Question - Who is legally responsible / financially responsible for finding a solution for the interference of emergency vehicles should the increase of train traffic occur?

All other arguments against this acquisition (noise, congestion, delays etc.) are legitimate and will interfere with the quality of life of many residents, but someone needs to be clear on the impact on emergency vehicles getting through to help people. If your child was in the back of an ambulance, would you want to wait for a freight train to pass? If this acquisition goes through, it must be only after some strong measures be put in place so all safety vehicles get across the tracks immediately!  
Please!

What scoping meeting did you attend? (Please circle): Mundelein, Barrington, Joliet, Matteson, Gary, West Chicago, Chicago.
