4                   Okay. Now my understanding of this  
5    is I have spoken with several of my constituents  
6    in the Second District especially the ones where  
7    this rail would come through, track would come  
8    through. And the concern is hazardous waste.

9                   We understand hazardous waste come  
10   through our city anyway through the trucks, but  
11   it's a difference coming in through the railcar  
12   understand. If hypothetically speaking there's a  
13   spill, are we equipped to take care of it what  
14   would happen, what would be the evacuation plan.  
15   And my constituents along with myself are very  
16   much concerned about those issues. What the  
17   hazardous wastes are, how will it affect us if  
18   there's a spill, and what procedures will the  
19   city along with the residents do to combat that  
20   situation.
