COMPARATIVE BALANCE SHEET EXPLANATORY NOTES

Footnotes listed below are provided for the purpose of disclosing supplementary information concerning matters which have an impount effect on the financial condition of the carrier.

Show hereunder the estimated accumulated Federal income tax reductions realized since December 31, 1949, under section 168 (formerly section 124-A) and under section 167 of the Internal Revenue Code because of accelerated amortization of emergency facilities and accelerated depreciation of other facilities in excess of recorded depreciation. The amount to be shown in each case is the net accumulated tax reduction, that is, the reduction in Federal income taxes realized less subsequent increases in taxes due to expired or lower allowances for amortization or depreciation as a consequence of accelerated allowances in earlier years. In the event provision has been made in the accounts through appropriations of income or otherwise for the contingency of increase in future tax payments, the amounts thereof and the accounting performed should be shown. If the carrier has nothing to report insert the word "None."

GENERAL INSTRUCTIONS CONCERNING RETURNS IN SCHEDULES 217 AND 218

1. Schedules 217 and 218 should give particulars of stocks, bonds, other secured obligations, unsecured notes, and investment advances of affiliated and nonaffiliated companies held by respondent at close of year specifically as investments including obligatons of the United States, of a State or local government, or of an individual, so held; investments made, disposed of, or written down during the year; and dividends and interest credited to income. They should exclude securities issued or assumed by respondent. For definition of affiliated companies, see the rules governing account No. 130, "Investments in affiliated companies," in the Uniform System of Accounts.

2. These investments should be subdivided to show the par value pledged, unpledged, and held in fund accounts. Under "pledged" include the par value of securities recorded in accounts Nos. 130, "Investments in affiliated companies," and 131, "Other investments," which are deposited with some pledgee or other trustee, or held subject to the lien of a chattel mortgage, or subject to any other restriction or condition which makes them unavailable for general corporate purposes. "Unpledged" should include all securities held by or for the respondent free from any lien or restriction, recorded in the accounts mentioned above. Under "In sinking, insurance, and other special funds" include the par value of securities recorded in accounts Nos. 122, "Insurance funds"; 123, "Sinking funds"; and 124, "Other special funds."

3. List the investments in the following order and show a total for each group and each class of investments by accounts in numerical order:

- (1) Carriers—active
- (2) Carriers-inactive
- (3) Noncarriers-active
- (4) Noncarriers-inactive.
- (B) Bonds (including U.S. Government Bonds):
- (C) Other secured obligations:
- (D) Unsecured notes:
- (E) Investment advances:

4. The subclassification of classes (B), (C), (D), and (E) should be the same as that provided for class (A).

5. The kinds of industry represented by respondent's investments in the securities of other companies should be shown by symbol opposite the names of the issuing corporations, the symbols and industrial classifications to be as follows:

Symbol	Kind of industry
1.	Agriculture, forestry, and fisheries.
II	Mining.
III	Construction.
IV	Manufacturing.
V	Wholesale and retail trade.
VI	Finance, insurance, and real estate.
VII	Transportation, communications, and other public utilities.
VIII	Services.
IX	Government.
X	All other.

6. By carriers, as the term is here used, is meant companies owning or operating steam railways, facilities auxiliary thereto such as bridges, ferries, union depots, and other terminal facilities, sleeping cars, parlor cars, dining cars, freight cars, express service and facilities, electric railways, highway motor vehicles, steamboats and other marine transportation equipment, pipe lines (other than those for transportation of water), and other instrumentalities devoted to the transportation of persons or property for hire. Telegraph and telephone companies are not meant to be included.

7. Noncarrier companies should, for the purposes of these schedules, include telephone companies, telegraph companies, mining companies, manufacturing companies, hotel companies, etc. Purely "holding companies" are to be classed as noncarrier companies, even though the securities held by such companies are largely or entirely those issued or assumed by carriers.

8. By an active corporation is meant one which maintains an organization for operating property or administering its financial affairs. An inactive corporation is one which has been practically absorbed in a controlling corporation, and which neither operates property nor administers its financial affairs; if it maintains an organization it does so only for the purpose of complying with legal requirements and maintaining title to property or franchises.

Give particulars of investments in stocks, boxds, other secured obligations, unsecured notes, and investment advances of companies affiliated with respondent, included in accounts Nos. 122, "Insurance funds"; 123, "Sinking funds"; 124, "Other special funds"; and 130, "Investments in affiliated companies."

Entries in this schedule should be made in accordance with the definitions and general instructions given on page 15, classifying the investments by means of letters, figures, and symbols in columns (a), (b) and (c).

Indicate by means of an arbitrary mark in column (d) the obligation in support of which any

security is pledged, mortgaged, or otherwise encumbered, giving names and other mportant particulars of such obligations in footnotes.

Give totals for each class and for each subclass, and a grand total for each account.

