

Jane Johnson:

The potential change to the rail line is of grave concern to me because it will greatly effect the quality of life to the communities and neighborhoods round the train in a negative way. This includes all of the following. The noise of the train reverberates thru the community which disturbs all the people and wild life including Cuba Marsh. 2. The traffic congestion if 20 or most likely more trains, go thru a day will be unbearable and will be a nightmare for traffic. 3. The safety in relation to near schools and parks is a real danger. Children cross these tracks daily. 4. The value of personal property will be severely impacted. People will not want to buy homes where noise vibration from the trains and safety are concerned. Barrington which is currently a desirable community will no longer be a place where people choose to live. If this goes thru, it will change everything. It will be a very sad day indeed. The other concerns include potential spills and derailments. The more trains the more chances. My suggestion is to move the tracks.
