RC-130500 BURLINGTON NORTHERN SANTA FE 1998

130500

ACCA - R1 APPROVED BY OMB 2140-0009 EXPIRES 11/30/2000

Class I Railroad Annual Report

The Burlington Northern and Santa Fe Railway Company
Leased Lines and Wholly-Owned Subsidiaries
3017 Lou Menk Drive
Fort Worth, Texas 76131

BNSF

To The

Surface Transportation Board For the Year Ending December 31, 1998

Notice

- 1. This report is required for every class I railroad operating within the United States. Three copies of this Annual Report should be completed. Two of the copies must be filed with the Surface Transportation board, Office of Economics, Environmental Analysis, and Administration, The Mercury Building, 1925 K St. N.W., Suite 500, Washington, DC 20423, by March 31 of the year following that for which the report is made. Once copy should be retained by the carrier.
- 2. Every inquiry must be definitely answered. Where the word "none" truly and completely states the fact, it should be given as the answer. If any inquiry is inapplicable, the words "not applicable" should be used.
- 3. Wherever the space provided in the schedules in insufficient to permit a full and complete statement of the requested information, inserts should be prepared and appropriately identified by the number of the schedule.
- 4. All entries should be made in a permanent black ink or typed. Those of a contrary character must be indicated in parenthesis. Items of an unusual character must be indicated by appropriate symbols and explained in footnotes.
- 5. Money items, except averages, throughout the annual report form should be shown in thousands of dollars adjusted to accord with footings. Totals for amounts reported in subsidiary accounts included in supporting schedules must be in agreement with related primary accounts. For purposes of rounding, amounts of \$500 but less than \$1,000 should be raised to the nearest thousand dollars, and amounts of less than \$500 should be lowered.
- 6. Except where the context clearly indicates some other meaning, the following terms when used in this Form have the following meanings:
 - (a) Board means Surface Transportation Board.
 - (b) Respondent means the person or corporation in whose behalf the report is made.
 - (c) Year means the year ended December 31 for which the report is being made.
- (d) Close of the Year means the close of business on December 31 for the year in which the report is being made. If the report is made for a shorter period than one year, it means the close of the period covered by the report.
- (e) beginning of the Year means the beginning on January 1 of the year for which the report is being made. If the report is made for a shorter period than one year, it means the beginning of that period.
- (f) Preceding Year means the year ended December 31 of the year preceding the year for which the report is made.
- (g) The Uniform System of Accounts for Railroad Companies means the system of accounts in Part 1201 of Title 49, Code of Federal Regulations, as amended.
- 7. The ICC Termination Act of 1995 abolished the Interstate Commerce Commission and replaced it with the Surface Transportation Board. Any references to the Interstate Commerce Commission or Commission contained in this report refer to the Surface Transportation Board.
- 8. Any references to the Bureau of Accounts or the Office of Economics contained in this report refer to the Office of Economics, Environmental Analysis, and Administration of the Surface Transportation Board.

Year 1998

SPECIAL NOTICE

Docket No 38559 Railroad Classification Index, (ICC served January 20, 1983), modified the reporting requirements for Class II, Class III and all Switching and Terminal Companies These carriers will notify the Board only if the calculation results in a different revenue level than its current classification

The dark borders on the schedules represents data that are captured by the Board

It is estimated that an average of 800 burden hours per response are required to complete this collection of information. This estimate includes time for reviewing instructions, searching existing data sources, gathering and maintaining the data needed, and completing and reviewing the collection of information. Comments concerning the accuracy of this burden estimate or suggestions for reducing this burden should be directed to the Office of the Secretary, Surface Transportation Board, and the Office of Information and Regulatory Affairs, Office of Management and Budget

| B IDENTITY OF RESPONDENT |
| Answers to the questions asked should be made in full, without reference to data returned on the corresponding page of previous reports. In case any changes of the nature referred to under Inquiry 4 on this page have taken place during the year covered by this report, they should be explained in full detail. |
| 1 Give the exact name of the respondent in full. Use the words, "The" and "Company" only when they are parts of the corporate name. Be careful to distinguish between railroad and railway. The corporate name should be given uniformly throughout the report, notably on the cover, on the title page, and in the "Verification." If the report is made by receivers, trustees, a committee of bondholders, or individuals otherwise in possession of the property, state names and facts with precision. If the report is for a consolidated group, pursuant to Special Permission from the Board, indicate such fact on line 1 below and list the consolidated group on page 4. |
| 2 If incorporated under a special charter, give date of passage of the act, if under a general law, give date of filing certificate of organization, if a receivership or other trust, also give date when such receivership or other possession began. If a partnership, give date of formation and also names in full of present partners. |
| 3 State the occasion for the reorganization, whether by reason of foreclosure of mortgage or otherwise, according to the fact. Give date of organization of original corporation and refer to laws under which organized |
| |
| Exact Name of common carrier making this report The Burlington Northern and Santa Fe Railway Company |
| 2 Date of incorporation January 12, 1961 |
| 3 Under laws of what Government, State or Territory organized? If more than one, name all. If in bankruptcy, give court of jurisdiction and dates |
| of beginning of receivership and of appointment of receivers or trustees Organized under the provisions of the General Corporation Law of the State of Delaware |
| |
| |
| 4 If the respondent was reorganized during the year, involved in a consolidation or merger, or conducted its business under a different name, give full particulars |
| Effective as of January 2, 1998, Santa Fe Pacific Corporation ("SFP"), being the owner of all of the issued and outstanding shares of stock of respondent. |
| merged itself with and into respondent ("the Merger") pursuant to the provisions of Section 253 of the General Corporation Law of the State of Delaware, and |
| respondent was the surviving corporation. Information provided herein reflects the Merger as if it occurred on January 1, 1997 |
| |
| STOCKHOLDERS' REPORTS |
| 5 The respondent is required to send the Office of Economic and Environmental Analysis, immediately upon preparation, two copies of its latest annual report to stock-holders Check appropriate box |
| () Two copies are attached to this report |
| |
| () Two copies will be submitted on(date) |
| (X) No annual report to stockholder's is prepared |
| Two copies of the Burlington Northern Santa Fe Corporation Annual Report to Shareholders are attached |
| Two copies of The Burlington Northern and Santa Fe Railway Company SEC Form 10-K are attached |
| |

Railroad Annual Report R-1

C VOTING POWERS AND ELECTIONS

1 State the par value of each share of stock Common \$1 00 per share, first preferred, \$ N/A per share, second preferred,

Year 1998

- \$ N/A per share, debenture stock, \$ N/A per share
- 2 State whether or not each share of stock has the right to one vote, if not, give full particulars in a footnote [X] Yes [] No
- 3 Are voting rights proportional to holdings? [X] Yes [] No If not, state in a footnote the relation between holdings and corresponding voting rights
- 4 Are voting rights attached to any securities other than stock? [] Yes [X] No. If yes, name in a footnote each security, other than stock, to which voting rights are attached (as of the close of the year), and state in detail the relation between holdings and corresponding voting rights, indicating whether voting rights are actual or contingent and, if contingent, showing the contingency
- 5 Has any class or issue of securities any special privileges in the election of directors, trustees, or managers, or in the determination of corporate action by any method?
- [] Yes [X] No If yes, describe fully in a tootnote each such class or issue and give a succinct statement showing clearly the character and extent of such privileges
- 6 Give the date of the latest closing of the stock book prior to the actual filing of this report, and state the purpose of such closing Stock books not closed and not required to be closed.
- 7 State the total voting power of all security holders of the respondent at the date of such closing, if within one year of the date of such filing, if not, state as of the close of the year 1.000 votes, as of December 31, 1998.
- 8 State the total number of stockholders of record, as of the date shown in answer to inquiry 7. One (1) stockholder
- 9 Give the names of 30 security holders of the respondent who, at the date of the latest closing of the stock book or compilation of the list of stockholders of the respondent (if within 1 year prior to the actual filing of this report), had the highest voting powers in the respondent, showing for each his or her address, the number of votes he or she would have had a right to cast on that date had a meeting then been in order, and the classification of the number of votes to which he or she was entitled, with respect to securities held by him or her, such securities being classified as common stock, second preferred stock, first preferred stock, and other securities (stating in a footnote the names of such other securities, if any). If any such holder held in trust, give (in a footnote) the particulars of the trust. In the case of voting trust agreements, give as supplemental information the names and addresses of the 30 largest holders of the voting trust certificates and the amount of their individual holdings. If the stock book was not closed or the list of stockholders compiled within such year, show such 30 security holders as of the close of the year.

200 COMPARATIVE STATEMENT OF FINANCIAL POSITION - EXPLANATORY NOTES (Dollars in Thousands)

The notes listed below are provided to disclose supplementary information on matters which have an important effect on the financial condition of the carrier. The carrier shall give the particulars called for herein and where there is nothing to report, insert the word "none", and in addition thereto shall enter in separate notes with suitable particulars other matters involving material amounts of the character commonly disclosed in financial statements under generally accepted accounting and reporting principles, except as shown in other schedules. This includes statements explaining (1) service interruption insurance policies and indicating the amount of indemnity to which respondent will be entitled for work stoppage losses and the maximum amount of additional premium respondent may be obligated to pay in the event such losses are sustained by other railroads. (2) particulars concerning obligations for stock purchase options granted to officers and employees, and (3) what entress have been made for not income or retained income restricted under provisions of mortiages and other arrangements.

| may be obligated to pay in the event such losses are sustained by other railroads. (2) particulars concerning obligations for stock purchase options granter officers and employees, and (3) what entries have been made for net income or retained income restricted under provisions of mortgages and other arran | |
|---|----|
| 1 Amount (estimated, if necessary) of net income or retained income which has to be provided for capital expenditures, and for sinking and other funds | |
| pursuant to provisions of reorganization plans, mortgages, deeds of trust, or other contracts S None | |
| 2 Estimated amount of future earnings which can be realized before paying Federal income taxes because of unused and available net operating loss | |
| carryover on January 1 of the year following that for which the report is made \$ 0 | |
| 3 (a) Explain the procedure in accounting for pension funds and recording in the accounts the current and past service pension costs, indicating whether | or |
| not consistent with the prior year | |
| See Note 2 on page 9 | |
| (b) State amount, if any, representing the excess of the actuarially computed value of vested benefits over the total of the pension fund See Note 2 on page 9 | |
| (c) Is any part of pension plan funded? Specify Yes X No | |
| (I) If funding is by insurance, give name of insuring company None | |
| If funding is by trust agreement, list trustee(s) Northern Trust Company | |
| Date of trust agreement or latest amendment June 21, 1996 | |
| if respondent is affiliated in any way with the trustee(s), explain affiliation. Not affiliated. See Note 1 page 9 | |
| See Note 1 on page 9 | |
| (d) List affiliated companies which are included in the pension plan funding agreement and describe basis for allocating charges under the agreement See Note 2 on page 9 | |
| (e) (i) Is any part of the pension plan fund invested in stock or other securities of the respondent or any of its affiliates? Specify | |
| Yes No X N/A | |
| If yes, give number of the shares for each class of stock or other security N/A | |
| (ii) Are voting rights attached to any securities held by the pension plan? Specify Yes No X N/A | |
| If yes, who determines how stock is voted? | |
| 4 State whether a segregated political fund has been established as provided by the Federal Election Campaign Act of 1971 (18 U S C 610) | |
| Yes X No | |
| 5 (a) The amount of employers contribution to employee stock ownership plans for the current year was \$ NONE (b) The amount of investment tax credit used to reduce current income tax expense resulting from contributions to qualified employee stock ownership plans for the current year was \$ None | |
| 6 In reference to Docket No 37465 specify the total amount of business entertainment expenditures charged to the non-operating expense account | |
| \$ None | |

