Subject: E&J purchase

Ms. Victoria Rutson

Chief, Section of Environmental Analysis

Surface Transportation Board

395 E Street, SW

Washington, DC 20423-0001

STB Docket number 35087

07/24/2008

Ms. Victoria Rutson:

We are opposing to proposal by Canadian National purchase of E&J due to the number of negative impacts in the future. This purchase would affect traffic. It is our understanding that the number of freight train would increase from the number of trains going through our area currently. There is only one lane going each way on the main road. If the vehicles would have to stop at the rail road intersection every time the train is passing the RUSH HOUR would become unbearable. This purchase would affect us environmentally; our children safety would be in jeopardy as all School buses would have to pass the real road intersection. The real estate value would suffer as people are reluctant to purchase their homes and pay 2-3% real estate tax living next to such busy rail road.

Life in a large metropolitan area is stressful enough please help us to reduce our stress by not accepting Canadian National proposal of purchase. I believe our children deserve to live life in a healthy environment.

Sincerely,

Alla Sherbakov
