Class I Railroad Annual Report

	CONSOLIDATED RAIL CORPORATION 2001 MARKET STREET P.O. BOX 41429 PHILADELPHIA, PA 19101-1429
Correct name and address if different than shown	Full name and address of reporting carrier (Use mailing label on original, copy in full on duplicate)

To The Surface Transportation Board

For the Year Ending December 31, 1996

NOTICE

1 7

1. This report is required for every class I railroad operating within the United States. Three copies of this Annual Report should be completed. Two of the copies must be filed with the Surface Transportation Board, Office of Economics, Environmental Analysis, and Administration, The Mercury Building, 1925 K St. N.W., Suite 500, Washington, DC 20423, by March 31 of the year following that for which the report is made. One copy should be retained by the carrier.

2. Every inquiry must be definitely answered. Where the word "none" truly and completely states the fact, it should be given as the answer. If any inquiry is inapplicable, the words "not applicable" should be used.

3. Wherever the space provided in the schedules in insufficient to permit a full and complete statement of the requested information, inserts should be prepared and appropriately identified by the number of the schedule.

4. All entries should be made in a permanent black ink or typed. Those of a contrary character must be indicated in parenthesis. Items of an unusual character must be indicated by appropriate symbols and explained in footnotes.

5. Money items, except averages, throughout the annual report form should be shown in thousands of dollars adjusted to accord with footings. Totals for amounts reported in subsidiary accounts included in supporting schedules must be in agreement with related primary accounts. For purposes of rounding, amounts of \$500 but less than \$1,000 should be raised to the nearest thousand dollars, and amounts of less than \$500 should be lowered.

6. Except where the context clearly indicates some other meaning, the following terms when used in this Form have the following meanings:

(a) Board means Surface Transportation Board.

(b) Respondent means the person or corporation in whose behalf the report is made.

(c) Year means the year ended December 31 for which the report is being made.

(d) Close of the Year means the close of business on December 31 for the year in which the report is being made. If the report is made for a shorter period than one year, it means the close of the period covered by the report.

(e) Beginning of the Year means the beginning of business on January 1 of the year for which the report is being made If the report is made for a shorter period than one year, it means the beginning of that period.

(f) Preceding Year means the year ended December 31 of the year preceding the year for which the report is made.

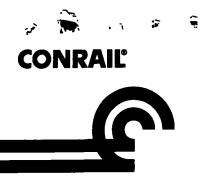

(g) The Uniform System of Accounts for Railroad Companies means the system of accounts in Part 1201 of Title 49, Code of Federal Regulations, as amended.

7 The ICC Termination Act of 1995 abolished the Interstate Commerce Commission and replaced it with the Surface Transportation Board. Any references to the Interstate Commerce Commission or Commission contained in this report refer to the Surface Transportation Board.

8. Any references to the Bureau of Accounts or the Office of Economics contained in this report refer to the Office of Economics, Environmental Analysis, and Administration of the Surface Transportation Board.

For Index, See Back of Form

Surface Transportation Board Office of Economics, Environmental Analysis, and Administration The Mercury Building 1925 K Street N.W. - Suite 500 Washington, DC 20423

Dear Sir:

Attached are two corrected copies of Page 97, Schedule 755 of the Company's 1996 Form R-1 Annual Report. The following lines changed:

÷

Railroad Annual Report R-1

SPECIAL NOTICE

Docket No. 38559 Railroad Classification Index, (ICC served January 20, 1983), modified the reporting requirements for class II, class III and Switching and terminal companies. These carriers will notify the Board only if the calculation results in a different revenue level than its current classification.

The dark border on the schedules represents data that are captured for processing by the Board.

It is estimated that an average of 800 burden hours per response are required to complete this collection of information. This estimate includes time for reviewing instructions, searching existing data sources, gathering and maintaining the data needed, and completing and reviewing the collection of information. Comments concerning the accuracy of this burden estimate or suggestions for reducing this burden should be directed to the Office of the Secretary, Surface Transportation Baord and the Office of Information and Regulatory Affairs, Office of Management and Budget.

A. SCHEDULES OMITTED BY RESPONDENT

- 1. The respondent, at its option, may omit pages from this report provided there is nothing to report or the schedules are not applicable.
- 2. Show below the pages excluded and indicate the schedule number and title in the space provided below.
- 3. If no schedules were omitted, indicate "NONE".

Page	Schedule No.	Title
		NONE
	-	
		1

B. IDENTITY OF RESPONDENT

Answers to the questions asked should be made in full, without reference to the data returned on the corresponding page of previous reports. In case any changes of the nature referred to under inquiry 4 on this page have taken place during the year covered by this report, they should be explained in full detail.

- 1. Give in full the exact name of the respondent. Use the words "The" and "Company" only when they are parts of the corporate name. Be careful to distinguish between railroad and railway. The corporate name should be given uniformly throughout the report, notably on the cover, on the title page, and in the "Verification". If the report is made by receivers, trustees, a committee of bondholders, or individuals otherwise in possession of the property, state names and facts with precision. If the report is for a consolidated group, pursuant to Special Permission from the Commission, Accounting and Valuation Board, indicate such fact on line 1 below and list the consolidated group on page 4.
- 2. If incorporated under a special charter, give date of passage of the act; if under a general law, give date of filing certificate of organization; if a recorganization has been effected, give date of reorganization. If a receivership or other trust, give also date which such receivership or other possession began. If a partnership, give date of formation and also names in full of present partners.
- 3. State the occasion for the reorganization, whether by reason of foreclosure of mortgage or otherwise, according to the fact. Give date of organization of original corporation and refer to laws under which organized.

1. Exact name of common carrier making this report CONSOLIDATED RAIL CORPORATION

- 2. Date of incorporation (*) See Below
- 3. Under laws of what Government, State, or Territory organized? If more than one, name all. If in bankruptcy, give court of jurisdiction and dates of beginning of receivership or trusteeship and of appointment of receivers of trustees Incorporated in the Commonwealth of Pennsylvania pursuant to Pennsylvania Business Corporation Law 1933, P.L. 364, as amended, as Merger Rail Corporation. Additional powers granted pursuant to the provisions of the Regional Rail

Reorganization Act of 1973, as amended, and the Conrail Privatization Act (P.L. 99-509).

4. If the respondent was reorganized during the year, involved in a consolidation or merger, or conducted its business under a different name, give full particulars

Effective July 1, 1993, Consolidated Rail Corporation became a wholly-owned subsidiary of Conrail Inc.

(*) February 10, 1976; Restated Articles of Incorporation filed March 30, 1976; Amended and Restated Articles of Incorporation filed April 12, 1987; Amended and Restated Articles of Incorporation filed May 17, 1989; Amended and Restated Articles of Incorporation filed March 7, 1994.

STOCKHOLDERS REPORTS

C. VOTING POWERS AND ELECTIONS

- per share; first preferred, 1. State the par value of each share of stock: Common, S 1.00 s no par per share; second per share; debenture stock, \$___ per share. preferred S Yes
- 2. State whether or not each share of stock has the right to one vote; if not, give full particulars in a footnote

3. Are voting rights proportional to holdings? If not, state in a footnote the relation between holdings and corresponding voting rights. Yes

4. Are voting rights attached to any securities other than stock? If so, name in a footnote each security, other than stock to which voting rights are No attached (as of the close of the year), and state in detail the relation between holdings and corresponding voting rights, stating whether voting rights are actual or contingent, and

if contingent, showing the contingency. 5. Has any class or issue of securities any special privileges in the election of directors, trustees, or managers, or in the determination of corporate action by any method? If so, describe fully in a footnote each such class or issue and give a succinct statement showing clearly the character and extent of such No pnvileges.

6. Give the date of the latest closing of the stock book prior to the actual filing of this report, and state the purpose of such closing Books not closed

7. State the total voting power of all security holders of the respondent at the date of such closing, if within one year of the date of such filing; if not, state as of the close of the 100 votes, as of December 31, 1996 year. (Date)

8. State the total number of stockholders of record, as of the date shown in answer to inquiry No. 7

9. Give the names of the thirty security holders of the respondent who, at the date of the latest closing of the stock book or compilation of his of stockholders of the respondent (if within 1 year prior to the actual filing of this report), had the highest voting powers in the respondent, showing for each his address, the number of votes which he would have had a right to cast on that date had a meeting then been in order, and the classification of the number of votes to which he was entitled, which respect to securities held by hum, such securities being classified as common stock, second preferred stock, first preferred stock, and other securities, stating in a footnote the names of such other securities (if any). If any such holder held in trust, give (in a footnote) the particulars of the trust. In the case of voting trust agreements, give as supplemental information the names and addresses of the thirty largest holders of the voting trust certificates and the amount of their individual holdings. If the stock book was not closed or the list of stockholders compiled within such year, show such thurty security holders as of the close of the year

1. Summary of Significant Accounting Policies

Industry

Consolidated Rail Corporation ("CRC" or the "Company"), a wholly-owned subsidiary of Conrail Inc.("Conrail"), operates a freight railroad system within the northeast and midwest United States and the Province of Quebec.

Cash Equivalents

Cash equivalents consist of commercial paper, certificates of deposit and other liquid securities purchased with a maturity of three months or less, and are stated at cost which approximates market value.

Material and Supplies

Material and supplies consist mainly of fuel oil and items for maintenance of property and equipment, and are valued at the lower of cost, principally weighted average, or market.

Property and Equipment

Property and equipment are recorded at cost. Depreciation is provided using the composite straight-line method. The cost (net of salvage) of depreciable property retired or replaced in the ordinary course of business is charged to accumulated depreciation and no gain or loss is recognized.

Asset Impairment

Long-lived assets are reviewed for impairment whenever events or changes in circumstances indicate that the carrying amount of an asset may not be recoverable. Expected future cash flows from the use and disposition of long-lived assets are compared to the current carrying amounts to determine the potential impairment loss.

Revenue Recognition

Revenue is recognized proportionally as a shipment moves on the Conrail system from origin to destination.

New Accounting Standards

During 1995, the Financial Accounting Standards Board issued Statement of Financial Accounting Standards ("SFAS") No. 121, "Accounting for the Impairment of Long-Lived Assets and for Long-Lived Assets to Be Disposed Of" (SFAS 121) and SFAS No. 123, "Accounting for Stock-Based Compensation" (SFAS 123), which are both effective in 1996. The Company has decided to adopt only the disclosure provisions of SFAS 123 in 1996 and continues to apply APB Opinion No. 25, "Accounting for Stock Issued to Employees" (APB 25) and related interpretations in accounting for its stock-based compensation plans. The Company adopted SFAS 121 in the first quarter of 1996 and determined that it did not have a material effect on its financial statements.

1. Summary of Significant Accounting Policies (Continued)

Use of Estimates

The preparation of financial statements in conformity with generally accepted accounting principles requires management to make estimates and assumptions that affect the reported amounts of assets and liabilities and disclosure of contingent assets and liabilities at the date of the financial statements and the reported amounts of revenues and expenses during the reporting period. Actual results could differ from those estimates.

2. Proposed Merger

On October 14, 1996, Conrail, CSX Corporation ("CSX") and a subsidiary of CSX entered into an Agreement and Plan of Merger (as amended, the "Merger Agreement"), pursuant to which Conrail was to be merged with a subsidiary of CSX in a merger-of-equals transaction.

On October 24, 1996, Norfolk Southern Corporation ("Norfolk") commenced an unsolicited tender offer for all outstanding Conrail voting stock at \$100 per share in cash. Norfolk has since increased its offer to \$115 per share in cash.

On November 20, 1996, CSX concluded its first tender offer and purchased approximately 19.9% of Conrail's outstanding shares for \$110 per share.

