ANNUAL REPORT

OF

SOUTH BROOKLYN RAILWAY COMPANY

370 JAY STREET, BROOKLYN, NEW YORK 11201

TO THE

INTERSTATE COMMERCE COMMISSION

FOR THE

YEAR ENDED DECEMBER 31, 1970

NOTICE

1. This Form for annual report should be filled out in triplicate and two copies returned to the Interstate Commerce Commission, *Bureau of Accounts*, Washington, D. C., 20423, by *March 31 of the year following that for which the report is made*. Attention is specifically directed to the following provisions of Part I of the Interstate Commerce Act:

SEC. 20. (1) The Commission is hereby authorized to require annual, periodical, or special reports from carriers, lessors, * * * (as defined in this section), to prescribe the manner and form in which such reports shall be made, and to require from such carriers, lessors, * * * specific and full, true, and correct answers to all questions upon which the Commission may deem information to be necessary, classifying such carriers, lessors, * * * as it may deem proper for any of these purposes. Such annual reports shall give an account of the affairs of the carrier, lessor, * * * in such form and detail as may be prescribed by the Commission.

(2) Said annual reports shall contain all the required information for the period of twelve months ending on the 31st day of December in each year, unless the Commission shall specify a different date, and shall be made out under oath and filed with the Commission at its office in Washington within three months after the close of the year for which report is made, unless additional time be granted in any case by the Commission. * * *

(7) (b). Any person who shall knowingly and willfully make, cause to be made, or participate in the making of, any false entry in any annual or other report required under this section to be filed, * * * or shall knowingly or willfully file with the Commission any false report or other document, shall be deemed guilty of a misdemeanor and shall be subject, upon conviction in any court of the United States of competent jurisdiction, to a fine of not more than five thousand dollars or imprisonment for not more than two years, or both such fine and imprisonment: * * *

(7) (c). Any carrier or lessor, * * * or any officer, agent, employee, or representative thereof, who shall fail to make and file an annual or other report with the Commission within the time fixed by the Commission, or to make specific and full, true, and correct answer to any question within thirty days from the time it is lawfully required by the Commission so to do, shall forfeit to the United States the sum of one hundred dollars for each and every day it shall continue to be in default with respect thereto.

(8) As used in this section * * * the term "carrier" means a common carrier subject to this part, and includes a receiver or trustee of such carrier; and the term "lessor" means a person owning a railroad, a water line or a pipe line, leased to and operated by a common carrier subject to this part, and includes a receiver or trustee of such lessor, * * *

The respondent is further required to send to the Bureau of Accounts, immediately upon publication, two copies of its latest printed annual report to stockholders. See schedule 108, page 5.

2. The instructions in this Form should be carefully observed, and each question should be answered fully and accurately, whether it has been answered in a previous annual report or not. Except in cases where they are specifically authorized, cancellations, arbitrary check marks, and the like should not be used either as partial or as entire answers to inquiries. If any inquiry, based on a preceding inquiry in the present report form, is, because of the answer rendered to such preceding inquiry, inapplicable to the person or corporation in whose behalf the report is made, such notation as "Not applicable; see page —, schedule (or line) number —" should be used in answer thereto, giving precise reference to the portion of the report showing the facts which make the inquiry inapplicable. Where the word "none"

truly and completely states the fact, it should be given as the answer to any particular inquiry or any particular portion of an inquiry. Where dates are called for, the month and day should be stated as well as the year. Customary abbreviations may be used in stating dates.

3. Every annual report should, in all particulars, be complete in itself, and references to the returns of former years should not be made to take the place of required entries except as herein otherwise specifically directed or authorized.

4. If it be necessary or desirable to insert additional statements, typewritten or other, in a report, they should be legibly made on durable paper and, wherever practicable, on sheets not larger than a page of the Form. *Inserted sheets should be securely attached, preferably at the inner margin; attachment by pins or clips is insufficient.*

5. All entries should be made in a permanent black ink. Those of a contrary character should be indicated in parenthesis. Items of an unusual character should be indicated by appropriate symbol and footnote.

Money items (except averages) throughout this annual report form should be shown in units of dollars adjusted to accord with footings.

6. Each respondent should make its annual report to this Commission in triplicate, retaining one copy in its files for reference in case correspondence with regard to such report becomes necessary. For this reason three copies of the Form are sent to each corporation concerned.

7. Provision is made in this Form for the returns of both operating and lessor companies. By an operating company should be understood one whose officers direct a business of transportation and whose books contain operating as well as financial accounts. For such a company an *Operating Report* should be rendered. By a lessor company should be understood one which, although merged in an operating system by means of a lease, or an operating contract or agreement, yet maintains separate accounts and an independent organization for financial purposes. For such a company a *Financial Report* should be rendered. Companies of both classes should make returns in the various schedules of this Form as they may be applicable. Operating companies are further divided into Classes I, II, and III, according to the amounts of their operating revenues, as provided in the Uniform System of Accounts for Electric Railways, and alternative schedules of operating expense accounts are correspondingly provided on pages 303 to 305. Each operating company should make its returns for operating expenses on the pages provided for companies of its class, I, II, or III, as indicated by the amount of its annual operating revenues, notwithstanding the fact that it may, for its own purposes, keep its accounts according to the list provided for companies of a higher class.

8. Except where the context clearly indicates some other meaning, the following terms when used in this Form have the meanings below stated:

COMMISSION means the *Interstate Commerce Commission*. RESPONDENT means the *person or corporation in whose behalf the report is made*. THE YEAR means the *year ended December 31 for which the report is made*. THE CLOSE OF THE YEAR means the *close of business on December 31 of the year for which the report is made*; or, in case the report is made for a shorter period than one year, it means the *close of the period covered by the report*. THE BEGINNING OF THE YEAR means the *beginning of business on January 1 of the year for which the report is made*; or, in case the report is made for a shorter period than one year, it means the *beginning of the period covered by the report*. THE PRECEDING YEAR means the *year ended December 31 of the year next preceding the year for which the report is made*. THE UNIFORM SYSTEM OF ACCOUNTS FOR ELECTRIC RAILWAYS means the *system of accounts in Part 1202 of Title 49, Code of Federal Regulations, as amended*

SPECIAL NOTICE

The attention of the respondent is directed below to certain particulars, if any, in which this report form differs from the corresponding form for the preceding year. It should be understood that mention is not made of necessary substitutions of dates or, in general, such other things as simple modifications intended to make requirements clearer, other minor adjustments, and typographical corrections.

211. ROAD AND EQUIPMENT

Give particulars of changes in accounts for investment in road and equipment, classified in accordance with the Uniform System of Accounts for Electric Railways.

In column (c) are to be shown disbursements made for the

specific purposes of purchasing, constructing, and equipping new lines and extensions of old lines.

In case the respondent's records are such that the amounts stated for road and equipment in "Investment to December 31, 1908," in the summary at the foot of this table include items

not provided for in the classification of Road and Equipment Accounts in the Uniform System of Accounts for Electric Railways, give a statement of such items in a footnote, and show the book values thereof at the close of the year.

Credit items in the entries hereunder should be fully explained.

GENERAL INSTRUCTIONS CONCERNING RETURNS IN SCHEDULES 217 AND 218

1. Schedules 217 and 218 should give particulars of stocks, bonds, notes, advances, and miscellaneous securities of affiliated and nonaffiliated companies held by respondent at close of year specifically as investments; investments made or disposed of during the year; and dividends and interest credited to income. They should exclude securities issued or assumed by respondent. For definitions of affiliated companies, see the rules governing account No. 405, "Investments in affiliated companies," in the Uniform System of Accounts for Electric Railways.

2. These investments should be subdivided to show the par value pledged, unpledged, and held in fund accounts. Under "pledged" include the par value of securities recorded in accounts Nos. 405, "Investments in affiliated companies," and 406, "Other investments," which are deposited with some pledgee or other trustee, or held subject to the lien of a chattel mortgage, or subject to any other restriction or condition which makes them unavailable for general corporate purposes. "Unpledged" should include all securities held by or for the respondent free from any lien or restriction, recorded in the accounts mentioned above. Under "In sinking, insurance, and other funds" include the par value of securities recorded in accounts Nos. 402, "Sinking funds"; 403, "Deposits in lieu of mortgaged property sold"; and 414, "Insurance and other funds."

3. List the investments in the following order and show a total for each group and each class of investments by accounts in numerical order:

(A) Stocks:

- (1) Carriers—active.
- (2) Carriers—inactive.
- (3) Noncarriers—active.
- (4) Noncarriers—inactive.

(B) Bonds (including U. S. Government Bonds):

(C) Notes:

(D) Advances:

(E) Miscellaneous securities:

4. The subclassification of classes (B), (C), (D), and (E) should be the same as that provided for class (A).

5. By carriers, as the term is here used, is meant companies owning or operating steam railways, facilities auxiliary thereto such as bridges, ferries, union depots, and other terminal facilities, sleeping cars, parlor cars, dining cars, freight cars, express service and facilities, electric railways, highway motor vehicles, steamboats and other marine transportation equipment, pipe lines (other than those for transportation of water), and other instrumentalities devoted to the transportation of persons or property for hire. Telegraph and telephone companies are not meant to be included.