Entries in column (d) should show date of maturity of bonds and other evidences of indebtedness. Schedule 250 .- RENTAL EXPENSE OF LESSEE

Complete this schedule only if (a) carrier operating revenues are \$10 million or more and (b) if gross rental expense in the most recent fiscal year exceeds one percent of operating revenue.

Otherwise, show total rental expense (reduced by rentals from subleases) entering into the determination of results of operations for each period for which an income statement is presented. Rental payments under short-term leases for a month or less which are not expected to be renewed need not be included. Contingent rentals, such as those based on usage or sales, shall be reported separately from the basic or minimum rentals.

Schedule 251.--MINIMUM RENTAL COMMITMENTS

Complete this schedule only if (a) carrier operating revenues are \$10 million or more and (b) gross rental expense in the most recent fiscal year exceeds one percent of operating revenue.

Show the minimum rental commitments under all noncancellable leases, as of the date of the latest balance sheet presented, in the aggregate (with disclosure of the amounts applicable to noncapitalized financing leases) for (a) each of the five succeeding fiscal years; (b) each of the next three five-year periods; and, (c) the remainder as a single amount. The amounts so determined should be reduced by rentals to be received from existing noncancellable subleases (with disclosure of the amounts of such rentals). For purposes of this rule, a noncancellable lease is defined as one that has an initial or remaining term of more than one year and is noncancellable, or is cancellable only upon the occurrence of some remote contingency or upon the payment of a substantial penalty.

Otherwise, show the impact on net income for each period for which an income statement is presented if all noncapitalized financing leases were capitalized, related assets were amortized on a straight-line basis and interest cost was accrued on the basis of the outstanding lease liability. The amounts of amortization and interest cost shall be separately identified.

SCHEDULE 541. FREIGHT CARRIED DURING THE YEAR

INSTRUCTIONS

Under the Commission's order of September 13, 1963, effective January 1, 1964, all carriers by water subject to the provisions of Parts I and III of the Interstate Commerce Act assigned to Class A and B are required to compile and report freight commodity statistics annually. Reports shall be filed in duplicate in the Bureau of Accounts, Interstate Commerce Commission, Washington, D.C. 20423, by March 31 of the year following that for which the report is made.

Tonnage and revenue should be on a billed basis. Classify the commodities carried by the respondent in its water-line and motortruck operations and for the respondent in the vessels and motortrucks of other companies (carriers) under contract, in revenue service, the domestic revenues from which are includible in accounts No. 301. "Freight revenue" and 35! "Motor-Carrier revenue" in accordance with the order of this Commission dated September 31, 1963. Maritime carriers should classify commodities the revenue from which are includible in account No. 605, "Freight-Coastwise and intercoastal". Separate the tonnage and revenue for each commodity code between "Joint rail and water traffic" and "All other traffic". The separation as to joint rail and water traffic and all other traffic may be omitted for commodity code 471, "Small packaged freight shipments".

Include under "Joint rail and water traffic" all shipments that, so far as apparent from the information on the waybills or abstracts thereof, are being transported partly by railroad and partly by water when both are used under a common control, management, or arrangement for a continuous carriage or shipment such as traffic moving on joint rail-water and rail-motor-water

Include under "All other traffic" all shipments that, so far as apparent from the information on the waybills or abstracts thereof, are transported from point of origin to point of destination solely by water, solely by truck, partly by water and partly by truck, or by any other combination which does not involve the interchanging of traffic with a railroad company; also, shipments moving on water rates when the carrier by water absorbs out of its port-to-port rates certain charges for switching, terminal, drayage, or other services within a port terminal district.

"Passenger cars, assembled" is confined to vehicles carried as revenue freight on freight rates and does not include those carried as an adjunct to passenger business.

Fuel and stores carried on any vessel for the purpose of operating and maintaining it should not be included in this schedule.

Include under "Joint rail and water traffic" and "All other traffic", the revenues that are applicable to the tonnage.

"Gross freight revenue" means reporting carrier's gross revenue from freight without adjustment for absorption or corrections.

In the "Note" on page 55 show the extent of joint motor-water traffic included in columns (c) and (f).

Commodity codes 01 through 462 shall include shipments weighing 10,000 pounds or more. Shipments of less than 10,000 pounds of one commodity shall be reported under commodity code 471, "Small packaged freight shipments" unless the reporting carrier elects to distribute all revenue freight among the other designated classes.

"Classify" means to assign an article of freight to its appropriate commodity class which may be a 3, 4, or 5-digit number. Always classify an article in the highest digit level possible. Use a 5-digit code if the article may be properly assigned to it. If there is no applicable 5-digit code, use a 4-digit code if available. If there is no applicable 4-digit code, then the article is classified at the 3-digit level.