200 COMPARATIVE STATEMENT OF FINANCIAL POSITION-EXPLANTORY NOTES-concluded

NOTES TO FINANCIAL STATEMENTS

Note 1

Changes to Company Organization and Reporting Presentation

The Burlington Northern and Santa Fe Railway Company (BNSF Railway) is a wholly owned subsidiary of Burlington Northern Santa Fe Corporation (BNSF). BNSF Railway was formerly known as the Burlington Northern Railroad Company (BNRR). On December 31, 1996, The Atchison, Topeka and Santa Fe Railway Company (ATSF) merged with and into Burlington Northern Railroad Company (BNRR) and the name of the surviving entity, BNRR, was changed to the Burlington Northern and Santa Fe Railway Company. Additionally, on January 2, 1998, BNSF Railway's parent, Santa Fe Pacific Corporation, merged with and into BNSF Railway. Information included herein reflects the merger as if it occurred on January 1, 1997.

Note 2

Retirement plans

BNSF Railway is included with certain other BNSF affiliates in the qualified BNSF Retirement Plan and the nonqualified BNSF Supplemental Retirement Plan.

BNSF sponsors two significant defined benefit pension plans: the noncontributory qualified BNSF Retirement Plan, which covers substantially all non-union employees, and the nonqualified BNSF Supplemental Retirement Plan, which covers certain officers and other employees. The benefits under BNSF's plans are based on years of credited service and the highest five-year average compensation levels. BNSF Railway's funding policy is to contribute annually not less than the regulatory minimum and not more than the maximum amount deductible for income tax purposes.

Certain salaried employees of BNSF Railway that have met certain age and years of service requirements are eligible for medical benefits and life insurance coverage during retirement. The retiree medical plan is contributory and provides benefits to retirees, their covered dependents and beneficiaries. Retiree contributions are adjusted annually. The plan also contains fixed deductibles, coinsurance and out-of-pocket limitations. The life insurance plan is noncontributory and covers retirees only. BNSF Railway's policy is to fund benefits payable under the medical and life insurance plans as they come due. Employees beginning salaried employment with BNSF Railway subsequent to September 22, 1995 are not eligible for benefits under these plans.

Components of the net benefit costs for these plans were as follows (in millions):

| | Pension Benefits | | | | | |

| December 31, | 1998 | 1997 | 1998 | 1997 |
| Amounts recognized in the consolidated balance sheet | | | | |
| Prepaid benefit cost - | \$ 20 | \$17 | \$ - | \$ - |
| Accrued benefit liability | (43) | (39) | (232) | (206) |
| Intangible asset | 2 | 2 | - | - |
| Accumulated other comprehensive income | 13 | 11 | - | • |
| Net amount recognized | \$(8) | \$(9) | \$(232) | \$(206) |

BNSF Railway uses a September 30 measurement date. The assumptions used in accounting for these plans were as follows:

Medical and Life

| | Pension | Benefits | | |
|---|---------|----------|------|------|
| Assumptions | 1998 | 1997 | 1998 | 1997 |
| Discount rate | 7.0% | 7.5% | 7.0% | 7.5% |
| Rate of increase in compensation levels | 4.0% | 4.0% | N/A | N/A |
| Expected return on plan assets | 9.5% | 9.5% | N/A | N/A |

For purposes of the medical and life benefits calculations for 1998, the assumed health care cost trend rate for both managed care and non-managed care medical costs is 9 percent and is assumed to decrease gradually to 5 percent by 2005 and remain constant thereafter. Increasing the assumed health care cost trend rates by one percentage point would increase the accumulated post-retirement benefit obligation by \$18 million and the combined service and interest components of net post-retirement benefit cost recognized in 1998 by \$1 million. Decreasing the assumed health care cost trend rates by one percentage point would decrease the accumulated post-retirement benefit obligation by \$17 million and the combined service and interest components of net post-retirement benefit cost recognized in 1998 by \$1 million.

Under collective bargaining agreements, BNSF Railway participates in multi-employer benefit plans which provide certain post-retirement health care and life insurance benefits for eligible union employees. Insurance premiums paid attributable to retirees, which are generally expensed as incurred, were \$18 million, \$15 million and \$14 million, in 1998, 1997 and 1996, respectively.

12 Road Initials: BNSF Year 1998

200. COMPARATIVE STATEMENT OF FINANCIAL POSITION-EXPLANTORY NOTES-concluded

NOTES TO FINANCIAL STATEMENTS

BNSF Railway sponsors 401(k) thrift and profit sharing plans which cover substantially all non-union employees and certain union employees. BNSF Railway matches 50 percent of the first 6 percent of non-union employees' contributions, which are subject to certain percentage limits of the employees' earnings, at each pay period. Depending on BNSF Railway's performance, an additional matching contribution of up to 30 percent of the first 6 percent can be made at the end of the year. Employer contributions for all non-union employees are subject to a five-year length of service vesting schedule. BNSF Railway's 401(k) matching expense was \$16 million, \$14 million and \$13 million in 1998, 1997 and 1996, respectively.

Note 3

Hedging activities, leases, environmental and other commitments and contingencies

Hedging activities

BNSF Railway has a program to hedge against fluctuations in the price of its diesel fuel purchases. This program includes forward purchases for delivery at fueling facilities, and various commodity swap and collar transactions which are accounted for as hedges. Any gains or losses associated with changes in market value of these hedges are deferred and recognized as a component of fuel expense in the period in which the hedged fuel is purchased and used. To the extent BNSF Railway hedges portions of its fuel purchases, it may not realize the impact of increases or decreases in fuel prices.

As of February 8, 1999, BNSF Railway had entered into fuel swaps for approximately 1,776 million gallons at an average price of approximately 49 cents per gallon. The above price does not include taxes, transportation costs, certain other fuel handling costs, and any differences which may occur from time to time between the prices of commodities hedged and the purchase price of BNSF Railway's diesel fuel.

Currently, BNSF Railway's fuel hedging program covers approximately 75 percent, 40 percent, 22 percent and 7 percent of estimated annual and quarterly fuel purchases for 1999, 2000, 2001, and 2002, respectively. Hedge positions are closely monitored to ensure that they will not exceed actual fuel requirements in any period. Unrecognized losses from BNSF Railway's fuel swap transactions were approximately \$174 million as of December 31, 1998, of which \$120 million relates to swap transactions that will expire in 1999. BNSF Railway also monitors its hedging positions and credit ratings of its counter-parties and does not anticipate losses due to counter-party nonperformance.

Leases

BNSF Railway has substantial lease commitments for locomotives, freight cars, trailers, office buildings and other property. Most of these leases provide the option to purchase the equipment at fair market value at the end of the lease. However, some provide fixed price purchase options. Future minimum lease payments (which reflect leases having non-cancelable lease terms in excess of one year) as of December 31, 1998 are summarized as follows (in millions):

Road Initials BNSF Year 1998

200 COMPARATIVE STATEMENT OF FINANCIAL POSITION-EXPLANTORY NOTES-concluded

NOTES TO FINANCIAL STATEMENTS

| Year ended December 31 | Capital Leases | Operatin Leases |
|---|-------------------|--------------------|
| 1999 | \$116 | \$350 |
| 2000 | 105 | 256 |
| 2001 | 116 | 206 |
| 2002 | 110 | 175 |
| 2003 | 109 | 164 |
| Thereafter | 594 | 1,814 |
| Total | 1,150 | \$2,965 |
| Less amount representing interest | 332 | |
| Present value of minimum lease payments | \$ 818 | |

Lease rental expense for all operating leases was \$503 million, \$456 million and \$446 million for the years ended December 31, 1998, 1997 and 1996, respectively. Contingent rentals and sublease rentals were not significant.

Environmental

BNSF Railway's operations, as well as those of its competitors, are subject to extensive federal, state and local environmental regulation. BNSF Railway's operating procedures include practices to protect the environment from the environmental risks inherent in railroad operations, which frequently involve transporting chemicals and other hazardous materials. Additionally, many of BNSF Railway's land holdings are and have been used for industrial or transportation-related purposes or leased to commercial or industrial companies whose activities may have resulted in discharges onto the property. As a result, BNSF Railway is subject to environmental clean-up and enforcement actions. In particular, the Federal Comprehensive Environmental Response, Compensation and Liability Act of 1980 (CERCLA), also known as the "Superfund" law, as well as similar state laws generally impose joint and several liability for clean-up and enforcement costs without regard to fault or the legality of the original conduct on current and former owners and operators of a site. BNSF Railway has been notified that it is a potentially responsible party (PRP) for study and clean-up costs at approximately 32 Superfund sites for which investigation and remediation payments are or will be made or are yet to be determined (the Superfund sites) and, in many instances, is one of several PRPs. In addition, BNSF Railway may be considered a PRP under certain other laws. Accordingly, under CERCLA and other federal and state statutes, BNSF Railway may be held jointly and severally liable for all environmental costs associated with a particular site. If there are other PRPs, BNSF Railway generally participates in the clean-up of these sites through cost-sharing agreements with terms that vary from site to site. Costs are typically allocated based on relative volumetric contribution of material, the amount of time the site was owned or operated, and/or the portion of the total site owned or operated by each PRP

Environmental costs include initial site surveys and environmental studies of potentially contaminated sites as well as costs for remediation and restoration of sites determined to be contaminated. Liabilities for environmental clean-up costs are initially recorded when BNSF Railway's liability for environmental clean-up is both probable and a reasonable estimate of associated costs can be made. Adjustments to initial estimates are recorded as necessary based upon additional information developed in subsequent periods. BNSF Railway conducts an ongoing environmental contingency analysis, which considers a combination of factors including independent consulting reports, site visits, legal reviews, analysis of the likelihood of participation in and the ability of other PRPs to pay for clean-up, and historical trend analyses.