On December 18, 1996, CSX and Conrail entered into a second amendment to the Merger Agreement (the "Second Amendment") that would, among other things, (i) increase the consideration payable pursuant to the merger, (ii) accelerate the consummation of the merger to immediately following the receipt of applicable shareholder approvals and prior to Surface Transportation Board ("STB") approval and (iii) extend until December 31, 1998, an exclusivity period during which the Conrail Board agreed not to withdraw or modify its recommendations of the CSX transactions, approve or recommend any takeover proposal or cause Conrail to enter into any agreement related to any takeover proposal.

On January 13, 1997, Norfolk issued a press release announcing that it would offer to purchase shares representing 9.9% of the outstanding shares for \$115 per share, in the event that Conrail shareholders did not approve the proposal to opt out of a Pennsylvania statute (the "Opt Out Proposal") at the meeting of shareholders to be held on January 17, 1997 (the "Special Shareholders Meeting").

On January 17, 1997, Conrail shareholders voted at the Special Shareholders Meeting against the Opt Out Proposal.

On February 4, 1997, the amended Norfolk tender offer expired, and Norfolk subsequently purchased approximately 8.2 million shares pursuant thereto.

2. **Proposed Merger** (Continued)

On March 7, 1997, Conrail and CSX entered into a Third Amendment (the "Third Amendment") to the Merger Agreement. Pursuant to the Third Amendment, (i) the price per share has been increased from \$110 to \$115, and the number of shares to be purchased in the tender offer has been increased to all outstanding shares. The tender offer is scheduled to close April 18, 1997 (subject to extension by CSX to June 2, 1997 whether or not the conditions have been satisfied), (ii) the consideration paid per share in the merger for all remaining outstanding shares following consummation of the offer has been increased to \$115 in cash and (iii) the conditions to the offer relating to certain provisions of Pennsylvania law becoming inapplicable to Conrail and relating pending governmental actions or proceedings have been deleted.

The Third Amendment also provides that CSX will have sole control over the regulatory approval process and will be free to conduct by itself discussions with other railroads, including Norfolk, relating to competitive issues raised by the CSX transactions, and to enter into any resulting agreement. It is anticipated that CSX and Norfolk will negotiate an appropriate division of Conrail's assets; however, neither the pending CSX tender offer nor the merger is conditioned on CSX's reaching an agreement with Norfolk.

Pursuant to the Third Amendment, three members of Conrail's Board of Directors approved by CSX shall be invited to join the CSX Board of Directors and a transition team will be established, the leadership of which will include senior executive officers of CSX and Conrail to ensure the orderly operation of Conrail during the regulatory approval process and an orderly transition thereafter.

Under the Third Amendment, Conrail and CSX agreed to reduce from December 31, 1998 to December 31, 1997 the period of time during which the Conrail Board is prohibited from (i) withdrawing or modifying, or publicly proposing to withdraw or modify, its approval or recommendation of the CSX transactions, in a manner adverse to CSX, (ii) approving or recommending, or publicly proposing to approve or recommend, any competing proposal or (iii) causing Conrail to enter into any agreement related to any such competing proposal.

Under the Merger Agreement as amended, Conrail may terminate the Merger Agreement in the event that after June 2, 1997, CSX fails to consummate the tender offer for any reason other than the nonoccurrence of any condition to the tender offer. In the event that CSX fails to consummate the tender offer under such circumstances, Conrail will be entitled to exercise any additional remedies it may have.

The full terms and conditions of the CSX and Norfolk offers and Conrail's position with respect to the CSX and Norfolk offers are set forth in documents filed by Conrail with the Securities and Exchange Commission.

Railroad Annual Report R-1

2. Proposed Merger (Continued)

Pending approval by the STB, 100% of Conrail's voting stock will be held by CSX in a voting trust. The combination of the railroad operations of the two companies is contingent upon the approval of the merger by the STB.

3. Voluntary Separation Programs

During the second quarter of 1996, the Company recorded a charge of \$135 million (before tax benefits of \$52 million) consisting of \$102 million in termination benefits to be paid to non-union employees participating in the voluntary retirement and separation programs ("voluntary separation programs") and losses of \$33 million on non-cancelable leases for office space no longer required as a result of the reduction in the Company's workforce. Over 840 applications were accepted from eligible employees under the voluntary separation programs. Approximately \$90 million of the termination benefits are being paid from the Company's overfunded pension plan.

4. Long-Term Debt

Long-term debt outstanding, including the weighted average interest rates at December 31, 1996, is composed of the following:

		Decei	ber	31,
(In Thousands)		1996		1995
Capital leases Medium-term notes payable,	\$	489,845	\$	487,998
6.70%, due 1997 to 1999		109,750		208,747
Notes payable, 9.75%, due 2000 Debentures payable, 7.88%, due 2043		249,746 249,536		249,493 249,526
Debentures payable, 9.75%, due 2020		544,202		544,313
Equipment and other obligations, 6.55%		254,718		241,983
Commercial paper, 5.53%		99,066		99,322
Less current portion	1 	.,996,863 (128,600)		,081,382 (179,236)
	\$1 ==	,868,263	\$1 ==	,902,146

Using current market prices when available, or a valuation based on the yield to maturity of comparable debt instruments having similar characteristics, credit rating and maturity, the total fair value of the Company's long-term debt, including the current portion, but excluding capital leases, is \$1,677 million and \$1,859 million at December 31, 1996 and 1995, respectively, compared with carrying values of \$1,507 million and \$1,592 million at December 31, 1996 and 1995, respectively.

4. Long-Term Debt (Continued)

The Company acquired equipment and incurred related long-term debt under various capital leases of \$82,427,000 in 1996 and \$70,170,000 in 1995. The Company's noncancelable long-term leases generally include options to purchase at fair value and to extend the terms. Capital leases have been discounted at rates ranging from 3.09% to 14.26% and are collateralized by assets with a net book value of \$399,019,000 at December 31, 1996.

Minimum commitments, exclusive of executory costs borne by the Company, are:

	Capital _Leases	Operating Leases
	(In Thou	isands)
1997	\$ 105,786	\$108,577
1998	95,138	98,989
1999	85,907	83,619
2000	64,407	73,492
2001	56,653	66,555
2002 - 2017	273,699	522,736
Total	681,590	\$953,968
Less interest portion	(191,745)	
Present value	\$_489,845 =======	

In June 1993, the Company and Conrail filed a shelf registration statement on Form S-3 to enable CRC to issue up to \$500 million in debt securities or Conrail to issue up to \$500 million in convertible debt and equity securities. The remaining balance under this shelf registration was \$312 million at December 31, 1996.

In April 1996, the Company issued \$50 million of Pass-Through Certificates at a rate of 6.96% to finance equipment. Although the certificates are not direct obligations of, or guaranteed by the Company, amounts payable under related capital leases will be sufficient to pay principal and interest on the certificates.

In July 1996, the Company issued \$26 million of 1996 Equipment Trust Certificates, Series A, with interest rates ranging from 6.0% to 7.48%, maturing annually from 1997 to 2011. The certificates were used to finance approximately 85% of the purchase price of twenty locomotives.

In June 1996, the Company borrowed \$69 million against the cash surrender value of the company-owned life insurance policies which it maintains on certain of its non-union employees.

Equipment and other obligations mature in 1997 through 2043 and are collateralized by assets with a net book value of \$252,517,000 at December 31, 1996. Maturities of long-term debt other than capital leases and commercial paper are \$64,896,000

1005

200. COMPARATIVE STATEMENT OF FINANCIAL POSITION-EXPLANATORY NOTES-CONTINUED NOTES TO FINANCIAL STATEMENTS

Long-Term Debt (Continued) 4.

in 1997, \$45,392,000 in 1998, \$45,647,000 in 1999, \$265,464,000 in 2000, \$16,172,000 in 2001 and \$970,381,000 in total from 2002 through 2043.

CRC had \$199 million of commercial paper outstanding at December 31, 1996. Of the total amount outstanding, \$100 million is classified as long-term since it is expected to be refinanced through subsequent issuances of commercial paper and is supported by the long-term credit facility mentioned below.

CRC maintains a \$500 million uncollateralized bank credit agreement with a group of banks which is used for general corporate purposes and to support its commercial paper program. The agreement matures in 2000 and requires interest to be paid on amounts borrowed at rates based on various defined short-term rates and an annual maximum fee of .125% of the facility amounts. The agreement contains, among other conditions, restrictive covenants relating to a debt ratio and consolidated tangible net worth. During 1996, CRC had no borrowings under this agreement.

5. Income Taxes

The provisions for income taxes are composed of the following:

	1996			<u>1995</u>	
(In Thousands)	Federal State	<u>Total</u>	<u>Federal</u>	<u>State</u>	<u>Total</u>
Current	\$ 66,500 \$ 8,100 \$	74,600	\$ 53,000	\$ 13,800	\$ 66,800
Deferred	149,113 31,155	180,268	111,155	(3,059)	108,096
Special income					
tax obligation	(80,472) (13,896)	(94,368)	(60,396)	(11,964)	(72,360)
	\$135,141 <u>\$ 25,359</u> <u>\$</u>	160,500	<u>\$103,759</u>	<u>s (1,223)</u>	<u>\$102,536</u>

As a result of a decrease in a state income tax rate enacted during 1995, income tax expense for that year was reduced by \$21 million representing the effects of adjusting deferred income taxes and the special income tax obligation for the rate decrease as required by SFAS 109, "Accounting for Income Taxes".

The Company and its subsidiaries are included in the consolidated federal income tax return filed by Conrail. The consolidated federal income tax expense or benefit is allocated to the Company as though the Company files a separate consolidated tax return.

The Company's consolidated federal income tax returns for the fiscal years 1993 through 1995 are currently being examined by the Internal Revenue Service.

Reconciliations of the U.S. statutory tax rates with the effective tax rates are as follows:

.

:.

Savings Plans The Company provides 401(k) savings plans for employees. Under the Non-union ESOP, 100% of	

15a

6. Employee Benefits (Continued)

Savings Plans (Continued)

contributions are matched in the form of ESOP Stock for the first 6% of a participating employee's base pay. There is no Company match provision under the union employee plan. Savings plan expense was \$4 million in 1996 and 1995.

In connection with the Non-union ESOP, the Company issued shares of its ESOP Stock to the Non-union ESOP in exchange for a 20 year promissory note with interest currently at 8.0% from the Non-union ESOP in the principal amount of \$288 million. In conjunction with the formation of the holding company in 1993, each share of the Company's preferred stock, all of which were held by the Non-union ESOP, was automatically converted into one share of preferred stock of Conrail and the promissory note receivable from the Non-union ESOP plus the accrued interest of \$21 million were reclassified by the Company to the stockholder's equity section of its balance sheet; however, CRC transferred the note to one of its subsidiaries during 1994. Unearned ESOP compensation is now amortized and charged to the Company by Conrail as shares of ESOP Stock are allocated to participants. Approximately 2.7 million ESOP shares have been cumulatively allocated to participants through December 31, 1996, and a portion of these shares have been tendered to CSX (Note 2). An amount equivalent to the preferred dividends declared on the ESOP Stock proportionally offsets compensation expense of the Company and interest expense of Conrail related to the Non-union ESOP.

Conrail makes dividend payments at a rate of 7.51% on the ESOP Stock and the Company makes additional contributions in an aggregate amount sufficient to enable the Non-union ESOP to make the required interest and principal payments on its note.

Compensation expense related to the Non-union ESOP was \$10 million in 1996 and 1995.

