710. INVENTORY OF EQUIPMENT

INSTRUCTIONS

- 1. Give particulars of each of the various classes of equipment which respondent owned or leased during the year
- 2. In column (c) give the number of units of equipment purchased, built in company shops, or otherwise acquired.

 3. Units leased to others for a period of one year or more are reportable in column (i), units temporarily out of respondent's service and rented of others for less than one year are to be included in column (e), units rented from others for a period less than one year should not be included in
- to others for less than one year are to be included in column (e), units rented from others for a period less than one year should not be included in column (f). Units installed during the year and subsequently leased to others for a year or more should be shown as added in column (c), as retired in column (d), and included in column (i).
- 4. Fix fenotting purposes, a "locomotive unit" is a self-propelled schicle generating or converting energy into motion, and designed solely for moving other equipment. An "A" unit is the least number of wheel bases with supers a lettere designed for use singly or as a lead locomotive unit in combination with other locomotive units. A "B" unit is similar to an "A" unit, but not equipped for use singly or as a lead locomotive unit. A "B" unit may be equipped with hostler controls for independent operating at terminals.
- 5. A "self-propelled car" is a rail motor car propelled by electric motors receiving power from third rail or overhead, or internal combustion engines located on the car itself. Trailers equipped for use only in trains of cars that are self-propelled are to be included as self-propelled equipment.
- 6. A "Diesel" unit includes all units propelled by diesel internal combustion engines irrespective of final drive, and whether power may at times be supplied from external conductor. Units other than diesel-electric, e.g., diesel-hydrautic, should be identified in a footnote giving the number and a brief description. An "Electric" unit includes all units which receive electric power from an overhead contact wire or third rail, and use the power to drive one or more electric motors that propel the vehicle. An "Other self-powered unit" includes all units other than diesel or electric, e.g., steam, gas turbine. Show the type of unit, service and number, as appropriate, in a brief description sufficient for positive identification. An "Auxiliary unit" inleudes all units used in conjunction with locomotives but which draw their powr from the "mother" unit, e.g., boosters, slugs, etc.
- 7. Column (h) should show aggregate capacity for all units reported in column (g), as follows. For locomotive units, report the manufacturers' rated horsepower (the maximum continuous power output from the diesel engine or engines delivered to the main generator or generators for tractive purposes), or tractive effort of steam locomotive units, for freight-train cars report the nominal capacity (in tons of 2,000 lbs.) as provided for in Rule 86 of the AAR Code of Rules Governing Cars in Interchange. Convert the capacity of tank cars to capacity in tons of the commodity which the car is intended to carry customarily.
