

To whom it may concern:

Increased freight traffic in Barrington would be devastating for our community. Economically it would destroy the businesses in our downtown area. The community has been working hard to bring the consumers back to Barrington, but will lose all the ground it has gained if it becomes difficult to access. Environmentally any derailment of hazardous material would be devastating considering the close proximity to our schools. Not to mention the difficulty in reaching our children in the event of an emergency. I strongly object to the increase and will do anything in my power to fight it.

Sincerely,