Postretirement Benefits Other Than Pensions

The Company provides health and life insurance benefits to certain retired non-union employees. Certain non-union employees are eligible for retiree medical benefits, while substantially all non-union employees are eligible for retiree life insurance benefits. Generally, company-provided health care benefits terminate when individuals reach age 65.

Retiree life insurance plan assets consist of a retiree life insurance reserve held in the Company's group life insurance policy. There are no plan assets for the retiree health benefits plan.

The following sets forth the plans' funded status reconciled with amounts reported in the Company's balance sheets:

6. **Employee Benefits** (Continued)

Postretirement Benefits Other Than Pensions (Continued)

	1	996	1	995
	Medical Plan	Life Insurance Plan (In Thou	Plan	
Accumulated postretirement benefit obligation: Retirees	\$43,739	\$19,853	\$38,355	\$18,598
Fully eligible active plan participants Other active plan participants	754 17	3,009	4,874 193	374 5,461
Accumulated benefit obligation Market value of plan assets		22,862 (9,615)	43,422	24,433 (7,253)
Accumulated benefit obligation in excess of plan assets Unrecognized gains and (losses)		13,247 2,038	43,422 564	17,180 (1,012)
Accrued benefit cost recognized in the Balance Sheet	\$43,919 =======	\$15,285 ======	\$43,986 ======	\$16,168 =======
Net periodic postretirement benefit cost, primarily interest cost	\$ 2,936 ======	\$ 1,084 ==== = =	\$ 3,339 =======	\$ 1,183

An 8 percent rate of increase in per capita costs of covered health care benefits was assumed for 1997, gradually decreasing to 6 percent by the year 2007. Increasing the assumed health care cost trend rates by one percentage point in each year would increase the accumulated postretirement benefit obligation as of December 31, 1996 by \$2 million and would have an immaterial effect on the net periodic postretirement benefit cost for 1996. Discount rates of 7.5% and 7.0% were used to determine the accumulated postretirement benefit obligations for both the medical and life insurance plans in 1996 and 1995, respectively. The assumed rate of compensation increase was 6.0% in 1996 and 5.0% in 1995.

Retiree medical benefits are funded by a combination of Company and retiree contributions. Retiree life insurance benefits are provided by insurance companies whose premiums are based on claims paid during the year.

7. Capital Stock

The Company is authorized to issue 25 million shares of preferred stock with no par value. The Board of Directors has the authority to divide the preferred stock into series and to determine the rights and preferences of each.

7. Capital Stock (Continued)

Subsequent to July 1, 1993, the Company had 100 shares of common stock outstanding, all held by Conrail. All of the Company's long-term incentive plans were amended in 1993 to reflect the use of Conrail's common stock. The Company applies APB 25 and related interpretations in accounting for the Conrail plans. Accordingly, no compensation cost has been recognized for its fixed stock option plans. SFAS 123 was issued in 1995 and, if fully adopted, would change the method of recognition of costs on plans similar to those of Conrail. Adoption of SFAS 123 is optional; however, pro forma disclosures as if the Company had adopted the cost recognition requirements under SFAS 123 in 1996 and 1995 are presented below. Conrail's stock-based compensation plans as of December 31, 1996 are described below.

Conrail's 1987 and 1991 Long-Term Incentive Plans authorize the granting to officers and key employees of up to 4 million and 6.6 million shares of common stock, respectively, through stock options, stock appreciation rights, phantom stock and awards of restricted or performance shares. A stock option is exercisable for a specified term commencing after grant at a price not less than the fair market value of the stock on the date of grant. The vesting of awards made pursuant to these plans is contingent upon one or more of the following: continued employment, passage of time or financial and other performance goals.

Effective November 1996, Conrail's Board of Directors authorized the automatic vesting of all unvested stock options outstanding in connection with the Merger Agreement between CSX and Conrail (Note 2).

The activity and status of stock options under the incentive plans follow:

	Non-qualified St	ock Options
	Option Price Per Share	Shares Under Option
Balance, January 1, 1995 Granted Exercised Canceled	\$14.000 - \$66.938 \$50.688 - \$68.563 \$14.000 - \$53.875 \$42.625 - \$53.875	1,363,955 516,757 (200,940) (123,560)
Balance, December 31, 1995 Granted Exercised Canceled	\$14.000 - \$68.563 \$68.563 - \$96.063 \$14.000 - \$73.250 \$42.625 - \$70.031	1,556,212 551,038 (1,268,085) (3,984)
Balance, December 31, 1996	\$14.000 - \$96.063	835,181
Exercisable, December 31, 1996	\$14.000 - \$74.188	831,481
Available for future grants December 31, 1995 December 31, 1996		1,188,193 ====3,969,317

15d

Railroad Annual Report R-1

7. Capital Stock (Continued)

The weighted average exercise prices of options granted during 1996 and 1995 are \$70.130 per share and \$51.204 per share, respectively. The weighted average exercise prices of options exercised during 1996 and 1995 are \$48.32 per share and \$31.16 per share, respectively. The average remaining maximum terms of options is not considered meaningful given the events that have occurred as a result of Conrail's proposed merger with CSX (Note 2).

The fair value of each option granted during 1996 is estimated on the date of grant using the Black-Scholes option-pricing model with the following weighted average assumptions: (1) dividend yield of 2.43%, (2) expected volatility of 25.25%, (3) risk-free interest rate of 5.51%, and (4) expected life of 4 years. The weighted average fair value of options granted during 1996 and 1995 is \$16.00 per share and \$13.12 per share, respectively.

Had the compensation cost for Conrail's 1996 and 1995 grants for stock-based compensation plans been determined consistent with SFAS 123, the Company's net income for 1996 and 1995 would approximate the pro forma amounts below (\$in millions):

	_ <u>1996</u>	1995
Net income as reported	\$ 335	\$ 256
Net income pro forma	328	254

Conrail has granted phantom shares and restricted stock under its non-union employee bonus plans to eligible employees who elect to defer all or a portion of their annual bonus in a given year. The number of shares granted depends on the length of the deferral period. Grants are made at the market price of Conrail's common stock at the date of grant. Conrail has granted 148,749 shares and 337,329 shares of phantom and restricted stock, respectively, under its non-union employee bonus plans through December 31, 1996. Conrail has also granted 73,344 performance shares under its 1991 Long-Term Incentive Plan through December 31, 1996. Compensation expense related to these plans was \$2 million in 1996 and \$3 million The weighted-average fair value for the phantom shares and in 1995. restricted stock granted during 1996 and 1995 was \$68.02 per share and \$52.88 per share, respectively.

8. Asset Disposition Charge

Included in 1995 operating expenses is an asset disposition charge of \$283 million, which reduced net income by \$175 million. The asset disposition charge resulted from a review of the Company's route system and other operating assets to determine those that no longer effectively and economically supported current and expected operations. The Company identified and has committed to sell 1,800 miles of rail lines that are expected to provide proceeds substantially less than net book value. In addition, other assets, principally yards and side tracks, identified for disposition were written down to estimated net realizable value. (See Note 1 "Asset Impairment")

15e

9. Commitments and Contingencies

Environmental

The Company is subject to various federal, state and local laws The Company is and regulations regarding environmental matters. a party to various proceedings brought by both regulatory agencies and private parties under federal, state and local laws, including Superfund laws, and has also received inquiries from governmental agencies with respect to other potential environmental issues. At December 31, 1996, the Company has received, together with other companies, notices of its involvement as a potentially responsible party or requests for information under the Superfund laws with respect to cleanup and/or removal costs due to its status as an alleged transporter, generator or property owner at 135 locations. However, based on currently available information, the Company believes it may have some potential responsibility at only 61 of these sites. Due to the number of parties involved at many of these sites, the wide range of costs of possible remediation alternatives, the changing technology and the length of time over which these matters develop, it is often not possible to estimate the Company's liability for the costs associated with the assessment and remediation of contaminated sites.

Although the Company's operating results and liquidity could be significantly affected in any quarterly or annual reporting period if it were held principally liable in certain of these actions, at December 31, 1996, the Company had accrued \$55 million, an amount it believes is sufficient to cover the probable liability and remediation costs that will be incurred at Superfund sites and other sites based on known information and using various estimating techniques. The Company believes the ultimate liability for these matters will not materially affect its consolidated financial condition.

The Company spent \$11 million in 1996 and \$14 million in 1995 for environmental remediation and related costs and anticipates spending an amount comparable to that spent in 1996 during 1997. In addition, the Company's capital expenditures for environmental control and abatement projects were approximately \$6 million in 1996 and 1995 and are anticipated to be approximately \$10 million in 1997.

The Environmental Quality Department is charged with promoting the Company's compliance with laws and regulations affecting the environment and instituting environmentally sound operating practices. The department monitors the status of the sites where the Company is alleged to have liability and continually reviews the information available and assesses the adequacy of the recorded liability.

Other

The Company is involved in various legal actions, principally relating to occupational health claims, personal injuries,

9. Commitments and Contingencies (Continued) Other (Continued)

casualties, property damage and damage to lading. The Company has recorded liabilities on its balance sheet for amounts sufficient to cover the expected payments for such actions.

The Company may be contingently liable for approximately \$63 million at December 31, 1996 under indemnification provisions related to sales of tax benefits.

CRC had an average of 20,761 employees in 1996, approximately 87% of whom are represented by 14 different labor organizations and are covered by 22 separate collective bargaining agreements. The Company was engaged in collective bargaining at December 31, 1996 with labor organizations representing approximately 22% of its labor force.

In 1994, Locomotive Management Services, a general partnership of which the Company holds a fifty percent interest, issued \$96 million of Equipment Trust Certificates to fund the purchase price of 60 new locomotives. While principal and interest payments on certificates will be fully guaranteed by the Company, through a sharing agreement with its partner, the Company's portion of the guarantee is reduced to approximately \$48 million, effective January 1, 1997, with the Company's purchase of twenty of the locomotives.

The Company has received three adverse jury verdicts related to railroad crossing accidents in Ohio that include significant punitive damage awards that currently collectively approximate \$30 million. The Company believes the punitive damage awards in those cases are improper and that it has meritorious defenses, which it plans to pursue on appeal. The Company is not presently able to reasonably estimate the ultimate outcome of these cases, and accordingly, no expense for such awards has been recorded as of December 31, 1996. As part of the Merger Agreement (Note 2), Conrail may be a party to certain stock purchase options or, under certain circumstances, be required to pay substantial termination fees.

240. STATEMENT OF CASH FLOWS

(Dollars in Thousands)

Give the information as requested concerning the cash flows during the year. Either the direct or indirect method can be used. The direct method shows as its principal components operating cash receipts and payments, such as cash received from customers and cash paid to suppliers and employees, the sum of which is net cash flow from operating activities. The indirect method starts with net income and adjusts it for revenue and expense items that were not the result of operating cash transactions in the current pend to reconcile it to net cash flow from operating activities. The indirect method starts with net income and adjusts if for revenue and expense items that were not the result of operating cash transactions in the current pend to reconcile it to net cash flow from operating activities. If direct method is used complete lines 1 - 41; udirect method complete lines 10 - 41. Cash for the purpose of this schedule shall metude cash and cash equivalents which are short-term, highly liquid investments reachly convertible to know amounts of cash and so near their maturity that they present insignificant risk of changes in value because of changes in interest rates. Information about all investing and financing activities which do not directly affect cash shall be separately disclosed in footnotes to this schedule. They shall clearly relate the cash (if any) any noncash aspects of transactions. Examples of noncash investing and transactions include converting debt to equity, acquiring assets by assuming directly related liabilities, such as purchasing a building by incurring a mortgage to the seller; obtaining an asset by entering into a capital lease; and exchanging noncash assets or liabilities for other noncash assets or liabilities. Some transactions are part cash and part cash; only the cash portion shall be reported directly in the statement of cash flows. Refer to FAS Statement No. 95, Statement of Cash Flows, for further details.

