

Brotherhood of Maintenance of Way Employees Division of the International Brotherhood of Teamsters

Tony D. Cardwell
President

Dale E. Bogart, Jr.
Secretary-Treasurer

November 22, 2023

Honorable Chairman Martin Oberman,

On October 27, 2023, the Brotherhood of Maintenance of Way Employees Division of the International Brotherhood of Teamsters (BMWED-IBT), notified the Surface Transportation Board that Union Pacific Railroad was preparing to lay off approximately 1,350 Maintenance of Way employees, escalating the likelihood of deferred maintenance for the sole purpose of appearing profitable to its investors (Attachment No 1). By letter of October 30, 2023, Union Pacific said that “we do not anticipate significant furloughs, if any resulting from this action” (Attachment No. 2). But, in fact, since the BMWED-IBT was notified on October 13, 2023, of Union Pacific’s plan to layoff Maintenance of Way employees there have been approximately 1,189 job abolishments throughout Union Pacific’s system (Attachment No. 3). Unfortunately, as of today’s date, there is no indication that Union Pacific intends to cease or even decrease job abolishments throughout its system. It bears repeating that after the recent furloughs, Union Pacific’s maintenance of way workforce will be less than 60% of what it was in 2016, while Union Pacific has to inspect, maintain, repair, and renew essentially the same track, right of way and structures as it had in 2016. According to Union Pacific’s R-1 reports, it had 51,500 miles of track in 2016 and 51,954 in 2022; Union Pacific had 7,980 maintenance of way workers in 2016 resulting in a ratio of 6.45 miles of track per employee; by 2022 Union Pacific had 6,034 maintenance of way employees resulting in a ratio of 8.61 miles of track per employee; furloughing 1,350 employees will take that ratio to 11 miles of track per employee.

Multiple media sources have brought it to our attention that you addressed Union Pacific’s conduct to various industry leaders at the RailTrends conference on Thursday, November 16, 2023. We appreciate you taking our concerns seriously and addressing this issue head on with the public, industry leaders, and investors. Unfortunately, Union Pacific’s leadership failed to acknowledge your concerns and instead took the position that it is running its business operations as normal. That is not so. As was explained in our October 27, 2023 letter, Union Pacific has not implemented large furloughs since 2015. While some have said that winter furloughs are a fact of life for Maintenance of Way employees who perform capital work, that was so to a degree prior to Presidential Emergency Board 219 (1991) which allowed for the creation of large regional and system production gangs, and prior to the mega mergers of the 1990s that allowed deployment of such gangs across whole quadrants or even halves of the country, along with the consequent reductions in the overall maintenance of way workforces - so a gang could work in the north in the summer and the south in the winter.

www.bmwe.org

After your comments at the RailTrends conference, Union Pacific President Beth Whited defended Union Pacific's layoffs as nothing more than a necessary measure to maintain the company's profitability and competitiveness. The reporting on this issue makes it clear that she dismissed your concerns as irrelevant, unreasonable, and misguided. Furthermore, Ms. Whited's suggestion that these furloughs are necessary to maintain profitability are disingenuous at best. Union Pacific remains highly profitable; it is just not reaping record profits as it has in recent years. While the Carrier notes that current profits are below those of 2022, 2022 was a record year for Union Pacific, after 2021 was reported as the best year for profits in the history of the 150+ year old railroad.¹ Union Pacific is attempting to justify furloughing 1,350 employees leaving them without income for two (2) months because 2023 fell below a record year following a record year.² It must also be noted that while Union Pacific has complained of reduction in volumes, its carloads are off only 3% since 2016 and 1% since 2019. See Union Pacific R-1 reports. Indeed, Union Pacific had the smallest reduction in carloads of any of the largest Class I carriers, but it has made the second largest reduction in headcounts. See Union Pacific employment data filed with the STB in categories L300, 1400 and 600. Finally, in this regard, Union Pacific has failed to acknowledge that its own management's failures have contributed to lower volumes. Poor service resulting substantially from reduced employment was a problem for all the Class I's in 2022 and into 2023. See Ex Parte 770 and Ex Parte 770 Sub-No. 1. But poor service has been a particular problem for Union Pacific. As this Board documented in the Union Pacific Embargoes proceeding (Ex Parte 772), Union Pacific imposed over 1000 embargoes on shippers due to congestion in 2022 compared to 19 such embargoes in 2017—it is not surprising that the Carrier suffered a loss of volume in 2023 following its service meltdown of 2022 (when it still made record profits). Confidence in Union Pacific's reliability was surely also affected by the two remarkable emergency service orders issued on behalf of Foster Poultry Farms. BMWED members are being punished for the incompetence, poor planning, and pennywise-pound foolish short-termism of Union Pacific's management. Rather than acknowledging the mistakes of the company, Union Pacific is cutting off its workers in order to make end of year numbers look good. Ms. Whited's attempt to justify sending workers home without income in an effort to maintain profitability is a cynical public relations ploy built on falsehoods and half-truths.