6. Noncarrier companies should, for the purposes of these schedules, include telephone companies, telegraph companies, mining companies, manufacturing companies, hotel companies, etc. Purely "holding companies" are to be classed as noncarrier companies, even though the securities held by such companies are largely or entirely those issued or assumed by carriers.

7. By an active corporation is meant one which maintains an organization for operating property or administering its financial affairs. An inactive corporation is one which has been practically absorbed in a controlling corporation, and which neither operates property nor administers its financial affairs; if it maintains an organization it does so only for the purpose of complying with legal requirements and maintaining title to property or franchises.

8. In case any adjustments in book values thereof have been made during the year, a detailed statement thereof should be given on page 408 of this form.

9. Classify the securities according to the classification given above, showing the subclass by means of letters and figures in columns (a) and (b). Indicate by means of an arbitrary mark in column (c) the obligation in support of which any security is pledged, mortgaged, or otherwise encumbered, giving names and other important particulars of such obligations in footnotes.

10. Entries in column (c) should show date of maturity of bonds and other evidences of indebtedness. Obligations of the same designation which mature serially may be reported as "Serially 19..... to 19....."

11. For nonpar stock, show the number of shares in lieu of the par value in columns (e), (f), (g), (h), (j), and (l) of schedule No. 217 and in columns (d), (e), (f), (g), (i), and (k) of schedule No. 218. In reporting advances, the columns mentioned should be left blank. If any advances are pledged, give particulars in a footnote.

12. If the cost of any investment made during the year differs from the book value reported, explain the matter in a footnote. By "cost" is meant the consideration given minus accrued interest or dividends included therein.

13. Give totals for each class and for each subclass, and a grand total for each account.

14. These schedules should not include any securities issued or assumed by respondent.

15. In the case of jointly-owned companies show names and percentages of other owners.

251. CAPITAL STOCK

Give particulars of the various issues of capital stock of the respondent.

In case any "Preferred" or "Debenture" stock is outstanding the rate of dividend requirements should be shown in column (a) and it should be stated whether the dividends are cumulative or noncumulative.

In stating the date of an authorization the date of the latest assent or ratification necessary to its validity should be shown; e. g., in case an authorization is required to be ratified by stockholders after action by the board of directors, but is not required to be approved by any State or other governmental board or officer, give the date of approval by stockholders; if the assent

of a State railroad commission or other public board or officer is necessary, give the date of such assent, or if subsequent to such assent notice has to be filed with a secretary of state or other public officer and a tax or other fee has to be paid as a condition precedent to the validity of the issue, give the date of such payment. In case some condition precedent has to be complied with after the approval and ratification of the stockholders has been obtained, state, in a footnote, the particulars of such condition and of the respondent's compliance therewith.

Entries in column (d) should include stock nominally issued, nominally outstanding, and actually outstanding. For the purposes of this report, capital stock and other securities are con-

sidered to be *nominally issued* when certificates are signed and sealed and placed with the proper officer for sale and delivery or are pledged or otherwise placed in some special fund of the respondent. They are considered to be *actually issued* when sold to a bona fide purchaser for a valuable consideration, and such purchaser holds free from control by the respondent. All securities actually issued and not reacquired by or for the respondent are considered to be *actually outstanding*. If reacquired by or for the respondent under such circumstances as require them to be considered as held alive, and not canceled or retired, they are considered to be *nominally outstanding*.

261. FUNDED DEBT NONE

Give particulars of the various bonds and other evidences of funded debt of the respondent which were in existence at the close of the year under accounts 427 and 434, respectively, showing a total for each account.

In column (a) show the name of each bond or other obligation as it is designated in the records of the respondent, classifying each obligation under the appropriate subhead as defined in the Uniform System of Accounts for Electric Railways under account 427.

In case obligations of the same designation mature serially or otherwise at various dates, enter in column (c) the latest date of maturity and explain the matter in a footnote.

Column (d) calls for the par value of the amount of debt authorized to be incurred, as determined by the final authority whose assent is necessary to the legal validity of the issue. In case such final authority is some public officer or board, state in a footnote the name of such officer or board and the date when assent was given.

261. FUNDED DEBT—Concluded **NONE**

Entries in column (e) should include funded debt nominally issued, nominally outstanding, and actually outstanding.

Entries should conform to the definitions of "nominally issued," "actually issued," etc., as given in the fourth paragraph of instructions on page 209.

If the items of interest accrued during the year as entered in columns (l) and (m) do not aggregate the total accrual for the year on any security, explain the discrepancy. Entries in these columns should include interest accrued on funded debt reacquired or retired during the year although no portion of the issue is actually outstanding at the close of the year.

In determining the entries for column (n), do not treat any interest as paid unless the liability of the respondent in respect to it is extinguished. Deposits of cash with banks and other fiscal agents for the payment of interest coupons should not be reported as payments of such interest until actually paid to coupon holders or others under such circumstances as to relieve the respondent from further liability. In accordance with the Uniform System of Accounts for Electric Railways, interest falling due on January 1 is to be treated as matured on December 31.

350. TAXES ASSIGNABLE TO TRANSPORTATION OPERATIONS

NONE

Give the various particulars called for with respect to the taxes accrued assignable to transportation operations of the respondent and charged to account No. 215 during the year.

Taxes are those annual or other payments exacted by governments (Federal, State, county, municipal, school, and other tax-district authorities) for the purpose of raising funds for public uses. They do not include payments exacted for special benefits conferred on the payor, such as special assessments for street improvements, etc.

Railway properties on which taxes are paid should be classified and grouped as follows:

(A) All railway properties owned by the respondent and its proprietary companies (showing these as a whole or in detail as the respondent may prefer);

(B) Properties held under any form of lease from other than proprietary companies and upon which respondent is required to pay the taxes in addition to the stipulated rent, showing such properties in detail;

(C) Properties held under any form of lease from other than proprietary companies and upon which the respondent is required to pay the taxes as a part of the stipulated rent, showing such properties in detail.

With respect to each of the groups or detailed properties above specified show in the upper section:

- (a) The name of the road (or group).
- (b) The State (or States or Federal Government) to which taxes are paid.
- (c) Taxes accrued which were levied on the carrier by State Governments (or governments other than the United States) on the basis of a percentage of the compensation of employees, such as taxes for unemployment insurance under State Social Security Acts.
- (d) Taxes of all other kinds accrued which were levied on the carrier by State Governments (or governments other than the United States)
- (e) The sum of the returns in columns (c) and (d).

In the lower section, show separately the various kinds of U. S. Government taxes. In column (c), include taxes accrued which are payable to the U. S. Government for old-age retirement and unemployment insurance. Taxes of all other kinds accrued, such as income tax, surtax on undistributed profits, stamp tax on sale or issue of capital stock, etc., should be included in column (d). Enter totals in column (e).

This schedule should, so far as possible, be restricted to taxes on properties used in transportation operations.

This schedule should not include any taxes on joint facilities not maintained by the respondent.

397. GRADE CROSSINGS

A—RAILWAY WITH RAILWAY

A crossing with a railway is to be regarded as comprising all the tracks within the right-of-way of the respondent, owned or leased, that are crossed by the track or tracks either of its own lines or of another steam or electric railway at a definite point of intersection. Crossings on jointly operated tracks should be reported only by the companies maintaining them.

The term "protection", as related to the table, should be so applied as: (1) To include automatic and interlocking devices

and derailing appliances at crossings of electric with other railways, hand-operated signals (not interlocking), and gates and/or watchmen; and (2) To exclude stationary signs and other cautionary fixtures that simply signify the proximity of a crossing, without regard to the approach of trains or cars, as crossings having only such safety equipment are includible in returns as "unprotected." In the classification, crossings protected by an interlocking device or by a derailing appliance on an electric line,

with or without additional protection, should be included only with "interlocking devices" or "derailing appliances on electric lines", as the case may be.

A crossing should be assigned to but one of the classes listed for enumeration, although it may have more than one of the kinds of protection defined above. Observe "NOTE" at foot of table.

NOTE.—Supplementary items applicable in total irrespective of any question of protection: NEW CROSSINGS ADDED during year **None**; CROSSINGS EXISTING on January 1, eliminated during year **None**.

B—RAILWAY WITH HIGHWAY

A highway crossing is to be regarded as a crossing comprising all the tracks within, or immediately adjacent to, the right-of-way of the respondent, owned or leased, at a definite point of intersection with a highway. The returns pertain to crossings with streets, avenues, and highways and should relate to public crossings only. Private crossings (such as farm lanes, or roads leading to or within industrial plants) are to be excluded. Highway crossings with industrial tracks, not owned or leased by the

respondent, over which it does switching should not be reported.

The general terms for signals on lines 15 to 17 are intended to cover devices that indicate the approach of trains or cars. Special fixed signs or barriers, includible on line 18, are such as "approach" or "distance" signs, special "stop" signs, and "island" or similar fixed barriers. Standard fixed signs, includible on line 19, are the common roadside signs of the simple "railway-crossing" type. On line 20 there should be entered

the number of reportable crossings, if any, without protection (as defined in sec. A), stationary signs, or other cautionary fixtures.

In the classification, a crossing should be assigned to but one of the classes listed for enumeration, although it may have more than one of the classes of protection defined. Observe "NOTE" at foot of table.