28	TOTAL WORKING CAPITAL	Line 24 + line 27	136,799	2

Notes: (A) Use common carrier portion only. Common carrier refers to railway transportation service.

- (B) Rent income is the sum of Schedule 410, column h, lines 121, 122, 123, 127, 128, 129, 133, 134, 135, 208, 210, 212, 227, 229, 231, 312, 314, and 316. Rent income is added to railway operating revenues to produce total revenues. Rent income is also added to total operating expenses to exclude the rent revenue items from operating expenses.
- (C) If result is negative, use zero.

GENERAL INSTRUCTIONS CONCERNING RETURNS IN SCHEDULES 310, 310A

 Schedule 310 should give particulars of stocks, bonds, other secured obligations, unsecured notes, and investment advances of affiliated companies held by respondent at close of year. Also, disclose the investments made, disposed of, and written down during the year and the applicable dividends and interest credited to income as a result of those investments. They should exclude securities issued or assumed by respondent. For definition of affiliated companies, see the rules governing Account No. 721, "Investments and advances, affiliated companies", in the Uniform System of Accounts for Railroad Companies.
 List the investments in the following order and show a total for each group and each class of investments by accounts in numerical order:

- (A) Stocks
 - (1) Carriers-active
 - (2) Carriers-inactive
 - (3) Noncarriers-active
 - (4) Noncarriers-inactive
- (B) Bonds (including U.S. Government bonds)
- (C) Other secured obligations
- (D) Unsecured notes
- (E) Investment advances

3. The subclassification of classes (B), (C), (D) and (E) should be the same as that provided for class (A).

4. The kinds of industry represented by respondent's investments in the securities of other companies should be shown by symbol opposite the names of the issuing corporation, the symbols and industrial classification to be as follows:

- Symbol
 - I Agriculture, forestry, and fishenes
 - II Mining
 - III Construction
 - IV Manufacturing
 - V Wholesale and retail trade
 - VI Finance, insurance, and real estate
 - VII Transportation, communications, and other public utilities

Kind of Industry

- VIII Services
- IX Government
- X All other

5. By carriers, as the term is used here, is meant companies owning or operating railroads, facilities auxiliary thereto such as bridges, ferries, union depots, and other terminal facilities, sleeping cars, parlor cars, dining cars, freight cars, express service and facilities, electric railways, highway motor vehicles, steamboats and other marine transportation equipment, pipe lines (other than those for transportation of water), and other instrumentalities devoted to the transportation of persons or property for hire. Telegraph and telephone companies are not meant to be included.

6. Noncarrier companies should, for the purpose of these schedules, include telephone companies, telegraph companies, mining companies, manufacturing companies, hotel companies, etc. Purely "holding companies" are to be classed as noncarrier companies, even though the securities held by such companies are largely or entirely those issued or assumed by carriers.

7. By an active corporation is meant one which maintains an organization for operating property or administering its financial affairs. An inactive corporation is one which has been practically absorbed in a controlling corporation and which neither operates property nor administers its financial affairs; if it maintains an organization it does so only for the purpose of complying with legal requirements and maintaining title to property or franchises.

8. Combine, in one amount, investments in which the original cost or present equity in total assets is less than \$10,000.

9. Include investments in unincorporated entities such as lessee organizations. Exclude amounts normally settled on a current basis.

10. Do not include the value of securities issued or assumed by respondent.

11. For affiliates which do not report to the Interstate Commerce Commission and are jointly owned, disclose in footnotes the name and extent of control of the other controlling entities.

2	6 Road Initials: CR	Year	1996
	310. INVESTMENTS AND ADVANCES AFFILIATED COMPANIES	-	
1.	Give particulars of investments in stocks, bonds, other secured obligations, unsecured notes, and investment advances of companies affiliated with respondent, included in accounts Nos. 715, "Sinking Funds"; 716, "Capital Funds"; 721, "Investments and advances Affiliated Companies"; and 717, "Other Funds".		

2. Entries in this schedule should be made in accordance with the definitions and general instructions given on page 18, classifying the investments by means of letter, figures, and symbols in columns (a), (b), and (c).

3. Indicate by means of an arbitrary mark in column (d) the obligation in support of which any security is pledged, mortgaged, or otherwise encumbered, giving names and other important particulars of such obligations in footnotes.

4. Give totals for each class and for each subclass and a grand total for each account.

5. Entries in column (d) should show date of maturity of bonds and other evidences of indebtedness. In case obligations of the same designation mature serially, the date in column (d) may be reported as "Serially 19_ to 19_". Abbreviations in common use in standard financial publications may be used to conserve space.

Note								

Notes:

(1) Line 2; The net carrying value of the Belt Railway Company of Chicago is \$1.

(2) Lines 4, 7, 8, 9, & 10, As part of Consolidated Rail Corporation's 1995 Asset Disposition Charge (See Note 8 to Schedule 200),

the carrying values of certain affiliates were reduced to their net realizable values.

(3) Line 7; In July 1996, the Nicholas, Fayette & Greenbrier Railroad Company completed a liquidation plan and ceased to exist.

310. INVESTMENTS AND ADVANCES AFFILIATED COMPANIES - Continued

(Doilars in thousands)

- 6. If any of the companies included in this schedule are controlled by respondent the percent of control should be shown in column (e). In case any company listed is controlled other than through actual ownership of securities, give particulars in a footnote. In cases of joint control, give names of other parties and particulars of control.
- 7. If any advances reported are pledged, give particulars in a footnote.
- Investments in companies in which neither the original cost or present equity in total assets are less than \$10,000, may be combined in one figure.
- 9. Also included should be investments in unincorporated entities such as lessee organizations (exclusive of amounts nominally settled on a current basis).
- 10. This schedule should not include securities issued or assumed by respondent.
- 11. For affiliates which do not report to the Surface Transportation Board and are jointly owned, give names and extent of control of other entities by footnotes.

THIS PAGE LEFT BLANK INTENTIONALLY .

INSTRUCTIONS CONCERNING RETURNS TO BE MADE IN SCHEDULE 330

1. Give particulars of balances at the beginning and close of the year and of all changes during the year in Account No. 731, "Road and Equipment Property", and Account No. 732, "Improvements on Leased Property", classified by primary accounts in accordance with the Uniform System of Accounts for Railroad Companies. The balances, by primary accounts, should insofar as known, be stated in column (b) and all changes made during the year should be analyzed in columns (c) to (f), inclusive. Column (h) is the aggregate of columns (b) to (f), inclusive. Grand totals of columns (b) and (h) should equal the sum of Accounts 731 and 732 for the respective periods; if not, full explanation should be made in a footnote.

2. In column (c) are to be shown disbursements made for the specific purpose of purchasing, constructing, and equipping new lines, and for the extension of old lines, as provided for in Instruction 2-1, "Items to be charged", of the Uniform System of Accounts for Railroad Companies for such items.

3. In column (d) is to be shown the cost of a railway or portion thereof, acquired as an operating entity or system by purchase, merger, consolidation, reorganization, receivership sale or transfer, or otherwise.

4. In columns (c) and (e) should be included all entries covering expenditures for additions and betterments, as defined, whether or not replacing other property.

5. In column (f) should be entered all credits representing property sold, abandoned, or otherwise retired.

6. Both the debit and credit involved in each transfer, adjustment, or clearance between road and equipment accounts, should be included in the column in which the item was initially included; also the transfer of prior years' debits or credits from investment in road and equipment to operating expenses or other accounts, or vice versa, should be included in the column applicable to current items of like nature. Each such transfer, adjustment, or clearance should be fully explained when in excess of \$100,000.

7. If during the year an individual charge of \$100,000 or more was made to Account No. 2, "Land for Transportation Purposes", state in a footnote the cost, location, area, and other details which will identify the property.

8. Report on hne 29 amounts not includible in the primary road accounts. The items reported should be briefly identified and explained under "Notes and Remarks" below. Amounts should be reported on this line only under special circumstances, usually after permission is obtained from the Commission for exceptions to prescribed accounting. Reference to such authority should be made when explaining the amounts reported. Respondents must not make arbitrary changes to the printed stub or column headings without specific authority from the Commission.

9. If during the year a segment of transportation property was acquired, state in a footnote the name of the vendor, the mileage acquired, and the date of acquisition, giving termini and the cost of the property to the respondent. Also furnish a statement of the amount included in each primary account representing such property acquired, referring to the column or columns in which the entries appear.

10. If an amount of less than \$2,000 is used as the minimum for additions and betterments to property investment accounts as provided for in Instruction 2-2 of the Uniform System of Accounts for Railroad Companies, state in a footnote the amount used.

332. DEPRECIATION BASE AND RATES - ROAD AND EQUIPMENT OWNED AND USED AND LEASED FROM OTHERS (Dollars in Thousands)

1. Show in columns (b) and (c), for each primary account, the depreciation base used to compute the depreciation charges for the month of January, and in columns (c) and (f) show the depreciation base used to compute the depreciation charges for the month of December, in columns (d) and (g) show the composite rates used in computing the depreciation charges for the month of December, and on lines 30 and 39 of these columns show the composite percentage for all road and equipment accounts, respectively, ascertaned by applying the primary account composite rates to the depreciation base used in computing the charges for December and dividing the total so computed by the total depreciation base for the same month. The depreciation base should not include the cost of equipment used, but not owned, when the rents therefore are included in the rent for equipment and Account Nos. 31-21-00, 31-22-00, 31-22-00, 35-23-00, 35-23-00, 35-23-00, 35-23-00, 35-23-00, 35-23-00, 32-23-00, 32-23-00, 32-23-00, 32-23-00, 32-23-00, 32-23-00, 32-23-00, 32-23-00, 36-21-00, 36-22-00, 36-22-00, 36-22-00, and 36-25-00, inclusive. The composite rates used should be those prescribed or otherwise authorized by the Commission, except that where the use of component rates has been authorized, the composite rates to be shown for the respective primary accounts should be recomputed from the December charges developed by the use of the authorized rates. If any changes in rates were effective during the year, give full particulars in a footnote.

2. All leased properties may be combined and one composite rate computed for each primary account, or a separate schedule may be included for each such property.

Show in columns (e), (f) and (g) data applicable to Lessor property, when the rent therefore is included in Account Nos. 31-11-00, 31-12-00, 31-21-00, 31-22-00, and 31-23-00, inclusive.
 If depreciation accruals have been discontinued for any account, the depreciation base should be reported, nevertheless, in support of depreciation reserves. Authority for the discontinuance of accruals should be shown in a footnote indicating the account(s) effected.

5. Disclosures in the respective sections of this schedule may be omitted if either total road leased from others or total equipment leased from others represents less than 5% of total road owned or total equipment owned, respectively.

salvage method, which produces financial statement results consistent with the method suggested by Docket No. 36988.

The Company's methodology has been approved by the Commission.

335. ACCUMULATED DEPRECIATION - ROAD AND EQUIPMENT OWNED AND USED

(Dollars in Thousands)

1. Disclose the required information in regard to credits and debits to Account No. 735 Accumulated depreciation: Road and Equipment Property, during the year relating to owned and used road and equipment. Include entries for depreciation of equipment owned but not used when the resulting rents are included in the "Lease Rental-Credit-Equipment" accounts and "Other-Rents-Credit-Equipment" accounts. Exclude any entries for depreciation of equipment that is used but not owned when the resulting rents are included in "Lease Rental-Debt-Equipment" account and "Other Rents-Debit-Equipment" accounts. (See Schedule 351 for the accumulated depreciation to road and equipment owned and leased to others).