In attempt to justify the furloughs as somehow benign, Ms. Whited was quoted at the RailTrends conference saying:

"We allow these workers to take the rest of the year off and then come back to work in January."

This comment echoes the assertion in Union Pacific's letter of October 30, 2023 that the Carrier's action "coincides with the heavy vacations that many of our employees working on capital projects choose to observe towards the end of the year" (Attachment No. 2). But as BMWED-IBT noted in its letter of

¹ See <https://www.trains.com/trn/news-reviews/news-wire/union-pacific-reports-record-revenue-and-profits-for-2022/>; <https://www.trains.com/trn/news-reviews/news-wire/union-pacific-reports-record-profits-for-2021-has-bright-outlook-for-this-yea/>; <https://www.railwayage.com/news/up-fritz-2021-most-profitable-year-ever/>

² Union Pacific's Third Quarter report laid partial blame for the reduction in net revenues on having to pay its employees for three years of pay increases in a single year. So, rather recognizing that expense as on-off (as a result of its own intransigence at the bargaining table, Union Pacific is relying in part on that payment as justification for furloughing 1300 employees. s

November 2, 2023, (Attachment No. 4), BMWED-IBT members were told throughout the year that vacation could not be scheduled during the holidays. Purportedly, this was so that the gangs would not be disabled by lack of manpower. Vacations were denied; therefore, numerous members had already scheduled their vacations earlier in the year. Furthermore, while an employee might want to take vacation for the holidays for the last two weeks of December through New Year's, no one wants to involuntarily lose two months of pay, and few if any employees have enough accrued vacation to cover two months of lost work (especially if they have used vacation early in the year per the Carriers' directives). Additionally, we are compelled to point out that for the past eight (8) years, Union Pacific has maintained the observance of the holidays during the months of November and December without job abolishments causing massive disruption throughout its system. This is because, during the months of November and December, Union Pacific and the Organization have ***agreed*** to a compressed work month for all members to accommodate the observed holidays and at the same time, maintain the forty (40) hour work week. Attached to this letter is an example of Union Pacific's compressed work schedule for System Track Maintenance groups (Attachment No. 5). The attachment references two (2) codes, "Z5 & Z6", working a Tuesday-to-Tuesday schedule (eight days) where the groups work opposite weeks of the Tuesday schedule. *This schedule guarantees track maintenance each day of the month!* It is important to note that this schedule is an agreement between Union Pacific and the Organization and represents a mutual understanding of conducting business, minimizing disruption, and ensuring the proper inspection and maintenance of Union Pacific's right of way, tracks, bridges, and structures. So, Ms. Whited's comment is distorted and a mischaracterization of the realities of what Maintenance of Way employees are *forced* to endure when massive layoffs are executed. Ms. Whited's comment clearly comes from an executive that is out of touch with their employees. This comment is nothing more than an executive desperately trying to save face and keep up with Union Pacific's Wallstreet appearance. It is a shame that Ms. Whited expects Maintenance of Way employees to view layoffs as a gift, instead of what they are- disruption. When Union Pacific imposes layoffs, it is not "allowing" employees to take time off work.

