¹ The conditions imposed by the Board include the following: (1) consult with NGS and notify NGS at least 90 days prior to beginning salvage activities that will disturb or destroy any geodetic station markers; and (2) prior to commencement of any salvage activities (i) consult with FWS regarding potential impacts from salvaging activities to federally listed threatened and endangered species that may occur in the vicinity of the line, and (ii) report the results of the consultations in writing to the Board’s Office of Environmental Analysis prior to the onset of salvage operations.