2. If any data are included in columns (d) or (f), explain the entries in detail.

3. A debit balance in columns (b) or (g) for any primary account should be designated Dr.

7

If there is any inconsistency between the credits to the reserve as shown in column (c) and the charges to operating expenses, a full explanation should be given.
 Enter amounts representing amortization under an authorized amortization program other than for defense projects on hines 29 and 39.

339. ACCRUED LIABILITY - LEASED PROPERTY

(Dollars in Thousands)

1. Disclose the required information relating to credits and debits of Account 772, "Accrued Liability Leased Property", during the year concerning road and equipment leased from others.

2. In column (c), enter amounts charged to operating expenses; in column (e), enter debits to account arising from retirements; in column (f), enter amounts paid to lessor.

3. Any inconsistencies between credits to account, charges to operating expenses and payments to lessors should be fully explained.

4. Required disclosure may be omitted if leased road and equipment property represents 5% or less of total property owned and used.

5. If settlement for depreciation is made currently between lessee and lessor, and no debits or credits to Account No. 772 are made by the accounting company, show in column (c) the charges to operating expenses, and m column (f) show payments made to the lessor in settlement thereof.

340. DEPRECIATION BASE AND RATES-IMPROVEMENTS TO ROAD AND EQUIPMENT LEASED FROM OTHERS (Dollars in thousands)

1. Show in column (b) for each primary account the depreciation base used in computing the depreciation charges for the month of January, and in column (c) show the depreciation base used in computing the depreciation charges for the month of December, in column (d) show the composite rates used in computing the depreciation charges for the month of December, and on lines 30 and 40 of these columns show the composite percentage of all road and equipment accounts, respectively, ascertained by applying the primary account composite rates to the depreciation base used in computing the charges for December and dividing the total so computed by the total depreciation base for the same month. This schedule should include only improvements to leased property charged to account 732, "Improvements on Leased Property". The composite rates used should be those prescribed or otherwise authorized by the Commission, except that where the use of component rates has been authorized, the composite rates to be shown for the respective primary accounts should be recomputed from the December charges developed by the use of the authorized rates. If any changes in rates were effective during the year, give full particulars in a footnote.

2. All improvements to leased properties may be combined and one composite rate computed for each primary account, or a separate schedule may be included for each such property.

3. If depreciation accruals have been discontinued for any account, the depreciation base should be reported, nevertheless, in support of depreciation reserves. Authority for the discontinuance of accruals should be shown in a footnote indicating the account(s) affected.

4. Disclosures in the respective sections of this schedule may be omitted if either total road leased from others or total equipment leased from others represents less than 5% of the total road owned or total equipment owned, respectively. However, line 41, Grand Total, should be completed.

Railroad Annual Report R-1

342. ACCUMULATED DEPRECIATION - IMPROVEMENTS TO ROAD AND EQUIPMENT LEASED FROM OTHERS (Dollars in thousands)

1. Enter the required information concerning debits and credits to account 733, "Accumulated Depreciation-Improvements on Leased Property", during the year relating to improvements made to road and equipment property leased from others, the depreciation charges for which are included in operating expenses of the respondent.

2. If any entries are made for column (d) "Other credits" or column (f) "Other debits", state the facts occasioning such entries on page 35. A debit balance in column (b) or (g) for any primary account should be shown in parenthesis or designated "Dr".

3. Any inconsistency between the credits to the reserve as shown in column (c) and the charges to operating expenses should be fully explained on page 35.

Show in column (e) the debits to the reserve arising from retirements. These debits should not exceed investment, etc.
 Details in the respective sections of this schedule may be omitted if either total road leased from others or total equipment leased from others.

represents less than 5% of total road owned or total equipment owned, respectively. However, line 39 Grand Total, should be completed.

350. DEPRECIATION BASE AND RATES-ROAD AND EQUIPMENT LEASED TO OTHERS (Dollars in thousands)

1. This schedule is to be used in cases where the related deprectation reserve is carried in the accounts of the respondent and the rent therefrom is included in Accounts 32-11-00, 32-12-00, 32-13-00, 32-22-00 and 32-23-00.

2. Show in columns (b) and (c), for each property account, the depreciation base used in computing the depreciation for the months of January and December, respectively, with respect to road and equipment owned by the respondent but leased to others, the depreciation charges for which are not includible in operating expenses of the respondent, but for which the depreciation reserve is recorded in the accounts of the respondent. If the base for road is other than the original cost or estimated original cost as found by the Commission's Bureau of Accounts, brought to a current date by the respondent from its Order No. 3 records and accounts, or is other than ledger value for equipment, a full explanation should be given.

3. In column (d) show the composite rates used to compute the depreciation for December and on lines 29 and 38 of this column show the composite percentage for all road and equipment accounts, respectively, ascertamed by applying the primary accounts composite rates to the depreciation base used to compute the depreciation for December and dividing the total also computed by the depreciation base.

4. If depreciation accruals have been discontinued for any account, the depreciation base should be reported, nevertheless, in support of depreciation reserves. Authority for the discontinuance of accruals should be shown in a footnote indicating the account(s) affected.

5. If the total road leased to others is less than 5% of the total road owned; omit. If total equipment leased to others is less than 5% of total equipment owned; omit. However, line 39, Grand Total, should be completed.

352A. INVESTMENT IN RAILROAD PROPERTY USED IN TRANSPORTATION SERVICE (by Company)

(Dollars in Thousands)

1. Disclose the investment in railway property used in transportation service at the close of the year. This investment represents the aggregate of property owned or leased by the respondent and used in the respondent's transportation service. Such property includes (a) the investment reported in Accounts 731, "Road and Equipment Property", and 732, "Improvements on Leased Property", of the respondent, less any 731 or732 property leased to others for their exclusive use of road, track, or bridges (including equipment or other railway property covered by the contract). Equipment leased to others under separate distinct contracts shall not be deducted from the respondent's 731 or 732 property, and (b) the investment of other companies' 731 or 732 property (including operating and lessor railroads) used by the respondent when the lease is for exclusive use or control of roads, tracks or bridges (including equipment of other railway property covered by the contract). This excludes leased equipment from operating railroads under separate distinct contracts and the investment of other carriers in property jountly used by the respondent. 2. In column (a), classify each company in this schedule as respondent (R), lessor railroad (L), unactive or proprietary company (P), and other leased properties (O).

3. In column (a) to (e), inclusive, first show the data requested for the respondent (R); next the data for companies whose entire properties are used in transportation service of the respondent, divided between lessor (L) and proprietary (P) companies; followed by data for carriers and others (O), portions of whose property are used in transportation service of the respondent. Show a total for each class of company in column (d) and (e). Then show, as deductions, data for transportation property leased to carriers and others.

4. In column (c), line-haul carriers report the miles of road used in line-haul service. Report miles in whole numbers.

5. In column (d), show the amount applicable in Accounts 731 and 732 on the books of the companion whose names appear in column (b). Values of property of carriers segregated by estimate or otherwise should correspond m amount to the deductions made by the owners in their reports. If separate value is not available, explanations should be given. Differences between the amounts m column (d) of this schedule and the amounts shown in column (c), line 24, on the asset side of the comparative general balance sheet of each individual railway, should be explained in a footnote. Book value included in Accounts 731 or 732 of the owner should be reported in column (d) in reference to the investment of the respondent in the securities of the owner values a good reason can be given for the contrary. Methods of estimating (by capitalizing rentals at 6 percent or otherwise) value of property of prote owners, or portions of property of other carriers, should be explained. 6. In column (e), show the amount of depreciation and amountization accrued as of the close of the year in Accounts 733, 734, 735, 736, and 772, that is applicable to the property of the carriers whose names are listed in column (b), regardless of where the reserves therefor are recorded.

352B. INVESTMENT IN RAILWAY PROPERTY USED IN TRANSPORTATION SERVICE

н.,

(Dollars in Thousands)

1. In columns (b) through (c) give, by primary accounts, the amount of investment at the close of the year in property of respondent and each group or class of companies and properties.

٠, .

2. The amounts for respondent and for each group or class of companies and properties on Line 44 herein, should correspond with the amounts for each class of company and properties shown in Schedule 352A. Continuing records shall be maintained by respondent of the primary property accounts separately for each company of property included in the schedule.

3. Report on line 29 amounts representing capitalization of rentals for leased property based on 6 percent per year where property is not classified by accounts by non-carrier owners,

or where cost of property leased from other carners is not ascertainable. Identify non-carner owners, and briefly explain on page 37 methods of estimating value of property of non-carners or property of other carriers.

4. Report on line 30 amounts not includible in the accounts shown, or in line 29. The items reported should be briefly identified and explained. Also include here those items after permission is obtained from the Commission for exceptions to prescribed accounting. Reference to such authority should be made when explaining the amounts reported. Respondents must not make arbitrary changes to the printed stub or column headings without specific authority from the Commission.

Railroad Annual Report R-1

NOTES TO SCHEDULE 410

SPECIAL CHARGE

Included in 1996 Operating Expenses is a \$135,000,000 special charge which reduced net income for the year 1996 by 83,000,000 (See Note 3 to the Financial Statements). The following identifies the components of the special charge as recorded in Schedule 410, Railway Operating Expenses:

ITEM	IN THOUSANDS	SCHEDULE 410		
Loss on Non-cancelable Lease	\$32,500	Way and Structures Line 120, Column (d)		
Voluntary Separation Programs	\$102,500	General and Administrative Line 618, Column (e)		
Total Special Charge	\$135,000	Line 620, Columns (d) & (e)		

THIS PAGE LEFT BLANK INTENTIONALLY

.

412. WAY AND STRUCTURES

(Dollars in Thousands)

1 Report freight expenses only.

2. The total deprectation expense reported in column (b), line 29, should balance to the sum of the deprectation expense reported in schedule 410, column (f) lines, 136, 137, and 138.

- 3. Report in column (c) the lease/rentals for the various property categories of Way and Structures. The total net lease/rental reported in column (c), hine 29 should balance the net amount reported in schedule 410, column (f), lines 118 through 123, plus lines 130 through 135. If an entire road or segment of track is leased and if the actual breakdown of lease/rentals by property categories is not known, apportion the lease/rentals based on the percentage of the categories' depreciation bases to the depreciation bases for all categories of depreciable leased property. Use Schedule 352B of this report for obtaining the depreciation bases of the categories of leased property.
- 4 Amortization adjustment of each road property type which is included in column (b) shall be repeated in column (d) as a debit or credit to the appropriate line item; the net adjustment on line 29 shall equal the adjustment reported on line 29 of schedule 335.
- 5. Report on line 28 all other lease rentals not apportioned to any category listed on lines 1-27.
- 6. Line 11, Account 16, should not include computer and data processing equipment reported on his 37 of schedule 415.

