Morris Campise:

First concern is track back up to house on NW HWY, using North Ave. as a short cut to get away from the train, every train. People trying to get to the Metra station going 30 mph or so to get to the station. Second, new development downtown, will those restaurants succeed with the higher train traffic. Emergency response is a key concern. There are schools and senior homes on all ends of out town. Takes time to decide which hospital to go to.
