Document #35952

David Navecky,

I am writing in opposition the GLBT Rail project as it is proposed. It will be passing through my farm Venable Farms, Inc., 8525 E County Rd MM, Janesville, WI 53546, that my husband & I along with his parents purchased 58 years ago. We have always ^{been} ~~be~~ conscious of the environmental impact that are farming practices have had over the years. I am not in favor of a train dividing our farm and putting some on the best farmland in the country out of production. We also feed cattle and the noise pollution will make the cattle very uneasy and edgy. Having 100+ trains pass a day is not what I had in mind when we purchased this farmland. We have worked all of these years to have it what it is today.

My home is a short distance from the proposed rail tracks and I think that the noise and vibration will make it impossible for me to continue to live in my home. My home was just remodeled so that I could continue to live in my own home. I noticed per the article in the Wall Street Journal that no one will be forced from their home. I suggest that Mr. Patton the man developing this plan buy one of the homes next to the tracks and live there. My main concern in the environmental impact this project would have on our rich "Rock Prairie" farmland. I am strongly opposed to this project.

Virgie Venable
