NOTICE

All switching and terminal companies will be designated class III railroads.

Switching and terminals companies are further classified as:

Class 1. Exclusively switching. This class of companies includes all those performing switching service only, whether for joint account or for revenue.

Class S2, Exclusively terminal. This class of companies includes all companies furnishing terminal trackage or terminal facilities only. Such as union passenger or freight stations, stockyards, etc., for which a charge is made, whether operated for joint account or for revenue. In case a bridge or ferry is part of the facilities operated by a terminal company, it should be include under this heading.

Class 53, Both switching and terminal. Companies which perform both a switching and a terminal service. This class of companies includes all companies whose operations cover both switching and terminal service, as defined above.

Class S4. Bridge and ferry. This class of companies is confined to those whose operations are limited to bridges and ferries exclusively. Class S5. Mixed. Companies performing primarily a switching or a terminal service, but which also conduct a regular freight or passenger caffic. The revenues of this class of companies include, in addition to switching or terminal revenues, those derived from local passenger service, local freight service, participation in through movement of freight or passenger traffic, other transportation operations, and operations other than transportation.

Line 12.

The Tacoma Municipal Belt Line Railway originated as a street railway trolley passenger system in 1914 operated under lease by the Tacoma Railway & Power Company to January 1919. In 1919 the operation was taken over by the City of Tacoma and a combined passenger and freight switching service was inaugurated. In 1941 buses replaced trolleys and trackage serving passenger interests only were abandoned. The road was designated as a common carrier in electric Docket 14 dated April 23, 1942. Bus passenger service was leased to the Tacoma Transit Company on January 1, 1947 and since then the Tacoma Municipal Belt Line Railway has been exclusively a railroad switching operation. Financing of a classificationinterchange yard and certain other track extensions to serve additional industries was through loans by the Light Division and the Emergency Fleet Corporation.

705. IMPORTANT CHANGES DURING THE YEAR

Hereunder state the following matters, numbering the statements in accordance with the inquiries, and if no changes of the character below indicated occured during the year, state that fact. Changes in mileage should be stated to the nearest hundredth of a mile. If any changes reportable in this schedule occurred under authority granted by the Commission in certificates of convenience and accessity, issued under paragraphs (18) to (22) of section 1 of the Interstate Commissee Act or otherwise, specific reference to such authority should in each case be made by Access number or otherwise, as may be appropriate.

1 All portions of road put in operation or abandoned, giving (a) termini, (b) length of road, and (c) dates of beginning operations or of

abandonnicar.

2. All other important physical changes, including herein all new tracks huilt

- 1. All leaseholds acquired or surrendered, giving (a) dates, (b) length of terms, (c) names of parties, (d) tents, and (e) other conditions
- 4. All agreements for trackage rights acquired or surrendered, giving (a) dates, (b) length of terms, (e) names of parties, (d) rents, and (e) other conditions.

5. All consolidations, arergers, and reorganizations effected giving particulars

- 6. All stocks issued, giving (a) purposes for which issued, (b) tames of stocks, and (e) amounts issued, and describing (d) the actual consideration realized, giving (e) amounts and (f) values, give similar information concerning all stocks retired (if any).
- 2. All funded debt issued, giving (a) purposes for which issued, (b) names of securities and (c) amounts issued, and describing (d) the actual consideration realized, giving (e) amounts and (f) values, also give particulars concerning any funded debt paid or otherwise retired, stating (a) date required, (b) date retired or canceled, (c) par value of amount retired.

8 All other suportant financial changes

- 9. All changes in and all additions to tranchise rights, describing fully (a) the actual consideration given therefor, and stating (b) the parties from whom acquired. If no consideration was given, state that fact
 - 10. In case the respondent has not yet begun operation, and no construction has been carried in during the year, state fully the reasons therefor
 - If All additional matters of fact that elsewhere provided fort which the respondent may desire to include in its report.

No changes of the character stated above were made in 1979.

If returns under items 1 and 2 include any first main track owned by respondent representing new construction or permanent abandonment give the following particulars:

Miles of road constructed

Miles of road abundaned

The stem. Miles of road constructed is extended to show the include of first main track land to extend respondent's road, and should not include tracks relocated and tracks land to shorten the distance between two points, without see any new termory.

710. INVENTORY OF EQUIPMENT

INSTRUCTIONS

- 1. Give particulars in each of the various classes of equipment which respondent owned or leased during the year
- 2. In column (c) give the number of units of equipment purchased, built in company shops, or otherwise acquired.
- 3. Units leased to others for a period of one year or more are reportable in column (i); units temporarily out of respondent's service and rented to others for less than one year are to be included in column (c), units rented from others for a period less than one year should not be included in column (f). Units installed during the year and subsequently leased to others for a year or more should be shown as added in column (c), as retired in column (d), and included in column (i).
- 4. For reporting purposes, a "locomotive unit" is a self-propelled vehicle generating or converting energy into motion, and designed solely for moving other equipment. An "A" unit is the least number of wheel bases with superstructure designed for use singly or as a lead locomotive unit in combination with other locomotive units. A "B" unit is similar to an "A" unit, but not equipped for use singly or as a lead locomotive unit. A "B" unit may be equipped with hostler controls for independent operating at terminals.
- 5. A "self-propelled car" is a rail motor car propelled by electric motors receiving power from third rail or overhead, or internal combustion engines located on the car itself. Trailers equipped for use only in trains of cars that are self-propelled are to be included as self-propelled equipment.
- b. A Diesel unit includes all units propelled by diesel internal combustion engines irrespective of final drive, and whether power may at times be supplied from external conductor. Units other than diesel-electric, e.g., diesel-hydraulic, should be identified in a footnote giving the number and a brief description. An 'Electric' unit includes all units which receive electric power from an overhead contact wire or third rail, and use the power to drive one or more electric motors that propel the vehicle. An 'Other self-powered unit' includes all units other than diesel or electric, e.g., steam, gas turbine. Show the type of unit, service and number, as appropriate, in a brief description sufficient for positive identification. An 'Auxiliary unit' includes all units used in conjunction with locomotives but which draw their power from the "mother" unit, e.g., boosters, slugs, etc.
- 7 Column (h) should show aggregate capacity for all units reported in column (g), as follows: For locomotive units, report the manufacturers' raied horsepower (the maximum continuous power output from the diesel engine of engines delivered to the main generator or generators for tractive purposes); or tractive effort of steam locomotive units, for freight train cars report the nominal capacity (in tons of 2,000 bis.) as provided for in Rule 86 of the AAR Code of Rules Governing Cars in Interchange. Convert the capacity of tank cars to capacity in tons of the commodity which the car is intended to carry customarily.