The BMWED-IBT is extremely concerned about the reports we are receiving regarding the disruption caused by Union Pacific's hasty decision to impose massive layoffs from our members and even from some of Union Pacific's front-line managers. Attached to this letter is a copy of a November 16, 2023, e-mail we received from a manager outlining the disruption that they have already experienced and are expecting in the future (Attachment No. 6). Therein, it was reported that all of Union Pacific's system tie and rail gangs are getting cut with very few exceptions. As an example, one of the tie gangs had a seventy (70) person roster. Moreover, this e-mail highlights how chaotic Union Pacific's business strategy is. Chaos and disruption with Union Pacific's Maintenance of Way forces can only lead to one outcome- deferred maintenance and catastrophic outcomes. These furloughs will affect the safety of Union Pacific Operations and pose serious safety risks for the general public and the communities surrounding Union Pacific's infrastructure. In its October 30 letter, Union Pacific asserted that the furloughs only affect capital work, not "ongoing maintenance work" -- as if capital work does not affect the ability of the railroad to operate safely and efficiently. That is false. Capital work is planned work typically for major track, right of way, and structure repairs and renewals. While ongoing maintenance may involve replacing random ties that have deteriorated or replacing/fixing broken rails or ties, capital projects involved replacement of whole sections of track, major repairs of structures that have been scheduled because of predictable wear and tear on the infrastructure, or the need to augment the infrastructure because of service needs (such as adding sidings or

double tracking to handle congestion- such as that experienced by Union Pacific in 2022); this work is not scheduled on a whim or because someone thinks it might be nice; it is scheduled because it is necessary, and deferring such work is deferring such work (and delaying work that would have been done in 2024). It is significant that Union Pacific did not assert that the work that had been planned was no longer necessary; rather it said that the work was being deferred because of “budget overruns” due in part to “catastrophic weather events”. See October 13, 2023 email from Terril Maxwell (Attached to the Organization’s October 27, 2023 letter). The railroads are fond of saying that railroading is an outdoor sport, but Union Pacific seems to have assumed that it was playing indoors and was unprepared for outdoors events, and while some weather events have become more severe in recent years, that is no longer news, and a corporation like Union Pacific should be anticipating more severe weather, not deferring necessary work when the weather is less predictable than it has been in the past.

Service will also be impacted by the furloughs. It is regional and system production gangs who do the work of double-tracking and construction and extension of sidings necessary to alleviate the sort of congestion that resulted in the unprecedented embargoes of 2022. And such gangs do the major renewal work like the work that should have been done on Union Pacific’s Winnemucca line that was used to serve Foster Poultry Farms but was subject to slow orders and operated as “dark territory” due to failures of the signal system as a result of years of deferral of undercutting and track renewal work. By laying off Maintenance of Way employees, Union Pacific is neglecting important aspects of risk management and exposing itself to potential lawsuits, fines, and public outrage. Instead of focusing on transporting America’s commerce, Union Pacific will find itself in the middle of managing a crisis.

It must also be noted that while Union Pacific has assured the Board that it is attempting to increase its workforce to improve resiliency (and foreswore future reliance on furloughs at the embargoes hearing), at the first whiff of a decline in profits (from record levels), Union Pacific resorted to furloughs that are unprecedented in recent memory. Union Pacific’s ability to recruit and retain skilled and highly qualified workers will be hindered by its cavalier treatment of its current workforce. The furloughs will agitate and destabilize the workforce, delay planned maintenance, impose unrealistic work expectations on Maintenance of Way employees, and undo the recruitment efforts of 2023.

