STB Docket No. AB-290 (Sub-No. 197X), *Norfolk and Western Railway Company--  
Abandonment Exemption--Toledo Pivot Bridge in Lucas County, OH.*

## APPENDIX B: PROCEDURAL SCHEDULE

May 16, 1997	Preliminary Environmental Report filed.
June 23, 1997	Primary application and related filings filed. Environmental Report filed.
July 23, 1997	Publication in the <i>Federal Register</i> , by this date, of: notice of acceptance of primary application and related filings; and notice of the five related abandonment filings.
August 6, 1997	Comments on the draft scope of the Environmental Impact Statement due. <sup>39</sup>
August 7, 1997	Notice of intent to participate in proceeding due.
August 22, 1997	Description of anticipated responsive (including inconsistent) applications due; petitions for waiver or clarification due with respect to such applications.
September 5, 1997	Preliminary Draft Environmental Assessments for the construction projects referenced in Decision No. 9 due.
October 1, 1997	Responsive Environmental Report and Environmental Verified Statements of responsive (including inconsistent) applicants due.
October 21, 1997	Responsive (including inconsistent) applications due. All comments, protests, and requests for conditions, and any other opposition evidence and argument, due. <sup>40</sup> Comments of the U.S. Secretary of Transportation and the U.S. Attorney General due. With respect to all related abandonments: opposition submissions, requests for public use conditions, and Trails Act requests due.

---

<sup>39</sup> See the notice served July 3, 1997, and published in the *Federal Register* on July 7, 1997, at 62 FR 36332. As indicated in that notice, slip op. at 3, 62 FR at 36333, it is not necessary to be a party of record to file comments on the draft scope of the EIS and/or to participate in the environmental review process.

<sup>40</sup> As indicated in the notice published in the *Federal Register* on July 11, 1997 (62 FR 37331), petitions for reconsideration with respect to the physical construction of the Crestline connection track, as proposed in the STB Finance Docket No. 33388 (Sub-No. 1) embraced docket, and/or operation thereover by CSXT, are due by July 31, 1997. As indicated in the notices published in the *Federal Register* concurrently herewith, comments respecting the physical construction of the Willow Creek, Greenwich, Sidney Junction, Sidney, Alexandria, and Bucyrus connection tracks, as proposed in the STB Finance Docket No. 33388 (Sub-Nos. 2, 3, 4, 5, 6, and 7) embraced dockets, respectively, and/or operation thereover by applicants, are due August 22, 1997.

- November 20, 1997 Notice of acceptance (if required) of responsive (including inconsistent) applications published in the *Federal Register*.
- December 15, 1997 Response to responsive (including inconsistent) applications due. Response to comments, protests, requested conditions, and other opposition evidence and argument due. Rebuttal in support of primary application and related filings due. With respect to all related abandonments: rebuttal due; and responses to requests for public use and Trails Act conditions due.
- January 14, 1998 Rebuttal in support of responsive (including inconsistent) applications due.
- February 23, 1998 Briefs due, all parties (not to exceed 50 pages).
- April 9, 1998 Oral argument (close of record).
- April 14, 1998 Voting conference (at Board's discretion).
- June 8, 1998 Date of service of final decision.
- With respect to any exempted abandonments: offers of financial assistance may be filed no later than 10 days after the date of service of the final decision.

NOTES: Immediately upon each evidentiary filing, the filing party will place all documents relevant to the filing (other than documents that are privileged or otherwise protected from discovery) in a depository open to all parties, and will make its witnesses available for discovery depositions. Access to documents, subject to protective order, will be appropriately restricted. Parties seeking discovery depositions may proceed by agreement. Discovery on responsive (including inconsistent) applications will begin immediately upon their filing.

SERVICE DATE - LATE RELEASE NOVEMBER 3, 1997

SURFACE TRANSPORTATION BOARD

STB Finance Docket No. 33388

CSX CORPORATION AND CSX TRANSPORTATION, INC.,  
NORFOLK SOUTHERN CORPORATION AND NORFOLK  
SOUTHERN RAILWAY COMPANY—CONTROL AND  
OPERATING LEASES/AGREEMENTS—CONRAIL, INC.  
AND CONSOLIDATED RAIL CORPORATION

Decision No. 52

Decided: November 3, 1997

As requested by the United States Department of Transportation (DOT) in its filing on October 21, 1997, in this proceeding (DOT-3) at pages 4-6, we have decided to require Applicants<sup>1</sup> to prepare Safety Integration Plans (SIPs) that address the concerns set forth in the verified statement of Edward R. English included with DOT's submission. That verified statement and Applicants' SIPs will be made a part of the environmental record and dealt with through the environmental review process. This is consistent with the Board's practice of treating safety matters in its environmental review of the proposals that come before it. We anticipate that DOT, as well as other interested parties, will analyze the Applicants' SIPs and give us the benefit of their views on the adequacy of Applicants' plans.

---

<sup>1</sup> CSX Corporation (CSXC) and CSX Transportation, Inc. (CSXT) are referred to collectively as CSX. Norfolk Southern Corporation (NSC) and Norfolk Southern Railway Company (NSR) are referred to collectively as NS. Conrail Inc. (CRI) and Consolidated Rail Corporation (CRC) are referred to collectively as Conrail. CSX, NS, and Conrail are referred to collectively as Applicants.

Specifically, we will require Applicants to file these SIPs with the Board 30 days from the date of service of this decision. These SIPs will be incorporated as a separate section of the Draft Environmental Impact Statement (EIS) to facilitate participation by commenters desiring to address only the adequacy of Applicants' SIPs. To accommodate inclusion of this material in the Draft EIS, and because of the late receipt of information necessary to prepare a sufficiently complete Draft EIS (e.g., receipt of the Errata and Supplemental Environmental Report approximately 9 weeks after the filing of the Application and Environmental Report), service of the Draft EIS, which had been scheduled for November, will not occur until the latter part of December. The 45 day period for comment on the Draft EIS will commence upon the service of the Draft EIS. We anticipate that the comment period will end in early February. Given the additional time required to issue the Draft EIS with the SIPs, we must extend the time accordingly for our Section of Environmental Analysis (SEA) to complete the EIS process and to ensure that the Board has adequate time to consider fully the environmental record in arriving at its decision in this proceeding. As a result, the Final EIS, which had been scheduled for service in early April 1998, will now be served in May of 1998.

These changes, in turn, will require the following modifications to our overall schedule for processing the applications as set forth in Decision Nos. 6 and 12 in this proceeding.<sup>2</sup> Oral argument will now be held on June 4, 1998, to be followed by a voting conference on June 8, 1998. Our final written decision will be served on Thursday, July 23, 1998. The remainder of the current procedural schedule, including the date for filing the parties' briefs will not be

---

<sup>2</sup> Served on May 30, 1997, and on July 23, 1997, respectively.

affected.

We recognize that our decision today results in extending the previously established schedule by 45 days. However, we have concluded that this delay is necessary to permit us to give safety concerns full consideration as warranted by this proceeding.

This action will not significantly affect either the quality of the human environment or the conservation of energy resources.

It is ordered:

1. Applicants CSX and NS, and Conrail, to the extent it will be responsible for operation in the Shared Assets Areas, shall file Safety Integration Plans in conformity with the request of the United States Department of Transportation in DOT-3 in this proceeding, as more specifically detailed in the verified statement of Edward R. English, within 30 days of the date of service of this order.

2. Responses to Applicants' SIPs shall be made as comments to the Draft EIS, which will be served by the end of the year. Comments on the Draft EIS will be due 45 days from the date of service of that document.

3. Oral Argument will be held on June 4, 1998.

4. The Board will hold a voting conference on June 8, 1998.

5. The final written decision will be served on July 23, 1998.

By the Board, Chairman Morgan and Vice Chairman Owen.

Vernon A. Williams

Secretary

DECISION NO. 54

AGENCY: Surface Transportation Board.

ACTION: Decision No. 54; Notice of Acceptance of Responsive Applications and Related Filing.

SUMMARY: The Board is accepting for consideration the responsive applications filed: by New York State Electric and Gas Corporation (NYSEG) in STB Finance Docket No. 33388 (Sub-No. 35); jointly by Elgin, Joliet & Eastern Railway Company, Transtar, Inc., and I & M Rail Link, LLC, in STB Finance Docket No. 33388 (Sub-No. 36);<sup>1</sup> by Livonia, Avon & Lakeville Railroad Corporation (LAL) in STB Finance Docket No. 33388 (Sub-No. 39); by Wisconsin Central Ltd. (WCL) in STB Finance Docket No. 33388 (Sub-No. 59); by Bessemer and Lake Erie Railroad Company (BLE) in STB Finance Docket No. 33388 (Sub-No. 61); by Illinois Central Railroad Company (IC) in STB Finance Docket No. 33388 (Sub-No. 62); by R.J. Corman Railroad Company/Western Ohio Line (RJCW) in STB Finance Docket No. 33388 (Sub-No. 63); jointly by (i) the State of New York, acting by and through its Department of Transportation (NYDOT), and (ii) the New York City Economic Development Corporation (NYCEDC) in STB Finance Docket No. 33388 (Sub-No. 69);<sup>2</sup> jointly by the Belvidere & Delaware River Railway (BDRV) and the Black River & Western Railroad (BRW) in STB Finance Docket No. 33388 (Sub-No. 72); by New England Central Railroad, Inc. (NECR), in STB Finance Docket No. 33388 (Sub-No. 75); by Indiana Southern Railroad, Inc. (ISRR), in STB Finance Docket No. 33388 (Sub-No. 76); by Indiana & Ohio Railway Company (IORY) in STB Finance Docket No. 33388 (Sub-No. 77); by Ann Arbor Acquisition Corporation, d/b/a Ann Arbor Railroad (AA), in STB Finance Docket No. 33388 (Sub-No. 78); by Wheeling & Lake Erie Railway Company (W&LE) in STB Finance Docket No. 33388 (Sub-No. 80); and jointly by Canadian National Railway Company (CN) and Grand Trunk Western Railroad Incorporated (GTW) in STB Finance Docket No. 33388 (Sub-No. 81). The Board is also accepting for consideration the notice of exemption filed by GTW in STB Finance Docket No. 33388 (Sub-No. 83). The responsive applications filed in STB Finance Docket No. 33388 (Sub-Nos. 35, 36, 39, 59, 61, 62,

---

<sup>1</sup> Elgin, Joliet & Eastern Railway Company and Transtar, Inc. are referred to collectively as EJE. I & M Rail Link, LLC is referred to as IMRL.

<sup>2</sup> The responsive application filed jointly by NYDOT and NYCEDC purports to be filed both in STB Finance Docket No. 33388 (Sub-No. 69) (this being the sub-number docket reserved by NYDOT) and in STB Finance Docket No. 33388 (Sub-No. 54) (this being the sub-number docket reserved by NYCEDC). Although there are two responsive applicants there is only one responsive application, and we will treat this single application as if it had been filed in STB Finance Docket No. 33388 (Sub-No. 69) only.

63, 69, 72, 75, 76, 77, 78, 80, and 81) are responsive to the primary application filed June 23, 1997, in STB Finance Docket No. 33388 by CSX Corporation (CSXC), CSX Transportation, Inc. (CSXT), Norfolk Southern Corporation (NSC), Norfolk Southern Railway Company (NSR), Conrail Inc. (CRR), and Consolidated Rail Corporation (CRC).<sup>3</sup> The notice of exemption filed in STB Finance Docket No. 33388 (Sub-No. 83) is related to the responsive application filed in STB Finance Docket No. 33388 (Sub-No. 81).<sup>4</sup>

**DATES:** The effective date of this decision is November 20, 1997. Comments regarding the responsive filings must be filed with the Board by December 15, 1997. Rebuttal in support of these responsive filings must be filed with the Board by January 14, 1998. Briefs (not to exceed 50 pages) must be filed with the Board by February 23, 1998.

**ADDRESSES:** An original and 25 copies of all comments referring to STB Finance Docket No. 33388 (Sub-No. 35), STB Finance Docket No. 33388 (Sub-No. 36), STB Finance Docket No. 33388 (Sub-No. 39), STB Finance Docket No. 33388 (Sub-No. 59), STB Finance Docket No. 33388 (Sub-No. 61), STB Finance Docket No. 33388 (Sub-No. 62), STB Finance Docket No. 33388 (Sub-No. 63), STB Finance Docket No. 33388 (Sub-No. 69), STB Finance Docket No. 33388 (Sub-No. 72), STB Finance Docket No. 33388 (Sub-No. 75), STB Finance Docket No. 33388 (Sub-No. 76), STB Finance Docket No. 33388 (Sub-No. 77), STB Finance Docket No. 33388 (Sub-No. 78), STB Finance Docket No. 33388 (Sub-No. 80), STB Finance Docket No. 33388 (Sub-No. 81), and/or STB Finance Docket No. 33388 (Sub-No. 83) must be filed with the Surface Transportation Board, Office of the Secretary, Case Control Unit, ATTN.: STB Finance Docket No. 33388, 1925 K Street, N.W., Washington, DC 20423-0001.<sup>5</sup>

---

<sup>3</sup> CSXC and CSXT, and their wholly owned subsidiaries, are referred to collectively as CSX. NSC and NSR, and their wholly owned subsidiaries, are referred to collectively as NS. CRR and CRC, and their wholly owned subsidiaries, are referred to collectively as Conrail or CR. CSX, NS, and Conrail are referred to collectively as the primary applicants.

<sup>4</sup> The responsive applications filed in STB Finance Docket No. 33388 (Sub-Nos. 35, 36, 39, 59, 61, 62, 63, 69, 72, 75, 76, 77, 78, 80, and 81) and the notice of exemption filed in STB Finance Docket No. 33388 (Sub-No. 83) are hereinafter referred to collectively as the "responsive filings."

<sup>5</sup> In order for a document to be considered a formal filing, the Board must receive an original and 25 copies of the document, which must show that it has been properly served on all other parties of record. Documents transmitted by facsimile (FAX) will not be considered formal filings and are not encouraged because they will result in unnecessarily burdensome, duplicative processing in what has already become a voluminous record.

In addition to submitting an original and 25 paper copies of each document filed with the Board, parties are also requested to submit one electronic copy of each such document. Further details respecting such electronic submissions are provided below.

In addition, one copy of each document filed in these proceedings must be served on: the U.S. Secretary of Transportation; the U.S. Attorney General; Administrative Law Judge Jacob Leventhal, Federal Energy Regulatory Commission, 888 First Street, N.E., Suite 11F, Washington, DC 20426; Dennis G. Lyons, Esq., Arnold & Porter, 555 12th Street, N.W., Washington, DC 20004-1202 (representing primary applicants CSXC and CSXT); Richard A. Allen, Esq., Zuckert, Scoutt & Rasenberger, LLP, Suite 600, 888 Seventeenth Street, N.W., Washington, DC 20006-3939 (representing primary applicants NSC and NSR); and Paul A. Cunningham, Esq., Harkins Cunningham, Suite 600, 1300 Nineteenth Street, N.W., Washington, DC 20036 (representing primary applicants CRR and CRC).

In addition, one copy of all comments filed in these proceedings must be served on the appropriate responsive applicant's representative: William A. Mullins, Esq., Troutman Sanders LLP, 1300 I Street, N.W., Suite 500 East, Washington, D.C. 20005-3314 (representing NYSEG); Thomas J. Litwiler, Esq., Oppenheimer Wolff & Donnelly, Two Prudential Plaza, 45th Floor, 180 North Stetson Avenue, Chicago, IL 60601-6710 (representing EJE, IMRL, BLE, IC, and WCL); Kevin M. Sheys, Esq., Oppenheimer Wolff & Donnelly, 1020 Nineteenth Street, N.W., Suite 400, Washington, DC 20036-6200 (representing LAL and RJCW); William L. Slover, Esq., Slover & Loftus, 1224 Seventeenth Street, NW, Washington, DC 20036-3003 (representing NYDOT); Charles A. Spitulnik, Esq., Hopkins & Sutter, 888 Sixteenth Street, NW, Washington, DC 20006 (representing NYCEDC); Peter A. Greene, Esq., Thompson Hine & Flory LLP, 1920 N Street, N.W., Suite 800, Washington, DC 20036 (representing BDRV and BRW); Karl Morell, Esq., Ball Janik LLP, Suite 225, 1455 F Street, N.W., Washington, DC 20005 (representing NECR, ISRR, IORY, and AA); Charles H. White, Jr., Esq., Galland, Kharasch & Garfinkle, P.C., 1054 Thirty-First Street, N.W., Washington, DC 20007-4492 (representing W&LE); and L. John Osborn, Sonnenschein Nath & Rosenthal, 1301 K Street, N.W., Suite 600 East, Washington, DC 20005 (representing CN and GTW).

In addition, one copy of all documents filed in these proceedings must be served on all other persons designated parties of record on the Board's service list in STB Finance Docket No. 33388. See the service list attached to Decision No. 21 (served August 19, 1997), as modified in Decision No. 27 (served September 8, 1997), and as further modified in Decision No. 43 (served October 7, 1997).<sup>6</sup>

---

<sup>6</sup> Members of the United States Congress and Governors are not parties of record and therefore need not be served with copies of filings, unless any such Member or Governor is designated as a party of record. See Decision No. 12 (served July 23, 1997, and published that (continued...)

FOR FURTHER INFORMATION CONTACT: Julia M. Farr, (202) 565-1613. [TDD for the hearing impaired: (202) 565-1695.]

**SUPPLEMENTARY INFORMATION:** In the primary application filed with the Board on June 23, 1997, primary applicants CSXC, CSXT, NSC, NSR, CRR, and CRC seek approval and authorization under 49 U.S.C. 11321-25 for: (1) the acquisition by CSX and NS of control of Conrail; and (2) the division of the assets of Conrail by and between CSX and NS. In various related filings also filed June 23, 1997, the primary applicants seek related relief contingent upon approval of the primary application. In Decision No. 12, the Board accepted for consideration the primary application and the various related filings, and directed that responsive applications be filed by October 21, 1997.

**RESPONSIVE FILINGS: CONDITIONS REQUESTED.** In STB Finance Docket No. 33388 (Sub-No. 35), NYSEG seeks: (1) on behalf of NSR,<sup>7</sup> or a third-party carrier suitable to NYSEG, trackage rights over the CRC lines between Buffalo, NY, and NYSEG's Kintigh Station; specifically, from the Niagara Branch MP 19.0 (CP-21)<sup>8</sup> to the Tuscarora Wye, for approximately 4,200 feet, to Lockport Branch MP 69.6 (CP-69) to the connection with Somerset Railroad Corporation at Lockport Branch MP 58.8 (CP-59) (a total distance of approximately 11.2 miles);<sup>9</sup> or (2) on behalf of CSXT, or a third-party carrier suitable to NYSEG, trackage rights over the CRC lines between Buffalo, NY, and NYSEG's Milliken, Goudey, and Greenidge plants; specifically, from Chicago Line MP 1.7 (CP-DRAW) over the Bison Running Track to

---

<sup>6</sup>(...continued)

day in the Federal Register at 62 FR 39577), slip op. at 19, 62 FR at 39588.

<sup>7</sup> If exercised by NSR, modification of NSR's trackage rights over CSXT and New York Central Lines LLC (NYC), as shown on pp. 220-52 and 329-35 of Volume 8B of the primary application, would also be required to eliminate any restrictions contained therein that would prevent transportation to NYSEG's Kintigh Station, including, but not confined to, limitations against interchanging with, or operating over, property of Somerset Railroad Corporation.

