Donald Schramm, Assistant Manager - Engineering for the Sunnyside Valley Irrigation District (509-837-6980), supplied a three page PDF of maps showing the route of the pipeline at Grandview. The pages progress westbound, with the second page just happening to encompass the entire run of the pipeline on the UP right of way.

First, immediately below, UP combined pages one and two for overall perspective and attached RR mileposts to the eastern entry and western exit points. This comes at the expense of readability of some of the map notations, which is why we include the unedited three page version of the maps farther below as a second attachment. The pipeline travels southward along North Avenue B to enter the UP right of way and then turns westward along the northern portion of the right of way. It switches to the south side of the right of way after crossing Wine Country Road, then turns southward again to leave the right of way.

(See attached file: Drainage Pipeline Map.pdf)

The unedited maps - again, with a focus on page two - show the UP more clearly as bounded in yellow. The total length of pipe on the UP/ Wine Country Road right of way based on pipe engineering stations is about 1075 feet. Given the angles made by the pipe, the actual east to west traverse is by measured scale about 1050 feet. The western exit of the pipeline occurs near the pennant shaped notation 37A.

Mr. Holter, we understand that you will give the final official view to Ms. Dean as to this area having been cleared regarding Section 106.

(TWO SEPARATE PLAN PAGES WERE OVERLAYED TO CREATE THIS DRAINAGE PLAN UTILIZING UPRR RIGHT-OF-WAY.)
THE RED ENHANCED LINE IS THE DRAINAGE PIPELINE ON UPRR RIGHT-OF-WAY AND THE RIGHT-OF-WAY FOR WINE
COUNTRY ROAD. (APPROXIMATELY 1,075 FT.)

THE RED ARROWS SHOW THE MILEPOSTS FOR THE UPRR ABANDONED RIGHT-OF-WAY REQUIRED FOR THE DRAINAGE
PIPELINE.
