 1968. Consolidated Rail Corporation (Conrail), which commenced operations on April 1, 1976, assumed control of the line following the bankruptcy of Penn Central, and, in 1999, NSR assumed control of the subject line segment.

(6) Summary of Documents In Carrier's Possession That Might Be Useful for Documenting a Structure That Is Found To Be Historic – Not applicable, as there are no structures on the line or within the APE for this undertaking.

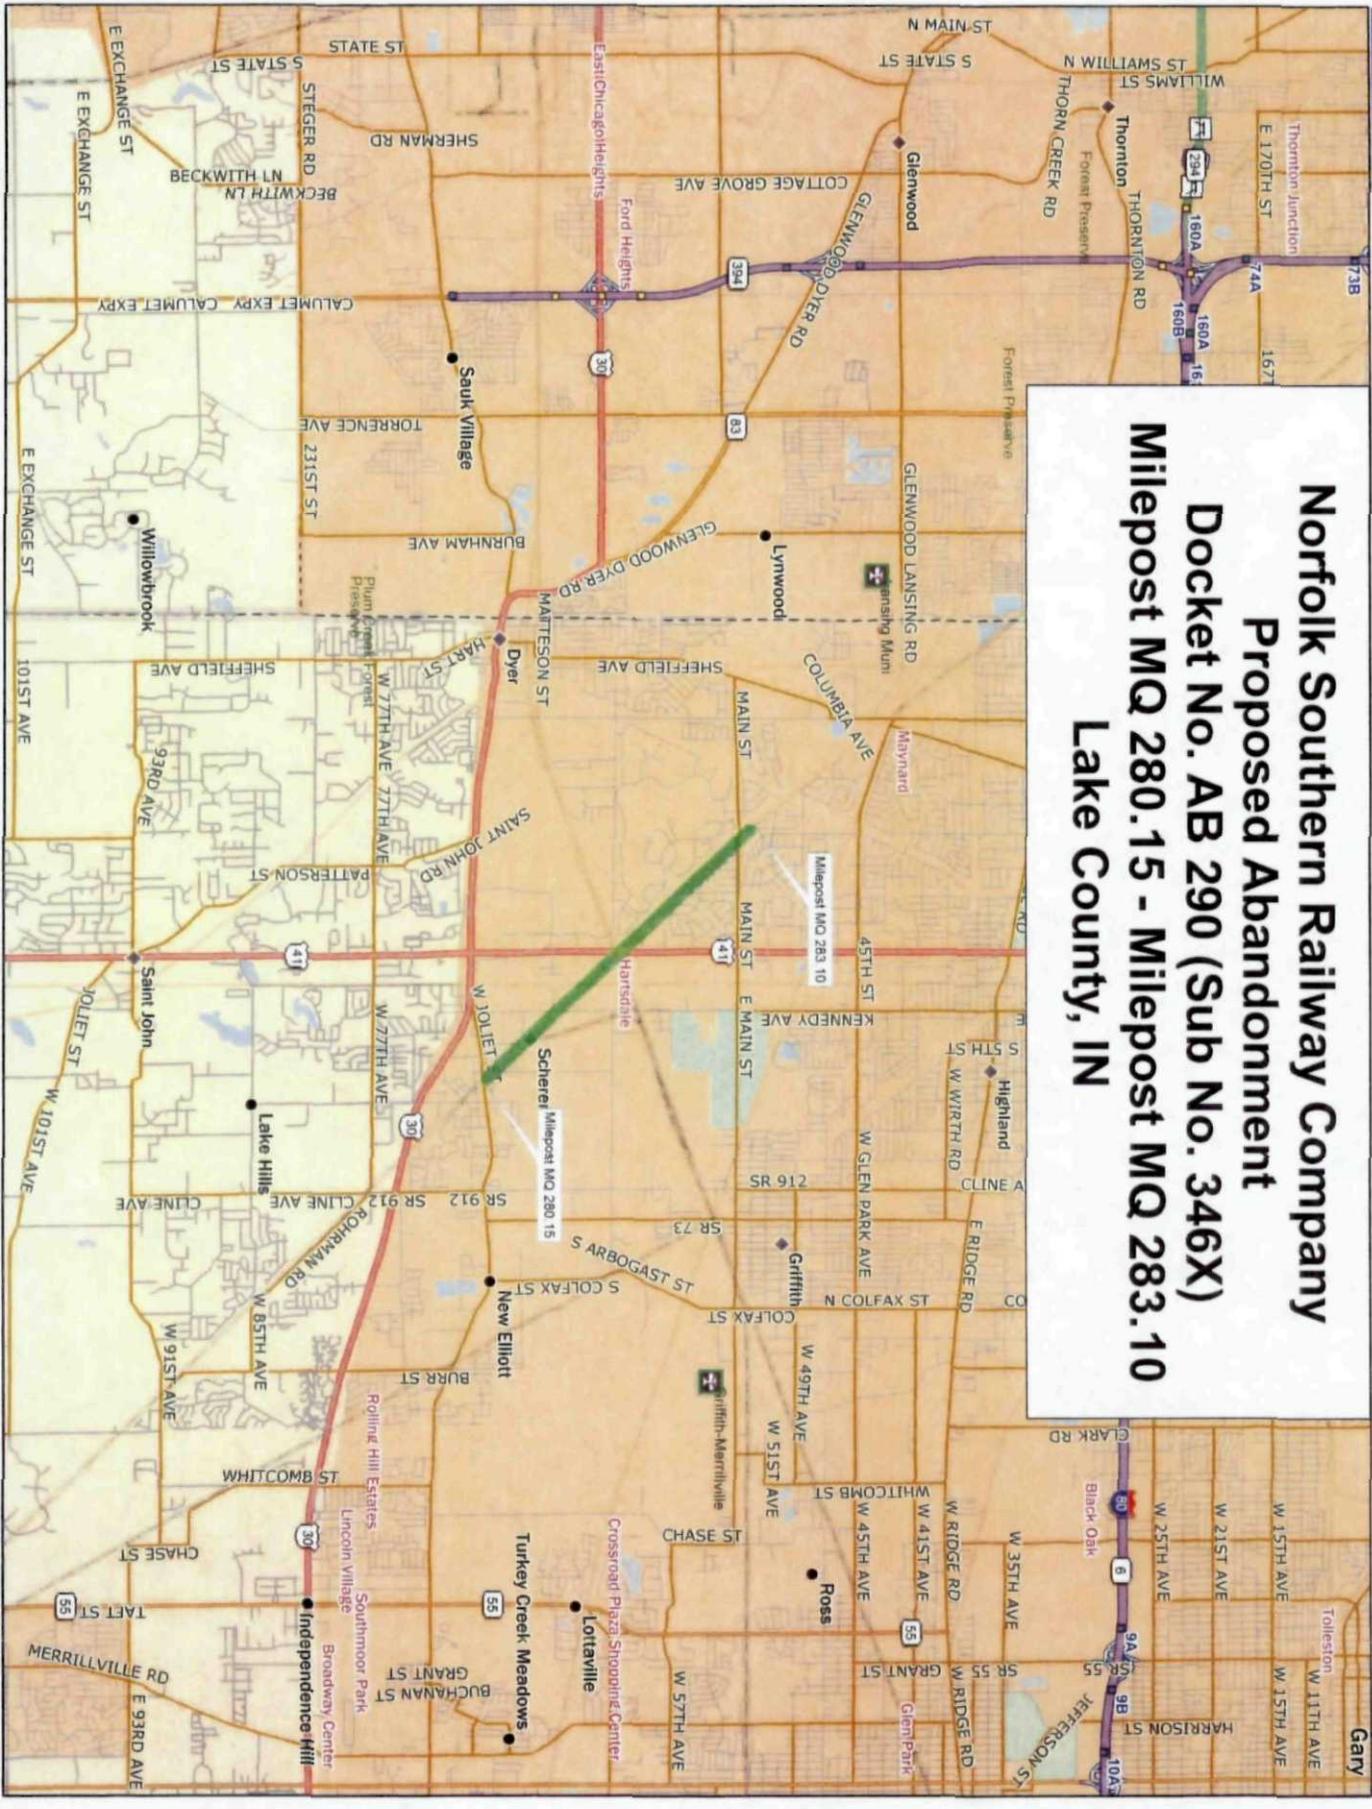

(7) Opinion Regarding Criteria For Listing In The National Register Of Historic Places – There are no structures on the line or within the APE for this undertaking. The railroad has no reason to believe that there is any likelihood of finding archaeological resources or historic properties on the line proposed for abandonment.