<sup>8</sup> Milepost is abbreviated MP. Control point is abbreviated CP.

<sup>9</sup> If exercised by a third-party carrier, these rights would include full access over: The Chicago Line between CP-2 and FW Tower (CP-437) and the Belt Line Branch owned by NYC and operated by CSX between the connection at FW Tower (CP-437), Buffalo, NY, at or near MP 0.0, and the connection with the Niagara Branch (CP-1) at or near MP 7.2, and the Niagara Branch operated by CSX between the connection with the Belt Line Branch, at or near MP 7.5, "and to" Tuscarora Wye to CP-69 at MP 69.6 of the Lockport Branch to MP 58.8 (CP-59) and connection track to MP 0.0 of the Somerset Railroad Corporation. This would cover a total distance of approximately 33.2 miles.

Southern Tier Line MP 419.8 to Binghamton MP 215.3 including Binghamton Running Track and #4 Yard Track with connections to: Vestal Industrial Track; on Vestal Industrial Track from MP 192.3 to MP 195.4; and connections to Lehigh Secondary at Southern Tier MP 255.2, Lehigh Secondary Track MP 269.5 to 271.6 and connection to Ithaca Secondary; Ithaca Secondary from MP 271.6 to the end of line at Milliken Station MP 321.0; connections to Corning Secondary at Southern Tier Line MP 290.1 and 290.8, Corning Secondary from MP 70.6 (CP-Glass) and MP 70.9 (GP - Gibson/CP-Corning) to MP 0 (CP-335), including sidings, runarounds, and passing tracks (a total distance of approximately 333.4 miles).

In STB Finance Docket No. 33388 (Sub-No. 36), EJE and IMRL seek to acquire, and thereafter to divide into two equal parts, CRC's 51% stock ownership of the Indiana Harbor Belt Railroad Company (IHB).

In STB Finance Docket No. 33388 (Sub-No. 39), LAL seeks to acquire ownership of or trackage rights on approximately 1.0 route mile of trackage constituting CRC's Genesee Junction yard in Chili, NY.

In STB Finance Docket No. 33388 (Sub-No. 59), WCL seeks to acquire from The Baltimore & Ohio Chicago Terminal Railroad Company (B&OCT, a wholly owned CSX subsidiary) a portion of B&OCT's Altenheim Subdivision, including rail line, side track, yard trackage, and associated right-of-way and appurtenances, beginning at a connection between WCL and B&OCT trackage at B&OCT MP 37.4 at Madison Street, Forest Park, IL, and extending to a point of connection with Union Pacific Railroad Company (UPRR) and Conrail's Panhandle Line in the vicinity of Rockwell Street, Chicago, IL.

In STB Finance Docket No. 33388 (Sub-No. 61), BLE seeks overhead trackage rights over: (1) CRC's Mon Line between the connection with BLE (Union Railroad Company, a BLE affiliate) at Pittsburgh (Duquesne), PA, and CRC's Shire Oaks Yard in Shire Oaks, PA (a distance of approximately 14 miles); and/or (2) CSXT's line (formerly the Pittsburgh & Lake Erie Railroad Company) between the connection with BLE (Union Railroad Company) at Bessemer (Pittsburgh), PA, and CSXT's Newell Interchange Yard near Brownsville, PA (a distance of approximately 40 miles). The overhead trackage rights sought by BLE would be restricted to the transportation of coal originating at current or future mines on the former Monongahela Railway Company lines and destined to the P&C Dock at Conneaut, OH, for movement beyond.

In STB Finance Docket No. 33388 (Sub-No. 62), IC seeks to acquire CSXT's Leewood-Aulon Line in Memphis, TN, which extends between CSXT MP F-371.4 (IC MP 387.9) at Leewood and CSXT MP F-373.4 (IC MP 390.0) at Aulon, a distance of approximately 2 miles.

In STB Finance Docket No. 33388 (Sub-No. 63), RJCW seeks to acquire ownership of or trackage rights on Conrail's line of railroad between approximately MP 54.4 and approximately MP 52.1 in Lima, OH.

In STB Finance Docket No. 33388 (Sub-No. 69), NYDOT and NYCEDC seek: (1) full service trackage rights in favor of a rail carrier other than Conrail or CSX, to be designated jointly by NYDOT and NYCEDC, over the lines of Conrail between points of connection with the Delaware & Hudson Railway (D&H) at CP-160 near Schenectady, NY, and Selkirk Yard near Selkirk, NY, on the one hand, and, on the other, CP-75 near Poughkeepsie, NY, together with sufficient rights on tracks within Selkirk Yard to permit the efficient interchange of freight with D&H; (2) full service trackage rights in favor of a rail carrier other than Conrail or CSX, to be designated jointly by NYDOT and NYCEDC, over the lines of Conrail between the point of Conrail ownership at Mott Haven Junction ("MO"), NY, and the point of connection with the lines of the Long Island Railroad near Fresh Pond ("MONT"), NY, via the Harlem River Yard; and (3) to the extent necessary to permit uninterrupted rail freight transportation between CP-160 and/or Selkirk Yard, on the one hand, and, on the other, Fresh Pond, a declaration that, pursuant to 49 U.S.C. 11321(a), Metro-North Commuter Railroad Company, a subsidiary of the Metropolitan Transportation Authority of the State of New York, may grant unrestricted trackage rights over the lines between CP-75 and Mott Haven Junction to a rail carrier other than Conrail or CSX, notwithstanding any provisions of any agreements which purport to limit or prohibit such a grant.

In STB Finance Docket No. 33388 (Sub-No. 72), BDRV and BRW seek: (1) removal of the restriction on certain D&H trackage rights that prevents interchange between D&H and BDRV at Phillipsburg, NJ, and between D&H and BRW at Three Bridges, NJ; (2) a grant of overhead trackage rights to BDRV over lines to be acquired by NS from Phillipsburg, NJ, to Manville, NJ (a distance of 40 miles), or to some other operationally feasible point at which BDRV and CSXT can interchange traffic; (3) a grant of overhead trackage rights to BRW over lines to be acquired by NS from Three Bridges, NJ, to Manville, NJ (a distance of 13 miles), or to some other operationally feasible point at which BRW and CSXT can interchange traffic; and (4) a grant of overhead trackage rights to BDRV and BRW over lines to be acquired by NS between the BDRV-NS connection at Phillipsburg, NJ, and the BRW-NS connection at Three Bridges, NJ (a distance of 29 miles).

In STB Finance Docket No. 33388 (Sub-No. 75), NECR seeks "limited trackage rights": (1) between Palmer, MA, and West Springfield, MA, a distance of 18 miles, over the CRC line to be acquired by CSXT; (2) between West Springfield, MA, on the one hand, and, on the other, Albany, Selkirk, and Mechanicville, NY, a distance of 98 miles, over the CRC line to be acquired by CSXT; and (3) between Albany, NY, and the New Jersey/New York Shared Assets Area,<sup>10</sup> a

---

<sup>10</sup> The "New Jersey/New York Shared Assets Area" is apparently the area that applicants refer to as the North Jersey Shared Assets Area.

distance of 140 miles, over the CRC line located on the west side of the Hudson River that is to be acquired by CSXT.<sup>11</sup>

In STB Finance Docket No. 33388 (Sub-No. 76), ISRR seeks: (1) overhead trackage rights in Indianapolis, IN, between MP 6.0 on ISRR's Petersburg Subdivision and Indianapolis Power & Light's Perry K facility, over the CRC line to be acquired by CSXT; (2) overhead trackage rights in Indianapolis, IN, between MP 6.0 on ISRR's Petersburg Subdivision and Indianapolis Power & Light's Stout facility located on the line of the Indiana Rail Road Company (INRD), over a segment of the CRC line to be acquired by CSXT and a segment of the INRD line; (3) local trackage rights over CRC's lines in Indianapolis, IN, including the Indianapolis Belt Line, to be acquired by CSXT (ISRR seeks trackage rights over all CRC lines in Indianapolis needed to access the 2-to-1 shippers located in Indianapolis); (4) local trackage rights between Indianapolis and Shelbyville, IN, a distance of 27 miles, over the CRC line to be acquired by CSXT; (5) local trackage rights between Indianapolis and Crawfordsville, IN, a distance of 44 miles, over the CRC line to be acquired by CSXT; and (6) local trackage rights between Indianapolis and Muncie, IN, a distance of 55 miles, over the CRC line to be acquired by CSXT.<sup>12</sup>

In STB Finance Docket No. 33388 (Sub-No. 77), IORY seeks: (1) overhead trackage rights over CSXT between East Norwood, OH, and Washington Court House, OH, a distance of 65 miles, with the right to connect at Midland City with IORY's Greenfield branch; (2) local trackage rights between Monroe, OH, and Middletown, OH, a distance of 5 miles, over the CRC line to be acquired by NSR (with the right to connect at Middletown with CSXT and IORY's existing trackage rights through Middletown over the CRC line between Springfield and Cincinnati); (3) local trackage rights between Sidney, OH, and Quincy, OH, a distance of 10 miles, over the CRC line to be acquired by CSXT; (4) local trackage rights between Sharronville, OH, and Columbus, OH, a distance of 125 miles, over the CRC line to be acquired by NSR; (5) local trackage rights between Quincy, OH, and Marion, OH, a distance of 52 miles, over the CRC line to be acquired by CSXT; (6) local trackage rights between Lima, OH, and Fort Wayne, IN, a distance of 59 miles, over the CRC line to be acquired by CSXT; (7) local trackage rights

---

<sup>11</sup> NECR's use of the term "limited trackage rights" is intended to include: (a) the right to operate trains over the lines described in the text; and (b) the right to interchange with all carriers, including shortlines, at all junctions on the lines thus described.

<sup>12</sup> ISRR's use of the term "local trackage rights" is intended to include: (a) the right to operate trains over the lines described in the text; (b) the right to interchange with all carriers, including shortlines, at all junctions on the lines thus described; and (c) the right to serve all shippers, sidings, and team tracks located on the lines thus described.

over CRC's Erie track in Lima, OH; and (8) local trackage rights between Quincy, OH, and Marysville, OH, over the CRC line to be acquired by CSXT.<sup>13</sup>

In STB Finance Docket No. 33388 (Sub-No. 78), AA seeks: (1) "limited trackage rights" between Toledo, OH, and Chicago, IL, via Elkhart, IN, a distance of 230 miles, over the CRC line to be acquired by NS; and (2) a condition permitting AA to interchange traffic with CP Rail System at Ann Arbor, MI.<sup>14</sup>

In STB Finance Docket No. 33388 (Sub-No. 80), W&LE seeks: (1) haulage and trackage rights to Chicago, IL, including access to Belt Railway of Chicago and rights for interchange with all carriers, specifically including WCL;<sup>15</sup> (2) haulage and trackage rights from Bellevue, OH, to Toledo, OH, a distance of 54 miles, for an interchange with the Ann Arbor Railroad, Canadian National, and the Indiana & Ohio Railroad (also including access to British Petroleum for movement of coke to Cressup, WV); (3) haulage and trackage rights to Erie, PA, with the right to interchange with other railroads; (4) the right "to lease to own" CRC's Randall Secondary from Cleveland, MP 2.5, to Mantua, MP 27.5; (5) the right "to lease to own" the Huron Branch (Shinrock to Huron) and Huron dock on Lake Erie; (6) haulage and trackage rights on CSX from Benwood to Brooklyn Junction and its yard facilities for commercial access to PPG and Bayer; (7) access on the Conrail Fort Wayne Line to the National Stone quarry near Bucyrus, via the Spore Industrial Track, a distance of 6.2 miles from CP Colsan, MP 200.5, on the Fort Wayne Line (access to the Fort Wayne line would be from the W&LE at CP Orr, MP 124, and from a point near Fairhope at MP 97.8); (8) trackage rights on the NS Sandusky District from Chatfield, OH, to Colsan, OH (for a junction with the Conrail Fort Wayne Line and access to the Spore Industrial Track); (9) access (apparently via trackage rights) to a stone quarry located on the Northern Ohio Railway at Maple Grove, via a junction on the NS Fostoria District at MP 269.4; (10) access (apparently via trackage rights over, among other lines, the former Conrail Akron Secondary) to the stone terminals in the Macedonia, Twinsburg, and Ravenna areas; (11) access, via haulage and trackage rights, to Wheeling Pittsburgh Steel at Allenport, PA; and (12) access, via haulage and trackage rights on the CSX New Castle Subdivision, to the Ohio Edison Power

---

<sup>13</sup> IORY's use of the term "local trackage rights" is intended to include: (a) the right to operate trains over the lines described in the text; (b) the right to interchange with all carriers, including shortlines, at all junctions on the lines thus described; and (c) the right to serve all shippers, sidings, and team tracks located on the lines thus described.

<sup>14</sup> AA's use of the term "limited trackage rights" is intended to include: (a) the right to operate trains over the line described in the text; and (b) the right to interchange with all carriers, including shortlines, at all junctions on the line thus described.

<sup>15</sup> These rights would apparently run between Chicago, on the west, and Carey and/or Bellevue, OH, on the east.

plant at Niles, OH, and to Erie, PA, for interchange to the Buffalo & Pittsburgh. W&LE also requests that provision be made for an inclusion proceeding in the event that W&LE fails during a post-merger oversight period.<sup>16</sup>

In STB Finance Docket No. 33388 (Sub-No. 81), CN and GTW seek trackage rights over the Conrail northbound mainline between approximately MP 16.5 and MP 18.0 at Trenton, MI, a distance of approximately 1.5 miles, for the purpose of serving Detroit Edison's Trenton Channel power plant.

In STB Finance Docket No. 33388 (Sub-No. 83), GTW has filed a notice of exemption under 49 CFR 1150.36 to construct and operate, at Trenton, MI, a connection between the Conrail northbound mainline and the GTW Shoreline Subdivision.

**RESPONSIVE FILINGS ACCEPTED.** Because the responsive applications filed by NYSEG, EJE/IMRL, LAL, WCL, BLE, IC, RJCW, NYDO/T/NYCEDC, BDRV/BRW, NECR, ISRR, IORY, AA, W&LE, and CN/GTW, and also the notice of exemption filed by GTW, are in substantial compliance with the applicable regulations, we are accepting for consideration such responsive applications and such notice of exemption.<sup>17</sup>

**PUBLIC INSPECTION.** The responsive filings are available for inspection in the Docket File Reading Room (Room 755) at the offices of the Surface Transportation Board, 1925 K Street, N.W., in Washington, DC. The responsive filing made by any particular responsive applicant may also be obtained upon request from that applicant's representative named above.

**PROCEEDINGS CONSOLIDATED.** The responsive filings in STB Finance Docket No. 33388 (Sub-Nos. 35, 36, 39, 59, 61, 62, 63, 69, 72, 75, 76, 77, 78, 80, 81, and 83) are consolidated for disposition with the primary application in STB Finance Docket No. 33388 (and all embraced proceedings).

**COMMENTS MAY BE SUBMITTED.** Interested persons may participate formally by submitting written comments regarding any or all of these responsive filings, subject to the filing and service requirements specified above. Such comments (referred to as "Response[s]" in the procedural schedule, see Decision No. 12, slip op. at 26, 62 FR at 39591) must be filed with the Board by December 15, 1997. Comments must include the following: the commenter's position

---

<sup>16</sup> Various additional W&LE condition requests are scattered throughout the verified statements submitted by W&LE witnesses in the WLE-4 pleading filed October 21, 1997.

<sup>17</sup> We reserve the right to require the filing of supplemental information from any responsive applicant or any other party or individual, if necessary to complete the record in this matter. See Decision No. 12, slip op. at 18 n.29, 62 FR at 39587 n.29.

in support of or in opposition to the transaction proposed in the responsive filing; any and all evidence, including verified statements, in support of or in opposition to such proposed transaction; and specific reasons why approval of such proposed transaction would or would not be in the public interest.

**REQUESTS FOR AFFIRMATIVE RELIEF WILL NOT BE ACCEPTED.** Because the responsive applications accepted for consideration in this decision contain proposed conditions to approval of the primary application in STB Finance Docket No. 33388, the Board will entertain no requests for affirmative relief with respect to these responsive applications. Parties may only participate in direct support of or in direct opposition to these responsive applications as filed.

**PLEADINGS NOT TREATED AS RESPONSIVE APPLICATIONS.** A pleading styled as a "responsive application" was filed on October 21, 1997, in a sub-number docket (Sub-No. 74) under the STB Finance Docket No. 33388 lead docket by Congressman Dennis J. Kucinich. While titled as a responsive application, this pleading does not address the criteria for such applications as required under 49 CFR part 1180. Rather, this pleading constitutes a comment on, and a request for conditions with respect to, the CSX/NS/CR primary application, and we will treat it as such and will docket this pleading in the STB Finance Docket No. 33388 lead docket..

Certain additional pleadings styled as "responsive applications" were filed in the STB Finance Docket No. 33388 lead docket on or about October 21, 1997, by: Jacobs Industries Ltd.; the State of Delaware Department of Transportation; ASHTA Chemicals Inc.; Southern Tier West Regional Planning and Development Board; and Resources Warehousing & Consolidation Services, Inc. Because these pleadings also do not satisfy the 49 CFR part 1180 requirements applicable to responsive applications, we will treat these pleadings as comments on, and/or requests for conditions with respect to, the CSX/NS/CR primary application.

**ADDITIONAL PLEADINGS TREATED AS FILED IN LEAD DOCKET.** Certain additional pleadings filed on or about October 21, 1997, though not labeled "responsive applications," were filed in various sub-number dockets under the STB Finance Docket No. 33388 lead docket by: Northern Virginia Transportation Commission and Potomac and Rappahannock Transportation Commission (in Sub-No. 37); New Jersey Department of Transportation and New Jersey Transit Corporation (in Sub-No. 38); the Rhode Island Department of Transportation (in Sub-No. 42); Buffalo & Pittsburgh Railroad, Inc., Allegheny & Eastern Railroad, Inc., Rochester & Southern Railroad, Inc., and Pittsburgh & Shawmut Railroad, Inc. (in Sub-Nos. 43, 44, 45, 46, 47, 48, 49, 50, 51, 52, and 56); the Eastern Shore Railroad, Inc. (in Sub-No. 57); Louisville & Indiana Railroad Company (in Sub-No. 64); Housatonic Railroad Company, Inc. (in Sub-No. 70); the Canadian Pacific Railway Company, Delaware and Hudson Railway Company, Inc., Soo Line Railroad Company, and St. Lawrence & Hudson Railway Company Limited (in Sub-No. 85); and the Commonwealth of Massachusetts

(in Sub-No. 86). Because these pleadings contain comments on, and/or requests for conditions with respect to, the CSX/NS/CR primary application, they will be docketed in, and they will be treated as having been filed in, the STB Finance Docket No. 33388 lead docket.

**ELECTRONIC SUBMISSIONS.** In addition to submitting an original and 25 paper copies of each document filed with the Board, parties are also requested to submit, on diskettes (3.5-inch IBM-compatible floppies) or compact discs, one electronic copy of each such document. Textual materials must be in, or be convertible by and into, WordPerfect 7.0. Spreadsheets must be in, or be convertible by and into, Lotus 1-2-3 Version 7.<sup>18</sup> Each diskette or compact disc should be clearly labeled with the identification acronym and number of the corresponding paper document, see 49 CFR 1180.4(a)(2), and a copy of such diskette or compact disc should be provided to any other party upon request. The data contained on the diskettes and compact discs submitted to the Board will be subject to the protective order applicable to this proceeding,<sup>19</sup> and will be for the exclusive use of Board employees reviewing substantive and/or procedural matters in this proceeding. The flexibility provided by such computer data will facilitate timely review by the Board and its staff.<sup>20</sup>

This action will not significantly affect either the quality of the human environment or the conservation of energy resources.