NOTE.—Supplementary items applicable to total irrespective of any question of protection: NEW CROSSINGS ADDED during year **None**; CROSSINGS EXISTING on January 1, eliminated during year **None**.

411-A. MILEAGE OPERATED AT CLOSE OF YEAR

Give particulars of all tracks operated by the respondent at the close of the year.

Classify the roads as follows:

- (1) Line owned by the respondent—(A) main line, (B) branches and spurs;
- (2) Line operated by the respondent but owned by the respondent's proprietary corporations and not formally leased to the respondent;
- (3) Line operated under lease for a specified sum, lessor being (A) an affiliated corporation, or (B) independent or not affiliated with respondent;
- (4) Line operated under contract or agreement, or where the rent is contingent upon earnings or other consideration, owner being (A) an affiliated corporation, or (B) independent or not affiliated with respondent;
- (5) Line operated under trackage rights.

Name all the roads of each class before any of a later class, and insert in column (a) before the name of each road the figure (and letter, if any) indicating its class in accordance with the preceding classification.

In column (b) give the name of the road as it is designated on the records of the respondent. For each road name its termini, and give its entire length (single or first track) and the lengths of second main track, all other main tracks, sidings, turn-outs, switches, spurs, etc. The mileage to be returned in column (d) hereunder is the single-track mileage or distance between the

termini named, two or more tracks lying in the same street being considered parts of the same portion of road, and the length of but one track being used as the length of road. If the same tracks were placed in different streets, the length of each should be taken in determining the length of road. Give also subtotals for the several numbered classes, as well as the total for all classes.

The spurs mentioned under (1B) include only those used for traffic purposes, as, e. g., a spur running from a main line to a quarry or a factory. Spurs in the nature of sidings should be shown under the head of sidings, in column (g).

Class (1) includes all lines operated by the respondent at the close of the year to which it has title in perpetuity.

Class (2) includes every line full title to which is in a proprietary corporation of the respondent (i. e., one all of whose capital stock is owned, either directly or indirectly, by the respondent), and which the respondent has seized and still holds wholly by virtue of such ownership of stock in the proprietary corporation and without any formal or express grant of the road, and which is operated by the respondent without any accounting to the said proprietary corporation. It may also include such line where the title is in a merely controlled corporation if there is no formal or express grant and no accounting to the controlled corporation, but in case of any such inclusion the facts of title and a statement showing the extent and character of the respondent's interest in the controlled corporation in which is the actual legal title to the road should be attached as a memorandum to this schedule.

Class (3) includes all road operated under a lease or formal conveyance of less than the grantor's interest in the property, with a specific and unconditional rent reserved. The fact that the lessor does or does not maintain an independent organization for financial purposes is immaterial in this connection.

Class (4) is the same as class (3) except that the rent reserved is conditioned upon earnings or other fact.

Class (5) includes every line operated and maintained by another company but over which the respondent has the right to operate some or all of its trains. In the road of this class the respondent has no proprietary rights but only the rights of a licensee. Include in this class, also, all main tracks and sidings owned by noncarrier companies and individuals when the respondent operates over them but does not have exclusive possession of them.

Lengths should be stated to the nearest hundredth of a mile. Road held by the respondent as joint or common owner or a joint lessee or under any joint arrangement should be shown in its appropriate class and the entry of length should be of the entire length of the portion jointly held. The class symbol should have the letter (J) attached, and full particulars showing all of the joint or common title holders and the extent of their respective interests should be shown in a memorandum attached to the schedule.

Road operated by the respondent as agent for another carrier should not be included in this schedule.

411-B. MILES OF ROAD AT CLOSE OF YEAR—BY STATES AND TERRITORIES (SINGLE TRACK)

(For companies making operating reports)

Give particulars, as of the close of the year, of all road operated and of all owned but not operated. The respondent's proportion of operated road held by it as joint or common owner, or under a joint lease, or under any joint arrangement, should be shown in columns (b), (c), (e), or (f), as may be appropriate. The remainder of jointly operated mileage should be shown in column (g). Respondent's proportion of road jointly owned, not operated, should be shown in columns (i) and (j), as may be appropriate. Lengths should be stated to the nearest hundredth of a mile.

411-C. MILEAGE OPERATED AT CLOSE OF YEAR—CLASSIFIED BY MOTIVE POWER

Give particulars of road operated at close of year classified by types of motive power used. Under "Electric" segregate returns according to type of transmission system. Under "Other than electric" specify the kind of power used, such as gas-electric, Diesel-electric, storage battery, gas-rail busses, auto-railers, gasoline locomotives, steam locomotives, etc. If trackage is operated with two or more motive powers, classify the tracks according to the principal power used, and state the other powers used under "Remarks."

"Regular fare passengers" should include passengers from whom cash or ticket fares are collected. "Revenue transfer passengers" should include passengers from whom transfers, for which an additional charge has been made, are collected. "Free transfer passengers" should include passengers from whom transfers, issued free of charge, are collected.

416. REVENUE FREIGHT CARRIED DURING THE YEAR

Include all commodities carried by the respondent during the year, the revenue from which is includible in account No. 107, "Freight Revenue." In stating the number of tons received from connecting carriers, include all connecting carriers, whether rail or water, and whether the freight is received directly or indirectly (as through elevators).

Include forwarder traffic and traffic moved in lots of less than 10,000 pounds.

416A. REVENUE FREIGHT CARRIED DURING THE YEAR—LARGE ELECTRIC RAILWAYS

NOTE: Copies of Schedule 416A, Revenue Freight Carried During the Year—Large Electric Railways, are supplied carriers unbound for use in reporting as provided by order of September 13, 1963 as amended December 20, 1963, Docket No. 34206, Commodity Classification for Reporting Purposes and by order of August 10, 1964, Docket No. 34316, Commodity Statistics Reporting—Extent and Disclosure.

416B. STATISTICS OF RAIL-LINE OPERATIONS—LARGE ELECTRIC RAILWAYS NOT APPLICABLE

Carriers by electric railway which reported more than 1,000,000, freight, mail, and express car-miles in rail-line operations during the year 1946 should show hereunder the details of rail-line operating statistics recorded for the year in accordance with the provisions of the Interstate Commerce Commission's Order of November 25, 1946, in the Matter of Freight Commodity Statistics and Operating Statistics of Electric Railways, effective on January 1, 1947.

"Freight train-miles" include miles run by all trains between terminals or stations for the transportation of revenue and company freight; also miles run by trains consisting of empty freight cars, and by trains consisting of a locomotive and caboose running light in connection with such service. Trains which contain passenger-train cars shall be classed as freight trains whenever the number of freight-train cars is in excess of the number of passenger-train cars in them. Freight train-miles should be subdivided as follows: Ordinary freight train-miles which includes miles run by trains consisting of a locomotive, with or without caboose, with other equipment; light freight train-miles which includes miles run by trains consisting of a locomotive and caboose, running light in connection with freight-train service. Motorcar train-miles should be included.

"Freight locomotive-miles" include miles run by locomotives in freight-train service. Miles of motorcars (propelling units) should not be classed as locomotive-miles. Locomotive-miles should be subdivided as follows: Principal freight locomotive-miles, including miles run by locomotives

principal to the train, between terminals or stations, with freight trains; also miles run by locomotives between terminals or stations, with cabooses, going to or returning from such service; and miles run in hauling the second cut of freight trains double over grades; helper freight locomotive-miles, including miles run by locomotives as helpers over the division or that portion covered by the run, or on important grades including double-headers, triple-headers, and pushers, regardless of whether on the head end, in the middle, or on the rear of the train; light freight locomotive-miles, including miles run by locomotives light between terminals or stations in connection with freight-train service on account of unbalanced traffic; miles run light for hauling second cuts of trains doubled; miles run light between freight trains and next coaling station or water tank for coal or water; miles run light to pick up or assist freight trains between terminals; miles run light by grade helpers in returning from assisting freight trains as pushers or double-headers; and miles run light by locomotives coming from or going to engine houses or turntables from freight-train service.

"Freight-train car-miles" include the miles run by freight-train cars (including caboose cars) in transportation service. Such car-miles should be subdivided as follows: Loaded, empty, and caboose. The mileage of company service equipment, designed exclusively for work service and moved in transportation trains, should be classed as loaded freight car-miles. Car mileage of motorcar trains should be included.

417. EMPLOYEES

This table should show the average number of employees of each class in service based on monthly counts and the aggregate of salaries and wages paid for the year covered by the report. The average number of employees in service for entry in column (b) is obtained by adding the number of employees on the payroll in each of the stated classes during the payroll period containing the 12th day of each month and dividing by 12. Every count should cover not only employees actually on duty during the period of the count, but also employees under pay not so on duty if absent from service on sick or other leave or held subject to call for duty.

If any compensation was paid or is payable under labor awards of the current year, include the amount applicable to the current year in column (c) and show the portion applicable to prior years (back pay) in a footnote, by groups of employees. For purposes of this report, labor awards are intended to cover adjustments resulting from the decisions of Wage Boards and voluntary awards by the respondent incident thereto. This schedule does not include old-age retirement, and unemployment insurance taxes. See schedule 350 for such taxes.

Respondent has no employees from June 2, 1940 to June 14, 1953. All Operating and Maintaining Services were furnished by Employees of the City of New York, Board of Transportation under Agreement of May 31, 1940.