(8) Subsurface Ground Conditions That Might Affect Archaeological Recovery
The railroad is not aware of any prior subsurface ground disturbances or environmental conditions that would affect archaeological recovery. Moreover, abandonment of the line and salvage of material from its surface will not affect any potential archaeological resources. The subsurface of the right-of-way was initially disturbed in the construction of the railroad line by grading and filling. Abandonment and salvage of the line will not result in activities below the surface, or below the level of initial disturbance.

(9) **Follow-Up Information** - Additional information will be provided as appropriate.

RE: STB Docket No. AB-290 (Sub-No. 346X), Norfolk Southern Railway Company -
Abandonment – in Lake County, Indiana

Dear Sir/Madam:

Norfolk Southern Railway Company (NSR) plans to request authority from the Surface Transportation Board (STB) to abandon a segment of rail line between MQ 280.15 and MQ 283.10 in Lake County, Indiana.

Enclosed is a Combined Environmental and Historic Report (Report) which describes the proposed abandonment and other pertinent information. A map of the proposed track abandonment can be found in Appendix A of this report. Appendix B of this report lists the various agencies receiving it.

The railroad does not anticipate adverse environmental impacts; however, if you identify any adverse environmental effects please describe the actions that would assist in alleviating them. Please provide us with a written response indicating any concerns or lack thereof, which will be included in the Report and sent to the Surface Transportation Board (STB).

This Report is being provided so that you may submit information that will form the basis for the STB's independent environmental analysis of the proceeding. If you believe any of the information is incorrect, if you think pertinent information is missing, or if you have any questions about the Board's Environmental Review process, please contact the Section of Environmental Analysis (SEA) by telephone at (202) 245-0295 or by mail to:

Surface Transportation Board,
395 E Street, S W., Room 1106
Washington DC 20423-0001

Please refer to the above Docket when contacting the STB. Applicable statutes and regulations impose stringent deadlines for processing this action. For this reason your written comments (with a copy to us) would be appreciated within three weeks.

Your comments will be considered by the Board in evaluating the environmental impacts of the contemplated action. In order for us to consider your input prior to filing with the STB, we must receive your comments within three weeks. Please provide information to LaWada Poarch by email at Lawada.Poarch@nscorp.com, or by mail to:

RE: Docket No. AB-290 (Sub-No. 346X), Norfolk Southern Railway Company – Abandonment – in Lake County, Indiana

Dear Ms. Poarch:

In response to the letter dated April 25, 2013, the Town of Munster is fully supportive of the abandonment of the railway between W. Joliet Street and Main Street, Schererville, Indiana, or between mileposts MQ 280.15 and MQ 283.10. Prior to this abandonment, the Town of Munster has acquired the railroad right of way between Main Street and Calumet Avenue for usage as a bike path.

This right-of-way will connect to the greater Pennsy Greenway, cross into Illinois and the Burnham Greenway, and eventually run into the City of Chicago. The entirety of this trail would become part of the American Discovery Trail. Through abandonment of this railway, and the subsequent creation of a path, this bike path will connect the residents of northern and southern Lake County, Indiana. A copy of related pages on the Pennsy Greenway from Munster's 2010 Comprehensive Plan are enclosed for your review. As you can see from these documents, the Town of Munster has long awaited to complete the connectivity of this trail.

Thank you for this information. You may call me at (219) 836-6900 if there are any problems, or if you have any questions.

Sincerely,

Thomas F. DeGiulio
Town Manager

Penssy Greenway Bike Path

Penssy Greenway is at the heart of Munster's existing and planned trail network.

When fully complete, this 15 mile trail (10 miles in Indiana, 5 in Illinois) will connect directly to the 450-mile Burnham Greenway/Grand Illinois trail system in Illinois, with the potential to serve a large regional population. This is envisioned to be the first off-road, bi-state link in the region, and would become part of the American Discovery Trail network. The trail is planned to go

through Crown Point, Schererville, Munster, Dyer, Lansing, Calumet City and Burnham, and continue southeast of Crown Point to Hebron, where it is called the Veterans Memorial Trail.