It is ordered:

1. The responsive applications in STB Finance Docket No. 33388 (Sub-Nos. 35, 36, 39, 59, 61, 62, 63, 69, 72, 75, 76, 77, 78, 80, and 81), and the notice of exemption in STB Finance Docket No. 33388 (Sub-No. 83), are accepted for consideration, and are consolidated for

---

<sup>18</sup> Parties intending to submit spreadsheets in formats other than Lotus 1-2-3 Version 7 may wish to consult with our staff regarding such submissions. Some (though not all) spreadsheets prepared in other formats, though perhaps not convertible by and into Lotus 1-2-3 Version 7, may nevertheless be useable by our staff. For further information, contact Julia M. Farr, (202) 565-1613.

<sup>19</sup> The protective order governing this proceeding was entered in Decision No. 1 (served April 16, 1997), and has been modified, in minor respects, in Decision Nos. 4, 15, 22, and 46 (served May 2, 1997, August 1, 1997, August 21, 1997, and October 17, 1997, respectively).

<sup>20</sup> The electronic submission requirements set forth in this decision supersede, for the purposes of this proceeding, the otherwise applicable electronic submission requirements set forth in our regulations. See 49 CFR 1104.3(a), as amended in Expedited Procedures for Processing Rail Rate Reasonableness, Exemption and Revocation Proceedings, STB Ex Parte No. 527, 61 FR 52710, 52711 (Oct. 8, 1996), 61 FR 58490, 58491 (Nov. 15, 1996).

disposition with the primary application in STB Finance Docket No. 33388 (and all embraced proceedings).

2. The parties shall comply with all provisions as stated above.
3. This decision is effective on November 20, 1997.

Decided: November 12, 1997.

By the Board, Chairman Morgan and Vice Chairman Owen.

Vernon A. Williams  
Secretary

**BOARD DECISION (SUB-NO. 1)**

[THIS PAGE INTENTIONALLY LEFT BLANK]

SERVICE DATE - LATE RELEASE NOVEMBER 25, 1997

SURFACE TRANSPORTATION BOARD

DECISION

STB Finance Docket No. 33388 (Sub-No. 1)<sup>1</sup>

CSX TRANSPORTATION, INC.--CONSTRUCTION AND OPERATION  
EXEMPTION--CONNECTION TRACK AT CRESTLINE, OH

Decided: November 25, 1997

By this decision, we are giving final approval, subject to certain environmental mitigation conditions, to build seven proposed construction projects. This proceeding is related to STB Finance Docket No. 33388, CSX Corporation and CSX Transportation, Inc., Norfolk Southern Corporation and Norfolk Southern Railway Company--Control and Operating Leases/Agreements--Conrail Inc. and Consolidated Rail Corporation (CSX/NS/CR). In CSX/NS/CR, Decision No. 9, served June 12, 1997, after seeking and fully considering public comments on the railroads' proposals, we granted the requests by applicants<sup>2</sup> for waivers, with

---

<sup>1</sup> This decision also embraces the following proceedings: STB Finance Docket No. 33388 (Sub-No. 2), CSX Transportation, Inc.--Construction and Operation Exemption--Connection Track at Willow Creek, IN; STB Finance Docket No. 33388 (Sub-No. 3), CSX Transportation, Inc.--Construction and Operation Exemption--Connection Tracks at Greenwich, OH; STB Finance Docket No. 33388 (Sub-No. 4), CSX Transportation, Inc.--Construction and Operation Exemption--Connection Track at Sidney Junction, OH; STB Finance Docket No. 33388 (Sub-No. 5), Norfolk and Western Railway Company--Construction and Operation Exemption--Connecting Track with Union Pacific Railroad Company at Sidney, IL; STB Finance Docket No. 33388 (Sub-No. 6), Norfolk and Western Railway Company--Construction and Operation Exemption--Connecting Track with Consolidated Rail Corporation at Alexandria, IN; and STB Finance Docket No. 33388 (Sub-No. 7), Norfolk and Western Railway Company--Construction and Operation Exemption--Connecting Track with Consolidated Rail Corporation at Bucyrus, OH.

<sup>2</sup> CSX Corporation (CSXC), CSX Transportation, Inc. (CSXT) (collectively with their wholly owned subsidiaries, CSX), Norfolk Southern Corporation (NSC), Norfolk Southern Railway Company (NSR) (collectively with their wholly owned subsidiaries, NS), Conrail Inc. (CRI), and Consolidated Rail Corporation (CRC) (collectively, Conrail) seek approval and authorization under 49 U.S.C. 11321-25 for: (i) the acquisition by CSX and NS of control of  
(continued...)

respect to four CSX construction projects and three NS construction projects, from our otherwise applicable "everything goes together rule" governing railroad consolidations. See 49 CFR 1180.4(c)(2)(vi). We established a process which would allow CSX and NS to begin construction of the proposed connection tracks following completion of our environmental review of each of these seven constructions, and our issuance of a further decision allowing the physical constructions, but prior to our decision on the primary application. In Decision No. 9, we emphasized that we would consider the competitive impacts of these projects, and the environmental effects of the operations, along with our consideration of the primary application. We made it clear that no operations can begin on the seven connections until a decision is rendered on the primary application that would allow these operations. We also stated that if we determined during the course of our environmental review that any of the seven construction projects could potentially cause, or contribute to, significant environmental impacts, then the project would be incorporated into the Environmental Impact Statement (EIS) for the primary application and would not be separately considered.

In the Sub-Nos. 2 through 7 dockets, we served on July 23, 1997, and published that day in the Federal Register (62 FR 39591-602), notices of the petitions for exemption to construct and operate these proposed constructions.<sup>3</sup> Our notices provided for the filing of comments on whether the proposed construction projects would meet the exemption criteria of 49 U.S.C. 10502, and on any other non-environmental concerns regarding the connections.

---

<sup>2</sup>(...continued)

Conrail, and (2) the division of Conrail's assets by and between CSX and NS.

<sup>3</sup> With regard to the remaining construction project at issue here, STB Finance Docket No. 33388 (Sub-No. 1), we served and published in the Federal Register (62 FR 37331) on July 11, 1997, a notice of exemption filed by CSX to construct a connection track between two Conrail lines crossing at Crestline, OH. By decision served September 18, 1997, the effective date of the notice of exemption in Sub-No. 1 was stayed by the Board's Chairman pending further agency action to allow completion of the environmental review process.

Comments regarding non-environmental concerns and the exemption criteria applicable to applicants' proposed construction projects were filed by Allied Rail Unions (ARU), the United Transportation Union--Illinois Legislative Board, and the Cities of East Chicago, Hammond, Gary, and Whiting, IN. ARU also filed a petition to stay the notice of exemption in Sub-No. 1, arguing that CSX did not qualify for the class exemption. After reviewing the comments and stay petition, in a decision served October 9, 1997, and published that day in the Federal Register (62 FR 52807), we: (1) conditionally exempted applicants' construction of the proposed connections in STB Finance Docket No. 33388 (Sub-Nos. 2 through 7) from the prior approval requirements of 49 U.S.C. 10901, subject to the completion of environmental review and the issuance of a further decision; and (2) denied ARU's petition to stay the notice of exemption in STB Finance Docket No. 33388 (Sub-No. 1).

The Environmental Report filed with the Board in STB Finance Docket No. 33388 included information covering the proposed seven construction projects. In addition, as required in Decision No. 9, CSX and NS submitted preliminary draft environmental assessments (PDEAs) on September 5, 1997, for each of these construction projects. We required CSX and NS in their respective PDEAs to comply with all of the requirements for environmental reports contained in our environmental rules at 49 CFR 1105.7. We also required that the PDEAs be based on consultations with our Section of Environmental Analysis (SEA) and the federal, state, and local agencies set forth in 49 CFR 1105.7(b), as well as other appropriate parties. See Decision No. 9, at 8.

In the environmental review process, SEA reviewed and verified the information contained in each PDEA, conducted further environmental analysis, as necessary, and developed appropriate environmental mitigation measures for each construction project. On October 7, 1997, SEA issued, and invited comments on, separate Environmental Assessments (EAs) for each of the proposed constructions. The EAs concluded that, subject to the recommended

mitigation for each individual project, construction of the proposed connection would not significantly affect the quality of the human environment.

SEA received comments from federal, state, and local agencies and other entities concerning some of these projects.<sup>4</sup> Certain commenters requested specific measures to mitigate potential environmental concerns. However, no commenter argued that any of the seven constructions would have potentially significant environmental impacts that could not be adequately mitigated or contended that any of these constructions should not be considered separately and in advance of the primary application.

On November 12 , 1997, in each of the seven constructions, SEA issued Post Environmental Assessments (Post EAs) containing SEA's final recommendations, including appropriate environmental mitigation to address the environmental concerns that had been raised. SEA's final recommendations were based on its further analysis of these projects and reflected its review of the comments received and appropriate consultations with various agencies. In each Post EA, SEA concluded that the EA had adequately identified and assessed potential environmental impacts. The Post EAs also concluded that, with the imposition of the recommended environmental mitigation, there would be no significant environmental impacts resulting from any of these constructions. Furthermore, SEA determined that applicants' proposed construction locations would be the environmentally preferable construction option. Accordingly, SEA recommended that any Board decision approving the proposed constructions be subject to the environmental mitigation measures included in its Post EAs.<sup>5</sup> The Post EAs, which have been placed in the public record, contain a detailed analysis of the individual

---

<sup>4</sup> In some cases, no comments were received.

<sup>5</sup> That mitigation is the same as the mitigation previously recommended in the EAs, except that SEA updated its initial recommendations, where appropriate, to reflect the comments and SEA's further analysis and consultations.

projects, the environmental comments received, and SEA's final recommendations and conclusions. In addition, each of these seven construction projects is briefly described below.

**The CSX Connections.**

Sub-No. 1. CSX proposes to construct a 1,507-foot rail line connection in Crestline, Crawford County, OH, to permit traffic movements between the CSX and Conrail systems. The new connection would be built in the northeastern quadrant of the intersecting Conrail lines in the southern portion of Crestline. The connection would link the Conrail lines north of the intersection of Lincoln Avenue and Ohio State Route 61 (also known as Thoman Street).

CSX states that the new connection would create an alternative east-west route on the CSX system for slower moving freight. This connection would enable CSX to route less time-sensitive east/west traffic on the alternative Chicago-Cleveland service route linking Crestline and Ft. Wayne, IN, that CSX would operate if the CSX/NS/Conrail transaction is approved. This would permit use of CSX's parallel B&O line for high-speed traffic over its proposed Northeastern Gateway service route. CSX anticipates that an average of 5 trains per day (unit trains and intermodal trains with an average length of 6,200 feet) would operate over the new connection.

Sub-No. 2. CSX proposes a 2,800-foot connection located at Willow Creek in the City of Portage, Porter County, IN. The new connection would be built in the southern quadrant of the intersecting CSX and Conrail rail lines, just north of the intersection of Willow Creek Road and Portage Road. The connection would link CSX's Garrett Subdivision rail line (which generally runs northwest to southeast) and Conrail's Porter Branch rail line (which generally runs northeast to southwest). The new connection would allow progressive east-west movements between the CSX and Conrail lines, enhancing rail operations and traffic movements between Garrett, IN, and

Chicago. CSX estimates that an average of 10 trains per day (primarily automotive and merchandise trains with an average length of 6,200 feet) would operate over the new connection.

Sub-No. 3. CSX's proposed connections are located in Greenwich, Huron County, OH. Greenwich is in north-central Ohio, approximately 50 miles southwest of Cleveland and 75 miles north of Columbus. The new connections would be built in the northwest and southeast quadrants of the intersecting CSX and Conrail lines, which together would form the proposed Northeastern Gateway service route, a major route for time-sensitive traffic moving between the northeastern United States and Chicago. At this location, an existing Conrail line runs southwest to northeast between Indianapolis and Cleveland and the existing CSX line runs west to east from Chicago to Akron, OH.

The proposed connection in the north west quadrant would provide a 4,600-foot, 45-mph connection, which would enable eastbound CSX trains from Chicago to utilize the Conrail line to proceed northeast toward Cleveland. The proposed connection in the southeast quadrant would provide a 1,044-foot, 30-mph per hour connection between the existing CSX and Conrail rail lines. That connection would enable northeast bound trains from Indianapolis to access the eastbound CSX line toward Akron and would allow freight transportation from Indianapolis to Greenwich along the Conrail line, and from Greenwich to Baltimore, MD, along the CSX line. CSX estimates that an average of 31.7 trains per day (primarily automotive, merchandise, intermodal, and unit trains with an average length of 6,200 feet) would operate over the new connection in the northwest quadrant, and that an average of 9.4 trains per day would use the new connection in the southeast quadrant.

Sub-No. 4. CSX proposes a 3,263-foot connection located in Sidney, Shelby County, OH. The new connection would be built in the southeastern quadrant of the intersecting CSX and Conrail lines in the southern portion of Sidney. The connection would link the CSX line

(which runs southwest to northeast between Cincinnati and Toledo) and the Conrail line (which runs from west to east between Indianapolis and Cleveland). The new connection would allow northbound trains to proceed east on the Conrail line toward Cleveland and westbound trains to proceed south on the CSX line toward Cincinnati. CSX anticipates that an average of 9.3 trains per day (intermodal, automotive, and merchandise trains with an average length of 6,200 feet) would operate over the new connection.

**The NS Connections.**

Sub-No. 5. NS proposes to construct a rail line connection in Sidney, IL, to permit traffic movements between the NS and Union Pacific (UP) systems. The proposed 3,250-foot connection is located 0.5 miles east of Sidney, Champaign County, IL. The new connection would traverse cropland to the southeast of the existing UP line. The new connection would permit more efficient movement between UP points in the Gulf Coast/Southwest and NS points in the Midwest and particularly between Pine Bluff, AR, and Fort Wayne, IN, and allow the connection of a new operating gateway as a fully-competitive service for petrochemical traffic flows between the Northeast, the Southwest, and the Gulf Coast. NS anticipates that an average of 9 trains per day would operate over the new connection.

Sub-No. 6. NS proposes to construct a 1,052-foot connection at Alexandria, Madison County, IN, to permit traffic movements between the NS and Conrail systems. The new connection would be located 250 feet northeast of the existing NS and Conrail intersection. The proposed construction site is located in the south-central part of Alexandria, southwest of the intersection of Berry and Curve Streets.

The new connection would connect NS's current main line between Marion and Anderson, IN, to Conrail's main line between Muncie and Lafayette, IN. NS states that the

connection would provide a new, more efficient route between points in the upper Midwest and points in the southeastern United States, increase rail traffic capacity, improve service to shippers, and reduce train delays in Chicago and rail traffic congestion in Fort Wayne, IN. NS anticipates that an average of 7 trains per day (single commodity, or unit trains and intermodal trains with an average length of 5,000 feet) would operate over the new connection.

Sub-No. 7. NS proposes to construct a 2,550-foot rail line connection at Bucyrus, Crawford County, OH, to permit traffic movements between the NS and Conrail systems. The new connection would be built in the southeastern quadrant of the intersecting NS and Conrail lines in the eastern portion of Bucyrus. The point of divergence from the NS rail line would be just south of the existing East Warren Street grade crossing. The point of divergence from the Conrail rail line would be approximately 200 feet west of the existing Whetstone Street grade crossing.

The new connection would connect the existing north/south NS main line between Bellevue and Columbus, OH, to the existing east/west Conrail main line between Crestline, OH, and Fort Wayne, IN. NS states that the connection would provide a new, more efficient route from Columbus to eastern Ohio and western Pennsylvania by increasing rail traffic capacity and improving service to shippers. NS anticipates that an average of 8 trains per day (single commodity, or unit trains and intermodal trains with an average length of 5,000 feet) would operate over the new connection.

#### DISCUSSION AND CONCLUSIONS

We agree with SEA's conclusions that, based on its environmental review and the comments received, the physical construction of these seven connections will not have potentially significant environmental impacts if the mitigation measures recommended by SEA

are imposed.<sup>6</sup> Accordingly, we will adopt the mitigation measures recommended by SEA and impose the measures as conditions to applicants' proposed constructions in Sub-Nos. 1 through 7, as set forth in the Appendix to this decision. Because we have determined that these constructions, as mitigated, could neither cause nor contribute to significant environmental impacts, we find that these constructions can go forward at this point and that there is no reason to incorporate an environmental analysis of any of the constructions into the EIS currently being prepared for the primary application.<sup>7</sup>

We again emphasize that our decision to allow these constructions to begin will not have any bearing on our determination of whether the transaction contemplated in the primary application is in the public interest. See Decision No. 9, at 6-8; STB Finance Docket No. 33388 (Sub-No. 1), served July 11, 1997; STB Finance Docket No. 33388 (Sub-Nos. 2-7), served July 23, 1997; and STB Finance Docket No. 33388 (Sub-Nos. 1-7), served October 1, 1997.

---

<sup>6</sup> As noted, we previously conditionally exempted six of these proposals from the prior approval requirements of 49 U.S.C. 10901, subject to completion of the environmental review and the issuance of a further decision. The effective date of the notice of exemption for the remaining construction project was stayed pending further agency action to allow completion of the environmental review process. Thus, there are only two issues before us at this time in these cases: whether we should deny any of these proposed constructions because of the potential environmental impacts, or fold one or more of these projects into the EIS for the primary application.

<sup>7</sup> We note that the Council on Environmental Quality (CEQ) raised concerns about considering these seven construction projects separately prior to the issuance of Decision No. 9. We believe that we fully addressed CEQ's concerns in Decision No. 9, and we incorporate that analysis by reference here. Moreover, as discussed above, no commenters to the EAs contended that any of these constructions should not be considered separately and in advance of the primary application.

Moreover, operations over these connections cannot commence unless and until we approve the primary application and authorize the operations, which SEA will analyze in the EIS.<sup>8</sup>

As we stated in Decision No. 9 at 6, any resources applicants expend in the construction of these connections may prove to be of little benefit to them if we deny the primary application or we authorize operations over one or more of the seven connections in a manner different from that which CSX and NS plan. In other words, although we are permitting the physical construction of these seven projects to go forward at this time, applicants will not be allowed to argue that, because they have expended resources to construct the connections, we should approve the primary application. Rather, applicants have willingly assumed the risk that we may deny the primary application, or approve it subject to conditions unacceptable to applicants, or approve the primary application but deny applicants' request to operate over any or all of the seven connections.

As conditioned, this action will not significantly affect either the quality of the human environment or conservation of energy resources.

It is ordered:

1. Under 49 U.S.C. 10502, we exempt applicants' construction of the proposed connections in STB Finance Docket No. 33388 (Sub-Nos. 2 through 7), from the prior approval requirements of 49 U.S.C. 10901, subject to the condition that applicants comply with the

---

<sup>8</sup> In order to fully consider the environmental impacts of the physical construction of the lines at issue here, SEA conducted a limited review of operations for these constructions in the EAs and Post EAs. For example, SEA examined whether each proposed construction would increase the potential for delays or accidents at grade crossings or affect the transportation of hazardous materials over these connections.

mitigation measures applicable to the Sub-Nos. 2 through 7 proceedings set forth in the Appendix.