For a 5-digit code, report the sum of all freight classified thereunder. For a 4-digit code, report the sum of all freight classified thereunder plus the sum of all 5-digit codes where the first four digits match. For a 3-digit code, report the sum of all 4-digit code numbers where the first three digits match, plus 5-digit code numbers where the first three digits match (provided they are not included in 4-digit codes), plus any articles classified at the 3-digit level. Generally the 3-digit codes are used as summaries. The 2-digit level is a summary of 3-digit codes where the first two digits match.

Commodities must not be classified to the codes with a "T" designation. Codes at the 2 and 3 digit level followed by a "T" always are totals of the related higher level codes shown on the report form; codes not so designated may include commodities classified directly thereunder and may not total.

"Piggyback traffic" is classified in the applicable commodity code if the commodity can be identified; where the commodity cannot be identified, classify in code 461 and summarize in code 46.

Codes 44 and 441, "Freight Forwarder Traffic" includes freight traffic shipped by or consigned to any forwarder holding a permit under Part IV of the Interstate Commerce Act.

"Shipper Association or Similar Traffic" Codes 45 and 451, include freight traffic shipped by a non-profit shipper association where the commodity cannot be identified; where the commodity can be identified, classify in the applicable commodity code.

542. FREIGHT AND PASSENGERS CARRIED DURING THE YEAR (DOMESTIC AND FOREIGN)

1. Give particulars called for hereunder with respect to domestic and foreign freight and passengers carried during the year. Tonnage and reve-

nue should be on a billed basis.

2. The term "regulated" in column (c) refers to traffic transported by the respondent in service subject to the Interstate Commerce Act.

3. The terms as herein used, (a) "Foreign traffic" means traffic trans-

ported by water between a United States port and a foreign port without transshipment at a United States port, and (b) "Domestic traffic" means traffic transported by water between two United States ports, including transshippped traffic contemplated by section 392 (1) and (3) of the Interstate Commerce Act.

561. EMPLOYEES, SERVICE AND COMPENSATION

Give particulars of persons employed by the respondent during the year (or during any por-tion thereof) in connection with its common and/or contract carrier operations, including inciden-tal construction and auxiliary operations.

tal construction and auxiliary operations.

2. In classifying employees among the classes listed in column (a), where any indivudial is properly classifiable in two or more classes, assign him to that class in which the principal portion of his service was rendered at the time of the count. If any persons in the regular service of the respondent were serving without compensation, they should nevertheless be included in the returns in column (b) and the matter should be fully explained in a footnote.

3. In column (b) show, properly classified with respect to occupation, the average number of employees in the service of the respondent during the year for classes in service the year round, and during the period of navigation for classes in service only during that period. Under "Remarks" state the methods by which these averages are determined. The numbers shown in this column should include only persons directly employed by the respondent; it should not include

employees of a company or person with thom the respondent has contracts for certain classes of work, as, for example, stevedoring at a given port, etc.

4. In column (c) show the total number of hours worked (or held for work) by employees compensated on an hourly basis. This number should be accurately stated and should exclude time allowed for lunch hours, half holidays, holidays, vacations, sick leave, etc., even though full compensation or part compensation is allowed for such time. It should include all overtime actually spent in work for the respondent even though no additional compensation is paid for such work. If the duties of certain general officers, traveling agents, solicitors, and other classes of employees compensated on other than an hourly basis are of such a nature that it is impracticable to record accurately the number of hours during which they are on duty, such number may be fairly estimated and the estimate number included in the return, in which case the basis for the estimate for each class is to be shown in a footnote.

5. In column (d) include the total compensation paid employees for the work represented in

column (c). If any compensation was paid or is payable under labor awards of the current year, include the amount applicable to the current year in column (d) and show the portion applicable to prior years (back pay) in a footnote, by groups of employees. For purposes of this report, labor awards are intended to cover adjustments resulting from the Jecisions of Wage Boards and voluntary awards by the respondent incident thereto.

6. If any person is employed by two or more carriers jointly he should be reported in column (b) by the carrier on whose payroll he is carried; if on the payrolls of more than one of the joint employers he should be reported by each carrier on whose payroll he was, and full particulars should be given to order to permit the elimination of duplications. If an officer serves two or more

corportations and receives no salary from any of them he should be reported in column (b) only by the controlling or highest ranking of such corporations reporting to the Commission.

7. This return need not include any employees engaged solely on the construction of new property; if any such are included that fact should be stated and particulars should be given in a foot-

note.

8. This schedule does not include old-age retirement, and unemployment insurance taxes. See schedule 350 for such taxes.

In addition, list all other officers, directors, pensioners or employees, if any, to whom the respondent paid \$40,000 or more in total compensation during the year.
- 2. The salary per annum to be entered in column: (c) is the annual rate at which an employee is paid ather than the amount actually paid for a part of a year. If the salary of an individual was increased or decreased during the year, show salary before each change as well as at close of year.