The Plan aims for Munster to connect with Lansing's established bike path at the state line. That path will run to Manor Avenue and Fisher Street, cross onto the future Mixed Use District and potential train station at Lake Business Center and southward to Centennial Park. As it travels through Centennial Park, the path will leave the old rail right of way and wind around the edge of the

golf course providing bikers with an attractive view of the park.

Construction began in Fall 2009 on the old Penn-Central (Conrail) right of way at Main Street as a major link in the Penssy-Greenway. The extension of this path from Calumet Avenue to the state line is planned for construction in 2010.

Re: Schererville/Town – Pennsy Greenway Bike Trail Project
Docket No. AB-209 (Sub-No. 346X), Norfolk Southern Railway Company Abandonment –
in Lake County, Indiana

Dear Mr. Kirchner:

Please be advised that this Law Firm represents the Town of Schererville, Indiana, as its Town Attorneys. This letter will serve as the formal response on behalf of the Town of Schererville to your correspondence to Town Manager, Robert Volkmann, dated April 25, 2013. The Town of Schererville is very interested in the abandonment proceeding and is attempting to acquire the same right-of-way for construction of the Pennsy Greenway Trail. A portion of the Pennsy Greenway Trail was completed by the Town of Schererville southeast of the portion proposed to be abandoned and the Town of Munster completed a portion northwest of the proposed abandonment. This abandonment will provide the opportunity to link these two (2) sections of very popular and frequently used trail. Enclosed please find a partial copy of the regional hiking and biking trails with the Pennsy Greenway Trail and the abandonment limits noted.

If you need further information, or have any questions, please contact the undersigned or Rex Sherrard of our Firm. Thank you.

Very truly yours,

AUSTGEN KUIPER & ASSOCIATES, P.C.

Docket No. AB-209 (Sub-No. 346X), Norfolk Southern Railway Company Abandonment –
in Lake County, Indiana**

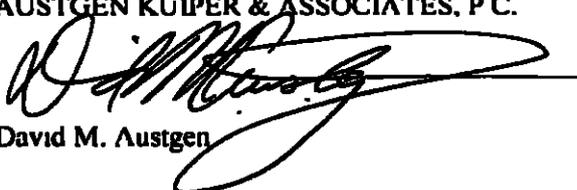

Dear Mr. Kirchner:

This letter is in follow-up to the May 13th formal response on behalf of the Town of Schererville to your correspondence to Town Manager, Robert Volkmann, dated April 25, 2013. A copy of that request letter is enclosed for your use and ready reference. The Town of Schererville is very interested in the abandonment proceeding and is attempting to acquire the same right-of-way for construction of the Pennsy Greenway Trail. No information has been provided on the status of the Abandonment in the more than seventy (70) days that have elapsed. Please provide an update as to the status of Abandonment proceedings and a timetable to complete same, if available.

If you need further information, or have any questions, please contact the undersigned or Rex Sherrard of our Firm. Thank you consideration and cooperation in this matter.

Very truly yours,

Marcellus C Kirchner
Director Strategic Planning
Norfolk Southern Corporation
Three Commercial Place
Norfolk, Virginia 23510-9202

Dear Mr Kirchner:

The proposed project to abandon approximately 2.95 miles of rail lines in Lake County, Indiana, as referred to in your letter received May 1, 2013, will not cause a conversion of prime farmland.

If you need additional information, please contact Lisa Bolton at 317-295-5842.

Sincerely,

A handwritten signature in cursive script that reads "Roger Kult".

ROGER KULT
Acting State Conservationist

THIS IS NOT A PERMIT

State of Indiana
DEPARTMENT OF NATURAL RESOURCES
Division of Fish and Wildlife
Early Coordination/Environmental Assessment

DNR #: ER-16987

Request Received: April 29, 2013

Requestor: Norfolk Southern Corporation
LaWada Poarch
Strategic Planning - 12th Floor
3 Commercial Place
Norfolk, VA 23510

Project: Norfolk Southern Railway Company, abandonment of 2.95 miles of rail line and removal of rail and track material between Mileposts MQ 280.15 and MQ 283.10; Docket No. AB-290 (Sub-No 346X)

County/Site Info: Lake

The Indiana Department of Natural Resources has reviewed the above referenced project per your request. Our agency offers the following comments for your information and in accordance with the National Environmental Policy Act of 1969.

If our agency has regulatory jurisdiction over the project, the recommendations contained in this letter may become requirements of any permit issued. If we do not have permitting authority, all recommendations are voluntary.