2. The stay of the proposed connection in Finance Docket No. 33388 (Sub-No. 1) is lifted subject to the condition that applicant comply with the mitigation measures applicable to the Sub-No. 1 proceeding set forth in the Appendix.

3. This decision is effective 10 days after its date of service.

By the Board, Chairman Morgan and Vice Chairman Owen.

Vernon A. Williams  
Secretary

## APPENDIX

**1. In STB Finance Docket No. 33388 (Sub-No. 1), the following mitigation measures regarding CSX's construction of the proposed rail line connection at Crestline, OH, are imposed:**

### **Land Use**

- CSX shall restore any adjacent properties that are disturbed during construction activities to their pre-construction conditions.
- CSX shall consult with the National Geodetic Survey to locate any geodetic survey marker and, if necessary, assist in the relocation of the marker.
- Prior to any construction activity, CSX shall consult with the local Natural Resources Conservation Service office in order to comply with the Farmland Policy Protection Act to ascertain whether Form AD 1006 should be completed.

### **Transportation and Safety**

- CSX shall use appropriate signs and barricades to control and minimize traffic disruptions during construction.
- CSX shall restore roads disturbed during construction to conditions as required by state or local jurisdictions.
- CSX shall observe all applicable federal, state, and local regulations regarding handling and disposal of any waste materials, including hazardous waste, encountered or generated during construction of the proposed rail line connection.
- CSX shall dispose of all materials that cannot be reused in accordance with state and local solid waste management regulations.
- CSX shall consult with the appropriate federal, state and local agencies if hazardous waste and/or materials are discovered at the site.
- CSX shall transport all hazardous materials in compliance with U.S. Department of Transportation Hazardous Materials Regulations (49 CFR Parts 171 to 180). CSX shall provide, upon request, local emergency management organizations with copies of all applicable Emergency Response Plans and participate in the training of local emergency staff (upon request) for coordinated responses to incidents. In the case of a hazardous

material incident, CSX shall follow appropriate emergency response procedures contained in its Emergency Response Plans.

#### **Water Resources**

- CSX shall complete a detailed investigation to determine if any wetlands are located in the vicinity of the proposed rail line connection prior to initiating any construction activities at this location.
- CSX shall obtain all necessary federal, state, and local permits if construction activities require the alteration of wetlands, ponds, lakes, streams, or rivers, or if these activities would cause soil or other materials to wash into these water resources. CSX shall use appropriate techniques to minimize effects to water bodies and wetlands.
- CSX shall close the existing ground water monitoring well located within the project area if the well is affected by the project. The well shall be closed in accordance with local, state, and federal requirements.

#### **Biological Resources**

- CSX shall preserve trees which provide habitat for the Indiana bat (*Myotis sodalis*), including trees with cavities and exfoliating bark, to the maximum extent possible. If such trees cannot be avoided, they shall not be cut between April 15<sup>th</sup> and September 15<sup>th</sup>. If such trees are to be removed and the time of year restriction is prohibitive, CSX shall consult with the U.S. Fish and Wildlife Service and conduct a survey to determine if the Indiana bat is present in the proposed construction area.
- CSX shall use Best Management Practices to control erosion, runoff, and surface instability during construction, including seeding, fiber mats, straw mulch, plastic liners, slope drains, and other erosion control devices. Once the tracks are constructed, CSX shall establish vegetation on the embankment slopes to provide permanent cover and prevent potential erosion. If erosion develops, CSX shall take steps to develop other appropriate erosion control procedures.
- CSX shall use only EPA-approved herbicides and qualified contractors for application of right-of-way maintenance herbicides, and shall limit such application to the extent necessary for rail operations.

### **Air Quality**

- CSX shall comply with all applicable federal, state, and local regulations regarding the control of fugitive dust. Fugitive dust emissions created during construction shall be minimized by using such control methods as water spraying, installation of wind barriers, and chemical treatment.

### **Noise**

- CSX shall control temporary noise from construction equipment through the use of work hour controls and maintenance of muffler systems on machinery.

### **Cultural Resources**

- If previously undiscovered archeological remains are found during construction, CSX shall cease work and immediately contact the Ohio State Historic Preservation Officer to initiate the appropriate section 106 process required by the National Historic Preservation Act (16 U.S.C. 470f, as amended).

**2. In STB Finance Docket No. 33388 (Sub-No. 2), the following mitigation measures regarding CSX's construction of the proposed rail line connection at Willow Creek, IN, are imposed:**

### **Land Use**

- CSX shall restore any adjacent properties that are disturbed during construction activities to their pre-construction conditions.

### **Transportation and Safety**

- CSX shall use appropriate signs and barricades to control and minimize traffic disruptions during construction.
- CSX shall restore roads disturbed during construction to conditions as required by state or local jurisdictions.
- CSX shall observe all applicable federal, state, and local regulations regarding handling and disposal of any waste materials, including hazardous waste, encountered or generated during construction of the proposed rail line connection.

- CSX shall dispose of all materials that cannot be reused in accordance with state and local solid waste management regulations.
- CSX shall consult with the appropriate federal, state and local agencies if hazardous waste and/or materials are discovered at the site.
- CSX shall transport all hazardous materials in compliance with U.S. Department of Transportation Hazardous Materials Regulations (49 CFR Parts 171 to 180). CSX shall provide, upon request, local emergency management organizations with copies of all applicable Emergency Response Plans and participate in the training of local emergency staff (upon request) for coordinated responses to incidents. In the case of a hazardous material incident, CSX shall follow appropriate emergency response procedures contained in its Emergency Response Plans.

#### **Water Resources**

- CSX shall obtain all necessary federal, state, and local permits if construction activities require the alteration of wetlands, ponds, lakes, streams, or rivers, or if these activities would cause soil or other materials to wash into these water resources. CSX shall use appropriate techniques to minimize effects to water bodies and wetlands.

#### **Biological Resources**

- CSX shall use Best Management Practices to control erosion, runoff, and surface instability during construction, including seeding, fiber mats, straw mulch, plastic liners, slope drains, and other erosion control devices. Once the tracks are constructed, CSX shall establish vegetation on the embankment slopes to provide permanent cover and prevent potential erosion. If erosion develops, CSX shall take steps to develop other appropriate erosion control procedures.
- CSX shall use only EPA-approved herbicides and qualified contractors for application of right-of-way maintenance herbicides, and shall limit such application to the extent necessary for rail operations.
- CSX shall revegetate all bare and disturbed areas in the vicinity of the proposed construction with a mixture of grasses (except tall fescue) and legumes following completion of construction activities.

### **Air Quality**

- CSX shall comply with all applicable federal, state, and local regulations regarding the control of fugitive dust. Fugitive dust emissions created during construction shall be minimized by using such control methods as water spraying, installation of wind barriers, and chemical treatment.

### **Noise**

- CSX shall control temporary noise from construction equipment through the use of work hour controls and maintenance of muffler systems on machinery.
- If wheel squeal occurs during operation of the connection, CSX shall use rail lubrication to minimize noise levels.

### **Cultural Resources**

- If previously undiscovered archeological remains are found during construction, CSX shall cease work and immediately contact the Indiana State Historic Preservation Officer to initiate the appropriate section 106 process required by the National Historic Preservation Act (16 U.S.C. 470f, as amended).

3. In STB Finance Docket No. 33388 (Sub-No. 3), the following mitigation measures regarding CSX's construction of the proposed rail line connection at Greenwich, OH, are imposed:

### **Land Use**

- CSX shall restore any adjacent properties that are disturbed during construction activities to their pre-construction conditions.
- Prior to any construction activity, CSX shall consult with the local Natural Resources Conservation Service office in order to comply with the Farmland Policy Protection Act to ascertain whether Form AD 1006 should be completed.

### **Transportation and Safety**

- CSX shall use appropriate signs and barricades to control traffic disruptions during construction.

- CSX shall restore roads disturbed during construction to conditions as required by state or local jurisdictions.
- To minimize disruption to the flow of north-south traffic in the Village of Greenwich, CSX shall not have construction activities occurring at the Kniffen and Townsend Street at-grade crossings simultaneously.
- CSX shall observe all applicable federal, state, and local regulations regarding handling and disposal of any waste materials, including hazardous waste, encountered or generated during construction of the proposed rail line connections.
- CSX shall dispose of all materials that cannot be reused in accordance with state and local solid waste management regulations.
- CSX shall consult with the appropriate federal, state and local agencies if hazardous waste and/or materials are discovered at the sites.
- CSX shall transport all hazardous materials in compliance with U.S. Department of Transportation Hazardous Materials Regulations (49 CFR Parts 171 to 180). CSX shall provide, upon request, local emergency management organizations with copies of all applicable Emergency Response Plans and participate in the training of local emergency staff (upon request) for coordinated responses to incidents. In the case of a hazardous material incident, CSX shall follow appropriate emergency response procedures contained in their Emergency Response Plans.

#### **Water Resources**

- CSX shall obtain all necessary federal, state, and local permits if construction activities require the alteration of wetlands, ponds, lakes, streams, or rivers, or if these activities would cause soil or other materials to wash into these water resources. CSX shall use appropriate techniques to minimize effects to water bodies and wetlands.

#### **Biological Resources**

- CSX shall preserve trees which provide habitat for the Indiana bat (*Myotis sodalis*), including trees with cavities and exfoliating bark, to the maximum extent possible. If such trees cannot be avoided, they shall not be cut between April 15<sup>th</sup> and September 15<sup>th</sup>. If such trees are to be removed and the time of year restriction is prohibitive, CSX shall consult with the U.S. Fish and Wildlife Service and conduct a survey to determine if the Indiana bat is present in the proposed construction area.

- CSX shall use Best Management Practices to control erosion, runoff, and surface instability during construction, including seeding, fiber mats, straw mulch, plastic liners, slope drains, and other erosion control devices. Once the tracks are constructed, CSX shall establish vegetation on the embankment slopes to provide permanent cover and prevent potential erosion. If erosion develops, CSX shall take steps to develop other appropriate erosion control procedures.
- CSX shall use only EPA-approved herbicides and qualified contractors for application of right-of-way maintenance herbicides, and shall limit such application to the extent necessary for rail operations.

#### **Air Quality**

- CSX shall comply with all applicable federal, state, and local regulations regarding the control of fugitive dust. Fugitive dust emissions created during construction shall be minimized by using such control methods as water spraying, installation of wind barriers, and chemical treatment.

#### **Noise**

- CSX shall control temporary noise from construction equipment through the use of work hour controls and maintenance of muffler systems on machinery.
- If wheel squeal occurs during operation of the connection, CSX shall use rail lubrication to minimize noise levels.

#### **Cultural Resources**

- If previously undiscovered archeological remains are found during construction, CSX shall cease work and immediately contact the Ohio State Historic Preservation Officer to initiate the appropriate section 106 process required by the National Historic Preservation Act (16 U.S.C. 470f, as amended).

**4. In STB Finance Docket No. 33388 (Sub-No. 4), the following mitigation measures regarding CSX's construction of the proposed rail line connection at Sidney, OH, are imposed:**

### **Land Use**

- CSX shall restore any adjacent properties that are disturbed during construction activities to their pre-construction conditions.
- Prior to any construction activity, CSX shall consult with the local Natural Resources Conservation Service office in order to comply with the Farmland Policy Protection Act to ascertain whether Form AD 1006 should be completed.

### **Transportation and Safety**

- CSX shall use appropriate signs and barricades to control and minimize traffic disruptions during construction.
- CSX shall restore roads disturbed during construction to conditions as required by state or local jurisdictions.
- CSX shall observe all applicable federal, state, and local regulations regarding handling and disposal of any waste materials, including hazardous waste, encountered or generated during construction of the proposed rail line connection.
- CSX shall dispose of all materials that cannot be reused in accordance with state and local solid waste management regulations.
- CSX shall consult with the appropriate federal, state and local agencies if hazardous waste and/or materials are discovered at the site.
- CSX shall transport all hazardous materials in compliance with U.S. Department of Transportation Hazardous Materials Regulations (49 CFR Parts 171 to 180). CSX shall provide, upon request, local emergency management organizations with copies of all applicable Emergency Response Plans and participate in the training of local emergency staff (upon request) for coordinated responses to incidents. In the case of a hazardous material incident, CSX shall follow appropriate emergency response procedures contained in its Emergency Response Plans.

### **Water Resources**

- CSX shall obtain all necessary federal, state, and local permits if construction activities require the alteration of wetlands, ponds, lakes, streams, or rivers, or if these activities would cause soil or other materials to wash into these water resources. CSX shall use appropriate techniques to minimize effects to water bodies and wetlands.

### **Biological Resources**

- CSX shall preserve trees which provide habitat for the Indiana bat (*Myotis sodalis*), including trees with cavities and exfoliating bark, to the maximum extent possible. If such trees cannot be avoided, they shall not be cut between April 15<sup>th</sup> and September 15<sup>th</sup>. If such trees are to be removed and the time of year restriction is prohibitive, CSX shall consult with the U.S. Fish and Wildlife Service and conduct a survey to determine if the Indiana bat is present in the proposed construction area.
- CSX shall use Best Management Practices to control erosion, runoff, and surface instability during construction, including seeding, fiber mats, straw mulch, plastic liners, slope drains, and other erosion control devices. Once the tracks are constructed, CSX shall establish vegetation on the embankment slopes to provide permanent cover and prevent potential erosion. If erosion develops, CSX shall take steps to develop other appropriate erosion control procedures.
- CSX shall use only EPA-approved herbicides and qualified contractors for application of right-of-way maintenance herbicides, and shall limit such application to the extent necessary for rail operations.

### **Air Quality**

- CSX shall comply with all applicable federal, state, and local regulations regarding the control of fugitive dust. Fugitive dust emissions created during construction shall be minimized by using such control methods as water spraying, installation of wind barriers, and chemical treatment.

### **Noise**

- CSX shall control temporary noise from construction equipment through the use of work hour controls and maintenance of muffler systems on machinery.

### **Cultural Resources**

- If previously undiscovered archeological remains are found during construction, CSX shall cease work and immediately contact the Ohio State Historic Preservation Officer to initiate the appropriate section 106 process required by the National Historic Preservation Act (16 U.S.C. 470f, as amended).

**5. In STB Finance Docket No. 33388 (Sub-No. 5), the following mitigation measures regarding NS's construction of the proposed rail line connection at Sidney, IL, are imposed:**

**Land Use**

- NS shall restore any adjacent properties that are disturbed during construction activities to their pre-construction conditions.
- Before undertaking any construction activities, NS shall consult with any potentially affected American Indian Tribes adjacent to, or having a potential interest in, the right-of-way.

**Transportation Systems**

- NS shall use appropriate signs and barricades to control traffic disruptions during construction.
- NS shall restore roads disturbed during construction to conditions as required by state or local jurisdictions.

**Safety**

- NS shall observe all applicable federal, state, and local regulations regarding handling and disposal of any waste materials, including hazardous waste, encountered or generated during construction of the proposed rail line connection.
- NS shall dispose of all materials that cannot be reused in accordance with state and local solid waste management regulations.
- NS shall consult with the appropriate federal, state, and local agencies if hazardous waste and/or materials are discovered at the site.
- NS shall transport all hazardous materials in compliance with U.S. Department of Transportation Hazardous Materials Regulations (49 CFR Parts 171 to 180). NS shall provide, upon request, local emergency management organizations with copies of all applicable Emergency Response Plans and participate in the training of local emergency staff (upon request) for coordinated responses to incidents. In the case of a hazardous material incident, NS shall follow appropriate emergency response procedures contained in its Emergency Response Plans.

### **Water Resources**

- NS shall obtain all necessary federal, state, and local permits if construction activities require the alteration of wetlands, ponds, lakes, streams, or rivers, or if these activities would cause soil or other materials to wash into these water resources. NS shall use appropriate techniques to minimize impacts to water bodies and wetlands.

### **Biological Resources**

- NS shall use Best Management Practices (BMPs) to control erosion, runoff, and surface instability during construction, including seeding, fiber mats, straw mulch, plastic liners, slope drains, and other erosion control devices. Once the track is constructed, NS shall establish vegetation on the embankment slope to provide permanent cover and prevent potential erosion. If erosion develops, NS shall take steps to develop other appropriate erosion control procedures.
- NS shall use only EPA-approved herbicides and qualified contractors for application of right-of-way maintenance herbicides, and shall limit such application to the extent necessary for rail operations.

### **Air Quality**

- NS shall comply with all applicable federal, state, and local regulations regarding the control of fugitive dust. Fugitive dust emissions created during construction shall be minimized by using such control methods as water spraying, installation of wind barriers, and chemical treatment.

### **Noise**

- NS shall control temporary noise from construction equipment through the use of work hour controls and maintenance of muffler systems on machinery.

### **Cultural Resources**

- If previously undiscovered archaeological remains are found during construction, NS shall cease work and immediately contact the Illinois State Historical Preservation Office to initiate the appropriate section 106 process pursuant to section 106 of the National Historic Preservation Act (16 U.S.C. 470f, as amended).

**6. In STB Finance Docket No. 33388 (Sub-No. 6), the following mitigation measures regarding NS's construction of the proposed rail line connection at Alexandria, IN, are imposed:**

**Land Use**

- NS shall restore any adjacent properties that are disturbed during construction activities to their pre-construction conditions.
- Before undertaking any construction activities, NS shall consult with any potentially affected American Indian Tribes adjacent to, or having a potential interest in, the right-of-way.

**Transportation Systems**

- NS shall use appropriate signs and barricades to control traffic disruptions during construction.
- NS shall restore roads disturbed during construction to conditions as required by state or local jurisdictions.

**Safety**

- NS shall observe all applicable federal, state, and local regulations regarding handling and disposal of any waste materials, including hazardous waste, encountered or generated during construction of the proposed rail line connection.
- NS shall dispose of all materials that cannot be reused in accordance with state and local solid waste management regulations.
- NS shall consult with the appropriate federal, state, and local agencies if hazardous waste and/or materials are discovered at the site.
- NS shall transport all hazardous materials in compliance with U.S. Department of Transportation Hazardous Materials Regulations (49 CFR Parts 171 to 180). NS shall provide, upon request, local emergency management organizations with copies of all applicable Emergency Response Plans and participate in the training of local emergency staff (upon request) for coordinated responses to incidents. In the case of a hazardous material incident, NS shall follow appropriate emergency response procedures contained in its Emergency Response Plans.

### **Water Resources**

- NS shall obtain all necessary federal, state, and local permits if construction activities require the alteration of wetlands, ponds, lakes, streams, or rivers, or if these activities would cause soil or other materials to wash into these water resources. NS shall use appropriate techniques to minimize impacts to water bodies and wetlands.

### **Biological Resources**

- NS shall use Best Management Practices (BMPs) to control erosion, runoff, and surface instability during construction, including seeding, fiber mats, straw mulch, plastic liners, slope drains, and other erosion control devices. Once the track is constructed, NS shall establish vegetation on the embankment slope to provide permanent cover and prevent potential erosion. If erosion develops, NS shall take steps to develop other appropriate erosion control procedures.
- NS shall use only EPA-approved herbicides and qualified contractors for application of right-of-way maintenance herbicides, and shall limit such application to the extent necessary for rail operations.

### **Air Quality**

- NS shall comply with all applicable federal, state, and local regulations regarding the control of fugitive dust. Fugitive dust emissions created during construction shall be minimized by using such control methods as water spraying, installation of wind barriers, and chemical treatment.

### **Noise**

- NS shall control temporary noise from construction equipment through the use of work hour controls and maintenance of muffler systems on machinery.