Effective June 15, 1953 the above services are furnished by The New York City Transit Authority under Agreement of Lease dated June 1, 1953.

418. COMPENSATION OF OFFICERS, DIRECTORS, ETC. NONE

Give the name, position, salary, and other compensation, such as bonus, commission, gift, reward, or fee, of each of the five persons named in Schedules 102 and 103 of this report to whom the respondent paid the largest amount during the year covered by this report as compensation for current or past service over and above necessary expenses incurred in discharge of duties, and in addition, all other officers, directors, pensioners or employees, if any, to whom the respondent similarly paid \$20,000 or more. If more convenient, this schedule may be filled out for a group of companies considered as one system and shown only in the report of the principal company in the system, with references thereto in the reports of the other companies. Any large "other compensation" should be explained in a footnote. If salary of an individual was

changed during the year, show salary before each change as well as at close of year. If an officer, director, etc., receives compensation from more than one transportation company (whether a subsidiary or not) or from a subsidiary company, reference to this fact should be made if his aggregate compensation amounts to \$20,000 or more and the detail as to division of the salary should be stated. By salary (column (c)) is meant the annual rate at which an employee is paid, rather than the amount actually paid for a part of a year when the salary is changed. Also, when a 10 percent (or other percent) reduction is made, the net rate and not the basic rate should be shown.

In the form below give information concerning payments, fees, retainers, commissions, gifts, contributions, assessments, bonuses, pensions, subscriptions, allowance for expenses, or any form of payments amounting in the aggregate to \$5,000 or more during the year to any corporation, institution, association, firm, partnership, committee, or any person (other than one of respondent's employees covered in schedule 418, or management fees and expenses covered in schedule 325 in this annual report) for services or as a donation. In the case of contributions of under \$5,000 which are made in common with other carriers under a joint arrangement in payment for the performance of services or as a donation, each such contribution shall be reported, irrespective of the amount thereof, if the total amount paid by all contributors for the performance of the particular service is equal to the sum of \$5,000 or more.

To be included are, among others, payments, directly or indirectly, for legal, medical, engineering, advertising, valuation, accounting, statistical, financial, educational, entertainment, charitable, advisory, defensive, detective, developmental, research, appraisal, registration, purchasing, architectural, and hospital services; payments for expert testimony and for handling wage disputes; and payments for services of banks, bankers, trust companies, insurance com-

panies, brokers, trustees, promoters, solicitors, consultants, actuaries, investigators, inspectors, and efficiency engineers. Payments to the various railway associations should also be included. The enumeration of these kinds of payments should not be understood as excluding other payments for services not excluded below.

To be excluded are: Rent of building or other property, taxes payable to the Federal, State, or local governments; payments for heat, light, power, telegraph, and telephone services; and payments to other carriers on the basis of lawful tariff charges or for the interchange of equipment between carriers as well as other payments for services which both as to their nature and amount may reasonably be regarded as ordinarily connected with the routine operation, maintenance, or construction of a railroad, but any special and unusual payments for services should be reported.

If more convenient, this schedule may be filled out for a group of roads considered as one system and shown only in the report of the principal road in the system, with references thereto in the reports of the other roads.

If any doubt exists in the mind of the reporting officer as to the reportability of any type of payment, request should be made for a ruling before filing this report.

591. CONTRACTS, AGREEMENTS, ETC.

Hereunder give a concise statement of each important contract, agreement, arrangement, etc., with other companies or persons, which became effective during the year, and concerned in any way the transportation of persons or things, at other than tariff rates, making such statements in the following order:

- 1. Express companies.
- 2. Mail.
- 3. Sleeping, parlor, and dining car companies.
- 4. Freight or transportation companies or lines.
- 5. Other railway companies.
- 6. Steamboat or steamship companies.
- 7. Telegraph companies.

8. Telephone companies.

9. Other contracts.

Information concerning contracts of minor importance may be omitted. A contract of minor importance is defined as one involving receipts or payments of less than \$1,000 per year, and which by its terms is otherwise unimportant.

In lieu of giving abstracts, copies of contracts may be filed. Every copy of a contract furnished in connection with the foregoing requirement should be listed hereunder.

The basis for computing receipts and payments should be fully stated in the case of each such contract, agreement, or arrangement.

NONE

592. CHANGES DURING THE YEAR

Hereunder state the matters called for. Make the statements explicit and precise, and number them in accordance with the inquiries; each inquiry should be fully answered, and if the word "none" truly states the fact it may be used in answering any particular inquiry. Where the particulars called for under any item are numerous, the minor particulars may be summarized by classes.

1. All extensions of road put in operation, giving—
 - (a) Termini,
 - (b) Length of road, and
 - (c) Dates of beginning operation.
2. All decreases of mileage by—
 - (a) Straightening, or
 - (b) Abandoning lines, giving particulars as above.
3. All other important physical changes, including herein all new tracks built, giving for each portion of such new track—
 - (a) Termini,
 - (b) Length, and
 - (c) Whether first main track, second main track, third main track, etc., spur, siding, switch, yard track, etc.
4. All leaseholds acquired or surrendered, giving—
 - (a) Dates,
 - (b) Length of terms,

- (c) Names of parties,
- (d) Rents, and
- (e) Other conditions.

Furnish copies of all contracts made during the year in connection with the acquisition of leasehold interests.

5. All consolidations, mergers, and reorganizations effected, giving particulars.

This statement should show the mileage, equipment, and cash value of property of each company as well as the consideration received by each company party to the action. State the dates on which consolidated, etc., and whether the prior companies have been dissolved. Copies of the articles of consolidation, merger, or reorganization should be filed with this report.

6. Adjustments in the book value of securities owned, and reasons therefor.
7. Other financial changes of more than \$50,000, not elsewhere provided for, giving full particulars.

416C. GRADE CROSSINGS

A—RAILWAY WITH RAILWAY

A crossing with a railway is to be regarded as comprising all the tracks within the right-of-way of the respondent, owned or leased, that are crossed by the track or tracks either of its own lines or of another steam or electric railway at a definite point of intersection. Crossings on jointly operated tracks should be reported only by the companies maintaining them.

The term "protection", as related to the table, should be so applied as: (1) To include automatic and interlocking devices

and derailing appliances at crossings of electric with other railways, hand-operated signals (not interlocking), and gates and/or watchmen; and (2) To exclude stationary signs and other cautionary fixtures that simply signify the proximity of a crossing, without regard to the approach of trains or cars, as crossings having only such safety equipment are includible in returns as "unprotected." In the classification, crossings protected by an interlocking device or by a derailing appliance on an electric line,

with or without additional protection, should be included only with "interlocking devices" or "derailing appliances on electric lines", as the case may be.

A crossing should be assigned to but one of the classes listed for enumeration, although it may have more than one of the kinds of protection defined above. Observe "NOTE" at foot of table.

B—RAILWAY WITH HIGHWAY

A highway crossing is to be regarded as a crossing comprising all the tracks within, or immediately adjacent to, the right-of-way of the respondent, owned or leased, at a definite point of intersection with a highway. The returns pertain to crossings with streets, avenues, and highways and should relate to public crossings only. Private crossings (such as farm lanes, or roads leading to or within industrial plants) are to be excluded. Highway crossings with industrial tracks, not owned or leased by the

respondent, over which it does switching should not be reported.

The general terms for signals on lines 15 to 17 are intended to cover devices that indicate the approach of trains or cars. Special fixed signs or barriers, includible on line 18, are such as "approach" or "distance" signs, special "stop" signs, and "island" or similar fixed barriers. Standard fixed signs, includible on line 19, are the common roadside signs of the simple "railway-crossing" type. On line 20 there should be entered

the number of reportable crossings, if any, without protection (as defined in sec. A), stationary signs, or other cautionary fixtures.

In the classification, a crossing should be assigned to but one of the classes listed for enumeration, although it may have more than one of the classes of protection defined. Observe "NOTE" at foot of table.

ANNUAL REPORT

OF

SOUTH BROOKLYN RAILWAY COMPANY

370 JAY STREET, BROOKLYN, NEW YORK 11201

TO THE

INTERSTATE COMMERCE COMMISSION

FOR THE

YEAR ENDED DECEMBER 31, 1969

NOTICE

1. This Form for annual report should be filled out in triplicate and two copies returned to the Interstate Commerce Commission, *Bureau of Accounts*, Washington, D. C., 20423, by *March 31 of the year following that for which the report is made*. Attention is specifically directed to the following provisions of Part I of the Interstate Commerce Act:

SEC. 20. (1) The Commission is hereby authorized to require annual, periodical, or special reports from carriers, lessors, * * * (as defined in this section), to prescribe the manner and form in which such reports shall be made, and to require from such carriers, lessors, * * * specific and full, true, and correct answers to all questions upon which the Commission may deem information to be necessary, classifying such carriers, lessors, * * * as it may deem proper for any of these purposes. Such annual reports shall give an account of the affairs of the carrier, lessor, * * * in such form and detail as may be prescribed by the Commission.