Regulatory Assessment: This proposal may require the formal approval of our agency pursuant to the Flood Control Act (IC 14-28-1) for any proposal to construct, excavate, or fill in or on the floodway of a stream or other flowing waterbody which has a drainage area greater than one square mile. Please submit more detailed plans to the Division of Water's Technical Services Section if you are unsure whether or not a permit will be required.

Natural Heritage Database: The Natural Heritage Program's data have been checked. The species and communities below have been recorded within 1/2 mile of the project area. The Division of Nature Preserves (DNP) does not anticipate any impacts to the plants species. The communities are within Hoosier Prairie managed lands adjacent to this project. DNP recommends that impacts to the communities be avoided while removing the rail and track. There should be no stock-piling or parking in these areas.

A) PLANTS:
1) Earleaf Foxglove (*Agalinis auriculata*); State Threatened
2) Narrow-leaved Cotton-grass (*Eriophorum angustifolium*), State Rare

B) COMMUNITIES:
1) Wet-mesic Sand Prairie
2) Sedge Meadow
3) Mesic Sand Prairie

Fish & Wildlife Comments: The information submitted states that the line crosses no watercourses, however, based on aerial images and topographic maps, there appears to be a small stream that the railroad crosses.

Avoid and minimize impacts to fish, wildlife, and botanical resources to the greatest extent possible, and compensate for impacts. The following are recommendations that address potential impacts identified in the proposed project area.

1) Wetland Habitat.

According to the National Wetlands Inventory data, various wetland types potentially occur within the project limits. We recommend a wetland delineation be conducted in order to identify, avoid, and minimize potential impacts. Due to the presence or potential presence of wetlands on site, we recommend contacting and coordinating with

THIS IS NOT A PERMIT

**State of Indiana
DEPARTMENT OF NATURAL RESOURCES
Division of Fish and Wildlife
Early Coordination/Environmental Assessment**

the Indiana Department of Environmental Management (IDEM) 401 program and also the US Army Corps of Engineers (USACE) 404 program. Impacts to wetlands should be mitigated at the appropriate ratio (see <http://www.in.gov/legislative/fac/20120801-IR-312120434NRA.xml> pdf)

2) Exposed Soil.

Install a double row erosion control fabric or silt fencing along wetland areas near the project area. All exposed soil areas should be stabilized with temporary or permanent vegetation by November 1. Between November 1 and April 1, all exposed soils idle for longer than 7 days should be stabilized with erosion control blankets or with a bonded fiber matrix hydro-mulch. Sites should be protected from seasonal flooding by keeping traffic areas covered with stone and soil stockpiles seeded, stabilized, and contained with silt fencing.

The additional measures listed below should be implemented to avoid, minimize, or compensate for impacts to fish, wildlife, and botanical resources:

1. Revegetate all bare and disturbed areas with a mixture of grasses (excluding all varieties of tall fescue), legumes, and native shrub and hardwood tree species as soon as possible upon completion.
2. Do not cut any trees suitable for Indiana bat roosting (greater than 3 inches dbh, living or dead, with loose hanging bark) from April 1 through September 30.
3. Operate equipment used to deconstruct the rail line from the existing railway corridor. Do not allow any construction debris to enter nearby waterbodies.
4. Appropriately designed measures for controlling erosion and sediment must be implemented to prevent sediment from entering the stream or leaving the construction site, maintain these measures until construction is complete and all disturbed areas are stabilized.
5. Seed and protect all disturbed streambanks and slopes that are 3:1 or steeper with erosion control blankets (follow manufacturer's recommendations for selection and installation); seed and apply mulch on all other disturbed areas.
6. Inspect structural erosion and sediment control practices daily and repair as necessary until all construction is complete and disturbed areas are permanently stabilized.

Contact Staff:

Christie L. Stanifer, Environ. Coordinator, Fish & Wildlife
Our agency appreciates this opportunity to be of service. Please contact the above staff member at (317) 232-4080 if we can be of further assistance.

Norfolk, Virginia 23510**

**Project No.: Docket No. AB-290 (Sub-No. 346X)
Project: Norfolk Southern Railway Company Line Abandonment
Location: Schererville, Lake County, Indiana**

Dear Ms. Poarch:

This responds to Marcellus C. Kirchner's letter dated April 25, 2013, requesting our comments on the aforementioned project.