14 Road Initials: BNSF Year 1998

200. COMPARATIVE STATEMENT OF FINANCIAL POSITION-EXPLANTORY NOTES-concluded

NOTES TO FINANCIAL STATEMENTS

BNSF Railway is involved in a number of administrative and judicial proceedings and other clean-up efforts at approximately 400 sites, including the Superfund sites, at which it is participating in the study or clean-up, or both, of alleged environmental contamination. BNSF Railway paid approximately \$64 million, \$55 million and \$47 million during 1998, 1997 and 1996 respectively, for mandatory and unasserted clean-up efforts, including amounts expended under federal and state voluntary clean-up programs. BNSF Railway has accruals of approximately \$185 million for remediation and restoration of all known sites. BNSF Railway anticipates that the majority of the accrued costs at December 31, 1998, will be paid over the next five years. No individual site is considered to be material.

During 1998, BNSF Railway settled an environmental matter in the State of Missouri related to the release of a reportable quantity of lead sulfide into a waterway. BNSF Railway agreed in the settlement to pay a fine of \$7 million, make restitution payments to the State of Missouri of \$3 million and committed to spend \$9 million, which includes amounts previously paid, in connection with its ongoing remediation efforts. BNSF Railway has made payments of approximately \$16 million related to this settlement, including approximately \$12 million that was paid during 1998, which is included in total 1998 payments discussed above.

Liabilities recorded for environmental costs represent BNSF Railway's best estimates for remediation and restoration of these sites and include both asserted and unasserted claims. Unasserted claims are not considered to be a material component of the liability. Although recorded liabilities include BNSF Railway's best estimates of all costs, without reduction for anticipated recoveries from third parties, BNSF Railway's total clean-up costs at these sites cannot be predicted with certainty due to various factors such as the extent of corrective actions that may be required, evolving environmental laws and regulations, advances in environmental technology, the extent of other parties' participation in clean-up efforts, developments in ongoing environmental analyses related to sites determined to be contaminated, and developments in environmental surveys and studies of potentially contaminated sites. As a result, future charges to income for environmental liabilities could have a significant effect on results of operations in a particular quarter or fiscal year as individual site studies and remediation and restoration efforts proceed or as new sites arise. However, management believes that it is unlikely that any identified matters, either individually or in the aggregate, will have a material adverse effect on BNSF's consolidated financial position or liquidity.

The railroad industry, including BNSF Railway, is subject to future requirements regulating air emissions from diesel locomotives. Final regulations applicable to new and rebuilt locomotive engines were promulgated by the United States Environmental Protection Agency (EPA) and became effective June 15, 1998. The new standards will be phased in between 2000 and 2005. BNSF Railway has evaluated compliance requirements and associated costs and believes the costs will not be material in any given year. BNSF Railway has also entered into agreements with the California State Air Resources Board and the EPA regarding a program to reduce emissions in Southern California through accelerated deployment of locomotives which comply with the federal standards.

Other commitments and contingencies

BNSF Railway has entered into commitments to acquire 476 locomotives in 1999. The locomotives will be financed from one or a combination of sources including, but not limited to, cash from operations, capital or operating leases, and debt issuances. The decision on the method used will depend upon the current market conditions and other factors at the time of financing. Additionally, BNSF Railway has committed to acquire 196 and 50 locomotives in 2000 and 2001, respectively.

210 RESULTS OF OPERATIONS

(Dollars in Thousands)

- 1 Disclose the requested information for the respondent pertaining to the results of operations for the year
- 2 Report total operating expenses from Schedule 410 of this report. Any dispanties in expense amounts shown in this schedule and expense amounts reported in Schedule 410 must be fully explained on page 18
- 3 List dividencs from investments accounted for under the cost method on the appropriate line No 19 for Account No 513 "Dividend Income" List dividends accounted for by the equity method on the appropriate dividend line No 25 under the "Income from Affiliated Companies" subsection of this schedule

Road Initials: BNSF Year 1998

200. COMPARATIVE STATEMENT OF FINANCIAL POSITION-EXPLANTORY NOTES-concluded NOTES TO FINANCIAL STATEMENTS

In connection with the closing of the sale of rail lines in Southern California in 1992 and 1993, BNSF Railway has a \$50 million liability recorded for an obligation retained by BNSF Railway which under certain conditions requires the Company to repurchase a portion of the properties sold.

BNSF Railway is party to a number of legal actions and claims, various governmental proceedings and private civil suits arising in the ordinary course of business, including those related to environmental matters and personal injury claims. While the final outcome of these items cannot be predicted with certainty, considering among other things the meritorious legal defenses available, it is the opinion of management that none of these items, when finally resolved, will have a material adverse effect on the annual results of operations, financial position or liquidity of BNSF Railway, although an adverse resolution of a number of these items could have a material adverse effect on the results of operations in a particular quarter or fiscal year.

| | Carrier Purposes | <u> </u> | | |
| 28 | TOTAL WORKING CAPITAL | Line 24 + line 27 | 278,077 | 28 |

NOTE (A) Use common carrier portion only. Common carrier refers to railway transportation service.

(B) Rent Income is the sum of Schedule 410, column (H), lines 121, 122, 123, 127, 128, 129, 133, 134, 135, 208, 210, 212, 227, 229, 231, 312, 314, and 316. Rent income is added to railway operating revenues to produce total revenues. Rent income is also added to total operating expenses to exclude the rent revenue items from operating expense.

(C) If result is negative, use zero.

GENERAL INSTRUCTIONS CONCERNING RETURNS IN SCHEDULES 310, 310A

- 1 Schedule 310 should give particulars of stocks, bonds, other secured obligations, unsecured notes, and investment advances of affiliated companies held by respondent at close of year. Also, disclose the investments made, disposed of, and written down during the year and the applicable dividends and interest credited to income as a result of those investments. They should exclude securities issued or assumed by respondent. For definition of affiliated companies, see the rules governing Account No. 721 "Investments and advances, affiliated companies," in the Uniform System of Accounts for Railroad Companies.
 - 2 List the investments in the following order and show a total for each group and each class of investments by accounts in numerical order
 - (A) Stocks
 - (1) Carriers-active
 - (2) Carriers-inactive
 - (3) Noncarriers-active
 - (4) Noncarriers-inactive
 - (B) Bonds (including U.S. Government Bonds)
 - (C) Other secured obligations
 - (D) Unsecured notes
 - (E) Investment advances
 - 3 The subclassification of classes (B), (C), (D), and (E) should be the same as that provided for class (A)
- 4 The kinds of industry represented by respondent's investments in the securities of other companies should be shown by symbol opposite the names of the issuing corporations, the symbols and industrial classifications to be as follows

| Symbol | Kind of Industry |
|--------|--|
| 1 | Agriculture, forestry, and fisheries |
| II | Mining |
| Ш | Construction |
| ١٧ | Manufacturing |
| V | Wholesale and retail trade |
| VI | Finance, insurance, and real estate |
| VII | Transportation, communications, and other public utilities |
| VIII | Services |
| IX | Government |
| X | All other |

- 5 By carriers, as the term is used here, is meant companies owning or operating railroads, facilities auxiliary thereto such as bridges, ferries, union depots, and other terminal facilities, sleeping cars, parlor cars, dining cars, freight cars, express service and facilities, electric railways, highway motor vehicles, steamboats and other marine transportation equipment, pipe lines (other than those for transportation of water), and other instrumentalities devoted to the transportation of persons or property for hire. Telegraph and telephone companies are not meant to be included.
- 6 Noncarrier companies should, for the purpose of these schedules, include telephone companies, telegraph companies, mining companies, manufacturing companies, hotel companies, etc. Purely "holding companies" are to be classed as noncarrier companies, even though the securities held by such companies are largely or entirely those issued or assumed by carriers.
- 7 By an active corporation is meant one which maintains an organization for operating property or administering its financial affairs. An inactive corporation is one which has been practically absorbed in a controlling corporation and which neither operates property nor administers its financial affairs, if it maintains an organization it does so only for the purpose of complying with legal requirements and maintaining title to property or franchises
 - 8 Combine, in one amount, investments in which the original cost or present equity in total assets is less than \$10,000
 - 9 Include investments in unincorporated entities such as lessee organizations. Exclude amounts normally settled on a current basis
- 10 Do not include the value of securities issued or assumed by respondent
- 11 For affiliates which do not report to the Surface Transportation Board and are jointly owned, disclose in footnotes the name and extent of control of the other controlling entities

310 INVESTMENTS AND ADVANCES AFFILIATED COMPANIES (Dollars in Thousands)

Give particulars of investments in stocks, bonds, other secured obligations, unsecured notes, and investment advances of companies affiliated with respondent, included in accounts Nos. 715, "Sinking Funds", 716, "Capital Funds", 721, "Investments and Advances Affiliated Companies", and 717, "Other Funds."

- Entries in this schedule should be made in accordance with the definitions and general instructions given on page 25, classifying the investments by means of letters, figures, and symbols in columns (a), (b), and (c)
 - Indicate by means of an arbitrary mark in column (d) the obligation in support of which any security is pledged, mortgaged or otherwise encumbered giving names and other important particulars of such obligations in footnotes
- 4 Give totals for each class and for each subclass and a grand total for each account
- Entries in column (d) should show date of maturity of bonds and other evidences of indebtedness. In case obligations of the same designation mature serially, the date in column (d) may be reported as "Serially 19_ to 19_ ". Abbreviations in common use in standard financial publications may be used to conserve space.

