SCHEDULE 101.

Page 2, Question 12.

The Company was incorporated in the year 1918, under the laws of the State of Oregon. In 1924, Swift and Company, Peninsula Industrial Company, and the Portland Union Stock Yards sold their tracks and right-of-way to the Peninsula Terminal Company. The tracks were leased for a number of years jointly to the Oregon-Washington Railroad and Navigation Company, and the Spokane, Portland and Seattle Railway Company. In 1929, the Portland Union Stock Yards purchased its original track and right-of-way from Peninsula Terminal Company and in 1930, the Portland Union Stockyards bought all of the Peninsula Terminal Company, taking over all of its assets and liabilities. On September 1, 1930, the Peninsula Terminal Company started operations under the Interstate Commerce Commission rules and regulations and handled all of the switching on its tracks from that day to the present time. On March 7, 1979, National Railway Utilization Corporation purchased all the outstanding common stock of the Peninsula Terminal Company.

NOTE A--SIGNIFICANT ACCOUNTING POLICIES

Parent Company:

On March 7, 1979, the National Railway Utilization Corporation acquired for \$300,000 all of the outstanding stock of Peninsula Terminal Company, a Class III switching railroad located in Portland, Oregon. This transaction has been accounted for as a purchase, and results of operations of the acquired company are included in the financial statements since the date of acquisition.

Railroad Accounting: Railroad operations of the Company maintain their accounts in accordance with the Uniform System of Accounts of the Interstate Commerce Commission ("ICC"). There is no significant difference between accounting under these regulations and generally accepted accounting principles.

Property, Plant and Equipment: Major renewals and betterments are capitalized and upon sale, retirement, or disposal of items, the asset cost and accumulated depreciation are removed from the accounts and any resulting profit or loss is recorded in income. For financial reporting, properties are depreciated by the straight-line method, using rates prescribed by the ICC.

NOTE B--CAR HIRE OPERATIONS

Under ICC regulations, railroads which use the Company's boxcars must pay the Company car-hire for these cars. ICC regulations pertaining to car-hire provide for incentive per diem in addition to regular per diem and mileage charges on all boxcars in the fleet. All incentive per diem collected must be earmarked to be used only to obtain new or rebuilt boxcars by purchase or the equity portion of leases of two or more years or nonequity leases of 10 years or more.

A "B" unit is similar to an "A" unit, but not equipped for use singly or as a lead locomotive unit. A "B" unit may be equipped with hostler controls for independent operating at terminals.
5. A "self-propelled car" is a rail motor car propelled by electric motors receiving power from third rail or overhead, or internal combustion engines located on the car itself. Trailers equipped for use only in trains of cars that are self-propelled are to be included as self-propelled equipment.
6. A "Diesel" unit includes all units propelled by diesel internal combustion engines irrespective of final drive, and whether power may at times be supplied from external conductor. Units other than diesel-electric, e.g., diesel-hydraulic, should be identified in a footnote giving the number and a brief description. An "Electric" unit includes all units which receive electric power from an overhead contact wire or third rail, and use the power to drive one or more electric motors that propel the vehicle. An "Other self-powered unit" includes all units other than diesel or electric, e.g., steam, gas turbine. Show the type of unit, service and number, as appropriate, in a brief description sufficient for positive identification. An "Auxiliary unit" includes all units used in conjunction with locomotives but which draw their power from the "mother" unit, e.g., boosters, slugs, etc.
7. Column (h) should show aggregate capacity for all units reported in column (g), as follows: For locomotive units, report the manufacturers' rated horsepower (the maximum continuous power output from the diesel engine or engines delivered to the main generator or generators for tractive purposes), or tractive effort of steam locomotive units; for freight-train cars report the nominal capacity (in tons of 2,000 lbs.) as provided for in Rule 86 of the AAR Code of Rules Governing Cars in Interchange. Convert the capacity of tank cars to capacity in tons of the commodity which the car is intended to carry customarily.
