Sept 21, 1977

Dear Congressman Kucinich,

Thank you for allowing me to express my opinion on the train's proposal to increase its number of trips through the western suburbs of Cleveland. I'm undecided. I'll be directly adversely affected by an increased number of trains, because I rent only 100 yards away from the tracks, and trains are noisy; there's also no crossing gates on Third Ave. between Clifton and Detroit. As I said, I rent; I also have no children. I'm concerned, however, about the economic impact of attempting to block the train company from increasing the number of trains as well as the subsidiary economic benefits gained from increased train traffic (would there be job creation? Railroad jobs used to be really nice paying jobs; would there be a loss of potential jobs? Sorry,

Yours truly
David Benay
11811 South Lane #3 Huron

SURVEY ON INCREASED TRAIN TRAFFIC

Dear Congressman Kucinich:

☒ I agree with the train companies' plan to triple the number of trains travelling the tracks in Westlake because it is good for business.

☐ I disagree with the train companies' plan to triple the number of trains travelling the tracks in Westlake.

I believe increased train traffic could mean increased noise pollution, more delays where streets intersect railroad tracks, greater possibility of dangerous collisions, and decreased property values for our community.

The tracks were there long before the people + homes. They chose to live near the tracks. Train companies should not be punished.

Sincerely,
Print Name: Mary Lynn Jensen

SURVEY ON INCREASED TRAIN TRAFFIC

Dear Congressman Kucinich:

- ☐ I agree with the train companies' plan to triple the number of trains travelling the tracks in the West Shore area because it is good for business.
- ☒ I disagree with the train companies' plan to triple the number of trains travelling the tracks in the West Shore area. I believe increased train traffic could mean increased noise pollution, more delays where streets intersect railroad tracks, greater possibility of dangerous collisions, and decreased property values for our community.

Sincerely,

Message

Imagine if there were 1,161 deaths in Northeast Ohio each year as a result of homicide. The outcry would be deafening. Yet in Northeast Ohio, there are that many premature deaths attributable to air pollution each year. Air pollution also has been linked to higher infant mortality rates. Northeast Ohio ranks fifth in the nation for having an increased number of infant deaths related to air pollution.

In response to the growing evidence that current levels of air pollution are dangerous, the Environmental Protection Agency (EPA) proposed tougher air quality standards. I wholeheartedly support sensible, health-based air quality standards, so I led the House of Representatives in support of the EPA's proposal, which was approved on June 24, 1997.

Despite the overwhelming evidence that the air needs to be cleaner, critics of the new standards have spread myths about these new air pollution regulations. I would like to address some of these myths.

See EPA continued on back

Trains pass close to homes in many residential areas of the West Shore.

The Federal Railroad Administration will hold a meeting in the West Shore area so local residents and representatives of hospitals, firefighters and the police can testify. The event is scheduled for Sunday, September 21 at 2:00 PM at Lakewood City Hall, 12650 Detroit Avenue. The public is invited and urged to attend.

The Norfolk Southern railroad company has announced that it will triple the number of freight trains running through Cleveland and the western suburbs of Lakewood, Rocky River, Bay Village, and Westlake. I will do everything possible to prevent the increased freight train traffic.

Norfolk Southern's proposal could affect the quality of life in the West Shore area, disrupting many quiet, residential communities like Lakewood. A tripling of train traffic could cause problems for emergency paramedics, firefighters and the police. And this is to say nothing of the noise, dirt, increase in hazardous materials coming through the area and a possible decrease in property values.

You are encouraged to bring written testimony about how this proposed increase in freight traffic will affect you and your family. If you would like to express your opinion at the hearing, please call or write the Lakewood Congressional office at (216) 228-8850, 14400 Detroit Ave., Lakewood, OH 44107.

Please complete and return the survey below to share your opinion on this plan. I will share the results of this survey with my colleagues and the Surface Transportation Board. This is your chance to make your voice heard.

Dear Sir,

This letter is in reference to
the proposed increase railroad use.