### **Cultural Resources**

- If previously undiscovered archaeological remains are found during construction, NS shall cease work and immediately contact the Indiana Department of Natural Resources, Division of Historic Preservation and Archaeology within two business days to initiate the appropriate section 106 process pursuant to section 106 of the National Historic Preservation Act (16 U.S.C. 470f, as amended).

**7. In STB Finance Docket No. 33388 (Sub-No. 7), the following mitigation measures regarding NS's construction of the proposed rail line connection at Bucyrus, OH, are imposed:**

**Land Use**

- NS shall restore any adjacent properties that are disturbed during construction activities to their pre-construction conditions.
- Before undertaking any construction activities, NS shall consult with any potentially affected American Indian Tribes adjacent to, or having a potential interest in, the right-of-way.
- Prior to any construction activity, NS shall consult with the local Natural Resources Conservation Service office in order to comply with the Farmland Policy Protection Act to ascertain whether Form AD 1006 should be completed.

**Transportation Systems**

- NS shall use appropriate signs and barricades to control traffic disruptions during construction.
- NS shall restore roads disturbed during construction to conditions as required by state or local jurisdictions.

**Safety**

- NS shall observe all applicable federal, state, and local regulations regarding handling and disposal of any waste materials, including hazardous waste, encountered or generated during construction of the proposed rail line connection.
- NS shall dispose of all materials that cannot be reused in accordance with state and local solid waste management regulations.
- NS shall consult with the appropriate federal, state, and local agencies if hazardous waste and/or materials are discovered at the site.
- NS shall transport all hazardous materials in compliance with U.S. Department of Transportation Hazardous Materials Regulations (49 CFR Parts 171 to 180). NS shall provide, upon request, local emergency management organizations with copies of all applicable Emergency Response Plans and participate in the training of local emergency

staff (upon request) for coordinated responses to incidents. In the case of a hazardous material incident, NS shall follow appropriate emergency response procedures contained in its Emergency Response Plans.

- NS shall upgrade existing flashing lights at East Warren Street and Rensselaer Street grade crossings to include both flashing lights and gates. NS shall also install flashing lights and gates at the new Rensselaer Street crossing.

#### **Water Resources**

- NS shall obtain all necessary federal, state, and local permits if construction activities require the alteration of wetlands, ponds, lakes, streams, or rivers, or if these activities would cause soil or other materials to wash into these water resources. NS shall use appropriate techniques to minimize impacts to water bodies and wetlands.

#### **Biological Resources**

- NS shall use Best Management Practices (BMPs) to control erosion, runoff, and surface instability during construction, including seeding, fiber mats, straw mulch, plastic liners, slope drains, and other erosion control devices. Once the track is constructed, NS shall establish vegetation on the embankment slope to provide permanent cover and prevent potential erosion. If erosion develops, NS shall take steps to develop other appropriate erosion control procedures.
- NS shall use only EPA-approved herbicides and qualified contractors for application of right-of-way maintenance herbicides, and shall limit such application to the extent necessary for rail operations.
- NS shall preserve trees which provide habitat for the Indiana bat (*Myotis sodalis*), including trees with cavities and exfoliating bark, if encountered prior to construction. If such trees cannot be avoided, they shall not be cut between April 15<sup>th</sup> and September 15<sup>th</sup>. If such trees are to be removed and the time of year restriction is prohibitive, NS shall consult with the U.S. Fish and Wildlife Service and conduct a survey to determine if the Indiana bat is present in the proposed construction area.

#### **Air Quality**

- NS shall comply with all applicable federal, state, and local regulations regarding the control of fugitive dust. Fugitive dust emissions created during construction shall be minimized by using such control methods as water spraying, installation of wind barriers, and chemical treatment.

**Noise**

- NS shall control temporary noise from construction equipment through the use of work hour controls and maintenance of muffler systems on machinery.

**Cultural Resources**

- In those cases where historic resources would be adversely affected, NS shall not undertake construction activities until the section 106 review process of the National Historic Preservation Act (16 U.S.C. 470f, as amended) is completed. If previously undiscovered archaeological remains are found during construction, NS shall cease work and immediately contact the Ohio State Historical Preservation Office (SHPO) to initiate the appropriate section 106 process.
- NS shall adhere to the set of stipulations agreed to by NS and the Ohio State Historic Preservation Office designed to mitigate adverse effects to the T&OC freight depot. These stipulations are currently being incorporated in a Memorandum of Agreement.

**[THIS PAGE INTENTIONALLY LEFT BLANK]**

**BOARD DECISION NO. 71**

[THIS PAGE INTENTIONALLY LEFT BLANK]

SERVICE DATE - LATE RELEASE MARCH 17, 1998

SURFACE TRANSPORTATION BOARD

STB Finance Docket No. 33388

CSX CORPORATION AND CSX TRANSPORTATION, INC.  
NORFOLK SOUTHERN CORPORATION AND  
NORFOLK SOUTHERN RAILWAY COMPANY  
--CONTROL AND OPERATING LEASES/AGREEMENTS--  
CONRAIL INC. AND CONSOLIDATED RAIL CORPORATION

Decision No. 71

Decided: March 17, 1998

The Board's Section of Environmental Analysis (SEA) currently is preparing a Final Environmental Impact Statement (FEIS) to meet the Board's responsibilities under the National Environmental Policy Act and related environmental laws in this case. The FEIS is scheduled to be issued in late May 1998. We are aware of ongoing environmental discussions between the railroads and various communities in the Greater Cleveland area.<sup>1</sup> The Board's practice is to encourage privately negotiated agreements to address environmental concerns. These agreements can often be more far-reaching and satisfactory to the parties than environmental mitigation that the Board could impose.

Within the context of the proposed Conrail acquisition, the Cleveland area is unique with respect to the proposed CSX and NS operations. The Cleveland area would be a major crossroad for the CSX and NS proposed systems for traffic moving between the Northeast and the Midwest. We are concerned that informal involvement by Board staff at this time could impede independent discussions among the private parties. Therefore, SEA and the consultants are instructed not to engage in any further informal discussions with the affected parties in the Greater Cleveland area at this time. Should the railroads and a community reach a mutually acceptable agreement by April 15, 1998, the involved parties shall immediately notify SEA. To the extent agreements are not reached, SEA will take the necessary steps to develop its own environmental mitigation for each of the communities in the Greater Cleveland area in the FEIS, which will be considered by the Board in reaching its final decision.

---

<sup>1</sup> The Greater Cleveland area includes Cleveland, East Cleveland, Berea, Brook Park, Olmstead Falls, and the West Shore suburbs (Lakewood, Bay Village, Rocky River, and Westlake).

This action will not significantly affect either the quality of the human environment or conservation of energy resources.

It is ordered:

1. SEA and the consultants are instructed not to engage in any further informal discussions with the affected parties in the Greater Cleveland area at this time.
2. This decision is effective on the date served.

By the Board, Chairman Morgan.

Vernon A. Williams  
Secretary

**BOARD DECISION NO. 73**

**[THIS PAGE INTENTIONALLY LEFT BLANK]**

CO

29065SERVICE DATE - MARCH 23, 1998

SURFACE TRANSPORTATION BOARD

STB Finance Docket No. 33388

CSX CORPORATION AND CSX TRANSPORTATION, INC .  
NORFOLK SOUTHERN CORPORATION AND  
NORFOLK SOUTHERN RAILWAY COMPANY  
--CONTROL AND OPERATING LEASES/AGREEMENTS--  
CONRAIL INC. AND CONSOLIDATED RAIL CORPORATION

Decision No. 73

Decided: March 20, 1998

Decision No. 71 issued in this matter on March 17, 1998, addressed certain ongoing environmental discussions between the railroads and various communities in the Greater Cleveland area. Noting that the Board's practice is to encourage privately negotiated agreements to address environmental concerns, the decision expressed concern that informal involvement by Board environmental staff at this time could impede independent discussions among the private parties. Therefore, the decision instructed Board staff not to engage in any further informal discussions with the affected parties in the Greater Cleveland area at this time.

In a letter dated March 19, 1998, counsel for the State of Ohio points out that the Draft Environmental Impact Statement issued in this proceeding encouraged negotiated settlements "among the Applicant[ railroads], the locally affected communities, and the appropriate government agencies." Noting that Decision No. 71 did not specifically refer to negotiations and agreements among parties other than railroads and communities, the March 19 letter requests "clarification that negotiations are expected to involve all interested parties and that the state will be a party to any agreement when state interests and state funding issues are involved."

Decision No. 71 was intended to facilitate negotiations among the various interested parties. It was not intended to define who should, or should not, be involved in any specific negotiation, and it was certainly not intended to limit the participation of any appropriate party in any negotiations that may be conducted. Any party that has a legitimate interest in these matters is free and indeed encouraged to participate in negotiations.

To that extent, Decision No. 71 is clarified.

This action will not significantly affect either the quality of the human environment or conservation of energy resources.

It is ordered:

1. Decision No. 71 is clarified to the extent noted in this decision.
2. This decision is effective on the date served.

By the Board, Chairman Morgan.

Vernon A. Williams  
Secretary

29123SERVICE DATE - LATE RELEASE APRIL 16, 1998

**SURFACE TRANSPORTATION BOARD**

**STB Finance Docket No. 33388**

**CSX CORPORATION AND CSX TRANSPORTATION, INC.  
NORFOLK SOUTHERN CORPORATION AND  
NORFOLK SOUTHERN RAILWAY COMPANY  
--CONTROL AND OPERATING LEASES/AGREEMENTS--  
CONRAIL INC. AND CONSOLIDATED RAIL CORPORATION**

**Decision No. 75**

**Decided: April 15, 1998**

Decision Nos. 71 and 73 issued in this matter on March 17, 1998, and March 23, 1998, addressed certain ongoing environmental discussions between the railroads and various communities and appropriate parties in the Greater Cleveland area. Noting that the Board's practice is to encourage privately negotiated agreements to address environmental concerns, the decisions expressed concern that informal involvement by Board environmental staff at this time could impede independent discussions among the private parties. Therefore, the decisions instructed Board staff not to engage in any further informal discussions with the affected parties in the Greater Cleveland area at this time, and instructed those parties, should they reach a mutually acceptable agreement by April 15, 1998, to notify the Board's Section of Environmental Analysis (SEA) immediately.

The Board is aware that the parties remain in serious negotiations. To provide additional time for the parties to complete these important negotiations without Board involvement, the prohibition on further informal discussions by SEA and the consultants with the affected parties regarding any negotiated agreements will be extended to April 23, 1998. This prohibition does not extend to data collection and verification activities by SEA and the consultants.

This action will not significantly affect either the quality of the human environment or conservation of energy resources.

**It is ordered:**

1. SEA and the consultants are instructed not to engage in any further informal discussions with the affected parties regarding any negotiated agreements in the Greater Cleveland area until April 23, 1998.

2. This decision is effective on the date served.

By the Board, Chairman Morgan.

Vernon A. Williams  
Secretary

## **APPENDIX U LIST OF PREPARERS**

### **SURFACE TRANSPORTATION BOARD SECTION OF ENVIRONMENTAL ANALYSIS**

ELAINE K. KAISER	Program Director/Legal Counsel, Section of Environmental Analysis
MICHAEL J. DALTON, III	Program Manager, Section of Environmental Analysis
HAROLD M. McNULTY	Environmental Protection Specialist, Rail Operations Analyst, Section of Environmental Analysis
VICTORIA J. RUTSON	Staff Attorney/Legal Review, Section of Environmental Analysis
DANA G. WHITE	Environmental Protection Specialist, Section of Environmental Analysis

### **PRIME CONTRACTORS**

The prime contractors, **De Leuw, Cather & Company (DCCO)** and **HDR Engineering, Inc. (HDR)**, were involved in all aspects of project management, technical analysis, quality assurance, public outreach, and document production. In addition, a subcontractor, **Public Affairs Management (PAM)**, directed and managed the public outreach efforts and provided extensive project management support as well as extensive technical and editorial assistance.

- Michael W. Johnson (DCCO), B.A. Legal Studies; 10 years experience in EIS preparation and infrastructure planning. Mr. Johnson served as Project Coordinator, Agency Operations Manager, and DCCO Project Manager.
- Thomas M. Sanders (HDR), B.S. Civil Engineering; 20 years experience in environmental and civil engineering. Mr. Sanders served as the Project Director and HDR Project Manager.

- Charles L. Gardiner (PAM), B.A. Chemistry and Political Science; 15 years in public outreach and agency coordination for environmental review and transportation-related projects. Mr. Gardiner served as Project Coordinator and PAM Project Manager.

## **DCCO AND SUBCONTRACTORS**

DCCO and its subcontractors were responsible for project management, comment response team management, legal counsel, and public outreach; and technical analysis of railroad operations, environmental justice, traffic and transportation, emergency response, noise, and hazardous materials transport.

- David Coate (Acentech, Inc.), B.A. Mathematics, B.A. Chemistry, B.A. Physics, M.S. Energy Technology; 20 years in acoustics and environmental studies. Mr. Coate served as Noise Analysis Team Leader.
- Charles De Weese (DCCO), B.S. Mathematics; 35 years in railroad operations and safety. Mr. De Weese served as Rail Operations Analyst and addressed hazardous materials transportation issues.
- Winn B. Frank (DCCO), M.B.A. Marketing, B.S./B.A. Transportation; 33 years experience in railroad operations and management for domestic and international projects. Mr. Frank served as the Railroad Operations Manager.
- James Gregory (DCCO), M.A. Urban and Environmental Planning, B.S. Biology; more than 10 years in environmental planning and management. Mr. Gregory served as Comment Response Analyst and Energy Team Leader.
- Robin E. Joseph (DCCO), M.A. Urban Planning, B.A. Political Science; 3 years in transportation and land use planning, transportation policy analysis, environmental justice and conflict management and resolution. Ms. Joseph served as Environmental Justice Team Co-leader.
- John C. Martin (DCCO), M.C.R.P. City and Regional Planning, B.S. Business Administration; 23 years experience in transportation planning. Mr. Martin served as Transportation — Emergency Response Team Leader.
- Terrence L. McKinley (DCCO), Juris Doctor, M.B.A., Management Science, B.S. Industrial Engineering; 15 years experience in management consulting and 17 years experience in public transportation, capital program management, strategic planning, and intergovernmental relations. Mr. McKinley served as Mitigation Manager.

- Bonnie A. Nixon (PAM), B.A. Communications; 15 years in strategic management of public participation programs for Federal, state, and regional agencies. Ms. Nixon served on the Project Advisory Panel for Strategic Issues and served as Public Outreach and Political Liaison.
- William J. Novak (DCCO), M.A., B.A. Geography; 25 years experience in environmental planning and impact assessment for transportation and infrastructure development projects. Mr. Novak served as Environmental Justice Team Co-leader and managed the local impacts analyses.
- Phil Olekszyk (World Wide Rail), M.B.A. Behavioral Science, B.S.M.E. Mechanical Engineering; 12 years in railroad federal safety enforcement, 10 years in railroad research. Mr. Olekszyk served as Safety Team Leader.
- Edward Y. Papazian (DCCO), M.S. Civil Engineering; B.S. Civil Engineering; 28 years in traffic engineering. Mr. Papazian served as Traffic/Transportation Team Leader.
- John Pinto (Rail Trac Associates), B.A. Social Sciences; 21 years in railroad rights of way acquisition, management, and analysis. Mr. Pinto served as Data Manager.
- Debra Richards (Consultant), M.B.A., B.S. Business Administration; 10 years in project management. Ms. Richards served on the Project Advisory Panel and was involved in strategic issues related to communications and document development.
- Robert Rooney (DCCO), B.S. Management; 20 years in railroad operations planning and analysis. Mr. Rooney served as Rail Operations Passenger Interface Analyst.
- Matthew Royce (PAM), M.F.A. Management; 10 years in public meeting planning and communications. Mr. Royce served as Public Outreach Associate.
- Barry P. Steinberg, Esq. (Kutak Rock), LLB, B.A. Psychology; 35 years as a military and private-sector environmental attorney. Mr. Steinberg served on the Project Advisory Panel.
- Philip Stephens (DCCO), M.S. Highway Engineering and Geotechnics, B.S. Civil Engineering; 10 years experience in transportation engineering. Mr. Stephens served as Process Auditing and Quality Assurance Specialist.

## **HDR AND SUBCONTRACTORS**

HDR and its subcontractors were responsible for project management, as well as management of databases, the comment response team, and document production; and technical analysis of Safety Integration Plans, cultural resources, rail safety, hazardous materials transport safety, rail operations, natural resources, land use, cumulative impacts, air quality, and hazardous waste sites.

- William D. Burgel (HDR), M.S. Geology, B.S. Engineering; 26 years in railroad engineering and operations and railroad negotiations with public agencies. Mr. Burgel served as Railroad Operations Team Leader.
- Todd Burger (Arthur D. Little, Inc.), B.S. Accounting; 21 years in rail transport operations, safety, organizational change strategy, and process improvement. Mr. Burger served as Safety Integration Plan Manager.
- Jay Campbell, P.E. (HDR), M.S., B.S., Civil Engineering; 29 years experience in project and operations management in transportation and environmental projects. Mr. Campbell served as the Quality Control Manager.
- Michael E. Harris, P.E. (HDR), M.S., B.S. Civil Engineering; 25 years experience in project operations management and Quality Assurance/Quality Control in environmental projects. Mr. Harris served as Quality Assurance Leader.
- William J. Jeffords, Jr. (HDR), B.S. General Science Education; 10 years in environmental impact assessment and planning for transportation projects. Mr. Jeffords served as Natural Resources Team Leader.
- Jeffery P. Johnson (HDR), M.C.R.P. City and Regional Planning, B.A. Political Science; 12 years land use, comprehensive and strategic planning projects, and economic and site development. Mr. Johnson served as Land Use and Cumulative Impacts Analyst.
- Edward J. Liebsch (HDR), M.S. Meteorology, B.A. Earth Science; 17 years in air quality impact analysis and permitting. Mr. Liebsch served as Air Quality Team Leader.
- John H. Morton (HDR), M.S. Engineering Management, B.S. Environmental Engineering; 23 years in impact analysis, regulatory compliance and environmental mitigation for transportation and development projects. Mr. Morton served as Technical Analysis Manager.
- Nancy A. Roberts, Esq. (Kutak Rock), Juris Doctor; 20 years in environmental law, including NEPA compliance. Ms. Roberts served as Legal Advisor for Railroad Operations and Inconsistent and Responsive Applications.

- Alonso Rodriguez (HDR), B.A. Management/Finance; seven years experience in telecommunications. Mr. Rodriguez served as Central Administrative Unit Document/Database Manager.
- Eileen K. Straughan (Straughan Environmental Services, Inc.), B.S. Natural Resources and Conservation; 16 years in environmental analysis, mitigation planning and design, and NEPA documentation. Ms. Straughan served as Production Manager.
- Barry Wharton (HDR), M.A. Archaeology, B.A. Anthropology; 18 years in cultural resource impact assessments and Section 106 compliance. Mr. Wharton served as Cultural Resources Team Leader/Section 106 Compliance.
- John H. Wiser (HDR), B.S. Biology; seven years experience in natural resource management. Mr. Wiser served as Central Administrative Unit Lead Comment Analyst.
- Mark Wollschlager (HDR), Juris Doctor, B.S. Biology; 20 years in environmental law and impact analysis and permitting. Mr. Wollschlager served as Comment Response Team Manager.
- Susan L. Young (HDR), B.S. Geology; 18 years in environmental geology and project management for environmental projects. Ms. Young served as Hazardous Waste Team Leader.