(2) Said annual reports shall contain all the required information for the period of twelve months ending on the 31st day of December in each year, unless the Commission shall specify a different date, and shall be made out under oath and filed with the Commission at its office in Washington within three months after the close of the year for which report is made, unless additional time be granted in any case by the Commission. * * *

(7) (b). Any person who shall knowingly and willfully make, cause to be made, or participate in the making of, any false entry in any annual or other report required under this section to be filed, * * * or shall knowingly or willfully file with the Commission any false report or other document, shall be deemed guilty of a misdemeanor and shall be subject, upon conviction in any court of the United States of competent jurisdiction, to a fine of not more than five thousand dollars or imprisonment for not more than two years, or both such fine and imprisonment: * * *

(7) (c). Any carrier or lessor, * * * or any officer, agent, employee, or representative thereof, who shall fail to make and file an annual or other report with the Commission within the time fixed by the Commission, or to make specific and full, true, and correct answer to any question within thirty days from the time it is lawfully required by the Commission so to do, shall forfeit to the United States the sum of one hundred dollars for each and every day it shall continue to be in default with respect thereto.

(8) As used in this section * * * the term "carrier" means a common carrier subject to this part, and includes a receiver or trustee of such carrier; and the term "lessor" means a person owning a railroad, a water line or a pipe line, leased to and operated by a common carrier subject to this part, and includes a receiver or trustee of such lessor, * * *

The respondent is further required to send to the Bureau of Accounts, immediately upon publication, two copies of its latest printed annual report to stockholders. See schedule 108, page 5.

2. The instructions in this Form should be carefully observed, and each question should be answered fully and accurately, whether it has been answered in a previous annual report or not. Except in cases where they are specifically authorized, cancellations, arbitrary check marks, and the like should not be used either as partial or as entire answers to inquiries. If any inquiry, based on a preceding inquiry in the present report form, is, because of the answer rendered to such preceding inquiry, inapplicable to the person or corporation in whose behalf the report is made, such notation as "Not applicable; see page —, schedule (or line) number —" should be used in answer thereto, giving precise reference to the portion of the report showing the facts which make the inquiry inapplicable. Where the word "none"

truly and completely states the fact, it should be given as the answer to any particular inquiry or any particular portion of an inquiry. Where dates are called for, the month and day should be stated as well as the year. Customary abbreviations may be used in stating dates.

3. Every annual report should, in all particulars, be complete in itself, and references to the returns of former years should not be made to take the place of required entries except as herein otherwise specifically directed or authorized.

4. If it be necessary or desirable to insert additional statements, typewritten or other, in a report, they should be legibly made on durable paper and, wherever practicable, on sheets not larger than a page of the Form. *Inserted sheets should be securely attached, preferably at the inner margin; attachment by pins or clips is insufficient.*

5. All entries should be made in a permanent black ink. Those of a contrary character should be indicated in parenthesis. Items of an unusual character should be indicated by appropriate symbol and footnote.

Money items (except averages) throughout this annual report form should be shown in units of dollars adjusted to accord with footings.

6. Each respondent should make its annual report to this Commission in triplicate, retaining one copy in its files for reference in case correspondence with regard to such report becomes necessary. For this reason three copies of the Form are sent to each corporation concerned.

7. Provision is made in this Form for the returns of both operating and lessor companies. By an operating company should be understood one whose officers direct a business of transportation and whose books contain operating as well as financial accounts. For such a company an *Operating Report* should be rendered. By a lessor company should be understood one which, although merged in an operating system by means of a lease, or an operating contract or agreement, yet maintains separate accounts and an independent organization for financial purposes. For such a company a *Financial Report* should be rendered. Companies of both classes should make returns in the various schedules of this Form as they may be applicable. Operating companies are further divided into Classes I, II, and III, according to the amounts of their operating revenues, as provided in the Uniform System of Accounts for Electric Railways, and alternative schedules of operating expense accounts are correspondingly provided on pages 303 to 305. Each operating company should make its returns for operating expenses on the pages provided for companies of its class, I, II, or III, as indicated by the amount of its annual operating revenues, notwithstanding the fact that it may, for its own purposes, keep its accounts according to the list provided for companies of a higher class.

8. Except where the context clearly indicates some other meaning, the following terms when used in this Form have the meanings below stated:

COMMISSION means the *Interstate Commerce Commission*. RESPONDENT means the person or corporation in whose behalf the report is made. THE YEAR means the year ended December 31 for which the report is made. THE CLOSE OF THE YEAR means the close of business on December 31 of the year for which the report is made; or, in case the report is made for a shorter period than one year, it means the close of the period covered by the report. THE BEGINNING OF THE YEAR means the beginning of business on January 1 of the year for which the report is made; or, in case the report is made for a shorter period than one year, it means the beginning of the period covered by the report. THE PRECEDING YEAR means the year ended December 31 of the year next preceding the year for which the report is made. THE UNIFORM SYSTEM OF ACCOUNTS FOR ELECTRIC RAILWAYS means the system of accounts in Part 1202 of Title 49, Code of Federal Regulations, as amended.

FOR THE INDEX SEE THE INSIDE OF BACK COVER

SPECIAL NOTICE

The attention of the respondent is directed below to certain particulars, if any, in which this report form differs from the corresponding form for the preceding year. It should be understood that mention is not made of necessary substitutions of dates or, in general, such other things as simple modifications intended to make requirements clearer, other minor adjustments, and typographical corrections.

If a receivership or other trust, give also date when such receivership or other posses-

sion began. If a partnership, give date of formation and also names in full of present partners.

3. Give specific reference to laws of each State or Territory under which organized, citing chapter and section. Include all grants of corporate powers by the United States, or by Canada or other foreign country; also, all amendments to charter.

4. Give specific reference to special or general laws under which each consolidation or merger or combination of other form was effected, citing chapter and section. Specify Government, State, or Territory under the laws of which each company consolidated or merged or otherwise combined into the present company was organized; give reference to the charters of each, and to all amendments of them.

5. State the occasion for the reorganization, whether by reason of foreclosure of mortgage or otherwise, according to the fact. Give date of organization of original corporation and refer to laws under which organized.

1. Exact name of common carrier making this report South Brooklyn Railway Company
2. Date of incorporation January 13, 1900
3. Under laws of what Government, State, or Territory organized? If more than one, name all. Give specific reference to each charter or statute and all amendments thereof, effected during the year. If previously effected show the year(s) of the report(s) setting forth details. If in bankruptcy, give court of jurisdiction and dates of beginning of receivership or trusteeship and of appointment of receivers or trustees New York State Railroad Law, Chapter 565 of the Laws of 1890.
4. If the respondent was formed as the result of a consolidation or merger during the year, name all constituent and all merged companies Respondent was not formed as a result of consolidation or merger during the year.

GENERAL INSTRUCTIONS CONCERNING RETURNS IN SCHEDULES 217 AND 218

1. Schedules 217 and 218 should give particulars of stocks, bonds, notes, advances, and miscellaneous securities of affiliated and nonaffiliated companies held by respondent at close of year specifically as investments; investments made or disposed of during the year; and dividends and interest credited to income. They should exclude securities issued or assumed by respondent. For definitions of affiliated companies, see the rules governing account No. 405, "Investments in affiliated companies," in the Uniform System of Accounts for Electric Railways.

2. These investments should be subdivided to show the par value pledged, unpledged, and held in fund accounts. Under "pledged" include the par value of securities recorded in accounts Nos. 405, "Investments in affiliated companies," and 406, "Other investments," which are deposited with some pledgee or other trustee, or held subject to the lien of a chattel mortgage, or subject to any other restriction or condition which makes them unavailable for general corporate purposes. "Unpledged" should include all securities held by or for the respondent free from any lien or restriction, recorded in the accounts mentioned above. Under "In sinking, insurance, and other funds" include the par value of securities recorded in accounts Nos. 402, "Sinking funds"; 403, "Deposits in lieu of mortgaged property sold"; and 414, "Insurance and other funds."

3. List the investments in the following order and show a total for each group and each class of investments by accounts in numerical order:

(A) Stocks:

- (1) Carriers—active.
- (2) Carriers—inactive.
- (3) Noncarriers—active.
- (4) Noncarriers—inactive.

(B) Bonds (including U. S. Government Bonds):

(C) Notes:

(D) Advances:

(E) Miscellaneous securities:

4. The subclassification of classes (B), (C), (D), and (E) should be the same as that provided for class (A).

5. By carriers, as the term is here used, is meant companies owning or operating steam railways, facilities auxiliary thereto such as bridges, ferries, union depots, and other terminal facilities, sleeping cars, parlor cars, dining cars, freight cars, express service and facilities, electric railways, highway motor vehicles, steamboats and other marine transportation equipment, pipe lines (other than those for transportation of water), and other instrumentalities devoted to the transportation of persons or property for hire. Telegraph and telephone companies are not meant to be included.

6. Noncarrier companies should, for the purposes of these schedules, include telephone companies, telegraph companies, mining companies, manufacturing companies, hotel companies, etc. Purely "holding companies" are to be classed as noncarrier companies, even though the securities held by such companies are largely or entirely those issued or assumed by carriers.

7. By an active corporation is meant one which maintains an organization for operating property or administering its financial affairs. An inactive corporation is one which has been practically absorbed in a controlling corporation, and which neither operates property nor administers its financial affairs, if it maintains an organization it does so only for the purpose of complying with legal requirements and maintaining title to property or franchises.

8. In case any adjustments in book values thereof have been made during the year, a detailed statement thereof should be given on page 408 of this form.