Lakewood is a small residential area
What we have now is about all
that this small area can accommodate
So increase the railway usage would
greatly increase the chance for many
accidents

I strongly oppose this proposal

Sincerely
Bill Ketherfield
1564 Northland
Lakewood Ohio

Sept 21, 1997

Dear Congressman Kucinich,

Thank you for allowing me to express my opinion on the train's proposal to increase its number of trips through the western suburbs of Cleveland. I'm undecided. I'll be directly adversely affected by an increased number of trains, because I rent only 100 yards away from the tracks, and trains are noisy; there's also no crossing gates on Third Ave. between Clifton and Detroit. As I said, I rent; I also have no children. I'm concerned, however, about the economic impact of attempting to block the train company from increasing the number of trains as well as the subsidiary economic benefits gained from increased train traffic (would there be job creation? Railroad jobs used to be really nice paying jobs; would there be a loss of potential jobs? Sorry,

Yours truly

David Benay

Mr. John Cavalier
415 Walmar Rd
Bay Village, Ohio 44140-1519

Dear Mr. Cavalier:

Thank you very much for your interest in the Norfolk Souther/CSX merger issue. As we discussed on the telephone this afternoon, a letter from you in your capacity as Director of Business and Fiscal Services with the Bay Village School System will be an important part of the case we are making before the Surface Transportation Board's Section on Environmental Analysis.

The deadline for submission for input into the Draft Environmental Impact Statement is October 1. This office has a deadline of September 30 to get all applicable information to the Congressman for the package that he will deliver to the Board. Therefore, your prompt attention to this matter is important.

The letter should state the issues that you discussed with me on the telephone. In particular, the letter should state the impact on increased train traffic would have on the school system's ability to transport schoolchildren to emergency facilities when necessary. Any examples you know of will be important to include.

Please FAX the letter to me at 216/228-6465 and address the letter to:

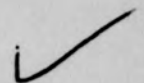

U.S. Surface Transportation Board
ATTN: SEA-Finance Docket 33388
1925 K Street, NW
Washington, DC 20423

Thank you again for your interest in this. I look forward to your letter. If you have any questions, please call me at 216/228-8850.

Sincerely,

Martin D. Gelfand
District Office Congressional Staff

SURVEY ON INCREASED TRAIN TRAFFIC

Dear Congressman Kucinich:

☐ I agree with the train companies' plan to triple the number of trains travelling the tracks in the West Shore area because it is good for business.

☒ I disagree with the train companies' plan to triple the number of trains travelling the tracks in the West Shore area. I believe increased train traffic could mean increased noise pollution, more delays where streets intersect railroad tracks, greater possibility of dangerous collisions, and decreased property values for our community.

Sincerely,

Print Name:

The train companies want to get the public stirred up to force the government to pay for relocating tracks through Berea. Sincerely, where the trains can move at 55 miles per hour instead of 35 mph. Then see the obsolete single track to RTA, then they would get financial resources without investing their own money.

1292 St. Charles Avenue
Lakewood, Ohio 44107
September 20, 1997

The Rt. Hon. Dennis J. Kucinich
14400 Detroit Avenue
Lakewood, Ohio 44107

Dear Mr. Kucinich:

My family and I would like to express our deep concern over the Norfolk & Southern Railroad Company's recent announcement that freight train traffic on the line that transgresses our neighborhood may soon triple in quantity. Two years ago we chose to purchase our first home in Lakewood because of the quality of life this city has to offer, and its well-known 'old-time neighborhood' character. At that time we gave little thought to safety threats posed by the train tracks that lie seven houses away from ours.

...noisy and inconvenient, but the many advantages of our house's abilities. I would like to share with you three two years which have changed my mind. Please use make NS and the Federal Railroad Administration ses.

Children

...four years old. Like many kids, they were fascinated by the train tracks to watch them go past. Like most of the crosses or barriers around the tracks, so we placed a strict limit on getting - marked by a large tree about three houses away. Our kids obeyed this limit and after a while my wife and I felt that the tree. Instead we would stay back and watch the train go by. I thought that any rational animal would have a natural aversion to the tracks, and would stay away on instinct. I was wrong. Our neighbors' three-year-old girl Samantha accompanied our train on its daily roar by. Samantha's father and I stood in front of

KIDS TO THE CROSSING
our house (seven houses from the track) and chatted. The three kids stood there for a while, and then, with no warning and for no apparent reason, Samantha broke into a full run toward the moving train. Her father and I sprinted toward her, shouting at her, but she didn't hear. When her father finally caught her, she was about twenty feet from the train and still heading toward it at full speed.

2. This past spring we came home from church on a Sunday to find a train had stopped at the crossing on our street, and a crowd was forming around it. My wife walked over to see what was happening, and learned that a man had committed suicide by laying on the tracks two blocks away on Marlowe Avenue. As the train sat there for several hours, a group of neighborhood kids, ages about 6 to 12, were walking around it. Several of them claimed they had witnessed the suicide, and gave her a full account of

Lakewood, Ohio 44107

Dear Mr. Kucinich,

I recently received the Bay Village Community Report which discussed the much publicized increase in train traffic that has been proposed by Norfolk Southern. Please include this letter in your efforts to fight this increase in train traffic.

