1. Which of the following applies to your situation?

The proposed rail line is near my home.

The proposed rail line is near my business.

The proposed rail line crosses my property Alt. route #1

Other, please specify

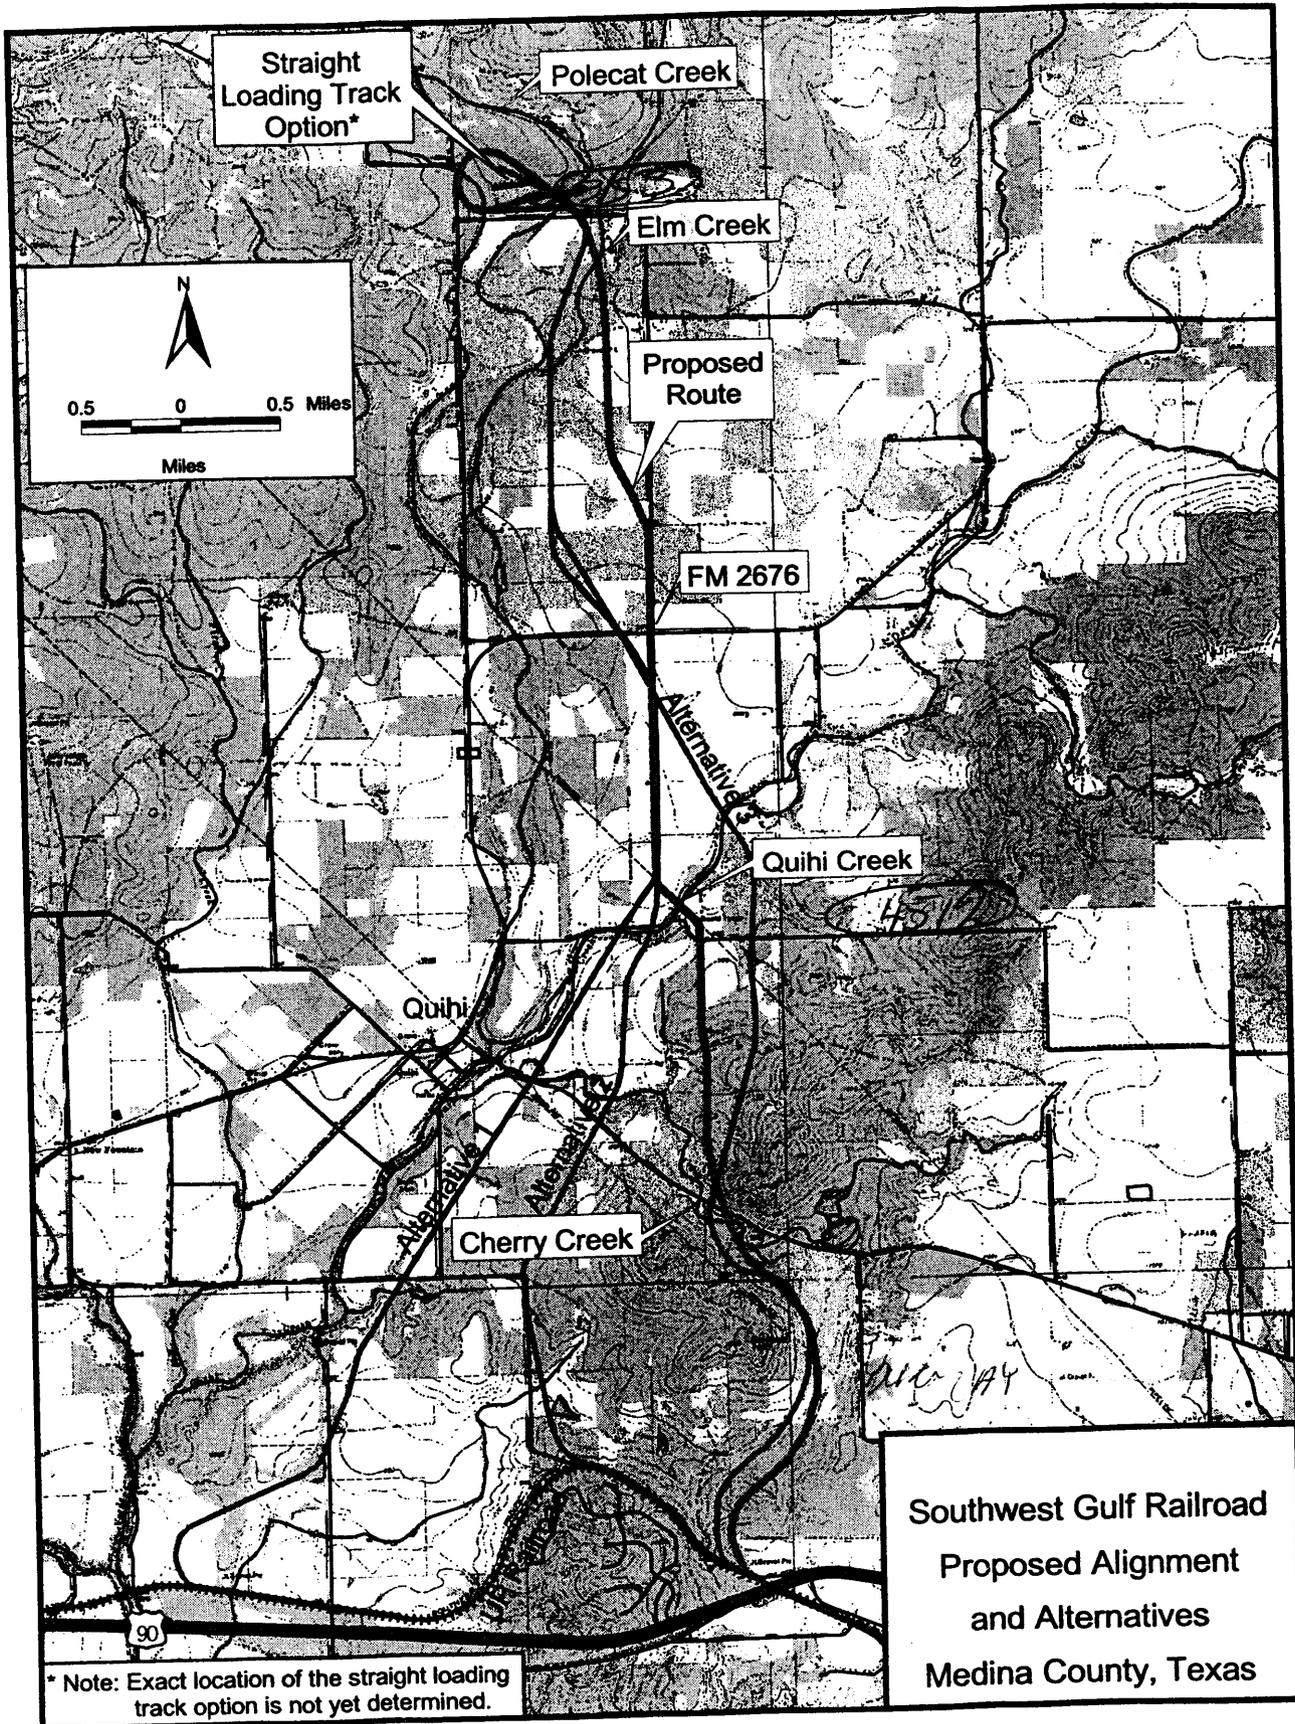

2. What are your concerns regarding potential environmental impacts and do you have any mitigation suggestions?

I feel that a rail line would be hazardous to the environment for many reasons. First, the noise and dust from the train would disturb the natural beauty of the area. Also as a volunteer Fire Fighter for La Caste, which has a train going through it, I am also worried about fires from the rail line, I know from experience that grass fires along the rail line are not uncommon.

3. Please use this space for additional comments or suggestions.

As a teenager I frequently go dancing at the Quini Gen Club. Many of my friends always say "hey, let's go out to that little dance hall in ~~Quini~~ Quini." I am afraid that after the rail line goes through it will be more like "let's go anywhere but Quini, the train is too loud and we have to wait forever for it to pass." This not only hurts the good natural safe place for young people to have fun, but the bands that play there will also be hurt.

Thank you for your comments.
