Re: Docket #FD35952

I oppose the building of the Great Lakes Basin Railroad.

I'm concerned about the hauling of hazardous material, disruption of water flow, tile damage, flooding possible explosions of tank cars or derailments, loss of valuable top soil, and first responders' inability to respond to emergencies due to the rail traffic.

I live in Paw Paw IL, not even one and one half miles from where trains will cross Chicago Road. If there should be a derailment with hazardous material, it could kill people in our town.