As of today’s date, Union Pacific has not guaranteed that its Maintenance of Way force will return in full in January 2024. Moreover, Union Pacific has yet to confirm a work program for 2024, despite the fact that BMWED-IBT representatives have made multiple attempts to clarify when Union Pacific plans to announce a 2024 “start date” for system gangs. On November 16, 2023, Union Pacific’s Vice President of Engineering, Russel Rohlf, informed the BMWED-IBT that Union Pacific was still evaluating their 2024 capital program and that teams would be notified when the schedule was finalized (Attachment No. 7). However, based on the history we presented to you on October 27, 2023, we expect that staffing and track programs will remain insufficient and inadequate. Considering all of the above information, the BMWED-IBT agrees with your assessment of Union Pacific’s new CEO, Jim Vena. His decisions at Union Pacific make us “concerned and bewildered.”

We strongly urge the STB to use its authority to continue challenging Union Pacific on this matter. We also encourage you to use your influence as the Chairman of the STB to emphasize that Union Pacific Railroad has a responsibility to maintain a safe and reliable railroad network.

Sincerely,

Tony Cardwell

Brotherhood of Maintenance of Way Employees Division of the International Brotherhood of Teamsters

Tony D. Cardwell
President

Dale E. Bogart, Jr.
Secretary-Treasurer

October 27, 2023

Dear members of the Surface Transportation Board,

I am writing on behalf of the Brotherhood of Maintenance of Way Employees Division of the International Brotherhood of Teamsters (BMWED-IBT), which represents the dedicated individuals who are responsible for maintaining the nation's railroad right of way, tracks, buildings, and bridges. We are bringing your attention to an urgent matter that will seriously put the safety and reliability of our nation's railroad network at risk. Union Pacific Railroad, one of the largest railroad networks in the United States, is preparing to lay off approximately 1,350 Maintenance of Way employees.

Union Pacific is laying off these workers without a guarantee of when these workers will be brought back. This drastic reduction in Maintenance of Way employees will only compromise the quality and frequency of inspections and necessary maintenance, thereby endangering the safety and reliability of our nation's railroad infrastructure. The last time Union Pacific furloughed such a large number of Maintenance of Way employees was in 2015. Importantly, the staffing levels of Maintenance of Way in 2015 were dramatically above where they are currently. In fact, on July 1, 2015, the BMWED had **8,791** members employed on Union Pacific Railroad. By January 1, 2016, after Union Pacific announced their 2015 furloughs, BMWED membership was reduced to 7,886 on Union Pacific. After 2016 the steady decline in Union Pacific BMWED membership continued and by September 1, 2023, BMWED membership on Union Pacific was at **6,087**. Furloughing an additional 1,350 Maintenance of Way employees will shrink Union Pacific BMWED employment numbers down to approximately **4,737**.

Over the past several years Union Pacific management has recklessly reduced the number of its Maintenance of Way workers far below the minimum needed to operate a safe and reliable railroad. It has done this with little regard for reliability, safety, or longevity. Now, Union Pacific is showing more disregard for reliability, safety, and longevity by flying in the face of the STB's emphasis on the importance of hiring and retaining enough personnel to properly maintain the nation's railroad right of way, tracks, buildings, and bridges. Indeed, the proposed layoffs by Union Pacific Railroad are in direct contradiction to this stance. According to an e-mail sent to the BMWED from a Union Pacific Official (Attached), its upcoming layoff will not be because a reduction of maintenance work is required. Instead, Union Pacific outright acknowledges that it is

41475 Gardenbrook Road
Novi, MI 48375-1328
Telephone 248.662.2660 Facsimile 248.662.2659
www.bmwe.org

pushing projects into next year for fourth quarter financial gain. In other words, Union Pacific intends to defer much-needed maintenance on its right of ways, tracks, buildings, and bridges for the sole purpose of showing a larger profit to its shareholders in the fourth quarter. As you are well aware, deferred maintenance will only lead to catastrophic outcomes.

