SUPPLEMENTAL INFORMATION: RETAC arose from a proceeding instituted by the Board, in Establishment of a Rail Energy Transportation Advisory Committee, STB Ex Parte No. 670. RETAC was formed to provide advice and guidance to the Board, and to serve as a forum for discussion of emerging issues regarding the transportation by rail of energy resources, particularly, but not necessarily limited to, coal, ethanol, and other biofuels. The purpose of this meeting is to continue discussions regarding issues such as rail performance, capacity constraints, infrastructure planning and development, and effective coordination among suppliers, carriers, and users of energy resources. Potential agenda items include reports from each of the four RETAC subcommittees (Best Practices, Capacity Planning, Communication, and Performance Measures), a report on the supplemental study recently released by Christensen Associates on rail capacity and infrastructure investment, a briefing on infrastructure implications of economic stimulus legislation and may include a discussion of the federal legislative agenda on energy issues.

The meeting, which is open to the public, will be conducted pursuant to RETAC's charter and Board procedures. Further communications about this meeting may be announced through the Board's website at "WWW.STB.DOT.GOV."

This action will not significantly affect either the quality of the human environment or the conservation of energy resources.

Decided: May 15, 2009.

By the Board, Anne K. Quinlan, Acting Secretary.