310 INVESTMENTS AND ADVANCES AFF.LIATED COMPANIES Continued (Dollars in Thousands)

- If any of the companies included in this schedule are controlled by respondent the percent of control should be shown in column (e). In case any company listed is controlled other than through actual ownership of securities, give particulars in a footnote. In cases of joint control, give names of other parties and particulars of control.
- If any advances reported are pledged, give particulars in a footnote
- Investments in companies in which neither the original cost or present equity in total assets are less than \$10,000 may be combined in one figure
- Also included should be investments in unincorporated entities such as lessee organizations (exclusive of amounts nominally settled on a current basis)
- 10 This schedule should not include securities issued or assumed by respondent
- For affiliates which do not report to the interstate Commerce Commission and are jointly owned, give names and extent of control of other entities by toolnotes

INSTRUCTIONS CONCERNING RETURNS TO BE MADE IN SCHEDULE 330

- 1 Give particulars of balances at the beginning and close of the year and of all changes during the year in Account No 731, "Road and Equipment Property," and Account No 732, "Improvements on Leased Property," classified by primary accounts in accordance with the Uniform System of Accounts for Railroad Companies The balances, by primary accounts, should insofar as known, be stated in column (b) and all changes made during the year should be analyzed in columns (c) to (f), inclusive Column (h) is the aggregate of columns (b) to (f), inclusive Grand totals of columns (b) and (h) should equal the sum of Accounts 731 and 732 for the respective periods, if not, full explanation should be made in a footnote
- 2 In column (c) are to be shown disbursements made for the specific purpose of purchasing, constructing, and equipping new lines, and for the extension of old lines, as provided for in Instruction 2-1, "Items to be charged," of the Uniform System of Accounts for Railroad Companies for such items
- 3 In column (d) is to be shown the cost of a railway or portion thereof, acquired as an operating entity or system by purchase, merger, consolidation, reorganization, receivership sale or transfer, or otherwise
- 4 In column (c) and (e) should be included all entries covering expenditures for additions and betterments, as defined, whether or not replacing other property
 - 5 In column (f) should be entered all credits representing property sold, abandoned, or otherwise retired
- 6 Both the debit and credit involved in each transfer, adjustment, or clearance, between road and equipment accounts, should be included in the column in which the item was initially included, also the transfer of prior years' debits or credits from investment in road and equipment to operating expenses or other explained when in excess of \$100,000
- 7 If during the year an individual charge of \$100,000 or more was made to Account No. 2, "Land for Transportation Purposes," state in a footnote the cost, location, area, and other details which will identify the property
- 8 Report on line 29, amounts not includible in the primary road accounts. The items reported should be briefly identified and explained under "Notes and

Remarks," below Amounts should be reported on this line only under special circumstances, usually after permission is obtained from the Commission for exceptions to prescribed accounting. Reference to such authority should be made when explaining the amounts reported. Respondents must not make arbitrary changes to the printed stub or column headings without specific authority from the Commission 9 If during the year a segment of transportation property was acquired, state in a footnote the name of the vendor, the mileage acquired, and the date of acquisition, giving location and the cost of the property to the respondent. Also furnish a statement of the amount included in each primary account representing such property acquired, referring to the column or columns in which the entries appear 10 If an amount of less than \$5,000 is used as the minimum for additions and betterments to property investment accounts as provided for in Instruction 2-2 of the Uniform System of Accounts for Railroad Companies, state in a footnote the amount used NOTES AND REMARKS

Railroad Annual Report R-1

332 DEPRECIATION BASE AND RATES -ROAD AND LOUPMENT OWNED AND USED AND LEASED FROM OTHERS (Dollars in Thousands)

Show in columns (b) and (c), for each primary account, the depreciation base used to compute the depreciation charges for the month of January, and in columns (c) and (f) show the depreciation base used to compute the depreciation charges for the month of December, and on lines 30 and 39 of these columns show the composite percentage for all road and equipment accounts respectively, ascertained by applying the primary account composite rates to the depreciation base used in computing the charges for December, and dividing the total so computed by the total depreciation base for the same month. The depreciation base should not include the cost of equipment used but not owned when the rents therefore are included in the rent for equipment and Account Nos 31-22-00, 31-23-00, 31-23-00, 31-21-00, 35-21-00, 35-21-00, 35-22-00, and 35-22-00, and 35-25-00 it should include the cost of equipment owned and leased to others when rents therefore are included in the rent for equipment Accounts Nos 32-21-00, 32-22-00, 32-23-00, 32-23-00, 36-22-00 36-23-00 and 36-25-00, inclusive The composite rates used should be those prescribed or otherwise authorized by the Commission, except that where the use of component rates has been authorized in rates were effective during the vear, once full particulars in a footnote

All leased properties may be combined and one composite rate computes for each primary account, or a separate schedule may be included for each such property. Show in columns (e), (f), and (g) data applicable to Lessor property, when the rent therefore is included in Account Nos. 31-11-00, 31-12-00, 31-13-00, 31-21-00, 31-22-00, and 31-23-00, inclusive

If depreciation accruals have been discontinued for any account, the depreciation base should be reported, nevertheless, in support of depreciation reserves. Authority for the discontinuance of accruals should be shown in a footnote indicating the account(s) effected.

Disclosure in the respective sections of this schedule may be omitted if either to at road leased from others or total equipment leased from others represents less than 5% of total road owned or total equipment owned, respectively

335 ACCUMULATED DEPRECIATION -ROAD AND EQUIPMENT OWNED AND USED (Do. ars in Thousands)

- 1 Disclose the required information in regard to credits and debits to Account No. 735. "Accumulated Depreciation. Road and Equipment Property." during the year relating to owned and used road and equipment. Include entries for depreciation of equipment owned but not used when the resulting rents are included in the "Lease Rentals-Credit-Equipment" accounts and "Other Rents-Credit-Equipment" accounts. Exclude any entries for depreciation of equipment that is used but not owned when the resulting rents are included in "Lease Rental-Debit-Equipment" account and "Other Rents-Debit-Equipment" accounts, (See Schedule 351 for the accumulated depreciation to road and equipment owned and leased to others.)
- 2 If any data are included in columns (d) or (f), explain the entries in detail
- $3\,$ A debit balance in columns (b) or (g) for any primary account should be designated "Dr "
- 4 If there is any inconsistency between the credius to the reserve as shown in column (c) and the charges to operating expenses, a full explanation should be given
- 5 Enter amounts representing amortization under an authorized amortization program other than for defense projects on lines 29 and 39

340 DEPRECIATION BASE AND RATES-IMPROVEMENTS TO ROAD AND EQUIPMENT LEASED FROM OTHERS (Doilars in Thousands)

- 1 Show in column (b) for each primary account the depreciation base used in computing the depreciation charges for the month of January, and in column (c) show the depreciation base used in computing the depreciation charges for the month of December, in column (d) show the composite rates used in computing the depreciation charges for the month of December, and on lines 30 and 40 of these columns show the composite percentage of all road and equipment accounts, respectively ascertained by applying the primary account composite rates to the depreciation base used in computing the charges for December and dividing the total so computed by the total depreciation base for the same month. This schedule should include only improvements to leased property charged to Account 732 "Improvements on Leased Property." The composite rates used should be those prescribed or otherwise authorized by the Commission, except that where the use of component rates has been authorized, the composite rates to be shown for the respective primary accounts should be recomputed from the December charges developed by the use of authorized rates. If any charges in rates were effective during the year give full particulars in a footnote.
- 2. All improvements to leased properties may be combined and one composite rate computed for each primary account, or a separate schedule may be included for each such property.
- 3 If depreciation accruals have been discontinued for any account, the depreciation base should be reported, nevertheless, in support of depreciation reserves.

 Authority for the discontinuance of accruals should be shown in a footnote indicating the account(s) affected.
- 4 Disclosures in the respective sections of this schedule may be omitted if either total road leased from others or total equipment leased from others represents less than 5% of total road owned or total equipment owned, respectively. However, line 41, Grand Total, should be completed

342 ACCUMULATED DEPRECIATION-IMPROVEMENTS TO ROAD AND EQUIPMENT LEASED FROM OTHERS (Dollars in Thousands)

- 1 Enter the required information concerning debits and credits to Account 733. "Accumulated Depreciation-Improvements on Leased Property" during the year relating to improvements made to road and equipment property leased from others, the depreciation charges for which are included in operating expenses of the respondent
- 2 If any entries are made for column (d) "Other credits" or column (f) "Other debits," state the facts occasioning such entries on page 35. A debit balance in column (b) or (g) for any primary account should be shown in parenthesis or designated "Dr"
- 3 Any inconsistency between the credits to the reserve as shown in column (c) and the charges to operating expenses should be fully explained on page 35
- 4 Show in column (e) the debits to the reserve arising from retirements. These debits should not exceed investment, etc.
- 5 Details in the respective sections of this schedule may be omitted if either total road leased from others or total equipment leased from others represents less than 5% of total road owned or total equipment owned, respectively. However, line 39, Grand Total, should be completed

350 DEPRECIATION BASE AND RATES-ROAD AND EQUIPMENT LEASED TO OTHERS (Dollars in Thousands)

- 1 This schedule is to be used in cases where the related depreciation reserve is carried in the accounts of the respondent and the rent therefrom is included in Accounts 32-11-00, 32-12-00, 32-13-00, 32-21-00, 32-22-00 and 32-23-00
- 2 Show in columns (b) and (c), for each primary account, the depreciation base used in computing the depreciation for the months of January and December, respectively, with respect to road and equipment owned by the respondent but leased to others the depreciation charges for which are not included in operating expenses of the respondent but for which the depreciation reserve is recorded in the accounts of the respondent. If the base for road is other than the original cost or estimated original cost as found by the Commission's Bureau of Accounts, brought to a current date by the respondent from its Order No. 3 records and accounts or is other than ledger value for equipment a full explanation should be given
- 3 In column (d) show the composite rates used to compute the depreciation for the month of December and on lines 29 and 38 of this column show the composite percentage for all road and equipment accounts, respectively, ascertained by applying the primary accounts composite rates to the depreciation base used to compute the depreciation for December and dividing the total also computed by the depreciation base
- 4 If depreciation accruals have been discontinued for any account the depreciation base should be reported, nevertheless, in support of depreciation reserves. Authority for the discontinuance of accruals should be shown in a footnote indicating the account(s) affected.
- 5 If total road leased to others is less than 5% of total road owned, omit. If total equipment leased to others is less than 5% of total equipment owned, omit. However, Line 39, Grand Total, should be completed.

351 ACCUMULATED DEPRECIATION-ROAD AND EQUIPMENT LEASED TO OTHERS (Dollars in Thousands)

- 1 This schedule is to be used in cases where the depreciation reserve is carried in the accounts of the respondent and the rent therefrom is included in Accounts 32-11-00 32-13-00, 32-21-00, 32-21-00, 32-22-00, and 32 23-00
- 2 Disclose credits and debits to Account 735 "Accumulated Depreciation-Road and Equipment Property," during the year relating to road and equipment leased to others the depreciation charges for which are not includible in operating expenses of the respondent. (See Schedule 330 for the reserve relating to road and equipment owned and used by the respondent)
- 3 If any entries are made for "Other credits", and "Other debits" state the facts occasioning such entries. A debit balance in columns (b) or (g) for any primary account should be shown in parenthesis or designated "Dr"
- 4 Details in the respective sections of this schedule may be omitted if either total road leased to others or total equipment leased from others represents less than 5% of total road owned or total equipment owned, respectively. However, line 39, Grand Total, should be completed.

