Dear Sirs:

P. O. Box 4910
The Woodlands, TX
77387-4910

I am writing to respectfully request that you consider the nomination of Mr. John Barrett, General Manager, Business Services, Chevron Phillips Chemical Company LP, to the Toxic by Inhalation Hazard Common Carrier Transportation Advisory Committee (TIHCCTAC). Mr. Barrett's Executive Profile is attached.

Phone: 832-813-4450
Fax: 832-813-4178
haneyma@cpchem.com

Chevron Phillips Chemical Company is a producer of Methyl Mercaptan (MESH) and Mixed Sulfides (B-11) out of our Borger, Texas chemical facility. We move shipments of these TIH materials each year to customers in Louisiana, Alabama, Missouri, Arkansas, and Texas. This business is very important to our Specialty Chemicals business line. We believe that delivery by rail is typically the most efficient, economical, and safe mode by which to transport such material.

www.cpchem.com

Mr. Barrett is committed to serve a two-year term as a member of the TIHCCTAC, with the possible charter renewal leading to a potential second term.

Please let me know if I can do anything else to champion the selection of John Barrett for membership on the committee.

Sincerely,

Mark A. Haney
Senior Vice President
Specialties, Aromatics and Styrenics

Executive Profile:

**J.L. (John) Barrett
General Manager, Business Services
Chevron Phillips Chemical Company**

In March 2005, J.L. (John) Barrett was given the responsibility of General Manager Business Services, Chevron Phillips Chemical Company. As part of this function, John is responsible for global transportation and logistics activities, supply chain, import/export compliance and distribution safety. Before being named to this position, John served as the General Manager for the Polypropylene Business Unit.

John joined Phillips Petroleum Company in 1975 as a process engineer in refining operations. Since then, he has held various positions in environmental, corporate planning and development, and chemicals operations, marketing and sales within the company.

John received a bachelor's degree in physics/math from Missouri State University in 1975 and that same year received a bachelor's degree from the University of Missouri in chemical engineering. In 1984, he earned a master's degree in Business Administration from Oklahoma State University.

John and his wife live in Montgomery, Texas. They have three children.