**SURFACE TRANSPORTATION BOARD**  
**Finance Docket No. 33388**

**CSX Corporation and CSX Transportation, Inc.**  
**Norfolk Southern Corporation and Norfolk Southern Railway Company**  
**Control and Operating Leases/Agreements**  
**Conrail Inc. and Consolidated Rail Corporation**

**GUIDE TO THE FINAL ENVIRONMENTAL IMPACT STATEMENT**

This Final Environmental Impact Statement (Final EIS) evaluates the potential environmental impacts that could result from the proposed Acquisition of Conrail Inc. and Consolidated Rail Corporation (Conrail) by CSX Corporation and CSX Transportation, Inc. (CSX) and Norfolk Southern Corporation and Norfolk Southern Railway Company (NS). The Surface Transportation Board's (Board) Section of Environmental Analysis (SEA) has prepared this document in accordance with the requirements of the National Environmental Policy Act (NEPA) of 1969, as amended (42 U.S.C. 4321); the Council on Environmental Quality (CEQ) regulations implementing NEPA; the Board's environmental rules (49 CFR Part 1105); and other applicable environmental statutes and regulations.

SEA issued the Draft EIS on December 19, 1997. Subsequently, SEA issued an Errata (January 12, 1998) and a Supplemental Errata (January 21, 1998) to clarify statements and analyses in the Draft EIS. The 45-day public comment period closed February 2, 1998. This Final EIS provides responses to comments, questions, and issues that the public, agencies, and other document reviewers raised. It describes SEA's additional environmental analysis and includes SEA's final environmental mitigation recommendations to the Board.

To assist the reader in the review of this document, each volume contains a Guide to that volume and a Table of Contents for each chapter in that volume. In addition, each individual volume also contains a Guide to the Final EIS, a Glossary of Terms, a List of Acronyms and Abbreviations, and the Table of Contents of the Final EIS. Specifically, the Final EIS document includes the following volumes:

### **Executive Summary Volume**

The **Executive Summary** provides an overview of the proposed Conrail Acquisition, including the potential environmental impacts and the mitigation measures that SEA recommends to address those impacts. In addition, the Executive Summary Volume contains the **Letter to Interested Parties** that SEA attached to copies of this Final EIS, the **Information Sources** that SEA used for preparing both the Draft EIS and the Final EIS documents, and the **Index** of keywords and phrases that appear in this Final EIS.

### **Volume 1: Chapters 1, 2, and 3**

- Chapter 1, "Introduction and Background," describes the purpose and need for the project, the proposed action, and the alternatives to the proposed action. It also sets forth the jurisdiction of the Board and outlines SEA's environmental review process. In addition, this chapter presents an overview of SEA's agency coordination and the public comment process.
- Chapter 2, "Scope of the Environmental Analysis," identifies the proposed Conrail Acquisition-related activities that SEA analyzed. This chapter includes a table presenting the thresholds SEA used to identify activities for environmental analysis and explains project activities that differ from those set forth in the Draft EIS.
- Chapter 3, "Agency Coordination and Public Outreach," describes SEA's public outreach activities to notify interested parties and environmental justice populations of the potential environmental impacts of the proposed Conrail Acquisition and of the availability of the Draft EIS and the Final EIS. Additionally, the chapter explains SEA's distribution of the Draft EIS and the Final EIS, explains the methods that SEA used to facilitate the public comment process, and describes the agency coordination that SEA performed as part of the environmental review process. Chapter 3 also reviews the historic properties outreach activities that SEA conducted in Ohio.

### **Volume 2: Chapter 4**

- Chapter 4, "Summary of Environmental Review," outlines the additional environmental analysis that SEA conducted for each environmental issue area since preparation of the Draft EIS. Specifically, it explains the methods of analysis, presents the public comments and additional evaluations, identifies the results of the analysis, and reviews SEA's assessment of environmental impacts. In addition, this chapter describes SEA's refinement of the mitigation measures recommended in the Draft EIS, SEA's final recommended mitigation measures, anticipated environmental benefits, and the adverse environmental impacts of the proposed Conrail Acquisition.

### **Volume 3: Chapter 5**

- Chapter 5, "Summary of Comments and Responses," contains summaries of the comments that SEA received on the Draft EIS and SEA's responses to the comments. The chapter provides the following: (a) an overview of the comments, including those

from Federal agencies, the Applicants, and national and regional groups as well as groups and individuals within specific states; (b) general comments on the Draft EIS, including the Application review process, the environmental review process, and the system-wide technical analysis; and (c) comments on state and community issues, organized by state and environmental issue category.

**Volume 4: Chapter 6**

- Chapter 6, "Safety Integration Planning," sets forth the purpose and topics of the Safety Integration Plans and presents summaries of comments that reviewing agencies and the public submitted about the Safety Integration Plans. The chapter also includes SEA's analysis and response to those comments and provides SEA's conclusion and recommended conditions regarding the Safety Integration Plans.

**Volume 5: Chapter 7**

- Chapter 7, "Recommended Environmental Conditions," describes the final environmental mitigation conditions that SEA recommends to address significant adverse environmental impacts that could result from the proposed Conrail Acquisition.

**Volume 6: Appendices**

- These four volumes (6A through 6D) include appendices containing the comments on the Draft EIS and the analysis by the technical disciplines as well as appendices containing public outreach and agency consultation information and documents.

**Volume 6A** contains the following appendix:

- A. Comments Received on the Draft Environmental Impact Statement.

**Volume 6B** contains the following appendices:

- B. Draft Environmental Impact Statement Correction Letter, Errata, Supplemental Errata and Additional Environmental Information, and Board Notices to Parties of Record.
- C. Settlement Agreements and Negotiated Agreements.
- D. Agency Consultation.
- E. Safety: Highway/Rail At-Grade Crossing Safety Analysis.
- F. Safety: Hazardous Materials Transport Analysis.
- G. Transportation: Highway/Rail At-grade Crossing Traffic Delay Analysis.
- H. Transportation: Roadway Systems Analysis.
- I. Air Quality Analysis.

**Volume 6C** contains the following appendices:

- J. Noise Analysis.
- K. Cultural Resources Analysis.
- L. Natural Resources Analysis.
- M. Environmental Justice Analysis.

N. Community Evaluations.

**Volume 6D** contains the following appendices:

- O. EPA Rules on Locomotive Emissions.
- P. SEA's Best Management Practices for Construction and Abandonment Activities.
- Q. Example Public Outreach Materials.
- R. All Relevant Board Decisions.
- S. Index for the Draft Environmental Impact Statement.
- T. Final Environmental Impact Statement Rail Line Segments.
- U. List of Preparers.

**Addendum Volume**

The **Addendum** contains information SEA did not include in the other portions of the Final EIS because of production timing constraints. The Addendum contains SEA's evaluation and additional analyses SEA conducted for train traffic rerouting proposed as mitigation for the Greater Cleveland Area. The Addendum also contains additional analysis of the proposed connection in Alexandria, Indiana (one of the Seven Separate Connections) as well as comments received during an additional comment period and summaries of, and responses to, those comments.

## **GLOSSARY OF TERMS**

- abandonment:** The discontinuance of service on a rail line segment and the salvaging and/or the removal of railroad-related facilities for reuse, sale, and/or disposal.
- Acquisition:** The proposal by CSX, NS, and Conrail to acquire control of Conrail's assets and its basic railroad operations.
- active warning devices:** Traffic control devices that give positive notice to highway users of the approach or presence of a train. These devices may include a flashing red light signal (a device which, when activated, displays red lights flashing alternately), a bell (a device which, when activated, provides an audible warning, usually used with a flashing red light signal), automatic gates (a mechanism added to flashing red light signals to provide an arm that can lower across the lanes of the roadway), and a cantilever (a structure equipped with flashing red light signals and extending over one or more lanes of traffic).
- Advanced Civil Speed Enforcement System (ACSES):** A supplement to the Automatic Cab Signal (ACS) and Automatic Train Control (ATC) systems currently in place within the Northeast Corridor (NEC), ACSES uses a series of transponders to communicate location and other factors to passing trains whose on-board computers utilize the information to achieve system function. These functions include: (1) civil speed enforcement; (2) temporary speed enforcement, including protection of roadway workers; and (3) enforcement of positive stop at interlocking home signals and Control Points (CPs).

**adverse environmental impact:**

A negative effect, resulting from the implementation of a proposed action, that serves to degrade or diminish an aspect of human or natural resources.

**Advisory Council on Historic Preservation (ACHP):**

An independent Federal agency charged with advising the President and Congress on historic preservation matters and administering the provisions of Section 106 of the National Historic Preservation Act.

**air-brake test:**

A test made prior to train departure, required by Federal Railroad Administration regulations and by railroad rules to ensure that a train's air-brake system is functioning as intended and that certain devices are within prescribed tolerances and physical parameters.

**Allied Rail Unions (ARU):**

A group of unions representing railroad employees, including the Brotherhood of Locomotive Engineers, the Brotherhood of Railroad Signalmen, and the Brotherhood of Maintenance-of-Way Employees.

**Applicants:**

CSX Corporation and CSX Transportation, Inc. (CSX), Norfolk Southern Railway Company and Norfolk Southern Corporation (NS), and Conrail Inc. and Consolidated Rail Corporation (Conrail).

**Application:**

A formal filing with the Surface Transportation Board related to railroad mergers, acquisitions, constructions, or abandonments. Applications may be either Primary Applications or Inconsistent and Responsive (IR) Applications. See *Primary Application* and *Inconsistent and Responsive (IR) Application*.

**Area of Potential Effect(s) (AoPE):**

The geographic area surrounding a rail activity where an individual (or resource) or group of individuals (or resources) could likely experience adverse environmental effects. For this Final EIS, where applicable, the different technical disciplines determined their own specific definitions of this term for their individual technical disciplines.

**attainment area:**

An area that EPA has classified as complying with the National Ambient Air Quality Standards specified under the Clean Air Act.

**authorized speed:**

Maximum permitted speed for a specific train at a specific location, taking into account the prevailing weather conditions (for example, restrictions due to heavy rain, extreme heat or cold).

**Automatic Block System (ABS):**

A series of railroad signals that indicate track occupancy in the block (length of track of defined limits) ahead and govern the use of a consecutive set of blocks by a train. These signals include wayside track signals and cab signals (signals displayed in the locomotive cab instead of, or in addition to, wayside track signal displays), or both. This system combines automatic detection of train position with control of signals.

**Automatic Train Control (ATC):**

A system that has components installed on both trains and tracks that, when working together, will cause the train brakes to apply automatically if the engineer fails to respond to a condition requiring train speed to be reduced.

**Best Management Practice (BMP):**

Technique that various parties (for example, the construction industry) use to provide protection from adverse impacts to the environment. The Board may designate these techniques as mitigation measures.

<b>block group:</b>	A small population area that the U.S. Census Bureau uses to measure and record demographic characteristics. The population of a block group typically ranges from 600 to 3,000 people and is designed to reflect homogeneous living conditions, economic status, and population characteristics. Block group boundaries follow visible and identifiable features, such as roads, canals, railroads, and above-ground high-tension power lines.
<b>block swapping:</b>	The process of moving groups of cars with a common destination (called "blocks") from one train to another.
<b>Board:</b>	The Surface Transportation Board, the licensing agency for the proposed Conrail Acquisition.
<b>bulletins:</b>	Documents addressed to train crews and other operating employees specifying temporary or local operating rules and restrictions.
<b>cab signaling:</b>	System that provides signal indications in the locomotive cab instead of, or in addition to, wayside signal displays.
<b>carload:</b>	A unit of measure used to describe commodities transported on a railroad typically in a boxcar, tank car, flat car, hopper car, or gondola.
<b>centralized traffic control system:</b>	A signal system that allows for the movement of trains in either direction on designated tracks at the maximum authorized speed, in accordance with the wayside or cab signals or both.
<b>census tract:</b>	Small, relatively permanent statistical subdivisions of a county containing between 2,500 and 8,000 persons. The U.S. Bureau of Census designs census tracts to reflect homogeneous living conditions, economic status, and population characteristics.

**Clean Air Act (Clean Air Act Amendments):**

The Clean Air Act of 1970 and the subsequent amendments, including the Clean Air Act Amendments of 1990 (42 U.S.C. 7401-7671g); the primary Federal law that protects the nation's air resources. This act establishes a comprehensive set of standards, planning processes, and requirements to address air pollution problems and reduce emissions from major sources of pollutants.

**Clean Water Act:**

The Federal Water Pollution Control Act Amendments of 1972 (33 U.S.C. 1251 *et seq.*) is the primary Federal law that protects the nation's waters, including lakes, rivers, aquifers, and coastal areas. This act provides a comprehensive framework of standards, technical tools, and financial assistance to address the many causes of pollution and poor water quality, including municipal and industrial wastewater discharges, polluted runoff from urban and rural areas, and habitat destruction. Specifically, the Clean Water Act provides for the following:

- Requires major industries to meet performance standards to ensure pollution control.
- Charges states and tribes with setting specific water quality standards appropriate for their waters and developing pollution control programs to meet them.
- Provides funding to states and communities to help them meet their clean water infrastructure needs.
- Protects valuable wetlands and other aquatic habitats through a permitting process that conducts land development activities and other activities in an environmentally sound manner.

**coastal zone:**

According to the Coastal Zone Management Act of 1972, lands and waters adjacent to the coast that exert an influence on the uses of the sea and its ecology, or whose uses and ecology the sea affects.

**Coastal Zone  
Management Act  
(CZMA):**

The Coastal Zone Management Act of 1972, as amended ( 16 U.S.C. 1451-1464; P.L. 92-583), is also known as "Federal Consistency With Approved State Coastal Management Programs" (15 CFR 930). This Federal act preserves, protects, develops, and, where possible, restores or enhances the resources of the nation's coastal zone for the present and for future generations. The provisions of 15 CFR 930.30 ensure that all Federally conducted or supported activities, including development projects directly affecting the coastal zone, are consistent with approved state coastal management programs as much as possible.

**collective bargaining  
agreement:**

An agreement between a union and an employer that defines the scope of work, rates of pay, rules, and working conditions for the union's members.

**common corridor:**

For the purposes of this Final EIS, a railroad line segment that accommodates both public mass transportation service and passenger and freight train operations by using separate tracks adjacent to each other in the same right-of-way or area.

**compensation wetlands  
(compensatory  
wetlands):**

Wetlands that an agency or entity creates, enhances, or preserves to mitigate for unavoidable impacts on existing wetlands that occur as a result of implementation of the agency's or entities' proposed action. These compensation (or compensatory) wetlands replace, "in kind", wetlands that an agency or entity partially or totally fills or drains during its construction or earth-moving activities.

**Comprehensive  
Environmental Response,  
Compensation, and  
Liability Act (CERCLA):**

The Comprehensive Environmental Response, Compensation, and Liability Act of 1980 (42 U.S.C. 9601-9675; P.L. 96-510); the Federal act that provides EPA with the authority to clean up inactive hazardous waste sites and distribute the cleanup costs among the parties who generated and/or handled the hazardous substances at these sites.

**Comprehensive  
Environmental Response,  
Compensation, and  
Liability Information  
System (CERCLIS):**

Federal database containing information on potential hazardous waste sites that states, municipalities, private companies, and private persons have reported to the EPA, pursuant to Section 103 of the Comprehensive Environmental Response, Compensation, and Liability Act. This database contains sites that are either proposed for inclusion on, or are currently on, the National Priorities List (NPL) and sites that are in the screening and assessment phase for possible inclusion on the NPL.

**condition:**

A provision that the Board imposes as part of any decision approving the proposed Conrail Acquisition and that requires action by one or more of the Applicants.

**conductor:**

The operating employee on a train responsible for safe and efficient train movement in accordance with all railroad operating rules and special instructions.

**Conrail Shared Assets  
Operations:**

*See Shared Assets Areas.*

**consist:**

The number and type of locomotives and cars included in a train, considering special factors such as the tonnage and the placement of hazardous materials cars and "high-wides" (oversize dimension cars).

**constant warning time:**

A motion-sensing system with the capability of measuring train speed and providing a relatively uniform warning time by warning signal devices to highway traffic at highway/rail at-grade crossings.

**Control Date:**

The date on which the merger can become effective, following formal approval of the Board.

**Council on  
Environmental Quality  
(CEQ):**

Federal agency responsible for developing regulations and guidance for agencies implementing the National Environmental Policy Act.

**craft employee:**

Term applied to a railroad employee qualified in a specific railroad operating or maintenance activity (for example, locomotive engineer, train dispatcher, signal maintainer, or car inspector).

**crew caller:**

Term applied to a railroad employee who is responsible for notifying train crews when and where to report for duty.

**crew calling:**

Process of notifying train crew members when and where their next tour-of-duty will start. Labor agreements commonly specify that railroads call train crews a minimum of 2 hours before crew members are required to begin their tour-of-duty.

**critical habitat:**

The specific sites within the geographical area occupied by a threatened or endangered species that include the physical or biological features essential to the conservation of the species. These areas may require special management considerations or protection. These areas include specific sites outside the geographical areas occupied by the species at the time of the listing that are essential for the conservation of the species.

**criteria of significance:**

The criteria SEA developed specifically for the proposed Conrail Acquisition to determine whether a potential adverse environmental effect is significant and may warrant mitigation.

**cross-tie:**

Transverse wooden, concrete, or steel beam supporting the rails of a railroad track.

**cultural resource:**

Any prehistoric or historic district, site, building, structure, or object that warrants consideration for inclusion in the National Register of Historic Places. A cultural resource that is listed in or is eligible for listing in the National Register of Historic Places is considered a historic property (or a significant cultural resource). For the purposes of this Final EIS, the term applies to any resource more than 50 years old for which SEA gathered information to evaluate its significance. In addition, this Final EIS addresses potential environmental impacts of the proposed rail line construction and abandonment activities on Native American reservations and sacred sites.

**cumulative effects:**

Effects resulting from the incremental impacts of the proposed Conrail Acquisition when added to other past, present, and reasonably foreseeable future actions, regardless of which agency (Federal or non-Federal) or person undertakes such actions, as described in 40 CFR 1508.7. Cumulative effects can result from individually minor but collectively significant actions taking place over a period of time.

**Day 1:**

In the event that the Board approves the proposed Conrail Acquisition, the date (as the Applicants determine through mutual agreement) when operating responsibility for the acquired railroad is transferred to the Applicants' organizations.

**decibel (dB):**

A unit of noise measured on a logarithmic scale that compresses the range of sound pressures audible to the human ear over a range from 0 to 140, where 0 decibels represents sound pressure corresponding to the threshold of human hearing, and 140 decibels corresponds to a sound pressure at which pain occurs. Noise analysts measure sound pressure levels that people hear in decibels, much like other analysts measure linear distances in yards or meters. A-weighted decibel (dBA) refers to a weighting that accounts for the various frequency components in a way that corresponds to human hearing.