^{*}To be reported with equipment expenses rather than W&S expenses

352A INVESTMENT IN RAILROAD PROPERTY USED IN TRANSPORTATION SERVICE (By Company) (Dollars in Thousands)

Disclose the investment in railway property used in transportation service at the close of the year. This investment represents the aggregate of property owned or leased by the respondent and used in the respondent's transportation service. Such property includes (a) the investment reported in Accounts 731, "Road and Equipment Property" and 732 "Improvements on Leased Property" of the respondent, less any 731 or 732 property leased to others for their exclusive use of road, track or bridges (including equipment of other railway property covered by the contract). Equipment leased to others under separate distinct contracts shall not be deducted from the respondent's 731 or 732 property, and (b) the investment other companies' 731 or 732 property (including operating and lessor railroads) used by the respondent when the lease is for exclusive use or control of roads, tracks, or bridges (including equipment of other railway property covered by the contract). This excludes leased equipment from operating railroads under seporate distinct contracts and the investment of other carners in property (only used by the respondent.

- In column (a), classify each company in this schedule as respondent (R), lessor railroad (L), inactive or propnetary company (P), and other leased properties (O)
- in column (a) to (e), inclusive, first show the data requested for the respondent (R) next the data for companies whose entire properties are used in transportation service of the respondent, divided between the lessor (L) and propnetary (P) companies followed by data for carriers and others (O), portions of whose property are used in transportation service of the respondent. Show total for each class of company in column (d) and (e). Then show, as deductions, data for transportation property leased to carriers and others.
- In column (c), line-haul carriers report the miles of road used in line-haul service. Report miles in whole numbers
- In column (d), show the amount applicable in Accounts 731 and 732 on the books of the companies whose names appear in column (b). Values of property of other carners segregated by estimate or otherwise should correspond in amount to the deductions made by the owners in their reports. If seperate value is not available, explanations should be given. Differences between the amounts in column (d) of this schedule and the amounts in column (c), line 24, on the asset side of the comparative general balance sheet of each individual railway, should be explained in a footnote. Book value included in accounts 731 or 732 of the owner should be reported in column (d) in reference to the investment of the investment in the securities of the owner unless a good reason can be given for the contrary. Methods of estimating (by capitalizing rentals at 6 percent or otherwise) value of property of private owners, or portions of property of other carners should be explained.
- 6 In column (σ), show the amount of depreciation and amortization accrued as of the close of the year in accounts 733, 734, 735, 736, and 772 that is applicable to the property of the carners whose names are listed in column (b), regardless of where the reserves therefor are recorded

352B INVESTMENT IN RAILWAY PROPERTY USED IN TRANSPORTATION SERVICE (By Property Accounts) (Dollars in Thousands)

- In columns (b) through (e) give, by primary accounts, the amount of investment at the close of the year in property of the respondent and each group or class of companies and properties
- The amounts for respondent and for each group or class of companies and properties on line 44 herein, should correspond with the amounts for each class of company and properties shown in Schedule 352A Continuing records shall be maintained by respondent of the primary property accounts separately for each company or property included in this schedule
- Report on line 29 amounts representing capitalization of rentals for leased property based on 6 percent per year where property is not classified by accounts by non-carrier owners, or where cost of property leased from other carriers is not ascertainable. Identify non-carrier owners, and briefly explain on page 39 methods of estimating value of property of non-carriers or property of other carriers
- Report on line 30 amounts not includible in the accounts shown, or on line 29 The items reported should be briefly identified and explained. Also include here those items after permission is obtained from the Commission for exceptions to prescribed accounting. Reference to such authority should be made when explaining the amounts reported. Respondents must not make arbitrary changes to the print stub or column headings without authority from the Commission

412 WAY AND STRUCTURES (Dollars in Thousands)

- 1 Report freight expenses only
- 2 The total depreciation expense reported in column (b), line 29, should balance to the sum of the depreciation expense reported in schedule 410. column (f) lines, 136, 137, and 138
- 3 Report in column (c) the lease rentals for the various property categories of Way and Structures. The total net lease/rental reported in column (c), line 29 should balance the net amount reported in schedule 410, column (f), lines 118 through 123, plus lines 130 through 135.

 If an entire road or segment of track is leased and if the actual breakdown of lease/rentals by property categories is not known, apportion the lease/rentals based on the percentage of the categories' depreciation bases to the depreciation bases for all categories of depreciable leased property.

 Use Schedule 352B of this report for obtaining the depreciation bases of the categories of leased property.
- 4 Amortization adjustment of each road property type which is included in column (b) shall be repeated in column (d) as a debit or credit to the appropriate line item, the net adjustment on line 29 shall equal the adjustment reported on line 29 of schedule 335
- 5 Report on line 28 all other lease rentals not apportioned to any category listed on lines 1-27
- 6 Line 11, Account 16, should not include computer and data processing equipment reported on line 37 of Schedule 415

414. RENTS FOR INTERCHANGED FREIGHT TRAIN CARS AND OTHER FREIGHT-CARRYING EQUIPMENT (Dollars in Thousands)

1 Report freight expenses only

2 Report in this supporting schedule rental information by car type and other freight-carrying equipment relating to the interchange of railroad owned or leased equipment and privately owned equipment. (Reporting for leased equipment covers equipment that carrier's own railroad markings)

and 230 (debits) Trailer and container rentals in this schedule are included in Schedule 410, column (f) tines 315 and 316 However, the trailer and container rentals in this schedule will not balance to tines 315 and 316 of Schedule 410 because those lines include rents for "Other Equipment" which is reported in Schedule 415, column (e) The balancing of Schedules 410, 414 and 415 "Other Equipment" is outlined in note 6 to Schedule 415 3 The gross amounts receivable and payable for freight-train cars (line 19, columns (b) through (d), and line 19, colums (e) through (g), respectively) should balance with Schedule 410, column (f) lines 231 (credits)

5 Report in columns (c), (f), (f), and (g) rentals for ratiroad owned cars prescribed by the Board in Ex Parte No 334, for which rentals are settled on combination mileage and time basis (basic per dient) 4 Report in columns (b) and (e) rentals for private-line cars (whether under railroad control or not) and shipper owned cars

¹ The data to be reported on lines 38, 39 and 40 in columns (g) and (h) is the investment recorded in Property Account 44, allocated to Locomotives, Freight Cars, and Other Equipment

² The depreciation to be reported on lines 38, 39 and 40 in column (c) is calculated by multiplying the investment in each element by the effective composite rate for Property Account 44, and then adding or subtracting the adjustment reported in column (e) This calculation should equal the amount shown in column (c), Schedule 335.

¹ The data to be reported in line 38 in column (b) is the amount reported in Schedule 410, column (f), line 203, reduced by the allocable portion of line 216

² The data to be reported on line 39 in column (b) is the amount reported in Schedule 410, column (f), line 222, reduced by the allocable portions of line 235

³ The data to be reported on line 40 in column (b) is the amount reported in Schedule 410, column (f), lines 302 through 306, reduced by the allocable portion of line 320

GENERAL INSTRUCTIONS CONCERNING RETURNS TO BE MADE IN SCHEDULE 415

- 1 Report freight expenses only
- 2 Report by type of equipment all natural expenses relating to equipment functions (salaries and wages, materials, tools, supplies, fuels and lubricants, purchased services, and general)
- 3 Report in column (b) net repair expense, excluding the cost to repair damaged equipment

Schedule 415, column (b), will balance to Schedule 410, column (f), as follows

- (a) Locomotives, line 5 plus line 38, compared to the sum of Schedule 410, lines 202, 203 plus 216 (excluding wreck repairs) Do not report in Schedule 415. Equipment Damaged from Schedule 410, line 204
- (b) Freight Cars, line 24 plus line 39, compared to the sum of Schedule 410, lines 221, 222 plus 235 (excluding wreck repairs) Do not report in Schedule 415, Equipment Damaged from Schedule 410, line 223
- (c) Sum of Highway Equipment (line 32), Floating Equipment (line 35), Passenger and Other Revenue Equipment (line 36), Computer and Data Processing Equipment (line 37), Machinery-Other Equipment (line 40), and Work and Other Non-Revenue Equipment (line 41), compared to Schedule 410, the sum of lines 302 through 307, inclusive, plus line 320 (excluding wreck repairs) Do not report in Schedule 415, Equipment Damaged from Schedule 410, line 308

Note Lines 216, 235, and 320 of Schedule 410 are credit amounts

The allocation of freight car repair expense reportable on Schedule 415 by car types shall be in accordance with Instruction 2-21, Freight train repair costing, 49 CFR 1201

4 Depreciation expense for each class of equipment by car type shall be reported in columns (c) and (d) For improvements on leased property, Accounts 732 and 733, use a supplementary Schedule 415, which will relate to Schedules 340 and 342

Depreciation charges reported on columns (c) and (d) will balance to Schedule 410, column (f), as follows

- (a) Locomotives, line 5 and 38 compared to Schedule 410, line 213
- (b) Freight Cars, line 24 and 39 compared to Schedule 410, line 232
- (c) Sum of Highway Equipment (line 32), Floating Equipment (line 35), Passenger and Other Revenue Equipment (line 36), Computer and Data Processing Equipment (line 37), Machinery-Other Equipment (line 40), and Work and Other Non-Revenue Equipment (line 41), compared to Schedule 410, line 317
- 5 Amortization adjustment of each equipment type which is included in column (c) shall be reported in column (e) as a debit or credit to the appropriate line item. The net adjustment on line 43 shall equal the equipment amortization adjustment applicable to equipment used in freight service included in line 39, column (c), of Schedule 335
- 6 Lease/Rentals reported in column (f) should balance to column (f) of Schedule 410 as follows
- (a) Locomotives, line 5 and 38, compared with Schedule 410, lines 207, 208, 211, and 212
- (b) Freight Cars, line 24 and 39, compared with Schedule 410, lines 226 and 227 (note that Schedule 410, lines 230 and 231, are reported in Schedule 414 and are not to be included in Schedule 415)
- (c) Sum of Lease/Rentals for All Other Equipment, lines 32, 35, 36, 37, 40, and 41, will balance to Schedule 410, lines 311, 312, 315, and 316, except for the interchange rental on trailers and containers which is reported in Schedule 414. Therefore, both Schedules 414 and 415 should be used when balancing Lease/Rentals Other Equipment to Schedule 410. Do not report in Schedule 415 the Trailer and Container rentals reported in Schedule 414.
- 7 Investment base by types of equipment shall be reported in columns (g) and (h) and should not include the cost of Equipment Used But Not Owned when the rents therefore are included in the rent for equipment and Account Nos 31-21-00, 31-22-00, 31-23-00, 35-21-00, 35-22-00 and 35-23-00 it should include the Cost of Equipment Owned and Leased to Others when the rents are included in the rent for Equipment Account Nos 32-21-00, 32-22-00, 32-23-00, 36-21-00, 36-22-00 and 36-23-00