414. RENTS FOR INTERCHANGED FREIGHT TRAIN CARS AND OTHER FREIGHT-CARRYING EQUIPMENT (Dollars in thousands)	 Report freight expenses only. Report in this supporting schedule rental information by car type and other freight-carrying equipment relating to the interchange of milroad, owned or leased equipment and privately owned equipment (reporting for leased equipment covers equipment that carrier on malroad markings). The gross amounts receivable and payable for freight-train cars (line 19, columns (b), and line 19, columns (e) through (g) respectively) should balance with Schedule 410, column (f), lines 231 (credits) and 230 (debits). Trailer and container rentals in this schedule are included in Schedule 410, column (f), lines 315 and 316 of Schedule 410 because those lines include rents for Other Equipment which is reported in Schedule 415, column (e). The balancing of Schedule 410, example for freight-train cars (whether under rantom cover, the trailer and container rentals in this schedule are included in Schedule 410, column (f). The balancing of Schedule 410 because those lines include rents for Other Equipment which is reported in Schedule 415, column (e). The balancing of Schedule 410, 414 and 415 Other Equipment is outlined in note 6 to Schedule 415. Report in columns (e), (d), (f) and (g) rentals for private-line cars (whether under national control or not) and shupper-owned cars. Report in columns (e), (d), (f) and (g) rentals for railroad owned cars prescribed by the Commission in Ex Parte No. 334, for which rentals are settled on a combination mileage and time basis (Daric per diem). Include railroad owned per diem tark cars on line 17. Report in columns (e) and osignations for each cars prescribed by the Commission in Ex Parte No. 334, for which rentals are settled on a combination mileage and time basis (Daric per diem). Include railroad owned per diem 17. Railroad Annual Report R-1

Road Initials

Year 1996

CR

NOTES AND REMARKS

GENERAL INSTRUCTIONS CONCERNING RETURNS TO BE MADE IN SCHEDULE 415

- 1. Report freight expenses only.
- 2. Report by type of equipment all natural expenses relating to the equipment functions (salaries and wages, materials, tools, supplies, fuels and lubricants, purchased services and general).
- 3. Report in column (b) net repair expense excluding the cost to repair damaged equipment.

Schedule 415, column (b), will balance to Schedule 410, column (f), as follows:

(a) Locomotives, line 5 plus line 38 compared to the sum of Schedule 410, lines 202,203 plus 216 (excluding wreck repairs). Do not report in Schedule 415, Equipment Damaged from Schedule 410, line 204.

(b) Freight Cars, line 24 plus line 39 compared to the sum of Schedule 410, lines 221, 222 plus 235 (excluding wreck repairs). Do not report in Schedule 415, Equipment Damaged from Schedule 410, line 223.

(c) Sum of Highway Equipment (line 32), Floating Equipment (line 35), Passenger and Other Revenue Equipment (line 36), Computer and Data Processing Equipment (line 37), Machinery-Other Equipment (line 40), plus Work and Other Non-Revenue Equipment (line 41) compared to Schedule 410, the sum of lines 302 through 307, inclusive, plus line 320 (excluding wreck repairs). Do not report in Schedule 415, Equipment Damaged from Schedule 410, line 308.

Note: Lines 216, 235 and 320 of Schedule 410 are credit amounts.

The allocation of freight car repair expense reportable on Schedule 415 by car types shall be in accordance with Instruction 2-21, Freight train repair costing, 49 CFR 1201.

4. Depreciation expense for each class of equipment by car type shall be reported in columns (c) and (d). For improvements on leased property, Accounts 732 and 733, use a supplementary Schedule 415, which will relate to Schedules 340 and 342.

Depreciation charges reported on columns (c) and (d) will balance to Schedule 410, column (f), as Follows:

(a) Locomotives, line 5 plus 38 compared to Schedule 410, line 213.

(b) Freight Cars, line 24 plus line 39 compared to schedule 410, line 232.

(c) Sum of Highway Equipment (line 32); Floating Equipment (line 35); Passenger and Other Revenue Equipment (line 36); Computer and Data Processing Equipment (line 37); Machmery-Other Equipment (line 40); and Work and Other Non-Revenue Equipment (line 41) compared to Schedule 410, line 317.

- 5. Amortization adjustment of each equipment type which is included in column (c) shall be reported in column (e) as a debit or credit to the appropriate line item; the net adjustment on line 43 shall equal the equipment amortization adjustment applicable to equipment used in freight service included in line 39, column (c), of Schedule 335.
- 6. Lease/Rentals reported in column (f) should balance to column (f) of Schedule 410 as follows:

(a) Locomotives, line 5 plus 38 compared with Schedule 410, lines 207, 208, 211 and 212.

(b) Freight Cars, line 24 plus 39 compared with Schedule 410, lines 226 plus 227 (note that Schedule 410, lines 230 and 231, are reported in Schedule 414 and are not to be included in Schedule 415).

(c) Sum of Lease/Rentals for All Other Equipment, lines 32, 35, 36, 37, 40 and 41, will balance to Schedule 410, lines 311, 312, 315 and 316, except for the interchange rental on trailers and containers which is reported in Schedule 414. Therefore, both Schedules 414 and 415 should be used when balancing Lease/Rentals Other Equipment to Schedule 410. Do not report in Schedule 415 the Trailer and Container rentals reported in Schedule 414.

7. Investment base by types of equipment shall be reported in columns (g) and (h) and should not include the cost of Equipment Used But Not Owned when the rents therefore are included in the rent for equipment and Account Nos. 31-21-00, 31-22-00, 31-23-00, 35-22-00 and 35-23-00. It should include the Cost of Equipment Owned and Leased to Others when the rents are included in the rent for Equipment Account Nos. 32-21-00, 32-22-00, 32-22-00, 36-22-00, 36-22-00, 36-22-00.

Property Used But Not Owned should also be included when the rent is included in Account Nos. 31-12-00, 31-13-00, 31-21-00, 31-22-00 and 31-23-00, inclusive.

The grand total of each equipment account in column (h) of Schedule 330 should equal the totals of line items constituting the equipment account totals of columns (g) and (h), of Schedule 415.

8. Accumulated depreciation for each class of equipment shall be reported in columns (i) and (j). The grand total of each equipment reserve account in columns (g), Schedule 335, shall equal the combined aggregate total accumulated depreciation for line items constituting the corresponding equipment accounts reported in columns (i) and (j), on Schedule 415.

The data to be reported on lines 38, 39 and 40 in columns (g) and (h) is the investment recorded in Property Account 44, allocated to Locomotives, Freight cars, and Other Equipment.
 The depreciation to be reported on lines 38, 39 and 40 in column (c) is calculated by multiplying the investment in each element by the effective composite rate for Property Account 44, and then adding or subtracting the adjustment reported in column (c). This calculation should equal the amount shown in column (c), Schedule 335.

Schedule 418

Instruction: This schedule will show the investment in capitalized leases in road and equipment by primary account.

<u>Column</u> (a)

- = primary account number and title for which capital lease amounts are included therein.
- (b) = the total investment in that primary account.
- (c) = the investment in capital leases at the end of the year.
- (d) = the current year amortization.
- (e) = the accumulated amortization relating to the leased properties.

7		Supplemental Annuities	8,200	7
8		Unemployment Insurance	954	8
9		All Other United States Taxes	1,405	9
10		Total - U.S. Government Taxes	258,622	10
11		Total Railway Taxes	330,862	11

B. Adjustments to Federal Income Taxes

1. In column (a) are listed the particulars which most often cause a differential between taxable income and pretax accounting income. Other particulars which cause such a differential should be listed under the caption Other (Specify), including State and other taxes deferred if computed separately. Minor items, each less than \$100,000, may be combined in a single entry under Other (Specify).

2. Inducate in column (b) the beginning of the year total of Accounts 714, 744, 762 and 786 applicable to each particular item in column (a).

3. Indicate in column (c) the net change in Accounts 714, 744, 762 and 786 for the net tax effect of timing differences originating and reversing in the current accounting period.

4. Indicate in column (d) any adjustments, as appropriate, including adjustments to eliminate or reinstate deferred tax effects (credits or debits) due to applying or recognizing a loss carry-forward or loss carry-back.

5. The total of line 19 in columns (c) and (d) should agree with the total of the contra charges (credits) to Account 557, Provision for Deferred Taxes, and Account 591, Provision for Deferred Taxes - Extraordinary Items, for the current year.

6. Indicate in column (e) the cumulative total of columns (b). (c) and (d). The total of column (e) must agree with the total of Accounts 714, 744, 762 and 786.

Line No.	Particulars	Beginning of year balance	Net credits (charges) for current year	Adjustments	End of year balance	Line No.

Railroad Annual Report R-1

502. COMPENSATING BALANCES AND SHORT-TERM BORROWING ARRANGEMENTS (Dollars in thousands)

67

Using the following notes as a guideline, show the requirements compensating balances and short-term borrowing arrangements. Footnote disclosure is required even though the arrangement is not reduced to writing.

1. Disclose compensating balances not legally restricted, lines of credit used and unused, average interest rate of short-term borrowings outstanding at balance sheet date, maximum amount of outstanding borrowings during the period and the weighted average rate of those borrowings.

2. Time deposits and certificates of deposit constituting compensating balances not legally restricted should be disclosed.

3. Compensating balance arrangements need only be disclosed for the latest fiscal year.

4. Compensating balances included in Account 703, Special Deposits and in Account 717, Other Funds, should also be separately disclosed below.

Compensating balance arrangements are sufficiently matenal to require disclosure in footnotes when the aggregate of written or oral agreement balances amount to 15 percent or more of liquid assets (current cash balances, restricted and unrestricted plus marketable securities).
 When a carrier is not in compliance with a compensating balance requirement, that fact should be disclosed along with stated and possible

sanctions whenever such possible sanctions may be immediate (not vague or unpredictable) and material.

The Company maintains a \$500 million uncollaterized revolving credit facility with a group of banks under which no borrowings were outstanding at December 31, 1996.

NOTES AND REMARKS

SCHEDULE 510 SEPARATION OF DEBTHOLDING BETWEEN ROAD PROPERTY AND EQUIPMENT (Dollars in Thousands)

The principal use of this schedule is to determine the average embedded rate of debt capital.

Note 1. Directly related means the purpose which the funds were used when the debt was issued.

Note 2. Line 16 plus Line 17 must equal Line 9.

Note 3. Line 21 includes interest on debt in Account 769 - Accounts Payable; Affiliated Companies.

Note 4. This interest relates to debt reported in Lines 10 and 11, respectively.

Note 5. Line 25 plus Line 26 must equal Line 21.

Railroad Annual Report R-1

NOTES AND REMARKS

:

INSTRUCTIONS CONCERNING RETURNS TO BE MADE IN SCHEDULE 512

1. Furnish the information called for below between the respondent and the affiliated companies or persons affiliated with the respondent, including officers, directors, stockholders, owners, partners or their wives and other close relatives, or their agents. IExamples of transactions are, but are not restricted to, management, legal, accounting, purchasing or other type of service including the furnishing of materials, supplies, purchase of equipment, leasing of structures, land and equipment, and agreements for other companies. To the contrast shares and other common const between affiliated companies.

To be excluded are payments for the following types of services: (a) Lawful tariff charges for transportation services.

(b) Payments to or from other carriers for interline services and interchange of

equipment. (c) Payment to or from other carriers which may reasonably be regarded as ordinarily connected with routine operation or maintenance , but any special or unusual transactions should be reported.

(d) Payments to public utility companies for rates or charges fixed in conformity with government authority.

2. In column (a) enter the name of the affiliated company, person, or agent with which respondent received or provided services aggregating \$50,000 or more for theyear. If an affiliated company provides services to more than one affiliate, and the aggregate compensation amounts to \$50,000 or more for the year, list all the affiliates included in the agreement and describe the allocation of the charges. If the respondent provides services services to more for the year, so \$50,000 or more than one affiliate, and the aggregate compensation amounts to \$50,000 or more for the segregate compensation amounts to \$50,000 or more for the segregate compensation amounts to \$50,000 or more for the year, reference to this fact should be made and the detail as to the allocation of charges should be stated. For those affiliates providing services to the respondent, also enter in column.