This recent and unnecessary decision to furlough over 1,300 Maintenance of Way employees is yet another drastic step further into the world of Precision Scheduled Railroading (PSR) under the new CEO's drive for a lower operating ratio. Reducing the operating ratio should never come at the cost of safety. Maintenance of our nation's railroads should never fall victim to an investor model that admires profits more than it cares about the safety and integrity of the United States of America's railroad network.

In summary, if Union Pacific's furloughs are permitted it would result in Union Pacific Railroad diminishing its workforce by nearly 50% in less than 10 years- from **8,791** BMWED represented employees in 2015 to a projected **4,737** BMWED represented employees in 2023. Union Pacific Railroad may assert that this workforce reduction is temporary, however, such a claim contradicts empirical evidence. Historical patterns clearly demonstrate that significant workforce reductions through systematic furloughs tend to have enduring consequences.

We strongly urge the STB to challenge Union Pacific on this matter and emphasize to the management at Union Pacific Railroad that it has a responsibility to maintain a safe and reliable railroad network.

We look forward to your prompt attention and action on this matter.

Sincerely,

Subject: FW: 4Q Engineering Abolishments -- Information and Timing

Gentlemen –

I wanted to pass along the below information issued today by Engineering concerning a business decision that will affect your members soon. Managers will be communicating this information to help employees understand the ‘why’ and felt it was equally important that Labor provide you with a heads up in the event members reach out to you with questions. After review, please let me or Chris know if you have questions.

Thanks.

-Terrill

Managers: As you’re aware, updated 2023 schedules were published today displaying revised gang cut-off dates prompted by budget overruns. Simply put, unforeseen, large-scale service interruptions greatly accelerated our spend through the first three quarters of the year. The need to balance the workforce was not readily apparent until very recently, thus leadership made the difficult decision to push a number of projects into 2024. It’s been about five years since we’ve had to cut gangs due to budget, so although many of our veteran employees have experienced this reality, it will be new to others. Although we have several open maintenance jobs on both the North and South, it’s conceivable we will have folks furloughed in December.

INTERNAL Northern Region Summary:

- The Northern Region Engineering Department is forecasting to be ~\$50M over its 2023 capital budget. The overage is due to a number of factors, including catastrophic weather events (i.e.,

washouts and slides), extreme heat (2023 was the hottest summer ever recorded) and record inflation impacting tools and material. These abolishments are in no way tied to performance. They are strictly the result of necessary budget controls in today's business environment.

- As a result, the team is pushing out planned capital work and will abolish related gangs, effecting about 650 employees, primarily on the track and rail side. Most distribution teams will continue working, delivering material required for 2024 projects.
- A majority of the abolishments will be effective Sunday, Nov. 19. The 2024 schedule will be made available soon after to help employees understand their likely 2024 schedule.
- We expect to re-post most all jobs in mid-December with an early January start under the same assigned manager. This means that furloughed employees will potentially miss two work halves.
- The following are some common questions that may be asked by your members:
 - **How many hours of vacation would I need to bridge the gap if I'm abolished on 11/19/23?**
An Z6 schedule would need 136 hours and an Z5 schedule would need 196 hours.
 - **How do I get paid for my remaining vacation?**
Employees can ask for vacation when abolished per Rule 21j on the UP Collective Bargaining Agreement. They will need to enter a TRM ticket asking for the Rule 21j.
 - **When will jobs go back up for bid and when will they be effective?**
We will open bulletins up on December 14, close on December 18, assign on December 21.