Property Used But Not Owned should also be included when the rent is included in Account Nos 31-12-00, 31-13-00, 31-21-00, 31-22-00 and 31-23-00, inclusive

The grand total of each equipment account in column (h) of Schedule 330 should equal the totals of line items constituting the equipment account totals of columns (g) and (h), of Schedule 415

8 Accumulated depreciation for each class of equipment shall be reported in columns (i) and (j) The grand total of each equipment reserve account in column (g), Schedule 335, shall equal the combined aggregate total accumulated depreciation for line items constituting the corresponding equipment accounts reported in columns (i) and (j), on Schedule 415

| Railroad Annual Report R- | <u> </u> | |

417 SPECIALIZED SERVICE SUBSCHEDULE - TRANSPORTATION (Dollars in Thousands)

Report in lines 1, 2, 3, 4, and 10 the total of those natural expenses (salanes and wages, matenal, tools, supplies, fuels and lubricants, purchased services, and general) incurred in the operation of each type of specialized service facility This schedule does not include switching services performed by train and yard crews in connection with or within

When it is necessary to apportion expenses, such as administrative expenses to two or more services, they shall be apportioned on the most equitable basis available to the respondent and only to the services they support. The total expenses in column (I) should balance with the respective line items in Schedule 410, Railway Operating Expenses

Report in column (b), line 2, the expenses incurred in highway movements of trailers and containers performed at the expense of the reporting rairoad within a terminal area for the purpose of pick-up, delivery or highway interchange service Report in column (b), line 3, the expenses incurred in operating facilities for handling trailers and/or containers, including storage expenses. See schedule 755, note R

incurred by the railroad in moving automobiles, etc., between bi-level and tin-level loading and unloading facilities over the highway to shippers, receivers or connecting carners. Report in column (1) operating exponses The operation of floating equipment in line-haul service (between distinct terminals) should be reported in column (c) on line 2. Floating operations conducted within a general terminal or harbor area should be Report in column (g), line 3, the expenses incurred by the railroad in loading and unloading automobiles, trucks, etc. to and from bi-level and tri-level auto rack cars. Report on line 2, column (g), the expense reported in column (c), line 3

Report on line 4, colurm (b), the expenses related to heating and refingeration of TOFC/COFC trailers and containers (total debits and credits) The expenses on line 4, colurm (h), relate to refingerator cars only for land facilities in support of floating operations, including the operation of docks and wharves

Report in column (i) total expenses incurred in performing rail substitute service, other highway revenue service, LCL terminal operations, warehouse operations, freight car transloading, grain elevator terminal

operations and livestock feeding operations only

Railroad Annual Report R-1

B Adjustments to Federal Income Taxes

- In column (a) are listed the particulars which most often cause a differential between taxable income and pretax accounting income. Other particulars which cause such a differential should be listed under the caption Other (Specify), including State and other taxes deferred if computed separately. Minor items, each less than \$100,000, may be combined in a single entry under Other (Specify).
- 2 Indicate in column (b) the beginning of the year total of Accounts 714, 744, 762, and 786 applicable to each particular item in column (a)
- 3 Indicate in column (c) the net change in Accounts 714, 744, 762 and 786 for the net tax effect of timing differences originating and reversing in the current accounting period
- 4 Indicate in column (d) any adjustments, as appropriate, including adjustments to eliminate or reinstate deferred tax effects (credits or debits) due to applying or recognizing a loss carry-forward or a loss carry-back
- 5 The total of line 19 in columns (c) and (d) should agree with the total of the contra charges (credits) to Account 557, Provision for Deferred Taxes, and Account 591, Provision for Deferred Taxes Extraordinary Items, for the current year
- 6 Indicate in column (e) the cumulative total of columns (b), (c), and (d) The total of column (e) must agree with the total of Accounts 714, 744, 762 and 786

502 COMPENSATING BALANCES AND SHORT-TERM BORROWING ARRANGEMENTS (Dollars In Thousands)

Using the following notes as a guideline, show the requirements compensating balances and short-term borrowing arrangements. Footnote disclosure is required even though the arrangement is not reduced in writing

- 1 Disclose compensating balances not legally restricted, lines of credit used and unused, average interest rate of short-term borrowings outstanding at balance sheet date, maximum amount of outstanding borrowings during the period and the weighted average rate of those borrowings
- 2 Time deposits and certificates of deposit constituting compensating balances not legally restricted should be disclosed
- 3 Compensating balance arrangements need only be disclosed for the latest fiscal year
- 4 Compensating balances included in Account 703, Special Deposits, and in Account 717, Other Funds, should also be separately disclosed below
- 5 Compensating balance arrangements are sufficiently material to require disclosure in footnotes when the aggregate of written and oral agreement balances amount to 15 percent or more of liquid assets (current cash balances, restricted and unrestricted plus marketable securities)
- 6 When a carner is not in compliance with a compensating balance requirement, that fact should be disclosed along with stated and possible sanctions whenever such possible sanctions may be immediate (not vague or unpredictable) and material

INSTRUCTIONS CONCERNING RETURNS TO BE MADE IN SCHEDULE 512

egal, accounting purchasing or other type of service including the furnishing of materials, supplies, purchase 1 Furnish the information called for below between the respondent and the affiliated companies or persons iffiliated with the respondent, including officers, directors, stockholders, owners partners or their wives and of equipment, leasing of structures, land and equipment, and agreements relating to allocation of officers' other close relatives, or their agents. Examples of transactions are, but not restricted to management,

To be excluded are payments for the following types of services salaries and other common costs between affiliated companies

(a) Lawful tanif charges for transportation services

(b) Payments to or from other carriers for interline services and interchange of equipment

(c) Payment to or from other carriers which may reasonably be regarded as ordinarily connected with outine operation or maintenance, but any special or unusual transactions should be reported

(d) Payments to public utility companies for rates or charges fixed in conformity with government

to more than one affiliate, and the aggregate compensation amounts to \$50,000 or more for the year, reference affiliates included in the agreement and describe the allocation of charges. If the respondent provider services to this fact should be made and the detail as to the allocation of charges should be stated. For those affiliates 2 In column (a) enter the name of the affiliated company, person or agent with which respondent received or provided services aggregating \$50,000 or more for the year. If an affiliated company provides services to more than one affiliate, and the aggregate compensation amounts to \$50,000 or more for the year, list all the providing services to the respondent, also enter in column (a) the percent of affiliate's gross income derived

illematively, attach a "Pro forma" balance sheet and income statement for that portion or entity of each attiliate The respondent may be required to furnish as an attachment to Schedule 512 a balance sheet and income statement for each affiliate with which respondent carrier had reportable transactions during the year or

which furnished the agreed to services, equipment, or other reportable transaction. The statements if required, should be prepared on a calendar year basis in conformly with the prescribed schedules for the balance sheet depreciating equipment or other property furnished the carrior, and (2) whether the affiliate's Federal income and income statement in Annual Roport Form R-1 and should be noted (1) to indicate the method used for lax return for the year was filed on a consolidated bas's with the respondent carrier

3 In column (b) indicate nature of relationship or control between the respondent and the company or

person identified in column (a) as follows

(a) If respondent directly controls affiliate, insert the word "direct"

(b) If respondent controls through another corrupany, unsert the word "indirent"

(d) If respondent is controlled directly or instrectly by the company listed in column (a), insert the ward (c) If respondent is under common control with affiliate insert the word "common"

(e) If control is exercised by other means such as a management contract or other arrangement of whatever kind, insert the word "other" and footnote to describe such arrangements

controlled*

column (c), list each type of service separately and show total for the affiliate. When services are both provided and received between the respondent and an attitute they should be listed scriarately and the amounts shown purchase of material etc. When the affiliate listed in column (a) provides more than one type of service in 4. In column (c) fully describe the transactions involved such as management focs, lease of building separately in column (e)

5 In column (d) report the dollar amounts of transaction shown and the effect of any change in the method of establishing the forms from that used in the preceding period 6 in column (e) report the dollar amounts due from or to related parties and if not otherwise apparent the lerms and manner of settlement. Insert (P) paid and (R) received by the arrount in column (e) SCHEDULE 512. TRANSACTIONS BETWEEN RESPONDENT AND COMPANIES OR PERSONS AFFILIATED WITH RESPONDENT FOR SERVICES RECEIVED OR PROVIDED

Railroad Annual Report R-1

INSTRUCTIONS CONCERNING RETURNS TO BE MADE IN SCHEDULE 700.

State particulars of all tracks operated by the respondent at the close of the year, according to the following classification

- (1) Line owned by respondent
- (2) Line owned by proprietary companies
- (3) Line operated under lease for a specified sum, lessor being (A) an affiliated corporation, or (B) independent or not affiliated with respondent
- (4) Line operated under contract or agreement for contingent rent, owner being (A) an affiliated corporation, or (B) independent or not affiliated with respondent
 - (5) Line operated under trackage rights

Give subtotals for each of the several numbered classes, in the order listed above, as well as the total for all classes

Lengths of track should be reported to the nearest WHOLE mile adjusted to accord with footings, i.e., counting one-half mile and over as a whole mile and disregarding any fraction less than one-half mile

In column (a) insert the figure (and letter, if any) indicating its class in accordance with the preceding classification

In column (b) give the various proportions of each class owned or leased by respondent, listing each proportion once in any grouping. Canadian mileage should be segregated and identified on separate lines in the various groupings. For each listing, in column (d) give its entire length (the distance between locations of single or first main track), and in the following columns the lengths of second main track, all other main tracks, passing tracks, cross-overs and turn-outs, way switching tracks, and yard switching tracks. These classes of tracks are defined as follows.