The respondent may be required to furnish as an attatchment to Schedule 512 a balance sheet and income statement for each affiliate with which respondent carrier had reportable transactions during the year, or alternatively, attatch a "Pro forma" balance

sheet and income statement for that portion or ontity of each affiliate which furnished the agreed to services, equipment, or other reportable transaction. The statements, if required, should be prepared on a calendar year basis in conformity with the prescribed schedules for the balance sheet and income statement in Annual Report Form R-1, and should be noted (1) to indicate the method used for depreciating equipment or other property furnished the carrier, and (2) whether the affiliate's Federal income tax return for the year was filed on a consolidated basis with the resolution each income tax return for the year was filed on a consolidated basis with the resolution each other at the affiliate's Federal income tax return for the year was filed on a consolidated basis with the resolution each other at the affiliate's return.

3. In column (b) indicate nature of relationship or control between the respondent and the company or person identified in column (a) as follows:

(a) If respondent directly controls affiliate, insert word "direct".

(b) If respondent controls through another company, insert the word "indirect".

(c) If respondent is under common control with affiliate, insert the word "common".
 (d) If respondent is controlled directly or indirectly by the company listed in column (a), insert the word "controlled".

(e) If control is exercised by other means such as a management contract or other arrangement of whatever kind, insert the word "other" and footnote to describe such annagements.

4. In column (c) fully describe the transactions involved such as management fees, lease of building, purchase of material, etc. When the affiliate listed in column(a) provides more than one type of service in column (c), list each type of service separately and show total for the affiliate. When services are both provided and received between the respondent and an affiliate they should be listed separately and the amounts shown separately in column (e).

5. In column (d) report the dollar amounts of the transaction shown and the effect of any change in the method of establishing the terms from that used in the preceding period.

6. In column (e) report the dollar amounts due from or to related parties and, if not otherwise apparent, the terms and manner of settlement. Insert (P) paid and (R) received by the amount in column (e).

	Line No.		61 20

INSTRUCTIONS CONCERNING RETURNS TO BE MADE IN SCHEDULE 700

State particulars of all tracks operated by the respondent at the close of the year, according to the following classification:

(1) Line owned by respondent

(2) Line owned by proprietary companies

(3) Line operated under lease for a specified sum, lessor being (A) an affiliated corporation, or (B) independent or not affiliated with respondent (4) Line operated under contract or agreement for contingent rent, owner being (A) an affiliated corporation, or (B) independent or not affiliated

with respondent

(5) Line operated under trackage rights.

Give subtotals for each of the several numbered classes, in the order listed above, as well as the total for all classes.

Lengths of track should be reported to the nearest WHOLE mile adjusted to accord with footings; i.e., counting one-half mile and over as a whole mile and disregarding any fraction less than one-half mile.

In column (a) insert the figure (and letter, if any) indicating its class in accordance with the preceding classification.

In column (b) give the various proportions of each class owned or leased by respondent, listing each proportion once in any grouping. Canadian mileage should be segregated and identified on separate lines in the various groupings. For each listing, in column (d) give its entire length (the distance between termini of single or first main track), and in the following columns the lengths of second main track; all other main tracks, passing tracks, cross-overs and tum-outs; way switching tracks; and yard switching tracks. These classes of tracks are defined as follows:

Running tracks: Running tracks, passing tracks, cross-overs, etc., including tum-outs from those tracks to clearance points.

Way switching tracks: Station, team, industry and other switching tracks for which no separate service is maintained.

Yard switching tracks: Yards where separate switching services are maintained, including classification, house, team, industry and other tracks switched by yard locomotives.

The returns in columns (h) and (i) should include tracks serving industries, such as mines, mills, smelters, factories, etc. Tracks belonging to an industry for which no rent is payable should not be included.

Tracks leading to and in gravel and sand pits and quarries, the cost of which is chargeable to a clearing account and which are used in getting out material for the respondent's use, should not be included.

Class (1) includes all lines operated by the respondent at the close of the year to which it has title in perpetuity.

Class (2) includes each line, full title to which is in an inactive proprietary corporation of the respondent (i.e. one all of whose outstanding stocks or obligations are held by or for the respondent, and which is operated by the respondent or an affiliated system corporation without any accounting to the said proprietary corporation). It may also include such line when the actual title to all of the outstanding stocks or obligations rest in a corporation controlled by or controlling the respondent, but in the case of any such inclusion, the facts of the relation to the respondent of the corporation holding the securities should be fully set forth in a footnote. An inactive corporation is one which has been practically absorbed in a controlling corporation, and which neither operates property nor administers its financial affairs: if it maintains an organization, it does so only for the purpose of complying with legal requirements and maintaining title to property or franchises.

Class (3) includes all tracks operated under a lease or formal conveyance of less than the grantor's interest in the property, with a specific and unconditional rent reserved. The fact that the lessor does not maintain an independent organization for financial purposes is immaterial in thus connection. Class (4) is the same as class (3), except that the rent reserved is conditional upon earnings or other fact.

Class (5) includes all tracks operated and maintained by others, but over which the respondent has the right to operate some or all of its trains. In the road of this class the respondent has no proprietary rights, but only the rights of a licensee. Include in this class, also all main tracks, industrial tracks and sidings owned by noncarrier companies and individuals when the respondent operates over them, but does not have exclusive possession of them.

Road held by the respondent as joint or common owner or a joint lessee or under any joint arrangement should be shown in its appropriate class, and the entry of length should be the entire length of the portion jointly held. The class symbol should have the letter (j) attached.

Road operated by the respondent as agent for another carrier should not be included in this schedule.

NOTES AND REMARKS

.

Road Initials:	CR	Year 1996	
IONS CONCERNING RETURNS TO BE MADE IN SCHEDULE 710	boosters, slugs, etc. For reporting purposes, indicate radio-controlled self-powered diesel units on lines 1 through 8, as appropriate, Radio-controlled units that are not self-powered, i.e., those without a diesel, should be reported on line 13 under "auxiliary units."	7. Column (k) should show aggregate capacity for all units reported in column (j), as follows: For locomotive units, report the manufacturers' rated horsepower (the maximum continuous power output from the diesel engine or engines delivered to the main generator or generators for tractive purposes). Exclude capacity data for steam locomotives For passenger-train cars report the number of passenger seats available for revenue service, counting one passenger to each berth in sleeping cars.	 8. Pasenger-train car types and service equipment car types correspond to AAR Mechanical Division designations. Descriptions of car codes and designations are published in The Official Railway Equipment Kegister. 9. Cross-checks 8. Cross-checks 9. Cross-checks 8. Schedule 710 1. Line 1, colurm () 1. Li
INSTRUCT	Instructions for reporting locomotive and passenger-utant car uses. 1. Give particulars of each of the various classes of equipment which respondent owned or leased during the year. 2. In column (c) give the number of units ourchased new or built in company ships. In column (d) give the	number of new units leased from others. The term "new" means a unit placed in service for the first time on any railroad. 3. Units leased to others for a period of one year or more are reportable in column (1). Units temporarily out of respondent's service and rented to others for less than one year are to be included in column (h). Units rented from tithers for a period less than one year should not be included in column (h).	 For reporting purposes, a "locomotive unit" is a self-propelled vehicle generating or converting energy nuo moton, and designed solely for moving other equipment. An "A" unit is the least number of wheel bases with superstructure designed for use singly or as a lead locomotive unit. A "B" unit may be equipped with hoster controls for independent operation at terminals. A "self-propelled car" is a rail motor car propelled by electric motors receiving power from a third rail or overhead, or internal combustion engues located on the car itself. Trailers equipped for use only in trains of careful or internal combustion engues located on the car itself. Trailers equipped for use only in trains of careful or internal combustion engues located on the car itself. Trailers equipped for use only in trains of the are self-propelled are not the included as self-propelled for an external conductor. Units other than disterict, e.g., dessel-hydraulo, should be identified in a footnote giving the number and a brief description. An "electric" unit includes all units which receive electric power from an overhead contact wire or a third rail, and unce the power than duesel, or electric motors that propel the vehicle. An "other self-proverdian", should be identified in a footnote giving the number and a brief description. An "electric" unit includes all units other than desel, or electric motors that propel the vehicle. An "other self-provered uni" includes all units other than desel, or electric motors that propel the vehicle. An "other self-provered uni" includes all units which draw their power from the "mother" and units used in conjunction with locenotives, but which draw their power from the "mother" unit, e.g.

Year 1996

710. INVENTORY OF EQUIPMENT - Continued

Instructions for reporting freight-train car data.

1. Give particulars of each of the various classes of equipment which respondent owned or leased during the year.

2. In column (d) give the number of units purchased or built in company shops. In column (e) give the number of new units leased from others. The term "new" means a unit placed in service for the first time on any railroad.

3. Units leased to others for a period of one year or more are reportable in column (n). Units temporarily out of respondent's service and rented to others for less than one year are to be included in column (1). Units rented from others for a period less than one year should not be included in column (j).

ŝ

4. Column (m) should show aggregate capacity for all units reported in columns (k) and (l), as follows. For freight-train cars, report the nominal capacity (in tons of 2,000 lbs) as provided for in Rule 86 of the AAR Code of Rules Governing Cars in Interchange. Convert the capacity of tank cars to capacity in tons of the commodity which the car is intended to carry customanly.

5. Tume-mileage cars refers to freight cars, other than cabooses, owned or held under lease arrangement, whose interline rental is settled on a per diem and line haul mileage basis under "Code of Car Hire Rules" or would be so settled if used by another railroad.

Note:

70

4

605

Locomotives: Line 1, Col (i) includes 60 units (LMS) that CR uses in service on a partial basis only.

710S. UNIT COST OF EQUIPMENT INSTALLED DURING THE YEAR (Dollars in thousands)

1. Give particulars as requested, separately, for the various classes of new units and rebuilt units of equipment installed by respondent during the year. If information regarding the cost of any units installed is not complete at time of filing of report, the units should be omitted, but reference to the number of units omitted should be given in a footnote, the details as to cost to be given in the report of the following year. The cost of units under construction at the close of the year should not be reflected in this schedule even though part of the cost appears in the property account for the year. Indicate in column (e) whether an installation represents equipment purchased (P), built or rebuilt by contract in outside railroad shops (C), or built or rebuilt in company or system shops (S) including units acquired through capitalized leases (L).

2. In column (a) has each class or type of locomotive unit, car or TOFC/COFC equipment on a separate line. By class is meant the standard classification used to distinguish types of locomotive units, freight cars or other equipment adopted by the Association of American Railroads, and should include physical characteristics requested by Schedule 710. Locomotive units should be identified as to power source, wheel arrangement, and horsepower per unit, such as multiple-purpose diesel locomotive A units (B-B), 2500 HP. Cars should be identified as to special construction or service characteristics, such as aluminum-covered hopper car (LO), steel boxcars-special service (XAP), etc. For TOFC/COFC show type of equipment as enumerated in Schedule 710.

3. In column (c) show the total weight in tons of 2,000 pounds. The weight of the equipment acquired should be the weight empty. 4. The cost should be the complete cost as entered on the ledger, including foreign line freight charges and handling charges.

5. Data for this schedule should be confined to the units reported in Schedule 710, columns (c) and (e) for locomotive units, passenger-train cars and

company service cars and columns (d) and (f) for freight train cars, floating equipment and highway revenue equipment. Disclose new units in the upper section of this schedule and in the lower section disclose rebuilt units acquired or rewritten into the respondent's accounts. The term "new" as used herein shall mean a unit or units placed in service for the first time on any railroad.

6. All unequipped boxcars acquired in whole or part with incentive per diem funds should be reported on separate lines and appropriately identified by footnote or sub-heading.