While the many areas that deal with safety are reason enough alone to make this a worthwhile fight, I cannot imagine what the potential damage will be to property values. The old adage in the real estate world when discussing the value of property is that there are three things that determine its value: location, location, location. Anyone living near those tracks is sure to be impacted negatively should they want or need to sell their home. Even a community like Bay Village that has maintained high property values and is still a very desirable place to live will be impacted. Anyone thinking of moving on the west side will begin to weigh the potential negative issues when purchasing a home in any community along the tracks. I really enjoy living in this community. My wife and children and I have been here for five years. We hope to move to a larger home in the next five years. I will consider another community if the train traffic has or will have increased by the time I am ready for a move. This train traffic situation is a long term proposition. If Norfolk Southern is able to increase their usage of the tracks it will be difficult to ever force their hand in reducing this usage, especially as time goes on.

Please feel free to contact me with any questions. Your efforts in fighting the train traffic are appreciated.

Sincerely,

David A. Walters

Paper Converters, Inc.

September 19, 1997

Jolene Molitoris
Administrator
Federal Railroad Administration
400 Seventh Street NW
Washington DC 20590

Dear Ms. Molitoris:

B & B Paper is in the business of converting and distributing newsprint paper to small newspapers throughout a 4-state area.

Newsprint is a commodity item that is shipped by rail from northern Canada. In most instances, trucks are not available so you can see our heavy dependency upon the rail.

If, for any reason, the proposed merger would eliminate our spur line, it would cause a serious hardship problem causing us (at great expense) to relocate..

The way we are serviced by Conrail now suits us just fine. We would strenuously object to any change in this methodology.

Sincerely

John J. Jazwa

JJ/ldb

cc: Anita Brindza Webco
Congressman Dennis Kucinich

**STATEMENT TO THE FEDERAL RAILROAD ADMINISTRATION
SEPTEMBER 21, 1997**

**BY:
WESTERN-ELMWOOD-BEREA CORPORATION (WEBCO)
Anita R. Brindza, Executive Director**

The Western-Elmwood-Berea Corporation (WEBCO) is a twenty-three year old industrial-based not-for-profit economic development corporation primarily serving the manufacturing and service base on the west side of Cleveland in the Berea Road/West 117th Street area. The forty member group focuses on industrial retention and growth through strategies based in investment, vision, planning, cohesion and collaboration.

The WEBCO membership is opposed to any decision by the Surface Transportation Board that will divert freight traffic now being served by CONRAIL on the line that runs through the heart of the west side manufacturing district to the area of the airport and city of Berea. WEBCO does not support putting additional freight on the Westshore line that runs through the heart of residential neighborhoods in Cleveland and the west suburbs.

Receipt of raw materials and shipping of finished products by WEBCO members and other industrial plants is now virtually "invisible" to the residential population of Cleveland and its suburbs due to the availability of below grade or above grade track service that CONRAIL provides. Most residents remain unaware of the large machinery, paper products, chemicals, steel, automotive components and other raw materials and finished products that are shipped weekly in and out of the west side via rail.

If companies were forced into making a decision to only ship via truck, surface traffic would quadruple. For every rail car that now is utilized, it would take three to four tractor trailers to service the company's needs. Quadrupling truck traffic exponentially increases the likelihood of accidents throughout our area.

In addition to safety issues, it is critical to note that many of the WEBCO member companies have been in business more than 50 years and employ hundreds of Cleveland and Lakewood residents in good paying positions with full benefits. At a time when companies are attempting to compete in a global economy, forcing manufacturers to increase costs through higher shipping expenses and perhaps longer shipping times only defeats our ability to remain competitive in the marketplace. When operating costs soar, businesses close, residents are laid-off and tax dollars are lost.

Lakewood OH 44107
Sept. 19, 1997

Dear Mr. Kucinich:

I am a current resident of Lakewood
OH, where the recent proposition of the increase
in train traffic was brought up by the
~~proposed Southern Company~~. Please allow
me to list just some of the reasons why
this should not occur.

1. More air and noise pollution.

2. More accidents.

3. Delays in traffic.

4. Emergency services slowed down such
as fire, paramedic, police & hospital.

5. Hazardous materials being shipped.

Mr. Kucinich, I would be greatly obliged
if you would defend my side of the ~~story~~
argument. Thank you for your time.

Sincerely,

Washington, D.C. 20423

Re: Train Traffic Through Western Suburbs - Cuyahoga County, Ohio

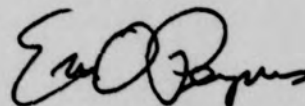

To whom it may concern:

As a concerned resident of the western suburbs of Cuyahoga County, Ohio, I am writing this letter in opposition to the increased train traffic proposed by the merger of Conrail with Norfolk Southern Railroad ("NFS").