Running tracks. Running tracks, passing tracks, cross-overs, etc., including turn-outs from those tracks to clearance points

Way switching tracks Station, team, industry and other switching tracks for which no separate service is maintained

Yard switching tracks Yards where separate switching services are maintained, including classification, house, team, industry and other tracks switched by yard locomotives

The returns in columns (h) and (i) should include tracks serving industries, such as mines, mills, smelters, factories, etc. Tracks belonging to an industry for which no rent is payable should not be included

Tracks leading to and in gravel and sand pits and quarries, the cost of which is chargeable to a clearing account and which are used in getting out material for the respondent's use, should not be included

Class (1) includes all lines operated by the respondent at the close of the year to which it has title in perpetuity

Class (2) includes each line, full title to which is in an inactive proprietary corporation of the respondent (i.e., one all of whose outstanding stocks or obligations are held by or for the respondent, and which is operated by the respondent or an affiliated system corporation without any accounting to the said proprietary corporation). It may also include such line when the actual title to all of the outstanding stocks or obligations rest in a corporation controlled by or controlling the respondent, but in the case of any such inclusion, the facts of the relation to the respondent of the corporation holding the securities should be fully set forth in a footnote. An inactive corporation is one which has been practically absorbed in a controlling corporation, and which neither operates property nor administers its financial affairs, if it maintains an organization, it does so only for the purpose of complying with legal requirements and maintaining title to property or franchises

Class (3) includes all tracks operated under a lease or formal conveyance of less than the grantor's interest in the property, with a specific and unconditional rent reserved. The fact that the lessor does not maintain an independent organization for financial purposes is immaterial in this connection.

Class (4) is the same as class (3), except that the rent reserved is conditional upon earnings or other fact

Class (5) includes all tracks operated and maintained by others, but over which the respondent has the right to operate some or all of its trains. In the road of this class the respondent has no proprietary rights, but only the rights of a licensee. Include in this class, also, all main tracks, industrial tracks and sidings owned by noncarrier companies and individuals when the respondent operates over them, but does not have exclusive possession of them.

Road held by the respondent as joint or common owner or a joint lessee or under any joint arrangement should be shown in its appropriate class, and the entry of length should be of the entire length of the portion jointly held. The class symbol should have the letter (J) attached

Road operated by the respondent as agent for another carrier should not be included in this schedule

700. MILEAGE OPERATED AT THE CLOSE OF YEAR Running tracks, passing tracks, cross-overs, etc Miles of way Miles of Miles of all Miles of pass-Miles of yard Proportion owned Line other switching switching Line or leased Miles of road second main ing tracks, TOTAL No. Class by Respondent track main tracks cross-overs, tracks tracks No and turnouts (d) (g) (h) (ı) (b) (c) (e) (a) 103 3,253 2,760 5,688 40,667 1 100% 24,776 4,087 2 2 5 5 1J 75% 3 17 17 3 1J 66.7% 4 4 1J 50% 200 122 40 19 60 188 629 5 6 37 43 5 1J 33.3% 56 57 6 6 1J 25% 11 7 7 1J 20% 0 8 200 40 19 67 303 751 8 TOTAL 1J 122 9 9 24,976 4,209 143 3,272 2,827 5,991 TOTAL 1 AND 1J 41,418 10 10 2 137 12 11 25 185 11 3 128 2 16 16 8 170 11 12 4 395 7 44 15 461 12 13 5 7,717 353 2 112 127 208 8,519 13 57 33,353 4,564 145 3,419 3,025 6,247 50,753 57 **GRAND TOTAL** 58 58 MILES OF ELECTRIFIED

INSTRUCTIONS CONCERNING RETURNS TO BE MADE IN SCHEDULE 710

instructions for reporting locomotive and passenger-train car data

1 Give particulars of each of the various classes of equipment which respondent owned or leased during the year 2 In column (c) give the number of units purchased new or built in company shops. In column (d) give the number of new units leased from others. The term "new" means a unit placed in service for the first time on any

3 Units leased to others for a period of one year or more are reportable in column (i) Units temporarily out of respondent's service and rented to others for less than one year are to be included in column (h) Units rented from others for a period less than one year should not be included in column (i)

4 For reporting purposes, a "ocomotive unit" is a self-propelled vehicle generating or converting energy into motion, and designed solely for moving other equipment. An "A" unit is the least number of wheel bases with superstructure designed to use singly or as a lead focomotive unit in combination with other locomotive units. A "B" unit is smilar to an "A" unit, but not equipped for use singly or as a lead locomotive unit. A "B" unit may be equipped with hostler controls for independent operation at terminals.

may be equipped with moster controls for independent operation at terminals

5. A 'Self-propelled car' is a rail motor car propelled by electric motors receiving power from a third rail or
verthead, or internal combustion engines located on the car riself. Trailers equipped for use only in trains of
cars that are self-propelled are to be included as self-propelled equipment.

6 A "diesel" unit includes all units propelled by diesel internal combustion engines irrespective of final drive or whether power may at times be supplied from an external conductor. Units other than diesel-electric, e.g., diesel-hydraulic, should be identified in a footnote giving the number and a brief diescription. An "electric" unit includes all units which receive electric power from an overhead contact wire or a third rail, and use the power to drive one or more electric motors that propel the vehicle. An "other self-powered unit includes all units other than diesel, or electric, e.g., steam, gas turbine. Show the type of unit, service and number, as appropriate in a brief description sufficient for positive identification. An "auxiliary unit includes all units used in conjunction with locomotives, but which draw their power from the "mother" unit, e.g.,

boosters, stugs.etc For reporting purposes, indicate radio-controlled self powered diesel units on lines 1 through 8, as appropriate, Radio-controlled units that are not self-powered, i.e., those writtout a diesel, should

be reported on line 13 under "auxiliary units"

7 Column (k) should show aggregate capacity for all units reported in column (j), as follows. For locomotive units, report the manufacturers' rated horsepower (the maximum continuous power output from the diesel engine or engines delivered to the main generator or generators for tractive purposes). Exclude capacity data for steam locomotives. For passenger-train cars report the number of passenger seats available for revenue service, counting one passenger to each berth in sleeping cars.

8 Passenger-train car types and service equipment car types correspond to AAR Mechanical Division designations. Descriptions of car codes and designations are published in The Official Railway Equipment Register.

9 Cross-checks

Schedule 710 Schedule 710

710 INVENTORY OF EQUIPMENT - Continued

Instructions for reporting freight-train car data

- 1 Give particulars of each of the various classes of equipment which respondent owned or leased during the year
- 2 In column (d) give the number of units purchased or built in company shops In column (e) give the number of new units leased from others. The term "new" means a unit placed in service for the first time on any railroad.
- 3 Units leased to others for a period of one year or more are reportable in column (n). Units temporarily out of respondent's service and rented to others for less than one year are to be included in column (i). Units rented from others for a period less than one year should not be included in column (j).

710 INVENTORY OF EQUIPMENT - Continued

- Column (m) should show aggregate Lapacity for all Links reported in columns (k) and (l) as follows. For freight-train cars, report the normal capacity (intens of 2,000 lbs) as provided for in Fiule 86 of the AAR Code of Rules Governing Cars in Interchange. Convert the capacity of lank Lars to capacity in tons of the commodity which the car is intended to carry customarily.
- Time-micage cars refers to freight cars, other than cabooses, owned or neld under case arrangement, whose interline rental is settled on a per diem and line haut mileage basis under "Cope of Car Hire Rules" or would be so settled it used by another railroad.

710S UNIT COST OF EQUIPMENT INSTALLED DURING THE YEAR (Dollars in Thousands)

- 1 Give particulars as requested, separately, for the various classes of new units and rebuilt units of equipment installed by respondent during the year. If information regarding the cost of any units installed is not complete at time of filing of report, the units should be omitted, but reference to the number of units omitted should be given in a footnote, the details as to cost to be given in the report of the following year. The cost of units under construction at the close of the year should not be reflected in this schedule even though part of the cost appears in the property account for the year. Indicate in column (e) whether an installation represents equipment purchased (P) built or rebuilt by contract in outside railroad shops (C), or built or rebuilt in company or system shops.

 (S) including units acquired through capitalized leases (L)
- 2 In column (a) list each class or type of locomotive unit, car, or TOFC/COFC equipment on a separate line. By class is meant the standard classification used to distinguish types of locomotive units, freight cars or other equipment adopted by the Association of American Railroads, and should include physical characteristics requested by Schedule 710. Locomotive units should be identified as to power source, wheel arrangement, and horsepower per unit, such as multiple-purpose diesel locomotive A units (B-B), 2,500 HP. Cars should be identified as to special construction or service characteristics, such as aluminum-covered hopper car (LO), steel boxcars-special service (XAP), etc. For TOFC/COFC show type of equipment as enumerated in Schedule 710.
 - 3 In column (c) show the total weight in tons of 2,000 pounds. The weight of the equipment acquired should be the weight empty
 - 4 The cost should be the complete cost as entered on the ledger, including foreign line freight charges and handling charges
- 5 Data for this schedule should be confined to the units reported in Schedule 710, columns (c) and (e) for locomotive units, passenger-train cars and company service cars and columns (d) and (f) for freight train cars, floating equipment and highway revenue equipment. Disclose new units in the upper section of this schedule and in the lower section disclose rebuilt units acquired or rewritten into the respondent's accounts. The term "new" as used herein shall mean a unit or units placed in service for the first time on any railroad.
- 6 All unequipped boxcars acquired in whole or in part with incentive per diem funds should be reported on separate lines and appropriately identified by tootnote or sub-heading

GENERAL INSTRUCTIONS CONCERNING RETURNS TO BE MADE IN SCHEDULES 720, 721, 723, AND 726

purposes of these schedules, the track categones are defined as follows

A - Freight density of 20 million or more gross ton miles per track mile per year (include passing tracks, turnouts and crossovers)

B - Freight density of less than 20 million gross ton miles per track mile per year, but at least 5 million (include passing tracks, turnouts and crossovers)

C - Freight density of less than 5 million gross ton miles per track mile per year, but at least 1 million (include passing tracks, turnouts and crossovers)

D - Freight density of less than 1 million gross ton miles per track mile per year(include passing tracks, turnouts and crossovers)

E - Way and yard switching tracks, (passing tracks, crossovers and turnouts shall be included in category A, B, C, D, F, and Potential abandonments, as appropriate)

F - Track over which any passenger service is provided (other than potential abandonments) Mileage should be included within track categorics A through E unless there is dedicated entirely

Potential abandonments - Route segments identified by railroads as potentially subject to abandonment as required by Section 10904 of the Interstate Commerce Act This schedule should include all class 1, 2, 3, or 4 track from schedule 700 that is maintained by the respondent (class 5 is assumed to be maintained by others) to passenger service

If for two consecutive years, a line segment classified in one track category maintains a traffic density which would place it in another, it shall be reclassified into that category as of the beginning

4 Traffic density related to passenger service shall not be included in the determination of the track calegory of a line segment of the second year

720 TRACK AND TRAFFIC CONDITIONS

1 Disclose the requested information pertaining to track and traffic conditions

724 RAILS LAID IN ADDITIONAL TRACKS AND IN NEW LINES AND EXTENSIONS (Dollars in Thousands)

- 1 Give particulars of all rails applied during the year in connection with the construction of new track in column (a) classify the kind of rail applied as follows
 - (1) New steel rails, Bessemer process
 - (2) New steel rails, open-hearth process
 - (3) New rails, special alloy (describe more fully in a footnote)
 - (4) Relay rails
- 2 Returns in columns (c) and (g) should be reported in WHOLE numbers Fractions of less than one-half should be disregarded, and fractions of one-half or more should be counted as one
- 3 The returns in columns (d) and (h) should include the cost of loading at the point of purchase ready for shipment, the freight charges paid foreign lines, and the cost of handling rails in general supply and storage yards. The cost of unloading, hauling over carner's own lines, and placing the rails in tracks and of train service in connection with the distribution of the rail should not be included in this schedule.