These comments have been prepared under the authority of the Fish and Wildlife Coordination Act (16 U.S.C. 661 et. seq.) and are consistent with the intent of the National Environmental Policy Act of 1969, the Endangered Species Act of 1973, and the U. S. Fish and Wildlife Service's Mitigation Policy.

The proposed project consists of the abandonment of 2.95 miles of track between Mileposts MQ 280.15 and MQ 283 10, basically between Joliet Street and Main Street in Schererville. This is a spur line that connects with another NS track at Hartsdale; the Canadian Northern/EJ&E double tracks are also crossed at Hartsdale.

The rail line is close to Hoosier Prairie State Nature Preserve, a protected area of approximately 750 acres in Schererville, Highland, and Griffith owned by the Indiana Division of Nature Preserves. A portion of Hoosier Prairie is shown on the map enclosed with your letter along Kennedy Avenue and East Main Street, but it also includes additional lands to the north and south of that core area. The area closest to the NS rail line is south of 61st Avenue/Division

Street, between Central Avenue/Mary Street and Junction Avenue. It borders a small section of Junction Avenue, which is parallel to the NS line between Joliet Street and Kennedy Avenue, so Junction Avenue is between the nature preserve and the railroad.

Hoosier Prairie is a complex of native habitats, including sedge meadow, wet prairie, and marsh wetlands and upland oak savannas. It supports numerous species of wildlife, including a diversity of amphibians, reptiles, mammals, and migratory birds, including some considered rare within the State of Indiana, a number of Indiana-listed rare plants are also present. The Federally endangered Karner blue butterfly (*Lycaeides melissa samuelis*) was formerly present at Hoosier Prairie but is no longer extant. Although Hoosier Prairie is close to the rail line proposed for abandonment, we do not anticipate any impacts to this resource from the abandonment actions.

The track that is proposed for abandonment is adjacent to a small local recreation area called Plum Creek Park, which is within a residential community south of Main Street and west of Indianapolis Boulevard. A narrow band of trees separates the park from the railroad tracks, and a walking path parallels these trees; as long as the trees are not removed during abandonment actions, the aesthetics and use of this community park should not be affected.

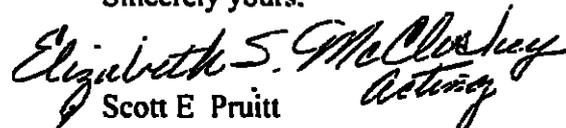

ENDANGERED SPECIES

The proposed project is within the range of the Federally endangered Indiana bat (*Myotis sodalis*) and Karner blue butterfly (*Lycaeides melissa samuelis*) and the threatened Pitcher's thistle (*Cirsium pitcheri*) and Mead's milkweed (*Asclepias meadii*). However, there is no habitat for any of these species within the proposed project area, so we agree that the proposed project is not likely to adversely affect these endangered and threatened species.

This precludes the need for further consultation on this project as required under Section 7 of the Endangered Species Act of 1973, as amended. However, should new information arise pertaining to project plans or a revised species list be published, it will be necessary for the Federal agency to reinstate consultation.

We appreciate the opportunity to comment at this early stage of project planning. If project plans change such that fish and wildlife habitat may be affected, please re-coordinate with our office as soon as possible. If you have any questions, please contact Elizabeth McCloskey at (219) 983-9753 or elizabeth_mccloskey@fws.gov.

Sincerely yours,

for Scott E. Pruitt
Supervisor

To: lawada.poarch@nscorp.com
Subject: Docket No AB-290; Abandonment in Lake County, Indiana (UNCLASSIFIED)

Classification: UNCLASSIFIED
Caveats: NONE

Ms Poarch,

I have reviewed your April 25th, 2013 notification for abandonment. The proposed project involves the abandonment of a rail line that crosses several streams and wetlands. Any impacts to these stream and wetland areas will require a permit from our office. Potential project impacts to waterways that may require a permit include dumping or stockpiling of any materials and installation of access roads or equipment staging.

However based on your project description it sounds like no impacts are expected to occur. It is Norfolk's responsibility to ensure this is the case. If plans change and impacts to waterways are required please contact me for further permitting instruction.

Sincerely,

Paul M Leffler
