**Mark Peters:**

Doing some of the quick math 20 trains a day at approx. 2 mile length is 40 miles worth of train according to rep. He says that speed is 40 miles an hour. An additional hour a day that traffic will be stopped at some pt in the center of town. That is excessive. In addition, general congestion create due to traffic. Only have two main arteries – north south and east west- continue to block would be bad. Concern for school and emergency vehicles and personal transportation.