9. Classify the securities according to the classification given above, showing the subclass by means of letters and figures in columns (a) and (b). Indicate by means of an arbitrary mark in column (c) the obligation in support of which any security is pledged, mortgaged, or otherwise encumbered, giving names and other important particulars of such obligations in footnotes.

10. Entries in column (c) should show date of maturity of bonds and other evidences of indebtedness. Obligations of the same designation which mature serially may be reported as "Serially 19..... to 19....."

11. For nonpar stock, show the number of shares in lieu of the par value in columns (e), (f), (g), (h), (j), and (l) of schedule No. 217 and in columns (d), (e), (f), (g), (i), and (k) of schedule No. 218. In reporting advances, the columns mentioned should be left blank. If any advances are pledged, give particulars in a footnote.

12. If the cost of any investment made during the year differs from the book value reported, explain the matter in a footnote. By "cost" is meant the consideration given minus accrued interest or dividends included therein.

13. Give totals for each class and for each subclass, and a grand total for each account.

14. These schedules should not include any securities issued or assumed by respondent.

15. In the case of jointly-owned companies show names and percentages of other owners.

Give an analysis of the balance in account No. 415, "Other deferred assets," at the close of the year, showing in detail each item or subaccount amounting to \$50,000 or more. Items less than \$50,000 may be com-

bined into a single entry designated "Minor items, each less than \$50,000." In case the character of any item is not fully disclosed by the entries in the columns hereunder, make a full explanation in a footnote.

251. CAPITAL STOCK

Give particulars of the various issues of capital stock of the respondent.

In case any "Preferred" or "Debenture" stock is outstanding the rate of dividend requirements should be shown in column (a) and it should be stated whether the dividends are cumulative or noncumulative.

In stating the date of an authorization the date of the latest assent or ratification necessary to its validity should be shown; e. g., in case an authorization is required to be ratified by stockholders after action by the board of directors, but is not required to be approved by any State or other governmental board or officer, give the date of approval by stockholders; if the assent

of a State railroad commission or other public board or officer is necessary, give the date of such assent, or if subsequent to such assent notice has to be filed with a secretary of state or other public officer and a tax or other fee has to be paid as a condition precedent to the validity of the issue, give the date of such payment. In case some condition precedent has to be complied with after the approval and ratification of the stockholders has been obtained, state, in a footnote, the particulars of such condition and of the respondent's compliance therewith.

Entries in column (d) should include stock nominally issued, nominally outstanding, and actually outstanding. For the purposes of this report, capital stock and other securities are con-

sidered to be *nominally issued* when certificates are signed and sealed and placed with the proper officer for sale and delivery or are pledged or otherwise placed in some special fund of the respondent. They are considered to be *actually issued* when sold to a bona fide purchaser for a valuable consideration, and such purchaser holds free from control by the respondent. All securities actually issued and not reacquired by or for the respondent are considered to be *actually outstanding*. If reacquired by or for the respondent under such circumstances as require them to be considered as held alive, and not canceled or retired, they are considered to be *nominally outstanding*.

261. FUNDED DEBT—Concluded None

Entries in column (e) should include funded debt nominally issued, nominally outstanding, and actually outstanding.

Entries should conform to the definitions of "nominally issued," "actually issued," etc., as given in the fourth paragraph of instructions on page 209.

If the items of interest accrued during the year as entered in columns (l) and (m) do not aggregate the total accrual for the year on any security, explain the discrepancy. Entries in these columns should include interest accrued on funded debt reacquired or retired during the year although no portion of the issue is actually outstanding at the close of the year.

In determining the entries for column (n), do not treat any interest as paid unless the liability of the respondent in respect to it is extinguished. Deposits of cash with banks and other fiscal agents for the payment of interest coupons should not be reported as payments of such interest until actually paid to coupon holders or others under such circumstances as to relieve the respondent from further liability. In accordance with the Uniform System of Accounts for Electric Railways, interest falling due on January 1 is to be treated as matured on December 31.

Give particulars of the various creditors and the character of the transactions involved in the current liability account entitled "Miscellaneous accounts payable." In column (a) show the name of each creditor in the account whose credit balance at the close of the year amounted to \$10,000 or more; for creditors whose balances were severally less than

\$10,000, a single entry for each subaccount may be made under the caption "Minor accounts, each less than \$10,000." In column (b) state the character of the transaction represented in the account between the creditor named and the respondent.

Items reportable in schedule 110 must not be included in this schedule. In column (a) give a description of each item of contingent assets and liabilities under an inserted caption "CONTINGENT ASSETS" or "CONTINGENT LIABILITIES," as appropriate, and in column (b) show the amount of each item; if unknown, so state and explain by footnote.

Give particulars of each dividend declared and charged to Profit and Loss. For nonpar stock, show the number of shares in column (d) and the rate per share in column (b) or (c). If any such dividend was payable in anything other than cash, explain the matter fully in a footnote. If an obligation of any character has been incurred for the purpose of procuring funds for the payment of any dividend or for the purpose of replenishing the treasury of the respondent after payment of any dividend, give full particulars in a footnote.

350. TAXES ASSIGNABLE TO TRANSPORTATION OPERATIONS None

Give the various particulars called for with respect to the taxes accrued assignable to transportation operations of the respondent and charged to account No. 215 during the year.

Taxes are those annual or other payments exacted by governments (Federal, State, county, municipal, school, and other tax-district authorities) for the purpose of raising funds for public uses. They do not include payments exacted for special benefits conferred on the payor, such as special assessments for street improvements, etc.

Railway properties on which taxes are paid should be classified and grouped as follows:

(A) All railway properties owned by the respondent and its proprietary companies (showing these as a whole or in detail as the respondent may prefer);

(B) Properties held under any form of lease from other than proprietary companies and upon which respondent is required to pay the taxes in addition to the stipulated rent, showing such properties in detail;

(C) Properties held under any form of lease from other than proprietary companies and upon which the respondent is required to pay the taxes as a part of the stipulated rent, showing such properties in detail.

With respect to each of the groups or detailed properties above specified show in the upper section:

- (a) The name of the road (or group).
- (b) The State (or States or Federal Government) to which taxes are paid.
- (c) Taxes accrued which were levied on the carrier by State Governments (or governments other than the United States) on the basis of a percentage of the compensation of employees, such as taxes for unemployment insurance under State Social Security Acts.
- (d) Taxes of all other kinds accrued which were levied on the carrier by State Governments (or governments other than the United States)
- (e) The sum of the returns in columns (c) and (d).

In the lower section, show separately the various kinds of U. S. Government taxes. In column (c), include taxes accrued which are payable to the U. S. Government for old-age retirement and unemployment insurance. Taxes of all other kinds accrued, such as income tax, surtax on undistributed profits, stamp tax on sale or issue of capital stock, etc., should be included in column (d). Enter totals in column (e).

This schedule should, so far as possible, be restricted to taxes on properties used in transportation operations.

This schedule should not include any taxes on joint facilities not maintained by the respondent.

397. GRADE CROSSINGS

A—RAILWAY WITH RAILWAY

A crossing with a railway is to be regarded as comprising all the tracks within the right-of-way of the respondent, owned or leased, that are crossed by the track or tracks either of its own lines or of another steam or electric railway at a definite point of intersection. Crossings on jointly operated tracks should be reported only by the companies maintaining them.

The term "protection", as related to the table, should be so applied as: (1) To include automatic and interlocking devices

and derailing appliances at crossings of electric with other railways, hand-operated signals (not interlocking), and gates and/or watchmen; and (2) To exclude stationary signs and other cautionary fixtures that simply signify the proximity of a crossing, without regard to the approach of trains or cars, as crossings having only such safety equipment are includible in returns as "unprotected." In the classification, crossings protected by an interlocking device or by a derailing appliance on an electric line,

with or without additional protection, should be included only with "interlocking devices" or "derailing appliances on electric lines", as the case may be.

A crossing should be assigned to but one of the classes listed for enumeration, although it may have more than one of the kinds of protection defined above. Observe "NOTE" at foot of table.

NOTE.—Supplementary items applicable in total irrespective of any question of protection: NEW CROSSINGS ADDED during year None; CROSSINGS EXISTING ON JANUARY 1, eliminated during year None

B—RAILWAY WITH HIGHWAY

A highway crossing is to be regarded as a crossing comprising all the tracks within, or immediately adjacent to, the right-of-way of the respondent, owned or leased, at a definite point of intersection with a highway. The returns pertain to crossings with streets, avenues, and highways and should relate to public crossings only. Private crossings (such as farm lanes, or roads leading to or within industrial plants) are to be excluded. Highway crossings with industrial tracks, not owned or leased by the

respondent, over which it does switching should not be reported.

The general terms for signals on lines 15 to 17 are intended to cover devices that indicate the approach of trains or cars. Special fixed signs or barriers, includible on line 18, are such as "approach" or "distance" signs, special "stop" signs, and "island" or similar fixed barriers. Standard fixed signs, includible on line 19, are the common roadside signs of the simple "railway-crossing" type. On line 20 there should be entered

the number of reportable crossings, if any, without protection (as defined in sec. A), stationary signs, or other cautionary fixtures.

In the classification, a crossing should be assigned to but one of the classes listed for enumeration, although it may have more than one of the classes of protection defined. Observe "NOTE" at foot of table.