<b>degradation:</b>	To change a habitat, either terrestrial or aquatic, so that it no longer meets the survival needs of a particular species of plant or wildlife. Such change could include reducing the feeding area, modifying the vegetation type, and limiting the available shelter.
<b>detector car:</b>	One of two types of rail equipment designed to detect imperfections in railroad track structure. Rail detector cars detect internal imperfections within the rail, using ultrasonic techniques. See also <i>track geometry inspection car</i> .
<b>dimensional traffic:</b>	A freight shipment requiring special authorization for movement because of height, width, length, or gross weight.
<b>dispatcher (train):</b>	The railroad operating employee responsible for issuing on-track movement and/or occupancy authority through the use of remotely controlled switches, signals, visual displays, voice control written mandatory directives, and/or all of the above.
<b>dispatcher desk:</b>	The workstation from which a train dispatcher controls a specific portion of a railroad's network.
<b>dispatching:</b>	The process of real-time planning, supervising, and controlling of train movements.
<b>disproportionality (test for):</b>	A comparison test to assess whether potentially high and adverse impacts of an action are predominantly borne or more severe or greater in magnitude in an Environmental Justice (EJ) population than a non-EJ population within the current analysis scale (that is, at the system, state, county, segment, or block group level).
<b>double-stack freight service:</b>	The transport of two intermodal containers stacked on top of each other on one platform of an intermodal rail flat car.

<b>double tracking:</b>	Construction of a second railroad track immediately adjacent to an existing track, to perform railroad activities similar to those occurring on the existing track.
<b>emergent species:</b>	Any type of aquatic plant whose vegetative growth is mostly above the water.
<b>emissions:</b>	Air pollutants that enter the atmosphere.
<b>endangered species:</b>	A species that is in danger of extinction throughout all or a significant portion of its range. Federal and state laws protect these species.
<b>Endangered Species Act (ESA):</b>	The Endangered Species Act of 1973 (16 U.S.C. 1531 <i>et seq.</i> ; P.L. 93-205), as amended in 1978, is the primary Federal law protecting endangered and threatened wildlife and plant species. The purpose of the law is to provide for the conservation of habitat for such species.
<b>engineer (railroad):</b>	Employee responsible for operating a railroad locomotive in accordance with train-handling practices, signal indications, operating rules, speed limits, and the technical requirements of the particular locomotive.
<b>Environmental Impact Statement (EIS):</b>	A document that the National Environmental Policy Act requires Federal agencies to prepare for major projects or legislative proposals having the potential to significantly affect the environment. A tool for decision-making, it describes the positive and negative environmental effects of the undertaking, and alternative actions and measures to reduce or eliminate potentially significant environmental impacts.

**Environmental Justice (EJ):**

For purposes of this document, SEA defines environmental justice as the mission discussed in Executive Order (EO) 12898 "Federal Actions to Address Environmental Justice in Minority Populations and Low-Income Populations" (59 FR 7629, February 11, 1994). This EO directs Federal agencies to identify and address "disproportionately high and adverse human health or environmental effects" of their programs, policies, and activities on minority and low-income populations in the United States. EO 12898 also calls for public notification for environmental justice populations, as well as meaningful public participation of environmental justice populations. In this document, SEA used the guidance provided in the Department of Transportation Order on Environmental Justice, the Council of Environmental Quality, Environmental Justice Guidance under the National Environmental Policy Act, and the Interim Final Guidance for Incorporating Environmental Justice Concerns in EPA's NEPA analysis to analyze potential disproportionately high and adverse impacts on environmental justice populations for rail segments, intermodal facilities, rail yards, and new construction.

**Environmental Justice (EJ) population:**

A population within an Area of Potential Effect whose minority and low-income composition meets at least one of the following criteria: (1) The percentage of minority and low-income population in the Area of Potential Effect is greater than 50 percent of the total population in the Area of Potential Effect; or (2) The percentage of minority and low-income population in the Area of Potential Effect is at least ten percentage points greater than the percentage of minority or low-income population in the county of which the Area of Potential Effect is a part.

**Environmental Resource Category:**

Any of the environmental issues that serve as the major topics of impact analysis for this EIS. Examples include land use, natural resources, noise, hazardous materials, cultural resources, water quality, or air quality.

<b>Environmental Resource Score (ERS):</b>	The impact score determined for an environmental resource category within a (block group) Area of Potential Effect. A typical ERS ranges from 0 to 6, reflecting the relative impact on the Area of Potential Effect compared with impacts on other Areas of Potential Effect. For the Environmental Justice analysis, SEA calculated an ERS for noise, hazardous materials transport, and traffic safety and delay.
<b>equipment:</b>	For a railroad, a term used to refer to the mobile assets of the railroad, such as locomotives, freight cars, and on-track maintenance machines. Also used more narrowly as a collective term for freight cars operated by the railroad.
<b>equipment restrictions:</b>	Operating instructions that restrict certain types of locomotives or freight cars from operating over selected line segments.
<b>Errata:</b>	A list of corrections to the Draft EIS, prepared to facilitate public review of the Draft EIS and to clarify some of the information contained therein.
<b>Executive Order (EO) 12898:</b>	Executive Order 12898, "Federal Actions to Address Environmental Justice in Minority and Low-Income Populations," issued in February of 1994; directs Federal agencies to identify and address as appropriate "disproportionately high and adverse human health or environmental effects," including interrelated social and economic effects, of their programs, policies, and activities on minority populations and low-income populations in the United States.
<b>extra board crew caller position:</b>	Railroad employee who does not have a regularly assigned position but who works on an on-call basis.

<b>floodplain:</b>	The lowlands adjoining inland and coastal waters and relatively flat areas and flood-prone areas of offshore islands, including, at a minimum, those areas that have a 1 percent or greater chance of flood in any given year (also known as a 100-year or a Zone A floodplain).
<b>Four City Consortium:</b>	An alliance of the cities of East Chicago, Hammond, Gary, and Whiting, Indiana.
<b>freight car inspections:</b>	Pre-departure tests required for railroad freight cars pursuant to Federal Railroad Administration regulations.
<b>fugitive dust:</b>	According to EPA regulations, those particulate matter emissions that could not "reasonably pass" through a stack, chimney, vent, or other functionally equivalent opening. Examples of fugitive dust include wind-borne particulate matter from earth-moving and material handling during construction activities.
<b>Geographic Information System (GIS):</b>	A computer system for storing, retrieving, manipulating, analyzing, and displaying geographic data. GIS combines mapping and databases.
<b>grade crossing:</b>	See <i>highway/rail at-grade crossing</i> .
<b>grade separation:</b>	See <i>separated grade crossing</i> .
<b>gross ton-mile:</b>	A measure of railroad production that represents the weight of cars and freight movement in terms of total tons per mile transported system-wide or over a specific rail line segment. Specifically, 1 ton of railroad car and loading carried 1 mile.

<b>haulage right(s):</b>	The limited right (or combination of limited rights) of one railroad to have their freight traffic moved by another railroad over the designated lines of the other railroad.
<b>hazardous materials:</b>	Substances or materials that the Secretary of Transportation has determined are capable of posing an unreasonable risk to human health, safety, and property when transported in commerce, as designated under 49 CFR Parts 172 and 173.
<b>hazardous wastes:</b>	Waste materials that, by their nature, are inherently dangerous to handle or dispose of (for example, old explosives, radioactive materials, some chemicals, some biological wastes). Usually, industrial operations produce these waste materials.
<b>high-and-wide load:</b>	Load on a freight car that exceeds the normal height and/or width limits for general operation over a railroad. Such loads may move only with special operating precautions to prevent damage to wayside structures and trains on adjacent tracks.
<b>high-profile crossings:</b>	A condition at a highway/rail at-grade crossing where the elevation of the tracks is above the elevation of the approaching roadway. This condition, generally the result of the periodic raising of the tracks for maintenance of the track bed, can affect sight distance for highway users and can become a hazard for trucks and trailers with low ground-clearance. This is also referred to as "hump crossings".
<b>highway/rail at-grade crossing:</b>	The general area of an intersection of a public or private road and a railroad where the intersecting rail and highway traffic are at the same level.

<b>historic property:</b>	Any prehistoric or historic district, site, building, structure, or object included in or eligible for inclusion in the National Register of Historic Places (NRHP). The term "eligible for inclusion in the NRHP" pertains to both properties that the Secretary of the Interior has formally determined to be eligible and to all other properties that meet NRHP listing criteria.
<b>horn noise (train):</b>	Noise that occurs when locomotives sound warning horns in the vicinity of highway/rail at-grade crossings.
<b>hours-of-service regulations:</b>	Federal Hours of Service Law, which Federal Railroad Administration enforces, governing maximum shift lengths and minimum rest periods for railroad operating employees. These employees include train crew, train dispatchers, and signal maintainers, as well as mechanical employees such as hostlers who move equipment for the purpose of test and inspection.
<b>Implementing Agreement:</b>	An agreement between a railroad company and an employee union regarding working conditions on a combined system, and specifying the corresponding seniority districts, work locations, and other terms and conditions of employment.
<b>Inconsistent and Responsive (IR) application:</b>	Proposal to the Surface Transportation Board that Parties of Record submitted prior to October 21, 1997, requesting modifications of, or alternatives to, the proposed Conrail Acquisition.
<b>Indian tribe:</b>	According to Indian Self-Determination and Education Assistance Act (25 U.S.C. 450-458; P.L. 93-638), any Indian tribe, band, nation, or other organized group or community recognized as eligible for the special programs and services that the United States provides to Indians because of their status as Indians.

<b>interchange point:</b>	Point at which two or more railroads join to exchange freight traffic.
<b>interlocking:</b>	An arrangement of switch, lock, and signal devices that is located where rail tracks cross, join, or separate. The devices are interconnected in such a way that their movements must succeed each other in a predetermined order, thereby preventing opposing or conflicting movements.
<b>intermodal facility:</b>	A site consisting of tracks, lifting equipment, paved and/or unpaved areas, and a control point for the transfer (receiving, loading, unloading, and dispatching) of trailers and containers between rail and highway, or between rail and marine modes of transportation.
<b>jurisdictional wetland:</b>	Wetlands that the U.S. Army Corps of Engineers regulates under Section 404 of the Clean Water Act (33 U.S.C. 1344).
<b>key route:</b>	For the purposes of this Final EIS, a rail line segment that carries an annual volume of 10,000 or more carloads of hazardous material.
<b>key train:</b>	Any train with five or more tank carloads of chemicals classified as a Poison Inhalation Hazard (PIH), or with a total of 20 rail cars with any combination of PIHs, flammable gases, explosives, or environmentally sensitive chemicals.
<b><math>L_{dn}</math>:</b>	The day-night average noise sound level, which is the receptor's cumulative noise exposure from all noise events over a full 24 hours. This is adjusted to account for the perception that noise at night is more bothersome than the same noise during the day.
<b><math>L_{eq(h)}</math>:</b>	The hourly energy-averaged noise level.

- labor relations culture:** Philosophy by which an employer and/or parties to a collective bargaining agreement conduct labor-management relations.
- land use consistency:** Determination of whether the proposed Conrail Acquisition represents a change that is consistent with local land use plans in effect, based on consultation with local and/or regional planning agencies and/or a review of the official planning documents that such agencies have prepared.
- Level of Service (LOS):** A measure of the operational efficiency of a roadway vehicle traffic stream using procedures that consider factors such as vehicle delay, freedom to maneuver, traffic interruptions, comfort and convenience, and safety. Traffic analysts express LOS as letter grades, ranging from Level of Service A (free flowing) to Level of Service F (severely congested); they measure LOS by the average delay for all vehicles. Specifically, Level of Service A describes operations with very low delay (less than 5.0 seconds per vehicle); Level of Service B describes operations with delay in the range of 5.1 to 15.0 seconds per vehicle; Level of Service C describes operations with delay in the range of 15.1 to 25.0 seconds per vehicle; Level of Service D describes operations with delay in the range of 25.1 to 40.0 seconds per vehicle; Level of Service E describes operations with delay in the range of 40.1 to 60.0 seconds per vehicle; and Level of Service F describes operations with delay in excess of 60.0 seconds per vehicle.
- low-income population:** A population composed of persons whose median household income is below the Department of Health and Human Services poverty guidelines.
- maintenance area:** An area classified by EPA as meeting National Ambient Air Quality Standards (NAAQS) and which previously (within the last 10 years before reclassification) did not meet NAAQS.

<b>maintenance-of-way:</b>	The activity of maintaining the track and structures of a railroad.
<b>major key route:</b>	For the purposes of this Final EIS, a rail line segment where the annual volume of hazardous material it carries is projected to double and also exceed 20,000 carloads as a result of the proposed Conrail Acquisition.
<b>Mechanical Department:</b>	Department of the railroad primarily responsible for the maintenance and inspection of locomotives, freight cars, and other moving equipment.
<b>Memorandum of Agreement (MOA):</b>	With regard to cultural resources for the Final EIS, a legally binding document executed under 36 CFR 800.5(e)(4) that either specifies the process a Federal agency will undertake in order to avoid, reduce, or mitigate adverse effects on historic properties by the implementation of a proposed action, or documents the acceptance of such effects in the public interest. The parties who sign a MOA generally include the lead agency, the State Historic Preservation Office, the Advisory Council on Historic Preservation, and sometimes other interested parties.
<b>Memorandum of Understanding (MOU):</b>	An agreement that two or more parties execute that sets forth the specific duties and responsibilities of each party. For the purposes of this Final EIS, MOU is an agreement that the Applicants may negotiate with communities.
<b>minority population:</b>	A population composed of persons who are Black (non-Hispanic), Hispanic, Asian American, American Indian, or Alaskan Native.
<b>mitigation:</b>	An action taken to prevent, reduce, or eliminate adverse environmental effects.

<b>motive power:</b>	Locomotives operated by the railroad.
<b>multi-level rail car:</b>	A two- or three-level freight car, designed for transporting automotive vehicles.
<b>Multiple Resource Score (MRS):</b>	For the Environmental Justice analysis, a measure of aggregate impacts used to identify the geographic areas of greatest concern. This score sums the environmental resource scores for hazardous materials transport, noise, and traffic safety and delay and forms the basis for the tests for disproportionality.
<b>National Ambient Air Quality Standards (NAAQS):</b>	Air pollutant concentration limits established by the EPA for the protection of human health, structures, and the natural environment.
<b>National Environmental Policy Act (NEPA):</b>	The National Environmental Policy Act of 1969, as amended (42 U.S.C. 4321-4347; P.L. 91-190) is the basic national charter for the protection of the environment. It establishes policy, sets goals, and provides means for carrying out the policy. Its purpose is to provide for the establishment of a Council on Environmental Quality and to instruct Federal agencies on what they must do to comply with the procedures and achieve the goals of NEPA.
<b>National Historic Preservation Act (NHPA):</b>	The National Historic Preservation Act of 1966, as amended (16 U.S.C. 470-470t <i>et seq.</i> ; P.L. 89-665), is the basic legislation of the Nation's historic preservation program that established the Advisory Council on Historic Preservation and the Section 106 review process. Section 106 of the NHPA requires every Federal agency to "take into account" the effects of its undertakings on historic properties.

**National Priorities List (NPL):**

A subset of CERCLIS; EPA's list of the most serious uncontrolled or abandoned hazardous waste sites identified for possible long-term remedial action under the Superfund Program.

**National Register of Historic Places (NRHP):**

Administered by the National Park Service, the Nation's master inventory of known historic properties, including buildings, structures, sites, objects, and districts that possess historic, architectural, engineering, archaeological, or cultural significance at the Federal, state, and local levels.

**Native American:**

According to the Native American Graves Protection and Repatriation Act of 1990, as amended (25 U.S.C. 3001 *et seq.*; P.L. 101-601), of, or relating to, a tribe, people, or culture that is indigenous to the United States.

**Native American lands:**

According to the regulations of the Advisory Council on Historic Preservation in 36 CFR 800.2, as modified by the scope of this EIS, all lands under the jurisdiction or control of an Indian tribe, including all lands within the exterior boundaries of any American Indian reservation.

**Negotiated Agreement:**

An agreement between CSX, NS, or both, and one or more communities or other governmental units that addresses potential environmental impacts or other issues.

**No-Action Alternative:**

The proposed acquisition of Conrail by CSX and NS does not take place under this alternative; also the present setting for the pre-Acquisition conditions.

<b>noise:</b>	A disturbance or annoyance of an intruding or unwanted sound. Noise impacts essentially depend on the amount and nature of the intruding sound, the amount of background sound already present before the intruding or unwanted sound occurred, and the nature of working or living activity of the people occupying the area where the sound occurs.
<b>noise contour:</b>	Lines plotted on maps or drawings connecting points of equal sound levels.
<b>noise-sensitive receptor:</b>	Location where noise can interrupt ongoing activities and can result in community annoyance, especially in residential areas. The Board's environmental regulations include schools, libraries, hospitals, residences, retirement communities, and nursing homes as examples of noise-sensitive receptors.
<b>nonattainment area:</b>	An area that EPA has classified as not complying with the National Ambient Air Quality Standards promulgated under the Clean Air Act.
<b>Northeast Corridor (NEC):</b>	Railroad right-of-way between Boston, Massachusetts and Washington, D.C. on which Amtrak and others operate; Amtrak is responsible for operation and maintenance on all of the route, except the route segment between New Haven, Connecticut and New Rochelle, New York.

**Northeast Operating Rules:**

Rules that govern railroad operations, adapted by members of the Northeast Operating Rules Advisory Committee (NORAC). These operating rules apply to all railroads when working on any NORAC member's territory. The NORAC members are Bay Colony Railroad, Conrail Inc. and Consolidated Rail Corporation (Conrail), Delaware & Hudson Railway company, Guildford Transportation Industries, National Railroad Passenger Corporation (Amtrak), New Jersey Transit (NJT), New York Susquehanna & Western Railway Corporation, Providence & Worcester Railroad Company, and Southeastern Pennsylvania Transportation Authority (SEPTA).

**notices:**

Documents addressed to engineers and other operating employees detailing temporary or local operating rules and restrictions.

**on-track (maintenance) equipment:**

Track and other maintenance equipment provided with flanged wheels and able to move along railroad track.

**operating employee:**

Railroad employee engaged in the operation of trains, including a member of the train crew; a train dispatcher; and a track, a signal, and an equipment maintenance employee.

**Operating Plans:**

Documents that CSX and NS provided as part of the Application, detailing their planned railroad operations following the proposed Conrail Acquisition.

**operating practices:**

Safety and operating rules, practices, and procedures contained in operating rulebook, timetable, special instructions, or any other company-issued instructions and the management decisions implementing those rules and instructions that govern the movement of trains and work on or around active tracks.

- operating rules:** Written rules of a railroad governing the operation of trains and the conduct of employees responsible for train operations when working on or around active tracks.
- Operation Lifesaver:** A non-profit public information and safety education program dedicated to eliminating collisions, deaths, and injuries at highway/rail at-grade crossings and on railroad rights-of-way. It is composed of a broad-based coalition of Federal, state, and local government agencies, private safety groups, and transportation industry representatives.
- particulate matter (PM):** Airborne dust or aerosols.
- Party of Record (POR):** Party that notified the Board of their active participation in the proceeding about the proposed Conrail Acquisition. When submitting a filing to the Board, the POR must also notify the entire POR service list.
- passive warning devices:** Traffic control devices that do not give positive notice to highway users of the approach or presence of a train. These devices may include signs and pavement markings, located at, or in advance of, railroad crossings to indicate the presence of a crossing and the presence of a train. These signs are either regulatory or non-regulatory and may include parallel track signs, crossbucks, stop signs, yield signs, and constantly flashing lights.
- positive train separation:** Mechanism included in positive train control, an experimental, automated safety system, using Global Positioning System (GPS) technology, onboard computers and wayside information inputs to control train movement. In the event of failure on the primary safety system, positive train control reduces the risk of single-point failure (that is, human error).