725 WEIGHT OF RAIL

Give the particulars called for below concerning the road and track operated by the respondent at the close of the year. Only the respondent's proportion of jointly owned mileage should be included. Under "Weight of rail," the various weights of rails should be given. Road and track occupied under trackage right or other form of license should not be included herein, but all road and track held under any form of lease (granting exclusive possession to the lessee) should be included.

| Line No. | Weight of rails per yard (a) | Line-haul companies (miles of main track) (b) | Switching and terminal companies (miles of all tracks) | Remarks (d) | Line No |

1 1:

Railroad Annual Report R-1

INSTRUCTIONS CONCERNING RETURNS TO BE MADE IN SCHEDULE 753

Unit Train, Way Train, and Through Train data under Items 2 3, 4, 6 and 12 shall be obtained from conductor's wheel reports (freight) or similar reports. Unit train service is a specialized scheduled shuttle type service in equipment (raintoad or privately owned) dedicated to such service, moving between origin and destination. The applicable tariffs and/or contracts generally require that a specific minimum tonnage or quantity of carloads be tendered as a unit for shipment on one bill of lading or other shipping document in a solid train for movement between origin and destination. Such tariffs and/or contracts generally contain restricted detention provisions and are subject to time-volume requirements which reflect the approximate capacity of the unit trains for the stated period. Way trains are defined as trains operated primarily to gather and distribute cars in road service and move them between way stations or way points. Through trains are those trains operated between two or more major concentration or distribution points. Do not include unit train statistics in way or through train statistics. A work train is a train operated solely or preponderantly for the purpose of transporting company freight, work equipment or company employees. Statistics for work trains should be reported under Item 11 only. Statistics related to company equipment, company employees, and company freight moving in transportation trains are not to be reported in Item 11, but are to be reported in Items 4-17, 6-04, 7-02, 8-04, and 8-05 as instructed in notes i. K. and L.

- (A) Report miles of road operated at close of year, excluding industrial tracks, yard tracks, and sidings
- (B) A train-mile is a movement of a train a distance of one mile disregarded and other fractions shall be considered as one mile. Train Miles-Running shall be based on the actual distance run between terminals and/or stations and shall be computed from the official time tables or distance tables. Train-miles shall not be increased to cover the running of locomotives from shops to terminals, doubling hills, switching, or other work at way stations, or for the service of helper or pusher locomotives or of extra locomotives on double-head or triple-head trains. When the carner's trains are detoured over foreign roads, the miles shall be computed on the basis of the miles actually run and in accordance with the service performed. Train-miles shall be kept separately for trains hauled by locomotives and trains moved by motorcars.
- (C) A motorcar is a self-propelled unit of equipment designed to carry freight or passengers, and is not considered a locomotive
- (D) A locomotive is a self-propelled unit of equipment designed solely for moving other equipment. A locomotive unit-mile is a movement of a locomotive unit a distance of one mile under its own power. Include miles made by all locomotive units. Exclude miles made by motorcars. Miles of locomotives in helper service shall be computed on the basis of actual distance run in such service.
- (E) All locomotives unit-miles in road service shall be based on the actual distance run between terminals and/or stations. Follow instruction (B) regarding fractions and official time tables for computing locomotive miles
- (F) Train switching locomotive-miles shall be computed at the rate of six miles per hour for the time actually engaged in such service. Include miles allowed train locomotives for performing switching service at terminals and way stations.
- (G) Yard switching locomotive-miles shall be computed at the rate of six miles per hour for the tirne actually engaged in yard switching service include miles allowed for yard locomotives for switching service in yards where regular switching service is maintained and in terminal switching and transfer service
- (H) Use car designations shown in Schedule 710, under Railroad Owned and Leased Cars, items 4-01 and 4-11. Report both foreign cars and respondents' own cars while on the line of the respondent railroad. In Items 4-13 and 4-15 report the private-line categories, miles for private-line cars (whether or not under railroad control), and shipper-owned cars. A car-mile is a movement of a unit of car equipment a distance of one mile. Report miles made by flatcars carrying loaded highway trailers or empty highway trailers moving under revenue billings as loaded freight car-miles made by flatcars carrying other empty highway trailers as empty freight car-miles. Exclude miles made by motorcars and report miles made by business cars of other than the reporting carrier as sleeping car-miles in Item 5-03. Report mail, express baggage cars, and combination cars, other than 5-02 combination cars, in Item 5-05.
- (I) Exclude from Items 4-01, 4-11, 4-13, and 4-15 car-miles of work equipment, cars carrying company freight, and no-payment cars moving in transportation trains include such car-miles in Items 4-17, 4-18, and 4-19. No-payment car-miles are miles made by private-line cars (other than railroad controlled) and shipper-owned cars for which the railroad does not reimburse the owner on a loaded and/or empty mile basis. If the payment for the loaded miles includes the empty miles, the loaded and empty miles should not be considered no-payment car miles.
- (J) Report miles actually run by passenger-train cars in transportation service. Passenger-train car-miles include miles run by coaches and cars in which passengers are carried at regular tarif fares without extra charge for space occupied, miles run by combination passenger and baggage, passenger and mail, passenger and express, miles run by sleeping, parlor, and other cars for which an extra fare is charged, miles run by dining, cafe, and other cars devoted exclusively to the serving of meals and other refreshments and by club, lounge, and observation cars, and miles run by other passenger-train cars where services are combined, such as baggage, express, and mail
- (K) From conductors or dispatcher's train reports or other appropriate sources, compute weight in tons (2,000 pounds. Item 6-01 includes weight of all locomotive units moved one mile in transportation trains. Ton-miles of motorcars should be excluded. Items 6-02 and 6-03 represent tons behind locomotive units (car and contents, cabooses) moved one mile in transportation trains (excluding non-revenue gross ton-miles). Non-revenue gross ton-miles in transportation trains include work equipment and cars carrying company freight and their contents. Use 150 lbs as the average weight per passenger and four tons as the average weight of contents of each head-end car.
- (L) From conductor's train reports or other appropriate sources compute ton-miles of freight. Ton-miles represent the number of tons of revenue and non-revenue treight moved one mile in a transportation train. Include net ton-miles in motorcar trains. Exclude I c I shipment of treight handled in mixed baggage express cars. Total ton-miles of revenue freight should correspond to the ton-miles reported on Form CBS.
- (M) Road service represents elapsed time of transportation trains (both ordinary and light) between the time of leaving the initial terminals and the time at final terminals, including trains switching at way stations and delays on road as shown by conductor's or dispatcher's train reports include time of motorcar service performed by train locomotives at terminals and way stations. Report in Item 9-02 train switching is the time spent by the train while performing switching service at terminals and way stations where no regular yard service is maintained. A train hour is independent of the number of locomotives in the train.
- (N) Yard switching hours are hours expended in switching service performed by yard crews in yards where regular switching service is maintained, including switching and transfer service in connection with the transportation of revenue and incidentally of company freight. Hours in yard switching are independent of the number of locomotives used

INSTRUCTIONS CONCERNING RETURNS TO BE MADE IN SCHEDULE 755-Concluded

- (O) Work-train miles include the miles run by trains engaged in company service such as official inspection inspection trains for railway commissioners for which no revenue is received, trains running special with fire apparatus to save carrier's property from destruction, trains run for transporting the carrier's employees to and from work when no transportation charge is made, wrecking trains, trains run solely for the purpose of transporting company material, trains run for distributing material and supplies for use in connection with operations, and all other trains used in work-train services. Exclude miles run by locomotives while engaged incidentally in switching company materials in company shops or material yards in connection with regular yard switching service or in switching equipment for repairs between yards and shops
- (P) The number of loaded freight cars shall be obtained from the conductors' wheel report and shall be the sum of all loaded cars handled by each train. For example, if a car moves loaded (1) in a way train from the origination points, (2) in two through trains, and (3) in a way train to the destination point, the total count of loaded cars would be four two counts for the movements in through trains. Therefore, each car originated or received from a connecting carrier receives an initial count plus one count for each subsequent physical transfer between trains on respondents lines. No additional count is given because of crew change or changes in track identification number unless there is a physical transfer of the car between trains. Each car moving under revenue billing shall be considered as a loaded Car.
- (Q) Report vehicles (TOFC trailers/containers, automobiles and trucks) loaded and unloaded to and from TOFC and multiple level freight cars when the work is performed at the railroad's expense
- (R) Report the number of loaded revenue trailers/containers picked up, plus revenue trailers/containers delivered in TOFC/COFC and in highway interchange service when the work is performed at the railroad's expense. (Performed at railroad's expense means that railroad employees perform the service or that the railroad hires a subsidiary or outside contractor to perform the service.) Do not include those trailers/containers which are picked up or delivered by a shipper or motor carrier etc. when a tariff provision that requires the shipper or motor carrier etc. and not the railroad perform that service. Note. The count should reflect the trailers/containers for which expenses are reported in Schedule 417, line 2 column (b).
- (S) Report under Marine Terminals, Item 16, the tons loaded onto and unloaded from marine vessels at the expense of the reporting railroad
- (T) Report the total number of foreign railroad cars on line at end of year (except surplus cars, see below) Foreign railroad cars refers to freight cars owned by other railroads whose interline rental is settled on time (by hour) and actual line-haul mileage charges under the Code of Car Hire Rules

Carriers will be governed by local conditions in determining whether a car at an interchange point should be considered "on line". Unserviceable cars include cars on repair tracks undergoing or awaiting repairs. They include cars on repair tracks repaired and awaiting switching, cars on repair tracks undergoing or awaiting repairs switching, cars awaiting movement to repair tracks held in train yard (excluding cars which are to be repaired in the train yard without loss of time), cars moving empty in trains en route to shop, and cars stored awaiting disposition.

Surplus cars are cars which are in serviceable condition for loading on the last day of the year, but have not been placed for loading within 48 hours. This count can be an annual average based on weekly count of cars that have not been placed for loading within 48 hours.
