Northern Columbia Basin Railroad Project

Grant County International Airport
Thursday, July 19, 2007, 4 - 7 PM

The Surface Transportation Board, which has jurisdiction over freight rail construction, and the Washington State Department of Transportation are jointly leading the required environmental review of a proposed rail construction project in the Moses Lake area, called the Northern Columbia Basin Railroad Project. The Port of Moses Lake has proposed this project to encourage economic development and the continued use and preservation of rail in the region.

Your comments on the alternative alignments and possible environmental and community impacts of the project will be valuable input for the environmental analysis. Please leave your comments with us tonight or send them to Elizabeth Phinney, Rail Environmental Manager, by email, phinnee@wsdot.wa.gov, by fax, (360) 705-6821, or by mail, WA St. Dept. of Transportation, Freight Systems Division, PO Box 47407, Olympia, WA 98504-7407 by **Thursday, August 9, 2007.**

Please tell us what you think

The railroad service is a good concept but the proposed route seems to be a bad idea. With the city limits expanding every year in 10-15 years the same problem would arise - where to run the lines without compromising traffic & safety issues. Rail lines should be run with as little affect on road →
