RE: Docket # FD36065

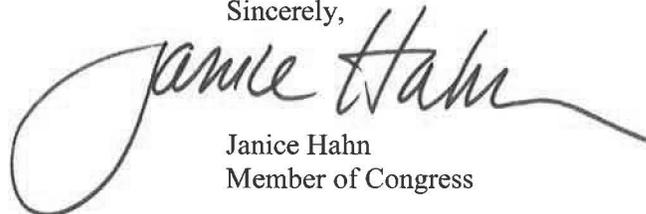

Dear Chairman Elliott:

Plains All American Pipeline, Rancho LPG LLC facility located in San Pedro, California stores liquefied petroleum gases. This dangerous facility is located near many pre-existing homes, shops, six youth soccer fields, and within mere feet of an elementary school and Jr. High School. Since I was a Los Angeles City Councilwoman, I have supported closing the facility and having the fuel now being stored there, stored at the respective refineries that generate the products but use Rancho for off-site storage.

Currently, this gas is being transported from this facility via rail through the community and the Port of Los Angeles. I have been recently informed that their current rail contracts do not permit the transportation of hazardous material. I strongly support the San Pedro Peninsula Homeowners United call for a Declaratory Order finding the rail permit issued by the Port of Los Angeles to Plains All American Pipeline, Rancho LPG LLC is being improperly used.

The Rancho LPG facility and its rail operation pose a serious threat to the entire Los Angeles Harbor region.

Sincerely,

Janice Hahn
Member of Congress