As part of my concern, I propose that a specific task force be created to conduct a study to evaluate a certain economic impact on the western suburbs. This study would focus on the costs involved to construct, in the various communities impacted, the following: 1) fire stations on the north side of the existing rail lines; and 2) over/under passes at railroad crossings. The results of this study would enable your Board and NFS to evaluate the economic impact of the increased train traffic proposal. The results could also be used to evaluate the propriety of NFS' position, as stated in the community meetings in September, that they take no responsibility for the economic impact of their proposed increase in train traffic.

I volunteer my time to work on a task force assembled to conduct such an economic impact study. My background in the building industry, as an architect and construction lawyer, arbitrator and mediator, could be utilized on a task force to conduct the study. Please contact me in this regard.

Very truly yours,

Eric O. Pempus

U.S. Surface Transportation Board
ATTN: SEA-Finance Docket 33388
1925 K Street, NW
Washington, DC 20423

Dear U.S. Surface Transportation Board:

This letter is to convey our serious concern regarding a pending Norfolk Southern/CSX merger and the subsequent increase in rail traffic anticipated in Bay Village, Ohio. Currently the track in Bay Village averages 13 trains per day. It is our understanding that this average could increase to more than 30 trains daily after the merger. An increase of this magnitude will have a serious impact on our regular student transportation program and could create a life threatening condition for students who require emergency medical treatment.

We currently transport a significant number of students to public and parochial schools outside Bay Village. Because the railroad tracks form the southern boundary of the city and there are railroad crossings at five of the six roads into the community, most, if not all, of these trips require crossing the tracks. St. Raphael's parochial school is also located in Bay Village. More than 100 students who attend St. Raphael's come from the south side of the railway. Doubling or tripling rail traffic would regularly and seriously jeopardize the timely arrival of students to their respective schools. Depriving children of educational time or increasing substantially their time on a school bus certainly does not contribute to student learning.

Beyond the negative daily effect on the educational program, the district is also responsible for the physical well being of approximately 3,300 public and parochial students. It is not uncommon in any given week to have one or more emergency vehicles called to one of our schools for trauma assistance. Medical care is usually provided by St. John West Shore Hospital located on the south side of the railway. It is our concern that increasing the rail traffic to more than 30 trains per day could have a life threatening impact on any student requiring emergency assistance.

In summary, we respectfully request that the Transportation Board give serious deliberation to this issue. This is not to suggest that the merger be abandoned because of the safety and environmental concerns of people in the Cleveland Westshore area. Rather, we implore you to explore alternative solutions to reduce the negative health and safety impact on these communities. Thank you for your consideration in this important matter.

September 19 1997

Dear Congressman Kucinich:

The idea of double to triple the number of trains running through Bay Village and other communities is unthinkable !!

Our reasons;

1) The N&S Railroad has recently removed tracks, creating a one way railroad except for the siding created for trains to pass each other. Pulling onto a siding and making sure there is clear passage for the on coming train is a very slow process ! This in itself causes traffic backups at crossings.

2) Safe crossing for pedestrian, bikers, cars, trucks, school buses and emergency equipment. This in addition to interruption of sleep and daily lives.

3) The communities on both sides of the tracks have Mutual aide agreements with each other. If emergency vehicles have to go to Clague Road in order to get over the tracks, the emergency may have become disaster.

4) Getting to I 90 may also be a very slow process and causing extra traffic on Wolf Rd. for example.

5) The length of trains will cause serious traffic backups and may even back up trains, if there is to be a train crossing about every 45 minutes.

6) Years ago, the Railroad refused to allow Canterbury Rd. to cross the tracks to meet the other section because they said there were already too many crossings. Now the N & S Railroad wants to create a real monster !

Please work hard to stop the additional numbers of trains. We are sure there are many more reasons to eliminate extra rail traffic.

Sincerely yours;

William H. Walsh

Trains pass close to homes in many residential areas of the West Shore.

The Federal Railroad Administration will hold a meeting in the West Shore area so local residents and representatives of hospitals, firefighters and the police can testify. The event is scheduled for Sunday, September 21 at 2:00 PM at Lakewood City Hall, 12650 Detroit Avenue. The public is invited and urged to attend.

The Norfolk Southern railroad company has announced that it will triple the number of freight trains running through Cleveland and the western suburbs of Lakewood, Rocky River, Bay Village, and Westlake. I will do everything possible to prevent the increased freight train traffic.