INTERNAL Southern Region Summary:

- The Southern Region Engineering Department is forecasting to be ~\$30M over its 2023 capital budget. The overage is due to a number of factors, including catastrophic weather events (i.e., washouts and slides), extreme heat (2023 was the hottest summer ever recorded) and record inflation impacting tools and material. These abolishments are in no way tied to performance. They are strictly the result of necessary budget controls in today's business environment.
- As a result, the team is pushing out planned capital work and will abolish related gangs, affecting about 700 employees, primarily on the track and rail side. Most distribution teams will continue working, delivering material required for 2024 projects.
- Abolishments will take place over the coming weeks, each effective date being work-group specific. The 2024 schedule will be made available in November to help employees understand their likely 2024 schedule.
- We expect to post most all jobs in mid-December with an early January start under the same assigned manager. This means that furloughed employees will potentially miss two work halves.
- The following are some common questions that may be asked by your members:
 - **How do I get paid for my remaining vacation?**
All employees furloughed in December will receive an automatic vacation payout before year end.
 - **When will jobs go back up for bid and when will they be effective?**
We will open bulletins up on December 8, close on December 18, assign on December 22.

October 30, 2023

Tony D. Cardwell

President, Brotherhood of Maintenance of Way Employees Division

Dear Tony,

This letter responds to your letter to the members of the Surface Transportation Board dated October 27, 2023. I am writing to correct your inaccurate assertions that Union Pacific's current headcount levels are affecting safety on our railroad.

Most importantly, Union Pacific is committed to the safety of our operations. Our day-to-day work to maintain and inspect our railroad remains in place and will not be interrupted.

- The changes you discussed in your letter involved changes to our capital program, not our ongoing maintenance work.
- Also, as you know from your time at Union Pacific, we historically have adjusted our capital program around the fourth quarter and this year is no exception.
- You are also aware that the timing of this action coincides with the heavy vacations that many of our employees working on capital projects choose to observe towards the end of the year.

As we have done every year, we will be advertising positions for next year's program work in mid-December to begin our 2024 capital work in early January. Given the four weeks between our actions and the posting of jobs for our 2024 capital program and the seniority bidding that will occur, we do not anticipate significant furloughs, if any, resulting from this action.

As part of our efforts to explain the upcoming plan changes, we communicated transparently with BMWED so that we can work together to address employee concerns. We are disappointed that you did not extend the same courtesy to us. Going forward, I would encourage you to reach out to us first so that we can discuss your concerns before mischaracterizing our actions based on your own perceptions.

Respectfully,

A handwritten signature in black ink, appearing to read "Maqui Parkerson".

Via email (mbparker@up.com)
Maqui Parkerson
Vice President, Labor Relations Union Pacific Railroad

Dear Ms. Parkerson

This letter responds to your October 30, 2023, letter you sent me in response to BMWED's letter to the Surface Transportation Board dated October 27, 2023.

Initially, I would note that you failed to directly address the fact Union Pacific Railroad's announcement of the 2023 layoffs will effectively reduce the BMWED force by nearly fifty percent in a period of eight years. Clearly, this drastic reduction in workforce places the maintenance and repair of UPRR's right of way, tracks, buildings, and bridges in a compromised state. UPRR's position on furloughing BMWED members will make the stability of UPRR's operations unreliable and dangerous.

Additionally, I would be remiss if I did not address your assertion that the relevant layoffs only impact the ability to perform capital projects and not ongoing maintenance. That is not so. It cannot be stressed enough that UPRR is fully aware that capital projects include tie and rail renewal work. Tie and rail renewal work is vital to the safe operation of UPRR. Tie and rail renewal work should not be entirely amalgamated into UPRR's capital projects. This is work that should be done year-round on a continuous basis, throughout the Carrier's system to maintain the safe and efficient operations of the railroad. Nevertheless, UPRR has assigned this work to system gangs that perform capital work, so UPRR's deferral of what classifies as capital work will cause the Carrier to fall further behind on its scheduled maintenance. UPRR's shift of work that has been historically performed by section gangs to production gangs has blurred the line between capital work and routine maintenance and repair work. As a consequence, the Carrier's superficial assertion that cutting off production gangs does not affect maintenance is obviously absurd. This is the quintessential definition of "deferred maintenance," the BMWED strongly urges the Carrier to avoid placing itself in a potentially catastrophic situation by insisting on reducing its BMWED forces.

