### Note 1.

Effective January 1, 1976 the respondent adopted the Louisville and Nashville Railroad Company Employees' Supplemental Retirement Plan for the benefit of non-union employees retiring on or after January 1, 1976. This Plan was merged into Seaboard Coast Line Railroad Company's Plan, effective January 1, 1978. The name of the merged plan was changed to the Family Lines System Employees' Supplemental Retirement Plan.

Based upon the latest actuarial report dated January 1, 1979, received from the Wyatt Company, actuary for the plan, the maximum contribution required to pay the normal cost and budget the net accrued liability over 7 years (the amortization period represents the remaining duration of a 10 year period which began January 1, 1976) is \$16,791, if made at the end of the year. Of this amount \$4,617 represents current service cost and \$12,174 past service cost. The total amount of \$16,791 is accrued as pension expense for the year 1979, which is the maximum amount which may be allowed as a tax deduction for 1979, on the basis of one IRS criterion. This is consistent with prior years.

An "Auxiliary unit" includes all units used in conjunction with locomotives but which draw their power from the "mother" unit, e.g., boosters, slugs, etc.
7. Column (h) should show aggregate capacity for all units reported in column (g), as follows: For locomotive units, report the manufacturers' rated horsepower (the maximum continuous power output from the diesel engine or engines delivered to the main generator or generators for tractive purposes); or tractive effort of steam locomotive units; for freight-train cars report the nominal capacity (in tons of 2,000 lbs.) as provided for in Rule 86 of the AAR Code of Rules Governing Cars in Interchange. Convert the capacity of tank cars to capacity in tons of the commodity which the car is intended to carry customarily.