	721.	

1. Fumish the requested information concerning ties laid in replacement.

2. In column (j), report the total board feet of switch and bridge ties laid in replacement.

3. The term 'spot maintenance' in column (k) means repairs to track components during inspections, as opposed to programmed replacements aimed at upgrading the general condition of the tracks. Percent of spot maintenance' refers to the percentage of total ties or board feet laid in replacement considered to be spot maintenance.

4. In No. 9, the average cost per tie should include transportation charges on forcign lines, tie trains, loading, inspection, and the cost of handling ties in general supply storage and seasoning yards, and in the case of treating ties, also the cost of handling at treating plants and the cost of treatment. The cost of unloading, hauling over carrier's own lines, and placing the ties in tracks and of train service other than that necessary in connection with loading or treatment should not be included in this schedule.

724. RAILS LAID IN ADDITIONAL TRACKS AND IN NEW LINES AND EXTENSIONS

(Dollars in Thousands)

1. Give particulars of all rails applied during the year in connection with the construction of new track.

In column (a) classify the kind of rail applied as follows:

(1) New steel rails, Bessemer process

(2) New steel rails, open-hearth process

(3) New rails, special alloy (describe fully in a footnote)

(4) Relay rails.

2. Returns in columns (c) and (g) should be reported in WHOLE numbers. Fractions of less than one-half should be disregarded, and fractions of one-half or more should be counted as one.

3. The returns in columns (d) and (h) should include the cost of loading at the point of purchase ready for shipment, the freight charges paid foreign lines, and the cost of handling rails in general supply and storage yards. The cost of unloading, hauling over carrier's own lines, and placing the rails in tracks and of train service in connection with the distribution of the rail should not be included in this schedule.

Give the particulars called for below concerning the road and track operated by the respondent at the close of the year. Only the the respondent's proportion of jointly owned mileage should be included. Under "Weight of rail", the various weights of rails should be given. Road and track occupied under trackage right or other form of license should not be included herein, but all road and track held under any form of lease (granting exclusive possession to the lessee) should be included.

Railroad Annual Report R-1

Road Initials CR Year 1996

INSTRUCTIONS CONCERNING RETURNS TO BE MADE IN SCHEDULE 755

Unit Train, Way Train, and Through Train data under Items 2, 3, 4, 6, and 12 shall be obtained from conductor's wheel reports (freight) or similar records. Unit train service is a specialized scheduled shuttle type service in equipment (Railroad or privately owned) dedicated to such service, moving between origin and destination. The applicable tariffs and/or contracts generally require that a specific minimum tonnage or quantity of carloads be tendered as a unit for shipment on one bill of lading or other shipping document in a solid train for movement between origin and destination. Such tariffs and/or contracts generally contain restricted detention provisions and are subject to time-volume requirements which reflect the approximate capacity of the unit trains for the stated period. Way Trains are defined as trains operated primarily to gather and distribute cars in road service and move them between way stations or way points. Through Trains are those trains operated between two or more major concentration or distribution points. Do not include Unit Train statistics in Way and Through Train statistics. A Work Train is a train operated solely or preponderantly for the purpose of transporting company freight, work equipment or company employees. Statistics for Work Trains should be reported under Item 11 only. Statistics related to company equipment, company employees and company freight moving in transportation trains are not to be reported in Item 11, but are to be reported in Items 4-17, 6-04, 7-02, and 8-04 as instructed in notes, I, K, and L.

- (A) Report miles of road operated at close of year, excluding industrial tracks, yard tracks, and sidings.
- (B) A train-mile is the movement of a train a distance of one mile. In computing train-miles, fractions representing less than one-half mile shall be disregarded and other fractions considered as one mile. Train Miles-Running shall be based on the actual distance run between terminals and/or stations and shall be computed from the official time tables or distance tables. Train-miles shall not be increased to cover the running of locomotives from shops to terminals, doubling hills, switching, or other work at way stations, or for the service of helper or pusher locomotives or of extra locomotives on double-head or triple-head trains. When the carrier's trains are detoured over foreign roads, the miles shall be computed on the basis of the miles actually run and in accordance with the service performed. Train-miles shall be kept separately for trains hauled by locomotives and trains moved by motorcars.
- (C) A motorcar is a self-propelled unit of equipment designed to carry freight or passenger traffic, and 1s not considered a locomotive.
- (D) A locomotive is a self-propelled unit of equipment designed solely for moving other equipment. A locomotive unit-mile is a movement of a locomotive unit a distance of one mile under its own power. Include miles made by all locomotive units. Exclude miles made by motorcars. Miles of locomotives in helper service shall be computed on the basis of actual distance run in such service.
- (E) All locomotives unit-miles in road service shall be based on the actual distance run between terminals and/or stations. Follow instructions (B) regarding fractions and official time tables for computing locomotive-miles.
- (F) Train switching locomotive-miles shall be computed at the rate of six miles per hour for the time actually engaged in such service. Include miles allowed train locomotives for performing switching service at terminals and way stations.
- (G) Yard switching locomotive-miles shall be computed at the rate of six miles per hour for the time actually engaged in yard switching service. Include miles allowed to yard locomotives for switching service in yards where regular switching service is maintained and in terminal switching and transfer service.
- (H) Use car designations shown in Schedule 710. Under Railroad Owned and Leased cars, Items 4-01 and 4-11, report both foreign cars and respondents' own cars while on the line of the respondent railroad. In Items 4-13 and 4-15, report the private-line categories, miles for private-line cars (whether or not under railroad control) and shipper-owned cars. A car-mile is a movement of a unit of car equipment a distance of one mile. Report miles made by flatcars carrying loaded highway trailers or empty highway trailers moving under revenue billings as loaded freight car-miles & miles made by flatcars carrying other empty highway trailers as empty freight car-miles. Exclude miles made by motorcars and report miles made by business cars of other than reporting carrier as sleeping car miles in Item 5-03. Report mail, express baggage cars and combination cars other than 5-02 combination cars, in Item 5-05.
- (I) Exclude from Item 4-10, 4-11, 4-13, and 4-15 car-miles of work equipment, cars carrying company freight and no-payment cars moving in transportation trains. Include such car-miles in Item 4-17, 4-18, and 4-19. No payment car-miles are miles made by private-line cars (other than railroad controlled) and shipper -owned cars for which the railroad does not reimburse the owner on a loaded and/or empty miles basis. If the payment for the loaded miles includes the empty miles, the loaded and empty miles should not be considered no-payment car miles.
- (J) Report miles actually run by passenger-train cars m transportation service. Passenger-train car-miles include miles run by coaches and cars in which passengers are carried at regular tariff fares without extra charge for space occupied; miles run by combination passenger and baggage, passenger and mail, passenger and express; miles run by sleeping, parlor and other cars for which an extra fare is charged; miles run by dining, cafe, and other cars devoted exclusively to the serving of meals and other refreshments and by club, lounge, and observation cars; and miles run by other passenger-train cars where services are combined such as baggage, express and mail.
- (K) From conductors' or dispatchers' train reports or other appropriate source, compute weight in tons (2,000 lbs). Item 6-01 includes weight of all locomotive units moved one mile in transportation trains. Ton-miles of motorcars should be excluded. Items 6-02 and 6-03 represent tons behind locomotive units (cars and contents, cabooses) moved one mile in transportation trains (excluding non-revenue gross ton-miles). Non-revenue gross ton-miles in transportation trains include work equipment and cars carrying company freight (and their contents). Use 150 lbs. as the average weight per passenger, and four tons as the average weight of contents of each head-end car.

INSTRUCTIONS CONCERNING RETURNS TO BE MADE IN SCHEDULE 755 - Concluded

- (L) From conductors' train reports or other appropriate source, compute ton-miles of freight. Ton-miles represent the number of tons of revenue and the number of tons of revenue and non-revenue freight moved one mile in transportation train. Include net ton-miles in motorcar trains. Exclude l.c.l. shipment of freight handled in mixed baggage express cars. Total Ton-Miles Revenue Freight should correspond to the Ton-Miles reported on Form CBS.
- (M) Road service represents elapsed time of transportation trains (both ordinary and light) between the time of leaving the initial temmals and the time at the final temmals, including trains switching at way stations and delays on road as shown by conductors' or dispatchers' train reports. Include time of motorcar service performed by train locomotives at terminals and way stations. Report in Item 9-02 train switching hours included in Item 9-01. Train switching is the time spent by the train while performing switching service at terminals and way stations where no regular yard service is maintained. A train hour is independent of the number of locomotives in the train.
- (N) Yard switching hours are hours expended in switching service performed by yard crews in yards where regular switching service is maintained, including terminal switching and transfer service in connection with the transportation of revenue and incidentally of company freight. Hours in yard switching are independent of the number of locomotives used.
- (O) Work-train miles include the miles run by trains engaged in company service such as official inspection, inspection trains for Railway Commissioners for which no revenue is received, trains running special with fire apparatus to save carrier's property from destruction, trains run for transporting the carrier's employees to and from work when no transportation charge is made, wrecking trains, trains run solely for the purpose of transporting company material, trains run for distributing material and supplies for use in connection with operations, and all other trains used in work-train services. Exclude miles run by locomotives which engaged incidentally in switching company materials in company shops or material yards in connection with regular yard switching service or in switching equipment for repairs between yards and shops.
- (P) The number of loaded freight cars shall be obtained from the conductors' wheel report and shall be the sum of all loaded cars handled by each train. For example, if a car moves loaded (1) in a way train from the origination points, (2) in two through trains, and (3) in a way train to the destination point, the total count of loaded cars would be four: two counts for the movements in the way trains and two counts for the movements in through trains. Therefore, each car originated or received from a connecting carrier receives an initial count, plus one count for each subsequent physical transfer between trains on respondents lines. No additional count is given because of crew change or changes in track identification number unless there is a physical transfer of the car between trains. Each car moving under revenue billing shall be considered as a loaded car.
- (Q) Report vehicle (TOFC trailers/containers, automobiles and trucks) loaded and unloaded to and from TOFC and multiple level freight cars when the work is performed at the railroad's expense.
- (R) Report the number of loaded revenue trailers/containers picked up, plus revenue trailers/containers delivered in TOFC/COFC and in highway interchange service, when the work is performed at the railroads' expense. (Performed at railroads' expense means that railroad employees perform the service or that the railroad hires a subsidiary or outside contractor to perform the service.) Do not include those trailers/containers which are picked up or delivered by a shipper or motor carrier, etc., when a tariff provision requires the shipper-motor carrier, etc., and not the railroad to perform that service. Note: the count should reflect the trailer/containers for which expenses is reported in Schedule 417 Line 2 Column (b).
- (S) Report under Marine Terminals, Item 16, the tons loaded onto and unloaded from marine vessels at the expense of the reporting railroad.
- (T) Report the total number of foreign railroad cars on line at the end of the year (except surplus cars, see below). Foreign railroad Cars refers to freight cars owned by other railroads, whose interline rental is settled on time (by hour) and actual line-haul mileage charges under the code of car hire rules.

Carriers will be governed by local conditions in determining whether a car at an interchange point should be considered "on line". Unserviceable cars include cars on repair tracks undergoing or awaiting repairs. They include cars on repair tracks repaired and awaiting switching, cars on repair tracks undergoing or awaiting movement to repair tracks held in train yard (excluding cars which are to be repaired in train yard without loss of time), car moving empty in trains en route to shop, and cars stored awaiting disposition.

Surplus cars are cars which are in serviceable condition available for loading on the last day of the year, but have not been placed for loading within 48 hours. This count can be an annual average based on weekly count of cars that have not been placed for loading within 48 hours.