This issue is extremely concerning to the BMWED. In fact, it was reported this morning that the Director of Tie Gangs, Mr. R. Case, announced that Tie Gangs will not return until January 23, 2024. This alone will put UPRR's right of way, tracks, buildings, and bridges at risk. Moreover, I must also point out that I have received phone calls from localized regional forces explaining that

41475 Gardenbrook Road
Novi, MI 48375-1328
Telephone 248.662.2660 Facsimile 248.662.2659
www.bmwe.org

their directors notified them that some regional gangs were going to be cut as well. This is the workforce assisting depleted section gangs to keep up with FRA defects. When all of this information is considered, it is clear that UPRR is deferring routine maintenance and repair work. It must be emphasized that UPRR has not declared that the work the employees to be furloughed were going to do was unnecessary, only that it is being pushed back into next year. Which also means that work planned for next year will be pushed back.

Your assertion that there are heavy vacations during the intended layoffs is a ridiculous talking point. BMWED members were told throughout the year that vacation could not be scheduled during the holidays. Purportedly, this was so that the gangs would not be disabled by lack of manpower. Vacations were denied; therefore, numerous members had already scheduled their vacations earlier in the year. I can assume that the only goal of these layoffs is to avoid the holiday payments that members earn if they are in service. This equates to the Carrier acting as this year's Ebenezer Scrooge.

Carrier cuts always result in a permanent reduction in forces. The numbers outlined in our initial letter to the STB have shown that the workforce never returned in full when there were year-end cuts. UPRR is aware that it will take months for the lower seniority members to return- if they return at all because of the cumbersome processes that are a result of layoffs (i.e., exercising seniority to obtain positions, being displaced, and having to place bids, etc.). Your employees will become disenchanted, and they will leave the industry permanently. This flies in the face of the recent efforts of the STB, FRA, and other agencies efforts to ensure that the railroads maintain appropriate manpower to keep the railroads and the general public safe. These agencies' efforts are being undermined by these actions.

Sincerely,

A handwritten signature in cursive script, appearing to read "Tony Cardwell".

Tony Cardwell
BMWED President

Subject: Info

ATTACHMENT 6

Good morning. Here is some of the requested info.

All system tie and rail gangs are getting cut with very few exceptions.

One tie gang that was already cut had a 70 person roster.

6 other known tie gangs that will be cut the 19th have a 45 person roster.

There are multiple smaller gangs and support gangs of various sizes that will be cut.

I'm unaware of the steel gang roster sizes. Curve gangs look to be a 30 person roster.

Here are the gangs I'm currently seeing that are posted on ITRACKFORCE. I'm sure there are many more.

9910, 9001, 8560, 8515, 8140, 4643, 0068, 8568, 9012, 9027, 8567, 0087, 8587, 8512, 9012, 8501, 9073, 8527, 8531, 8562, 0082, 0062, 9062, 9075, 0075, 0707

I'm unaware of the Tie South....MoPac seniority gang sizes. We can't even see the rosters on our end.

Drew Bokenkamp met with us in Montpelier Idaho a couple months ago and assured us that all gangs would be working all year.

Once cuts were announced, Russel Rholf's sent an email stating that the restart date would be Jan 9th. I will see what I can do to obtain a copy of the email.

Cuts are being blamed on Internal mistakes. "Supply paid \$7 more per tie since May and nobody caught it until October." "Finance didn't plan for the extra mileage and members are taking advantage of the extra mileage and traveling further to make more money". These were

the words of Ryan Case on 11/14 and 11/15 to the 8562 and 8567 gangs.

Ryan Case stated that around 1600 members will be laid off to us on 11/14 and 11/15 in Reno Nevada.

There has been zero transparency on the equipment side. Everything seems to be a secret. I will let you know the information as I get it.

Jason
