to the
Interstate Commerce Commission
for the year ended December 31, 1978

CAPE FEAR RAILWAYS, INC.
FORT BRAGG, NORTH CAROLINA

CAPE FEAR RAILWAYS, INCORPORATED, was originally built as a street car line between Fayetteville and Fort Bragg, N.C. and was operated exclusively until the middle of the year 1926. At Cain's station, a new line was built, a point about midway between Fayetteville and Fort Bragg, to Skibo, N.C., a station on the Aberdeen and Rockfish Railroad. Certificate of Public Convenience and Necessity No. 5293 was granted on April 10, 1926, and operation as common carrier began June 30, 1926. The line was junked between Fayetteville and Cain's Station, and was abandoned.

In March 1930, the military authorities of the United States, through the Quartermaster General and Secretary of War, leased all of the railroad tracks, equipment, etc. to the Cape Fear Railways, Incorporated. Under this lease, the Cape Fear Railways, Incorporated took over all the railroad equipment of the United States Government located within the reservation of Fort Bragg, N.C. and began operation thereof. Certificate of Public Convenience and Necessity No. 5293, mentioned in the paragraph above covered operation between Skibo, N.C. and Fort Bragg proper. Application was made to the Interstate Commerce Commission for Certificate of Public Convenience and Necessity to operate that part of the Government's tracks between Fort Bragg, N.C. proper and Fort Junction, N.C., which is the connection of the Government's lines with the Atlantic Coast Line Railroad. The application was granted on December 26, 1930, effective January 26, 1931, and is numbered Interstate Commerce Commission Finance Docket 8254.

The Cape Fear Railways, Incorporated is now in operation under the two Finance Dockets mentioned above, it's main line extending from Skibo, a station on the Aberdeen and Rockfish Railroad to Fort Junction, N.C., a station on the Atlantic Coast Line Railroad.

On August 12, 1937, C. W. Rankin was appointed temporary receiver, and on August 31, 1937, E. H. Foley was appointed receiver. On April 26, 1938 the receivership was terminated and the operation of the Company reverted to their former status.

710. INVENTORY OF EQUIPMENT

INSTRUCTIONS

1. Give particulars of each of the various classes of equipment which respondent owned or leased during the year.
2. In column (c) give the number of units of equipment purchased, built in company shops, or otherwise acquired.
3. Units leased to others for a period of one year or more are reportable in column (i); units temporarily out of respondent's service and rented to others for less than one year are to be included in column (e); units rented from others for a period less than one year should not be included in column (f). A "B" unit is similar to an "A" unit, but not equipped for use singly or as a lead locomotive unit. A "B" unit may be equipped with hostler controls for independent operating at terminals.
5. A "self-propelled car" is a rail motor car propelled by electric motors receiving power from third rail or overhead, or internal combustion engines located on the car itself. Trailers equipped for use only in trains of cars that are self-propelled are to be included as self-propelled equipment.

Units other than diesel-electric, e.g., diesel-hydraulic, should be identified in a footnote giving the number and a brief description. An "Electric" unit includes all units which receive electric power from an overhead contact wire or third rail, and use the power to drive one or more electric motors that propel the vehicle. An "Other self-powered unit" includes all units other than diesel or electric, e.g., steam, gas turbine. Show the type of unit, service and number, as appropriate, in a brief description sufficient for positive identification. An "Auxiliary unit" includes all units used in conjunction with locomotives but which draw their power from the "mother" unit, e.g., boosters, slugs, etc.
7. Column (h) should show aggregate capacity for all units reported in column (g), as follows: For locomotive units, report the manufacturers' rated horsepower (the maximum continuous power output from the diesel engine or engines delivered to the main generator or generators for tractive purposes); or tractive effort of steam locomotive units; for freight-train cars report the nominal capacity (in tons of 2,000 lbs.) as provided for in Rule 86 of the AAR Code of Rules Governing Cars in Interchange. Convert the capacity of tank cars to capacity in tons of the commodity which the car is intended to carry customarily; for passenger-train cars report the number of passenger seats available for revenue service, coupling one passenger to each berth in sleeping cars.