<b>posted speed:</b>	Maximum speed permitted at a specific location on the railroad network irrespective of train type.
<b>Prevention of Significant Deterioration (PSD) Class I Areas:</b>	National parks and wilderness areas designated under the Clean Air Act as areas for which users are to maintain air quality at pristine levels, with very small increases in air pollution levels allowed.
<b>Primary Application:</b>	The formal filing of documents with the Surface Transportation Board by applicants for railroad mergers, acquisitions, constructions, or abandonments. The Primary Application contains Operating Plans and information describing related construction projects. It also includes an Environmental Report, describing the physical and operational changes associated with the proposed action and the potential environmental effects of that action.
<b>prime farmland:</b>	According to Natural Resources Conservation Service, land having the best combination of physical and chemical characteristics for producing food, feed, forage, fiber, and oilseed crops.
<b>proposed Conrail Acquisition:</b>	The proposed acquisition of Conrail's physical assets and operating systems by CSX and NS, for which the Applicants are seeking approval from the Board.
<b>public uses:</b>	According to 49 U.S.C. 10905 and STB Regulations "Surface Transportation Manual," Section 1105.7(3)iv, those identified alternative public purposes for the use of rail properties proposed for abandonment or discontinuance, including highways, other forms of mass transportation, conservation, energy production or transmission, or recreation.
<b>queue:</b>	A line of vehicles waiting at a highway/rail at-grade crossing for an obstruction to clear.

<b>rail line segment:</b>	For the purposes of this Final EIS, portions of rail lines that extend between two terminals or junction points.
<b>rail route:</b>	Line of railroad track between two points on a rail system.
<b>rail spur:</b>	A railroad track that typically connects to the main line at only one end and provides rail service to one or more railroad freight customers. A rail spur could also parallel the main line.
<b>rail yard:</b>	A location or facility with multiple tracks where rail operators switch and store rail cars.
<b>receptor:</b>	See <i>noise-sensitive receptor</i> .
<b>regional and system gang:</b>	A group of railroad maintenance-of-way employees that work a particular region or an entire railroad system.
<b>remediation (remedial actions):</b>	Actions taken to mitigate the adverse effects, or potential adverse effects, to the environmental or to the public health and welfare resulting from the release or spill of hazardous substances.
<b>Request for Conditions:</b>	A document filed with the Board by a party to this proceeding on or before October 21, 1997, that requests the Board to impose one or more specified requirements on the Applicants as a condition to the Board's approval of the proposed Conrail Acquisition.
<b>Resource Conservation and Recovery Act (RCRA):</b>	The Resource Conservation and Recovery Act of 1976 (42 U.S.C. 6901 <i>et seq.</i> ; P.L. 94-580) is a Federal act governing the generating, storing, transporting, treating, and disposing of hazardous waste.

**Resource Conservation  
and Recovery  
Information System  
(RCRIS):**

Federal database containing information on facilities that generate, transport, store, treat, and/or dispose of hazardous waste.

**Responsive  
Environmental Report  
(RER):**

A report, submitted by an Inconsistent and Responsive applicant, that contains detailed environmental information regarding the activities proposed in its IR Application and complies with the requirements for environmental reports in the Board's rules at 49 CFR 1105.7(e).

**restricted speed:**

A speed that will permit a train to stop within one-half the range of vision of the railroad employee controlling the movement of the train; the train must stop before passing improperly aligned switches, a defect in the track structure, deliberately placed objects, or striking other railroad equipment. According to Federal Railroad Administration regulations, this speed is not to exceed 20 miles per hour.

**retarder:**

In railroad yards, a braking device, usually power-operated, built into a railroad track to reduce the speed of cars by means of brake-shoes which, when set in braking position, press against the sides of the lower portions of the wheels.

**right-of-way:**

The strip of land for which an entity (for example, a railroad) has a property right to build, operate, and maintain a linear structure (for example, a rail line).

**roadmaster:**

Railroad supervisor responsible for track inspection and maintenance over a specified portion of the railroad network.

**Safety Assurance and  
Compliance Program  
(SACP):**

Federal Railroad Administration program to audit railroad safety practices and to ensure compliance with Federal regulations.

<b>safety culture:</b>	The manner in which management and employees in an organization view and approach the issue of safety, including both formalized rules and informal practices in the organization.
<b>Safety Implementation Plan Guidelines (SIPG):</b>	A series of acquisition-related guidelines that the Federal Railroad Administration developed for CSX and NS, detailing a list of safety concerns that CSX and NS must address in their Safety Integration Plans.
<b>Safety Integration Plans:</b>	Plans that the Applicants prepared and submitted to the Board to explain how they propose to provide for the safe integration of their separate corporate cultures and operating systems, if the Board approves the proposed Conrail Acquisition.
<b>Section 106 review process:</b>	The review process set forth in Section 106 of the NHPA (16 U.S.C. 470) that requires every Federal agency to "take into account" the effects of its undertakings on historic properties and affords the ACHP the opportunity to comment on those undertakings and their effects.
<b>seniority district:</b>	A geographic area within which a group of employees in a specific labor union (for example, engineers, dispatchers) are authorized and expected to work.
<b>seniority rights:</b>	The priority one employee has over another employee in bidding for available positions, choice of work assignments, and similar matters, based on length of employment in a specified category. Agreements between railroad companies and labor unions specify such rights.
<b>sensitive receptor:</b>	See <i>noise-sensitive receptor</i> .

- separated grade crossing:** The site where a local street or highway crosses railroad tracks at a different level or elevation, either as an overpass or as an underpass.
- service:** The official notification and delivery of Board decisions and notices (including EAs and EISs) by the Secretary of the Board to persons involved in a particular proceeding.
- Settlement Agreement:** An agreement negotiated between CSX or NS or both and one or more parties, including other railroads, that addresses concerns or requests of the party (or parties). Generally, such an agreement addresses competitive customer service or labor issues.
- Seven Separate Connections:** Seven new rail line connection construction projects in Illinois, Indiana, and Ohio. These projects total approximately 4 miles of new track. CSX and NS requested that the Board give early consideration and approval to the physical construction of these particular connections.
- Shared Assets Areas:** Areas comprising Conrail facilities in southeastern Michigan, northern New Jersey, and southern New Jersey/Philadelphia that CSX and NS would share and Conrail Shared Assets Operations would operate for the benefit of both CSX and NS, if the Board approves the proposed Conrail Acquisition.
- shifted load:** An improperly secured freight car load that has moved and may protrude beyond the allowed dimensional limits.
- shipment:** A unit of freight given to the railroad for movement to its destination by an individual customer.

<b>siding:</b>	A track parallel to a main track that is connected to the main track at each end. A siding is used for the passing and/or storage of trains.
<b>signal maintainer:</b>	Railroad employee who maintains signal and communications systems.
<b>socioeconomic:</b>	For this Final EIS, job loss directly attributable to changes in the physical environment as a result of construction and abandonment activities and other activities related to the proposed Conrail Acquisition project.
<b>Sound Exposure Level (SEL):</b>	For a transient noise event such as a passing train, equivalent to the maximum A-weighted sound level that would occur if all of the noise energy associated with the event were restricted to a time period of 1 second. The SEL accounts for both the magnitude and the duration of the noise event; noise analysts use SEL to calculate the day-night average noise level.
<b>Spill Prevention, Control, and Countermeasures Plan (SPCCP):</b>	A site-specific document written to detail measures to prevent discharges of oil into waters of the United States (as defined in the Clean Water Act). Facilities with aboveground storage capacities in a single container greater than 660 gallons, or the aggregate aboveground storage capacity greater than 1,320 gallons, or total underground storage capacity greater than 42,000 gallons are required to prepare SPCCPs.
<b>superior train:</b>	For purposes of this Final EIS, a passenger train operating on the same track network with freight trains. Superior trains must have track clear of all trains not less than 15 minutes prior to their arrival. See <i>temporal train separation</i> .

<b>Supplemental Environmental Report:</b>	A report that analyzes the environmental impacts of operating changes related to a Settlement Agreement between an Applicant and another railroad that exceed the Board's thresholds when added to changes proposed in the Applicants' Operating Plans.
<b>switch:</b>	The portion of the track structure used to direct cars and locomotives from one track to another.
<b>switching:</b>	The activity of moving cars from one track to another in a yard or where tracks go into a railroad customer's facility.
<b>temporal train separation:</b>	The time separation of passenger trains that share rail lines with freight trains, in order to reduce the possibility of train collisions. See <i>superior train</i> .
<b>territory:</b>	The portion of a railroad's track network under the management of a particular supervisor.
<b>threatened species:</b>	A species that is likely to become endangered within the foreseeable future throughout all or part of its range. Federal and state laws protect these species.
<b>threshold for environmental analysis:</b>	A level of proposed change in railroad activities that determines the need for SEA's environmental review. For the proposed Conrail Acquisition, SEA used the Board's environmental rules at 49 CFR Part 1105 to determine the activities that it would examine for air and noise impacts ("Board thresholds"). For other issue areas, SEA developed appropriate thresholds to guide its environmental review ("SEA thresholds"). The term "Board thresholds", as used in this EIS, may refer to either Board or SEA thresholds.

<b>timetable:</b>	A document that identifies key railroad line features over a defined portion of the network. The features usually include distances, speed limits, track layout, type of signaling, location and length of passing sidings, and the local applicability of specific operating rules. Operating rules are often published with the timetable.
<b>track geometry:</b>	Dimensional description of railroad track and individual rails compared to optimal design criteria.
<b>track geometry inspection car:</b>	Rail vehicle equipped with instruments to make continuous, in-motion measurements of variations in the track gauge, alignment, and cross level.
<b>trackage right(s):</b>	The right (or combination of rights) of one railroad to operate over the designated trackage of another railroad including, in some cases, the right to operate trains over the designated trackage; the right to interchange with all carriers at all junctions, the right to build connections or additional tracks to access other shipper or carriers. See also <i>haulage right(s)</i> .
<b>trackage rights agreement:</b>	An agreement between two parties that defines the trackage rights granted to one party over the tracks of a second party.
<b>traffic volume (highway):</b>	The number of highway vehicles that pass over a given point during a given period of time, often expressed on an annual, daily, hourly, and sub-hourly basis. For the purposes of this Final EIS, SEA expressed highway traffic volumes on a daily basis.
<b>traffic volume (rail):</b>	The total volume of rail traffic that passes over a given rail line segment, typically expressed in either trains per day or annual million gross tons per year.

<b>train (freight):</b>	A conveyance transported by one or more locomotives typically with 40 to 150 freight cars, measuring approximately 5,000 to 8,000 feet in length. For the purposes of this Final EIS, does not apply to locals, work trains, switch-engine movements, or engine-only movements.
<b>train (passenger):</b>	Equipment composed of one or more rail cars designed to carry passengers, propelled by a locomotive or self-propelled, moving from one place to another.
<b>train crew:</b>	Employees assigned to operate a train, usually an engineer, a conductor, and one or more trainmen.
<b>train defect detector:</b>	An electronic device located alongside a rail track that monitors passing trains to determine the presence of certain potentially dangerous conditions, such as an overheated wheel bearing ("hot box") or a shifted load that protrudes from the rail car.
<b>trainman:</b>	Member of a train crew responsible for assisting the engineer and conductor in operating the train, especially with switching cars.
<b>trainmaster:</b>	Railroad operations supervisor responsible for managing train and yard operations and operating employees on a defined portion of the railroad network.
<b>transient noise event:</b>	An intermittent occurrence of noise, such as the passing of a train that generates such noise.
<b>Transportation Department:</b>	Department of the railroad responsible for day-to-day train operations and dispatching.

**Triple Crown Service (TCS):**

An expedited intermodal service offered by both Conrail and NS. TCS trains do not require the use of flat cars, but rather use specially designed dual-mode highway trailers that are coupled together with two-axle rail wheel sets that support the ends of the trailers for the rail portion of the rail-highway movement. The equipment used is similar to "RoadRailer" equipment.

**turnout:**

The portion of railroad track structure where a single track divides into two tracks.

**Verified Statement:**

A party's sworn statement that provides information to the Board.

**vibration velocity:**

The rate of change of displacement of a vibration. Noise analysts often express measurements of vibration in terms of velocity because velocity correlates well with human response to vibration.

**waybill:**

Document or computer record containing details of a rail shipment: origin, destination, route, commodity, freight rate, car or cars used, and similar information.

**wayside:**

Adjacent to the railroad track, as in "wayside signals" or "wayside defect detectors."

**wayside noise:**

Train noise adjacent to the right-of-way that comes from sources other than the horn, such as engine noise, exhaust noise, and noise from steel train wheels rolling on steel rails.

**wetlands:**

According to 40 CFR Part 230.41, those "areas that are inundated or saturated by surface or ground water at a frequency and duration sufficient to support, and that under normal circumstances do support, a prevalence of vegetation typically adapted for life in saturated soil conditions," generally including swamps, marshes, bogs, and similar areas.

**yardmaster:**

Railroad operations supervisor responsible for railroad operations and employees in a railyard.

<b>CONTENTS OF CHAPTER 4 .....</b>	<b>4-i</b>
------------------------------------	------------

<b>CHAPTER 4: SUMMARY OF ENVIRONMENTAL REVIEW .....</b>	<b>4-1</b>
---	------------

4.1	BACKGROUND .....	4-1
4.1.1	Framework of SEA's Analysis .....	4-2
4.1.2	Additional Activities Resulting in Refinements to the Draft EIS .....	4-3
4.2	SAFETY: HIGHWAY/RAIL AT-GRADE CROSSINGS .....	4-5
4.2.1	Analysis Methods .....	4-5
4.2.2	Public Comments and Additional Evaluations .....	4-6
4.2.3	Analysis Results and Impacts .....	4-8
4.2.4	Mitigation .....	4-8
4.3	SAFETY: HAZARDOUS MATERIALS TRANSPORT .....	4-10
4.3.1	Analysis Methods .....	4-11
4.3.2	Public Comments and Additional Evaluations .....	4-12
4.3.3	Analysis Results and Impacts .....	4-13
4.3.4	Mitigation .....	4-15

**Volume 2 Continued**

4.4	SAFETY: PASSENGER RAIL OPERATIONS .....	4-18
4.4.1	Analysis Methods .....	4-18
4.4.2	Public Comments and Additional Evaluations .....	4-19
4.4.3	Analysis Results and Impacts .....	4-20
4.4.4	Mitigation .....	4-21
4.5	SAFETY: FREIGHT RAIL OPERATIONS .....	4-22
4.5.1	Analysis Methods .....	4-22
4.5.2	Public Comments and Additional Evaluations .....	4-23
4.5.3	Analysis Results and Impacts .....	4-24
4.5.4	Mitigation .....	4-25
4.6	TRANSPORTATION: PASSENGER RAIL SERVICE .....	4-26
4.6.1	Analysis Methods .....	4-26
4.6.2	Public Comments and Additional Evaluations .....	4-28
4.6.3	Analysis Results and Impacts .....	4-28
4.6.4	Mitigation .....	4-28
4.7	TRANSPORTATION: HIGHWAY/RAIL AT-GRADE CROSSING DELAY .....	4-29
4.7.1	Analysis Methods .....	4-29
4.7.2	Public Comments and Additional Evaluations .....	4-31
4.7.3	Analysis Results and Impacts .....	4-32
4.7.4	Mitigation .....	4-33
4.7.5	Delay of Emergency Vehicles .....	4-35
4.8	TRANSPORTATION: ROADWAY SYSTEMS .....	4-38
4.8.1	Analysis Methods .....	4-38
4.8.2	Public Comments and Additional Evaluations .....	4-40
4.8.3	Analysis Results and Impacts .....	4-41
4.8.4	Mitigation .....	4-42
4.9	TRANSPORTATION: NAVIGATION .....	4-43
4.9.1	Analysis Methods .....	4-43
4.9.2	Public Comments and Additional Evaluations .....	4-43
4.9.3	Analysis Results and Impacts .....	4-44
4.9.4	Mitigation .....	4-45
4.10	ENERGY .....	4-45
4.10.1	Analysis Methods .....	4-45
4.10.2	Public Comments and Additional Evaluations .....	4-47
4.10.3	Analysis Results and Impacts .....	4-48
4.10.4	Mitigation .....	4-49

**Volume 2 Continued**

4.11	AIR QUALITY .....	4-50
4.11.1	Analysis Methods .....	4-52
4.11.2	Public Comments and Additional Evaluations .....	4-55
4.11.3	Analysis Results and Impacts .....	4-61
4.11.4	Mitigation .....	4-63
4.12	NOISE .....	4-63
4.12.1	Analysis Methods .....	4-64
4.12.2	Public Comments and Additional Evaluations .....	4-65
4.12.3	Analysis Results and Impacts .....	4-68
4.12.4	Mitigation .....	4-69
4.13	CULTURAL RESOURCES .....	4-72
4.13.1	Analysis Methods .....	4-72
4.13.2	Public Comments and Additional Evaluations .....	4-73
4.13.3	Analysis Results and Impacts .....	4-73
4.13.4	Mitigation .....	4-75
4.14	HAZARDOUS WASTE SITES .....	4-77
4.14.1	Analysis Methods .....	4-77
4.14.2	Public Comments and Additional Evaluations .....	4-78
4.14.3	Analysis Results and Impacts .....	4-79
4.14.4	Mitigation .....	4-80
4.15	NATURAL RESOURCES .....	4-81
4.15.1	Analysis Methods .....	4-81
4.15.2	Public Comments and Additional Evaluations .....	4-83
4.15.3	Analysis Results and Impacts .....	4-84
4.15.4	Mitigation .....	4-84
4.16	LAND USE AND SOCIOECONOMICS .....	4-86
4.16.1	Analysis Methods .....	4-87
4.16.2	Public Comments and Additional Evaluations .....	4-88
4.16.3	Analysis Results and Impacts .....	4-89
4.16.4	Mitigation .....	4-90
4.17	ENVIRONMENTAL JUSTICE .....	4-91
4.17.1	Analysis Methods .....	4-92
4.17.2	Public Comments and Additional Evaluations .....	4-94
4.17.3	Analysis Results and Impacts .....	4-97
4.17.4	Mitigation .....	4-99
4.18	CUMULATIVE EFFECTS .....	4-102
4.18.1	Analysis Methods .....	4-103
4.18.2	Public Comments and Additional Evaluations .....	4-106
4.18.3	Analysis Results and Impacts .....	4-108
4.18.4	Mitigation .....	4-110

**Volume 2 Continued**

4.19	COMMUNITY EVALUATIONS .....	4-110
4.19.1	Greater Cleveland Area, Ohio .....	4-111
4.19.2	Erie, Pennsylvania .....	4-143
4.19.3	Four City Consortium, Indiana .....	4-150
4.19.4	Lafayette, Indiana .....	4-157
4.20	INCONSISTENT AND RESPONSIVE APPLICATIONS AND REQUESTS FOR CONDITIONS .....	4-163
4.21	SETTLEMENT AGREEMENTS AND NEGOTIATED AGREEMENTS .....	4-170
4.21.1	Settlement Agreements .....	4-170
4.21.2	Negotiated Agreements .....	4-173
4.22	ANTICIPATED ENVIRONMENTAL BENEFITS .....	4-174
4.22.1	Energy Efficiency and Consumption .....	4-175
4.22.2	Air Quality .....	4-175
4.22.3	Hazardous Materials Transportation .....	4-175
4.22.4	Transportation Safety .....	4-176
4.23	SUMMARY OF ADVERSE ENVIRONMENTAL IMPACTS .....	4-174

**FIGURES**
