Dear Mr. Navecky,;

I would like to express my concerns over the proposed Great Lakes Basin Transportation, LLC rail line project. Docket#35952. I oppose the project and ask the Surface Transportation Board to deny the proposal also..

We built our home 20yrs. ago (we physically built our home). Moved to the country to get away from the noise of the city and all the hustle and bustle. Never dreaming that a high speed train would someday fly by 400ft. from our home. We raised four children and now teaching our twelve grandchildren about farming and raising livestock. The impact on our home and family and farm would be devastating.

We have twelve terrific grandchildren the oldest being 10. How would I ever let them go out in the pasture and help with the animals, knowing at any moment a freight train could fly by at 70mph. Not mentioning what that train could be carrying. They say it will be a quiet train. A freight train traveling at 70mph. 400ft from my home will not only be extremely noisy it will rattle my windows.

We have farmed hay and raised livestock. We have cattle, horses and goats. The train will cut off the pasture next door we use for the cattle. The animals will startle when a large tractor or truck occasionally go by at 30mph. A freight train traveling by at 70mph. I am sure will have a devastating impact on my livestock. The creek that passes thru our property supports a multitude of wildlife. Everything from beavers and deer to egrets and hawks.

As you consider this decision ask yourself would you want this for your family and home??

Sincerely yours,

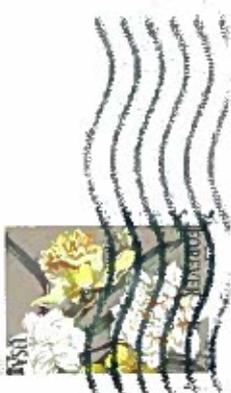

Alban & Denise Scheuber