Norfolk Southern's proposal could affect the quality of life in the West Shore area, disrupting many quiet, residential communities like Lakewood. A tripling of train traffic could cause problems for emergency paramedics, firefighters and the police. And this is to say nothing of the noise, dirt, increase in hazardous materials coming through the area and a possible decrease in property values.

You are encouraged to bring written testimony about how this proposed increase in freight traffic will affect you and your family. If you would like to express your opinion at the hearing, please call or write the Lakewood Congressional office at (216) 228-8850, 14400 Detroit Ave., Lakewood, OH 44107.

Please complete and return the survey below to share your opinion on this plan. I will share the results of this survey with my colleagues and the Surface Transportation Board. This is your chance to make your voice heard.

SURVEY ON INCREASED TRAIN TRAFFIC

Dear Congressman Kucinich:

- ☐ I agree with the train companies' plan to triple the number of trains travelling the tracks in Lakewood because it is good for business.
- ☒ I disagree with the train companies' plan to triple the number of trains travelling the tracks in Lakewood. I believe increased train traffic could mean increased noise pollution, more delays where streets intersect railroad tracks, greater possibility of dangerous collisions, and decreased property values for our community.

Sincerely,

Print Name

J. T. DAVIS

the Air

Imagine if there were 1,161 deaths in Northeast Ohio each year as a result of homicide. The outcry would be deafening. Yet in Northeast Ohio, there are that many premature deaths attributable to air pollution each year. Air pollution also has been linked to higher infant mortality rates. Northeast Ohio ranks fifth in the nation for having an increased number of infant deaths related to air pollution.

In response to the growing evidence that current levels of air pollution are dangerous, the Environmental Protection Agency (EPA) proposed tougher air quality standards. I wholeheartedly support sensible, health-based air quality standards, so I led the House of Representatives in support of the EPA's proposal, which was approved on June 24, 1997.

Despite the overwhelming evidence that the air needs to be cleaner, critics of the new standards have spread myths about these new air pollution regulations. I would like to address some of these myths.

See EPA continued on back

Freight Train Hearing September 21!

Trains pass close to homes in many residential areas of the West Shore.

The Federal Railroad Administration will hold a meeting in the West Shore area so local residents and representatives of hospitals, firefighters and the police can testify. The event is scheduled for Sunday, September 21 at 2:00 PM at Lakewood City Hall, 12650 Detroit Avenue. The public is invited and urged to attend.

The Norfolk Southern railroad company has announced that it will triple the number of freight trains running through Cleveland and the western suburbs of Rocky River, Lakewood, Bay Village, and Westlake. I will do everything possible to prevent the increased freight train traffic.

Norfolk Southern's proposal could affect the quality of life in the West Shore area, disrupting many quiet, residential communities like Rocky River. A tripling of train traffic could cause problems for emergency paramedics, firefighters and the police. And this is to say nothing of the noise, dirt, increase in hazardous materials coming through the area and a possible decrease in property values.

You are encouraged to bring written testimony about how this proposed increase in freight traffic will affect you and your family. If you would like to express your opinion at the hearing, please call or write the Lakewood Congressional office at (216) 228-8850, 14400 Detroit Ave., Lakewood, OH 44107.

Please complete and return the survey below to share your opinion on this plan. I will share the results of this survey with my colleagues and the Surface Transportation Board. This is your chance to make your voice heard.

SURVEY ON INCREASED TRAIN TRAFFIC

Dear Congressman Kucinich:

☐ I agree with the train companies' plan to triple the number of trains travelling the tracks in the West Shore area because it is good for business.

☒ I disagree with the train companies' plan to triple the number of trains travelling the tracks in the West Shore area. I believe increased train traffic could mean increased noise pollution, more delays where streets intersect railroad tracks, greater possibility of dangerous collisions, and decreased property values for our community.

Sincerely,

Print Name: HELEN C. NICHOLS

September 8, 1997

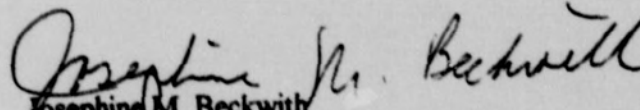

Congressman Dennis Kucinich
14400 Detroit Avenue
Lakewood, Ohio 44107

Dear Congressman:

Please note my firm opposition to the Norfolk & Southern proposal. It is terribly unsafe and would represent a significant DANGER to my community.

Thank you in advance for fighting this proposal in every possible manner.

Sincerely,

Josephine M. Beckwith
29501 Osborn Road
Bay Village, Ohio 44140