NOTE.—Supplementary items applicable to total irrespective of any question of protection: NEW CROSSINGS ADDED during year None; CROSSINGS EXISTING ON JANUARY 1, eliminated during year None

411-A. MILEAGE OPERATED AT CLOSE OF YEAR

Give particulars of all tracks operated by the respondent at the close of the year.

Classify the roads as follows:

- (1) Line owned by the respondent—(A) main line, (B) branches and spurs;
- (2) Line operated by the respondent but owned by the respondent's proprietary corporations and not formally leased to the respondent;
- (3) Line operated under lease for a specified sum, lessor being (A) an affiliated corporation, or (B) independent or not affiliated with respondent;
- (4) Line operated under contract or agreement, or where the rent is contingent upon earnings or other consideration, owner being (A) an affiliated corporation, or (B) independent or not affiliated with respondent;
- (5) Line operated under trackage rights.

Name all the roads of each class before any of a later class, and insert in column (a) before the name of each road the figure (and letter, if any) indicating its class in accordance with the preceding classification.

In column (b) give the name of the road as it is designated on the records of the respondent. For each road name its termini, and give its entire length (single or first track) and the lengths of second main track, all other main tracks, sidings, turn-outs, switches, spurs, etc. The mileage to be returned in column (d) hereunder is the single-track mileage or distance between the

termini named, two or more tracks lying in the same street being considered parts of the same portion of road, and the length of but one track being used as the length of road. If the same tracks were placed in different streets, the length of each should be taken in determining the length of road. Give also subtotals for all classes.

The spurs mentioned under (1B) include only those used for traffic purposes, as, e. g., a spur running from a main line to a quarry or a factory. Spurs in the nature of sidings should be shown under the head of sidings, in column (g).

Class (1) includes all lines operated by the respondent at the close of the year to which it has title in perpetuity.

Class (2) includes every line full title to which is in a proprietary corporation of the respondent (i. e., one all of whose capital stock is owned, either directly or indirectly, by the respondent), and which the respondent has seized and still holds wholly by virtue of such ownership of stock in the proprietary corporation and without any formal or express grant of the road, and which is operated by the respondent without any accounting to the said proprietary corporation. It may also include such line where the title is in a merely controlled corporation if there is no formal or express grant and no accounting to the controlled corporation, but in case of any such inclusion the facts of title and a statement showing the extent and character of the respondent's interest in the controlled corporation in which is the actual legal title to the road should be attached as a memorandum to this schedule.

Class (3) includes all road operated under a lease or formal conveyance of less than the grantor's interest in the property, with a specific and unconditional rent reserved. The fact that the lessor does or does not maintain an independent organization for financial purposes is immaterial in this connection.

Class (4) is the same as class (3) except that the rent reserved is conditioned upon earnings or other fact.

Class (5) includes every line operated and maintained by another company but over which the respondent has the right to operate some or all of its trains. In the road of this class the respondent has no proprietary rights but only the rights of a licensee. Include in this class, also, all main tracks and sidings owned by noncarrier companies and individuals when the respondent operates over them but does not have exclusive possession of them.

Lengths should be stated to the nearest hundredth of a mile.

Road held by the respondent as joint or common owner or a joint lessee or under any joint arrangement should be shown in its appropriate class and the entry of length should be of the entire length of the portion jointly held. The class symbol should have the letter (J) attached, and full particulars showing all of the joint or common title holders and the extent of their respective interests should be shown in a memorandum attached to the schedule.

Road operated by the respondent as agent for another carrier should not be included in this schedule.

411-B. MILES OF ROAD AT CLOSE OF YEAR—BY STATES AND TERRITORIES (SINGLE TRACK)

(For companies making operating reports)

Give particulars, as of the close of the year, of all road operated and of all owned but not operated. The respondent's proportion of operated road held by it as joint or common owner, or under a joint lease, or under any joint arrangement, should be shown in columns (b), (c), (e), or (f), as may be appropriate. The remainder of jointly operated mileage should be shown in column (g). Respondent's proportion of road jointly owned, not operated, should be shown in columns (i) and (j), as may be appropriate. Lengths should be stated to the nearest hundredth of a mile.

411-C. MILEAGE OPERATED AT CLOSE OF YEAR—CLASSIFIED BY MOTIVE POWER

Give particulars of road operated at close of year classified by types of motive power used. Under "Electric" segregate returns according to type of transmission system. Under "Other than electric" specify the kind of power used, such as gas-electric, Diesel-electric, storage battery, gas-rail busses, auto-railers, gasoline locomotives, steam locomotives, etc. If trackage is operated with two or more motive powers, classify the tracks according to the principal power used, and state the other powers used under "Remarks."

415. MILEAGE, TRAFFIC, AND MISCELLANEOUS STATISTICS

In making returns for items numbered 7 to 11, observe the following:

"Regular fare passengers" should include passengers from whom cash or ticket fares are collected. "Revenue transfer passengers" should include passengers from whom transfers, for which an additional charge has been made, are collected. "Free transfer passengers" should include passengers from whom transfers, issued free of charge, are collected.

416. REVENUE FREIGHT CARRIED DURING THE YEAR

Include all commodities carried by the respondent during the year, the revenue from which is includible in account No. 107, "Freight Revenue." In stating the number of tons received from connecting carriers, include all connecting carriers, whether rail or water, and whether the freight is received directly or indirectly (as through elevators).

Include forwarder traffic and traffic moved in lots of less than 10,000 pounds.

416A. REVENUE FREIGHT CARRIED DURING THE YEAR—LARGE ELECTRIC RAILWAYS

NOTE: Copies of Schedule 416A, Revenue Freight Carried During the Year—Large Electric Railways, are supplied carriers unbound for use in reporting as provided by order of September 13, 1963 as amended December 20, 1963, Docket No. 34206, Commodity Classification for Reporting Purposes and by order of August 10, 1964, Docket No. 34316, Commodity Statistics Reporting—Extent and Disclosure.

416B. STATISTICS OF RAIL-LINE OPERATIONS—LARGE ELECTRIC RAILWAYS Not applicable

Carriers by electric railway which reported more than 1,000,000, freight, mail, and express car-miles in rail-line operations during the year 1946 should show hereunder the details of rail-line operating statistics recorded for the year in accordance with the provisions of the Interstate Commerce Commission's Order of November 25, 1946, in the Matter of Freight Commodity Statistics and Operating Statistics of Electric Railways, effective on January 1, 1947.

"Freight train-miles" include miles run by all trains between terminals or stations for the transportation of revenue and company freight; also miles run by trains consisting of empty freight cars, and by trains consisting of a locomotive and caboose running light in connection with such service. Trains which contain passenger-train cars shall be classed as freight trains whenever the number of freight-train cars is in excess of the number of passenger-train cars in them. Freight train-miles should be subdivided as follows: Ordinary freight train-miles which includes miles run by trains consisting of a locomotive, with or without caboose, with other equipment; light freight train-miles which includes miles run by trains consisting of a locomotive and caboose, running light in connection with freight-train service. Motorcar train-miles should be included.

"Freight locomotive-miles" include miles run by locomotives in freight-train service. Miles of motorcars (propelling units) should not be classed as locomotive-miles. Locomotive-miles should be subdivided as follows: Principal freight locomotive-miles, including miles run by locomotives

principal to the train, between terminals or stations, with freight trains; also miles run by locomotives between terminals or stations, with cabooses, going to or returning from such service; and miles run in hauling the second cut of freight trains doubled over grades; helper freight locomotive-miles, including miles run by locomotives as helpers over the division or that portion covered by the run, or on important grades including double-headers, triple-headers, and pushers, regardless of whether on the head end, in the middle, or on the rear of the train; light freight locomotive-miles, including miles run by locomotives light between terminals or stations in connection with freight-train service on account of unbalanced traffic; miles run light for hauling second cuts of trains doubled; miles run light between freight trains and next coaling station or water tank for coal or water; miles run light to pick up or assist freight trains between terminals; miles run light by grade helpers in returning from assisting freight trains as pushers or double-headers; and miles run light by locomotives coming from or going to engine houses or turntables from freight-train service.

"Freight-train car-miles" include the miles run by freight-train cars (including caboose cars) in transportation service. Such car-miles should be subdivided as follows: Loaded, empty, and caboose. The mileage of company service equipment, designed exclusively for work service and moved in transportation trains, should be classed as loaded freight car-miles. Car mileage of motorcar trains should be included.

METHODS OF OBTAINING AVERAGES INDICATED BY NUMBERED ITEMS

- 100. Miles per revenue ton.—Divide "60. Tons of revenue freight carried one mile" by "50. Number of revenue tons carried."
- 101. Ton-miles per car-mile.—Divide "62. Total tons of freight carried one mile" by "40. Loaded freight-train car-miles."

417. EMPLOYEES

This table should show the average number of employees of each class in service based on monthly counts and the aggregate of salaries and wages paid for the year covered by the report. The average number of employees in service for entry in column (b) is obtained by adding the number of employees on the payroll in each of the stated classes during the payroll period containing the 12th day of each month and dividing by 12. Every count should cover not only employees actually on duty during the period of the count, but also employees under pay not so on duty if absent from service on sick or other leave or held subject to call for duty.

