Janice Sullivan, Emergency Medical Services Coordinator out of Good Shepherd Hospital, and **Kerry Smith**, Resident and Emergency Preparedness Coordinator for Good Shepherd Hospital:

Rail traffic will cause significant delays in emergency services, ambulance, fire and police to residences:

- Fire doubles in size in one min. Homes will be destroyed if fire trucks can't get through loss of property and life
- Barrington leads nation in response time. Now you have a delay to get them to care
- Heart Attack problems
- Good Shepherd winning awards to cardiac center in hour or less – at 10 min you will have cripple
- Having babies delivered
- Trauma patient, getting doctor to hospital
- Loss of life – loss of limb
- Child was choking in Barrington – after 3 min you die, trains will be longer than that.
- Longer the time it takes to respond and out of service and then unavailable to make the call.
- Trains increase hazardous materials by schools and homes
