SCHEDULE 541. FREIGHT CARRIED DURING THE YEAR

INSTRUCTIONS

Under the Commission's order of September 13, 1963, effective January 1, 1964, all carriers by water subject to the provisions of Parts I and III of the Interstate Commerce Act assigned to Class A and B are required to compile and report freight commodity statistics annually. Reports shall be filed in duplicate in the Bureau of Accounts, Interstate Commerce Commission, Washington, D.C. 20423, by March 31 of the year following that for which the report is made.

Tonnage and revenue should be on a billed basis. Classify the commodities carried by the respondent in its water-lift and motortruck operations, and for the respondent in the vessels and motortrucks of other companies (carriers) under contract, in revenue service, the domestic revenues from which are includible in accounts No. 401, "Freight revenue," and 351, "Motor Carrier revenue," in accordance with the order of this Commission dated September 31, 1964. Maritime carriers should classify commodities the revenue from which are includible in account No. 405, "Freight—Coastwise and intercoastal." Separate the tonnage and revenue for each commodity code between "Joint rail and water traffic" and "All other traffic." The separation as to joint rail and water traffic and all other traffic may be omitted for commodity code 471, "Small packaged freight shipments."

Include under "Joint rail and water traffic" all shipments that, so far as apparent from the information on the waybills or abstracts thereof, are being transported partly by railroad and partly by water when both are used under a common control, movement, or arrangement for a continuous carriage or shipment such as traffic moving on joint rail-water and rail-motor-water rates.

Include under "All other traffic" all shipments that, so far as apparent from the information on the waybills or abstracts thereof, are transported from point of origin to point of destination solely by water, solely by truck, partly by water and partly by truck, or by any other combination which does not involve the interchanging of traffic with a railroad company; also, shipments moving on water rates when the carrier by water absorbs (on all its port-to-port rates) certain charges for switching, terminal, drayage, or other services within a port terminal district.

"Passenger cars, assembled" is confined to vehicles carried as revenue freight on freight rates and does not include those carried as an adjunct to passenger business.

Fuel and stores carried in any vessel for the purpose of operating and maintaining it should not be included in this schedule.

Include under "Joint rail and water traffic" and "All other traffic" the revenues that are applicable to the tonnage

"Gross freight revenue" means reporting carrier's gross revenue from freight without adjustment for absorption or corrections.

In the "Note" on page 55 show the extent of joint motor-water traffic included in columns (c) and (f).

Commodity codes 01 through 461 shall include shipments weighing 10,000 pounds or more. Shipments of less than 10,000 pounds of one commodity shall be reported under commodity code 471, "Small packaged freight shipments," unless the reporting carrier elects to distribute all revenue freight among the other designated classes.

"Classify" means to assign an article of freight to its appropriate commodity class, which may be a 3, 4, or 5-digit number. Always classify an article in the highest digit level possible. Use a 5-digit code if the article may be properly assigned to it. If there is no applicable 5-digit code, use a 4-digit code if available. If there is no applicable 4-digit code, then the article is classified at the 3-digit level.

For a 5-digit code, report the sum of all freight classified thereunder. For a 4-digit code, report the sum of all freight classified thereunder plus the sum of all 5-digit codes where the first four digits match. For a 3-digit code, report the sum of all 4-digit code numbers where the first three digits match, plus 5-digit code numbers where the first three digits match (provided they are not included in 4-digit codes), plus any articles classified at the 3-digit level. Generally the 3-digit codes are used as summaries. The 3-digit level is a summary of 4-digit codes where the first two digits match.

Commodities must not be classified to the codes with a "T" designation. Codes at the 2 and 3 digit level followed by a "T" always are totals of the related higher level codes shown on the report form; codes not so designated may include commodities classified directly thereunder and may not total.

"Piggyback traffic" is classified in the applicable commodity code if the commodity can be identified; where the commodity cannot be identified, classify in code 461 and summarize in code 46.

Codes 44 and 441, "Freight Forwarder Traffic" includes freight traffic shipped by or consigned to any forwarder holding a permit under Part IV of the Interstate Commerce Act.

"Shipper Association or Similar Traffic" Codes 45 and 451 include freight traffic shipped by a non-profit shipper association where the commodity cannot be identified; where the commodity can be identified, classify in the applicable commodity code.

1. Give particulars called for hereunder with respect to domestic and foreign freight and passengers carried during the year. Tonnage and revenue should be on a billed basis.

2. The term "regulated" in column (c) refers to traffic transported by the respondent in service subject to the Interstate Commerce Act.

3. The terms as herein used: (a) "Foreign traffic" means traffic trans-

ported by water between a United States port and a foreign port without transshipment at a United States port; and (b) "Domestic traffic" means traffic transported by water between two United States ports, including transshipped traffic contemplated by section 902 (1) and (3) of the Interstate Commerce Act.

561. EMPLOYEES, SERVICE AND COMPENSATION

1. Give particulars of persons employed by the respondent during the year (or during any portion thereof) in connection with its common and/or contract carrier operations, including incidental construction and auxiliary operations.

2. In classifying employees among the classes listed in column (a), where any individual is properly classifiable in two or more classes, assign him to that class in which the principal portion of his service was rendered at the time of the count. If any persons in the regular service of the respondent were serving without compensation, they should nevertheless be included in the response in column (b) and the master should be fully explained in a footnote.