If any compensation was paid or is payable under labor awards of the current year, include the amount applicable to the current year in column (c) and show the portion applicable to prior years (back pay) in a footnote, by groups of employees. For purposes of this report, labor awards are intended to cover adjustments resulting from the decisions of Wage Boards and voluntary awards by the respondent incident thereto. This schedule does not include old-age retirement, and unemployment insurance taxes. See schedule 350 for such taxes.

Respondent has no employees. From June 2, 1940 to June 14, 1953 all operating and maintaining services were furnished by employees of the City of New York, Board of Transportation under Agreement of May 31, 1940.

Effective June 15, 1953 the above services are furnished by the New York City Transit Authority under Agreement of Lease dated June 1, 1953.

418. COMPENSATION OF OFFICERS, DIRECTORS, ETC. None

Give the name, position, salary, and other compensation, such as bonus, commission, gift, reward, or fee, of each of the five persons named in Schedules 102 and 103 of this report to whom the respondent paid the largest amount during the year covered by this report as compensation for current or past service over and above necessary expenses incurred in discharge of duties, and in addition, all other officers, directors, pensioners or employees, if any, to whom the respondent similarly paid \$20,000 or more. If more convenient, this schedule may be filled out for a group of companies considered as one system and shown only in the report of the principal company in the system, with references thereto in the reports of the other companies. Any large "other compensation" should be explained in a footnote. If salary of an individual was

changed during the year, show salary before each change as well as at close of year. If an officer, director, etc., receives compensation from more than one transportation company (whether a subsidiary or not) or from a subsidiary company, reference to this fact should be made if his aggregate compensation amounts to \$20,000 or more and the detail as to division of the salary should be stated. By salary (column (c)) is meant the annual rate at which an employee is paid, rather than the amount actually paid for a part of a year when the salary is changed. Also, when a 10 percent (or other percent) reduction is made, the net rate and not the basic rate should be shown.

419. PAYMENTS FOR SERVICES NOT RENDERED BY EMPLOYEES None

In the form below give information concerning payments, fees, retainers, commissions, gifts, contributions, assessments, bonuses, pensions, subscriptions, allowance for expenses, or any form of payments amounting in the aggregate to \$5,000 or more during the year to any corporation, institution, association, firm, partnership, committee, or any person (other than one of respondent's employees covered in schedule 418, or management fees and expenses covered in schedule 325 in this annual report) for services or as a donation. In the case of contributions of under \$5,000 which are made in common with other carriers under a joint arrangement in payment for the performance of services or as a donation, each such contribution shall be reported, irrespective of the amount thereof, if the total amount paid by all contributors for the performance of the particular service is equal to the sum of \$5,000 or more.

To be included are, among others, payments, directly or indirectly, for legal, medical, engineering, advertising, valuation, accounting, statistical, financial, educational, entertainment, charitable, advisory, defensive, detective, developmental, research, appraisal, registration, purchasing, architectural, and hospital services; payments for expert testimony and for handling wage disputes; and payments for services of banks, bankers, trust companies, insurance com-

panies, brokers, trustees, promoters, solicitors, consultants, actuaries, investigators, inspectors, and efficiency engineers. Payments to the various railway associations should also be included. The enumeration of these kinds of payments should not be understood as excluding other payments for services not excluded below.

To be excluded are: Rent of buildings or other property, taxes payable to the Federal, State, or local governments; payments for heat, light, power, telegraph, and telephone services; and payments to other carriers on the basis of lawful tariff charges or for the interchange of equipment between carriers as well as other payments for services which both as to their nature and amount may reasonably be regarded as ordinarily connected with the routine operation, maintenance, or construction of a railroad, but any special and unusual payments for services should be reported.

If more convenient, this schedule may be filled out for a group of roads considered as one system and shown only in the report of the principal road in the system, with references thereto in the reports of the other roads.

If any doubt exists in the mind of the reporting officer as to the reportability of any type of payment, request should be made for a ruling before filing this report.

EXPLANATORY REMARKS

591. CONTRACTS, AGREEMENTS, ETC.

Hereunder give a concise statement of each important contract, agreement, arrangement, etc., with other companies or persons, which became effective during the year, and concerned in any way the transportation of persons or things, at other than tariff rates, making such statements in the following order:

- 1. Express companies.
- 2. Mail.
- 3. Sleeping, parlor, and dining car companies.
- 4. Freight or transportation companies or lines.
- 5. Other railway companies.
- 6. Steamboat or steamship companies.
- 7. Telegraph companies.

8. Telephone companies.

9. Other contracts.

Information concerning contracts of minor importance may be omitted. A contract of minor importance is defined as one involving receipts or payments of less than \$1,000 per year, and which by its terms is otherwise unimportant.

In lieu of giving abstracts, copies of contracts may be filed. Every copy of a contract furnished in connection with the foregoing requirement should be listed hereunder.

The basis for computing receipts and payments should be fully stated in the case of each such contract, agreement, or arrangement.

None

592. CHANGES DURING THE YEAR

Hereunder state the matters called for. Make the statements explicit and precise, and number them in accordance with the inquiries; each inquiry should be fully answered, and if the word "none" truly states the fact it may be used in answering any particular inquiry. Where the particulars called for under any item are numerous, the minor particulars may be summarized by classes.

1. All extensions of road put in operation, giving—
 - (a) Termini,
 - (b) Length of road, and
 - (c) Dates of beginning operation.
2. All decreases of mileage by—
 - (a) Straightening, or
 - (b) Abandoning lines, giving particulars as above.
3. All other important physical changes, including herein all new tracks built, giving for each portion of such new track—
 - (a) Termini,
 - (b) Length, and
 - (c) Whether first main track, second main track, third main track, etc., spur, siding, switch, yard track, etc.
4. All leaseholds acquired or surrendered, giving—
 - (a) Dates,
 - (b) Length of terms,

- (c) Names of parties,
- (d) Rents, and
- (e) Other conditions.

Furnish copies of all contracts made during the year in connection with the acquisition of leasehold interests.

5. All consolidations, mergers, and reorganizations effected, giving particulars.

This statement should show the mileage, equipment, and cash value of property of each company as well as the consideration received by each company party to the action. State the dates on which consolidated, etc., and whether the prior companies have been dissolved. Copies of the articles of consolidation, merger, or reorganization should be filed with this report.

6. Adjustments in the book value of securities owned, and reasons therefor.
7. Other financial changes of more than \$50,000, not elsewhere provided for, giving full particulars.

None

VERIFICATION

The foregoing report must be verified by the oath of the officer having control of the accounting of the respondent. It should be verified, also, by the oath of the president or other chief officer of the respondent, unless the respondent states on the last preceding page of this report that such chief officer has no control over the accounting of the respondent. The oath required may be taken before any person authorized to administer an oath by the laws of the State in which the same is taken.

416. REVENUE FREIGHT CARRIED DURING THE YEAR

Include all commodities carried by the respondent during the year, the revenue from which is includible in account No. 107, "Freight Revenue." In stating the number of tons received from connecting carriers, include all connecting carriers, whether rail or water, and whether the freight is received directly or indirectly (as through elevators).

Include forwarder traffic and traffic moved in lots of less than 10,000 pounds.

416C. GRADE CROSSINGS

A—RAILWAY WITH RAILWAY

A crossing with a railway is to be regarded as comprising all the tracks within the right-of-way of the respondent, owned or leased, that are crossed by the track or tracks either of its own lines or of another steam or electric railway at a definite point of intersection. Crossings on jointly operated tracks should be reported only by the companies maintaining them.

The term "protection", as related to the table, should be so applied as: (1) To include automatic and interlocking devices

and derailing appliances at crossings of electric with other railways, hand-operated signals (not interlocking), and gates and/or watchmen; and (2) To exclude stationary signs and other cautionary fixtures that simply signify the proximity of a crossing, without regard to the approach of trains or cars, as crossings having only such safety equipment are includible in returns as "unprotected." In the classification, crossings protected by an interlocking device or by a derailing appliance on an electric line,

with or without additional protection, should be included only with "interlocking devices" or "derailing appliances on electric lines", as the case may be.

A crossing should be assigned to but one of the classes listed for enumeration, although it may have more than one of the kinds of protection defined above. Observe "NOTE" at foot of table.

B—RAILWAY WITH HIGHWAY

A highway crossing is to be regarded as a crossing comprising all the tracks within, or immediately adjacent to, the right-of-way of the respondent, owned or leased, at a definite point of intersection with a highway. The returns pertain to crossings with streets, avenues, and highways and should relate to public crossings only. Private crossings (such as farm lanes, or roads leading to or within industrial plants) are to be excluded. Highway crossings with industrial tracks, not owned or leased by the

respondent, over which it does switching should not be reported.

The general terms for signals on lines 15 to 17 are intended to cover devices that indicate the approach of trains or cars. Special fixed signs or barriers, includible on line 18, are such as "approach" or "distance" signs, special "stop" signs, and "island" or similar fixed barriers. Standard fixed signs, includible on line 19, are the common roadside signs of the simple "railway-crossing" type. On line 20 there should be entered

the number of reportable crossings, if any, without protection (as defined in sec. A), stationary signs, or other cautionary fixtures.

In the classification, a crossing should be assigned to but one of the classes listed for enumeration, although it may have more than one of the classes of protection defined. Observe "NOTE" at foot of table.
