Subject: railroad in Moses Lake

To Elizabeth Phinny.Railroad Environmental Mgr.

I am very much opposed to to a new rail road being built when there is one already in place that could be improved on at a much lesser cost of building a new one. It would also have no impact on the people living along your new proposed route. I think this new route is just a very costly new adventure that makes no sense what so ever!

Sincerely,

Sharyl A. Darlington