3. In column (b) show, properly classified with respect to occupation, the average number of employees in the service of the respondent during the year for classes in service the year round, and during the period of navigation for classes in service only during that period. Under "Remarks" state the methods by which these averages are determined. The numbers shown in this column should include only persons directly employed by the respondent; it should not include

employees of a company or person with whom the respondent has contracts for certain classes of work, as, for example, stevedoring at a given port, etc.

4. In column (c) show the total number of hours worked (or held for work) by employees compensated on an hourly basis. This number should be accurately stated and should include time allowed for lunch hours, half holidays, holidays, vacations, sick leave, etc., even though full compensation or part compensation is allowed for such time. It should include all overtime actually spent in work for the respondent even though no additional compensation is paid for such work. If the duties of certain general officers, traveling agents, solicitors, and other classes of employees compensated on other than an hourly basis are of such a nature that it is impracticable to record accurately the number of hours during which they are on duty, such number may be fairly estimated and the estimate number included in the return, in which case the basis for the estimate for each class is to be shown in a footnote.

5. In column (d) include the total compensation paid employees for the work represented in

compensation. If any compensation was paid on a pro-rata basis, the amount of the current year's compensation should be reported in column (1) and show the portion applicable to each year (that is, in a "prorated" group of employees). For purposes of this report, when awards are intended to cover adjustments resulting from the issuance of Wage Records and subsequent awards to the respondents, include them.

4. If any person is employed by two or more carriers jointly, he should be reported in column (1) for the carrier on whose payroll he is carried. If on the payroll of more than one of the water employers he should be reported for each carrier on whose payroll he was, and full particulars should be given in order to permit the elimination of duplications. If an officer serves two or more

carriers, and receives no salary from any of them he should be reported in column (1) for the carrier of highest ranking of such carriers, reporting to the Commission.

5. This report need not include any employees employed solely on the coasting trade of new vessels, if any such are included. Their data should be stated, and particulars should be given in a footnote.

6. This schedule does not include out-of-pocket expenses, and indemnities, insurance, fringe benefits, etc., for such items.

562. COMPENSATION OF OFFICERS, DIRECTORS, ETC.

1. In columns (a) and (b) enter the name and position of each of the five persons named in Schedules 102 and 103 of this report to whom the respondent paid the largest amount during the year as compensation for current or past service over and above necessary expenses incurred in discharge of duties. In addition, list all other officers, directors, pensioners or employees, if any, to whom the respondent paid \$40,000 or more in total compensation during the year.

2. The salary per annum to be entered in column (c) is the annual rate at which an employee is paid rather than the amount actually paid for a part of a year. If the salary of an individual was increased or decreased during the year, show salary before each change as well as at close of year.

3. If an officer, director, etc., receives compensation from one or more of the affiliated companies listed in Schedule 104, reference to this fact should be made if the aggregate compensation from all companies amounts to \$40,000 or more.

4. Other compensation to be entered in column (d) includes, but is not

limited to, commissions; bonuses; shares in profits; contingent compensation; moneys paid, set aside or accrued pursuant to any pension, retirement, savings, deferred compensation, or similar plan including premiums paid for retirement annuities, or life insurance where the respondent is not the beneficiary (Premiums on group life insurance for benefits less than \$50,000 need not be reported); or any other arrangement which constitutes a form of compensation. Give the details of any plan not previously reported, the basis of determining the ultimate benefits payable, and the payments or provisions made during the year.

5. Also include in column (d) all remuneration paid, directly or indirectly, in the form of securities, options, warrants, rights or other property. Furnish particulars concerning any options, warrants, or rights issued or granted during the year including prices, expiration dates and other information relating to exercise of the options, warrants, or rights. 563. PAYMENTS FOR SERVICES RENDERED BY OTHER THAN EMPLOYEES

In the form below give information concerning fees, retainers, commissions, gifts, contributions, assessments, bonuses, pensions, subscriptions, allowance for expenses, or other amounts payable aggregating \$10,000 or more during the year to any corporation, institution, association, firm, partnership, committee, or any person (other than one of respondent's employees covered in Schedule 562 in this annual report) for services or as a donation. In the case of contributions of under \$10,000 which are made in common with other carriers under a joint arrangement in payment for the performance of services or as a donation, each such contribution shall be reported, irrespective of the amount thereof, if the total amount paid by all contributors for the performance of the particular service is equal to the sum of \$10,000 or more.

To be included are, among others, payments, directly or indirectly, for legal, medical, engineering, advertising, valuation, accounting, statistical, financial, educational, entertainment, charitable, advisory, defensive, detective, developmental, research, appraisal, registration, purchasing, architectural, and hospital services; payments for expert testimony and for handling wage disputes; and payments for services of banks, bankers, trust companies, insurance companies, brokers, trust

tees, promoters, solicitors, consultants, actuaries, investigators, inspectors, and efficiency engineers. The enumeration of these kinds of payments should not be understood as excluding other payments for services not excluded herein.

To be excluded are: Rent of buildings or other property; taxes payable to the Federal, State, or local governments; payments for heat, light, power, telegraph, and telephone services; and payments to other carriers on the basis of lawful tariff charges, as well as other payments for services which both as to their nature and amount may reasonably be regarded as ordinarily connected with the routine operation, maintenance, or construction of a waterline, but any special and unusual payments for services should be reported.

If more convenient, this schedule may be filled out for a group of companies considered as one system and shown only in the report of the principal company in the system, with references thereto in the reports of the other companies.

If any doubt exists in the mind of the reporting officer as to the reportability of any type of payment, request should be made for a ruling before filing this report.
