STRASBURG RAIL ROAD COMPANY ANNUAL REPORT to STOCKHOLDERS For the year ended December 31, 1978 Accountants' Statement The accompanying statement of financial condition of the STRASBURG RAIL ROAD COMPANY as of December 31, 1978 and the related statements of operations and retained earnings and changes in financial position for the year then ended were not audited by us and we are not independent with respect to the Company. Accordingly, we do not express an opinion on the enclosed statement. TROUT, EBERSOLE & GROFF Certified Public Accountants February 8, 1979 (Unaudited) NOTES to FINANCIAL STATEMENTS Significant Accounting Policies A) The Company keeps its books and prepares its financial statements, except year end annual statements, on a cash basis. The statement of financial condition, the statement of operations and retained earnings and the statement of changes in financial position for this report, however, have been prepared on an accrual basis of accounting for purpose of clarity. B) Fixed Assets - For financial reporting purposes and for income tax deduction purposes, depreciation is provided on a straight-line basis over the estimated useful life of the buildings and parking lots (principally 10 to 25 years), grading and fill (principally 50 years), crossing signals and guards (principally 20 years), locomotives and cars (principally 5 to 14 years) and a 4 to 10 year life on all other depreciable assets. C) The Company records income and expense on contract work for others on the completed contract method of accounting. No receipts are included in income and no expenditures are charged to expense until the contract is complete. The same method of accounting for contracts was used on these state-D) Tax Credits - Investment tax credits are accounted for on the "flowthrough" method which recognizes the benefit in the year in which the assets which gave rise to the credit are placed in service. The tax liability is net of a \$4,791.37 credit for the current year. During the current year, the Corporation was eligible for a Jobs Tax Credit amounting to \$426.14. In computing taxable income, the credit is subtracted from gross wages. The credit is then used as a dollar for dollar reduction of federal tax liability. E) Earnings per Share - Earnings per share for the year was computed by dividing the net income by the weighted average number of shares outstanding for the year.

705. IMPORTANT CHANGES DURING THE YEAR

Hereunder state the following matters, numbering the statements in accordance with the inquiries, and if no changes of the character below indicated occured during the year, state that fact. Changes in mileage should be stated to the nearest hundredth of a mile. If any changes reportable in this schedule occurred under authority granted by the Commission in certificates of convenience and necessity, issued under paragraphs (18) to (22) of section 1 of the Interstate Commerce Act or otherwise, specific reference to such authority should in each case be made by docket number or otherwise, as may be appropriate.

1. All portions of road put in operation or abandoned, giving (a) termini. (b) length of road, and (c) dates of beginning operations or obtained operations of the state of th

abandonment.*

2. All other important physical changes, including herein all new tracks built

3. All leaseholds acquired or surrendered, giving (a) dates. (b) length of terms, (c) names of parties, (d) rents, and (e) other conditions. NONE 4. All agreements for trackage rights acquired or surrendered, giving (a) dates, (b) length of terms, (c) names of parties, (d) rents, and (e) other conditions. NONE

5. All consolidations, mergers, and reorganizations effected, giving particulars.

- 6. Ali stocks issued, giving (a) purposes for which issued, (b) names of stocks, and (c) amounts issued, and describing (d) the actual consideration realized, giving (e) amounts and (f) values: giv. similar information concerning all stocks retired (if any). NONE
- 7. All funded debt issued, giving (a) purposes for which issued, (b) names of securities and (c) amounts issued, and describing (d) the actual consideration realized, giving (e) amounts and (f) aiues: also give particulars concerning any funded debt paid or otherwise retired, stating (a) date acquired. (b) date retired or canceled. (c) par value of amount retired. NONE

8. All other important financial changes. NONE

9. All changes in and all additions to franchise rights, describing fully (a) the actual consideration given therefor, and stating (b) the parties from whom acquired; if no consideration was given, state that fact. NONE

10. In case the respondent has not yet begun operation, and no construction has been carried on during the year, state fully the reasons therefor. 11. All additional matters of fact (not elsewhere provided for) which the respondent may desire to include in its report.

APPLICABLE

*If returns under items 1 and 2 include any first main track owned by respondent representing new construction or permanent abandonment give the following particulars:

Miles of road constructed

Miles of road abandoned

The item "Miles of road constructed" is intended to show the mileage of first main track laid to extend respondent's road, and should not include tracks relocated and tracks laid to shorten the distance between two points, without serving any new territory

710. INVENTORY OF EQUIPMENT

INSTRUCTIONS

- 1. Give particulars of each of the various classes of equipment which respondent owned or leased during the year.
- 2. In column (c) give the number of units of equipment purchased, built in company shops, or otherwise acquired.
- 3. Units leased to others for a period of one year or more are reportable in column (i), units temporarily out of respondent's service and rented to others for less than one year are to be included in column (c), units rented from others for a period less than one year should not be included in column (f). Units installed during the year and subsequently leased to others for a year or more should be shown as added in column (c), as retired in column (d), and included in column (i).
- 4. For reporting purposes, a "focomotive unit" is a self-propelled vehicle generating or converting energy into motion, and designed solely for moving other equipment. An "A" unit is the least number of wheel bases with superstructure designed for use singly or as a lead locomotive unit in combination with other locomotive units. A "B" unit is similar to an "A" unit, but not equipped for use singly or as a lead locomotive unit. A "B" unit may be equipped with hostler controls for independent operating at terminals.
- 5. A "self-propelled car" is a rail motor car propelled by electric motors receiving power from third rail or overhead, or internal combustion engines located on the car itself. Trailers equipped for use only in trains of cars that are self-propelled are to be included as self-propelled equipment.
- 6. A "Diesel" unit includes all units propelled by diesel internal combustion engines irrespective of final drive, and whether power may at times be supplied from external conductor. Units other than dieser-electric, e.g., diesel-hydraulic, should be identified in a footnote giving the number and a brief description. An "Electric" unit includes all units which receive electric power from an overhead contact wire or third rail, and use the power to drive one or more electric motors that propel the vehicle. An "Other self-powered unit" includes all units other than diesel or electric, e.g., steam, gas turbine. Show the type of unit, service and number, as appropriate, in a brief description sufficient for positive identification. An "Auxiliary unit" includes all units used in conjunction with locomotives but which draw their powr from the "mother" unit, e.g., boosters, slugs, etc.
- 7. Column (h) should show aggregate capacity for all units reported in column (g), as follows. For locomotive units, report the manufacturers rated horsepower (the maximum continuous power output from the diesel engine or engines delivered to the main generator or generators for tractive purposes); or tractive effort of steam locomotive units, for freight-train cars report the nominal capacity (in tons of 2,000 lbs.) as provided for in Rule 86 of the AAR Code of Rules Governing Cars in Interchange. Convert the capacity of tank cars to capacity in tons of the commodity which the car is intended to carry customarily, for passenger-train cars report the number of passenger seals available for revenue service, counting one passenger to each berth in sleeping cars.
