Class I Railroad Annual Report

To The Surface Transportation Board For the Year Ending December 31, 2005

NOTICE

- 1. This report is required for every class I railroad operating within the United States. Three copies of this Annual Report should be completed. Two of the copies must be filed with the Surface Transportation Board, Office of Economics, Environmental Analysis, and Administration, The Mercury Building, 1925 K St. N.W., Suite 500, Washington, DC 20423, by March 31 of the year following that for which the report is made. One copy should be retained by the carrier.
- 2. Every inquiry must be definitely answered. Where the word "none" truly and completely states the fact, it should be given as the answer. If any inquiry is inapplicable, the words "not applicable" should be used.
- 3. Wherever the space provided in the schedules in insufficient to permit a full and complete statement of the requested information, inserts should be prepared and appropriately identified by the number of the schedule.
- 4. All entries should be made in a permanent black ink or typed. Those of a contrary character must be indicated in parenthesis. Items of an unusual character must be indicated by appropriate symbols and explained in footnotes.
- 5. Money items, except averages, throughout the annual report form should be shown in thousands of dollars adjusted to accord with footings. Totals for amounts reported in subsidiary accounts included in supporting schedules must be in agreement with related primary accounts. For purposes of rounding, amounts of \$500 but less than \$1,000 should be raised to the nearest thousand dollars, and amounts of less than \$500 should be lowered.
- 6. Except where the context clearly indicates some other meaning, the following terms when used in this Form have the following meanings:
 - (a) Board means Surface Transportation Board.
 - (b) Respondent means the person or corporation in whose behalf the report is made.
 - (c) Year means the year ended December 31 for which the report is being made.
- (d) Close of the Year means the close of business on December 31 for the year in which the report is being made. If the report is made for a shorter period than one year, it means the close of the period covered by the report.
- (e) Beginning of the Year means the beginning of business on January 1 of the year for which the report is being made. If the report is made for a shorter period than one year, it means the beginning of that period.
- (1) Preceding Year means the year ended December 31 of the year preceding the year for which the report is made.
- (g) The Uniform System of Accounts for Railroad Companies means the system of accounts in Part 1201 of Title 49, Code of Federal Regulations. as amended.
- 7. The ICC Termination Act of 1995 abolished the Interstate Commerce Commission and replaced it with the Surface Transportation Board. Any references to the Interstate Commerce Commission or Commission contained in this report refer to the Surface Transportation Board.
- 8. Any references to the Bureau of Accounts or the Office of Economics contained in this report refer to the Office of Economics, Environmental Analysis, and Administration of the Surface Transportation Board.
- 9. NOTE An additional line has been added to Schedule 755 (Line 134) effective with the 2004 R-I. Also note that the instructions for completion of Schedule 755 now have two additional items (Instructions U and V).
- 10. NOTE The columns in Schedule 710-Distribution of Locomotive Units In Service of Respondent At Close Of Year, Disregarding Year Of Rebuilding have been revised to reflect new five year periods.
- 11. NOTE The following supplemental information about STB information collections is provided in compliance with OMB requirements and pursuant to the Paperwork Reduction Act of 1995, 44 U.S.C. 3501et seq.:

Supplemental Information about the Annual Report (R-l)

This information collection is mandatory pursuant to 49 U.S.C. 11145.

The estimated hour burden for filing this report is less than 800 hours.

Information in the Annual Reports is used to monitor and assess railroad industry growth, financial stability, traffic, and operations and to identify industry changes that may affect national transportation policy. In addition, the Board uses data from these reports to more effectively carry out regulatory responsibilities, such as acting on railroad requests for authority to engage in Board regulated financial transactions (for example, mergers, acquisitions of control, consolidations, and abandonments); conducting investigations and rulemakings; conducting rail revenue adequacy proceedings; developing rail cost adjustment factors; and developing the URCS, which is a cost measurement methodology. URCS was developed by the Board pursuant to 49 U.S.C. 11161 and is used as a tool in rail rate proceedings to calculate the variable costs associated with providing a particular service in accordance with 49 U.S.C. 10707(d). The Board also uses URCS to analyze the information that it obtains through the annual railroad industry waybill sample, see 49 CFR 1244, and in railroad abandonment proceedings to measure off-branch costs, pursuant to 49 U.S.C. 10904(a) and in accordance with 49 CFR 1152.32(n).

The information in this report is ordinarily maintained by the agency in hard copy for 10 years, after which it is transferred to the National Archives, where it is maintained as a permanent record. These reports are also maintained by the agency indefinitely on microfiche. In addition, some of this information is posted on the Board's website, www.stb.dot.gov, where it may remain indefinitely. All information collected through this report is available to the public.

The OMB control number for this collection is 2140-0009. The display of a currently valid OMB control number is required by law.

Supplemental Information about the Quarterly Condensed Balance Sheet (CBS)

This information collection is mandatory under 49 CFR 1243.2.

The estimated hour burden for filing this report is six hours per report.

The Board uses the information in this report to ensure competitive, efficient, and safe transportation through general oversight programs that monitor and forecast the financial and operating condition of railroads, and through specific regulation of railroad-rate and service issues and rail-restructuring proposals, including railroad mergers, consolidations, acquisitions of control, and abandonments. Information from the reports is used by the Board, other Federal agencies, and industry groups, including the Association of American Railroads, to assess industry growth and operations, detect changes in carrier financial stability, and identify trends that may affect the national transportation system.

Information from these reports is compiled by the Board and published on its website, www.stb.dot.gov, where it may be maintained indefinitely. The compilation report is entitled Class I Railroads. Selected Earning Data. In addition, paper copies of individual reports are maintained by the Board for ten years, after which they are destroyed. All information collected through this report is available to the public.

The display of a currently valid OMB control number for this collection is required by law.

Supplemental Information about the Quarterly Report of Revenues, Expenses, and Income (Form RE&I)

This information collection is mandatory pursuant to 49 U.S.C. 11164 and 49 CFR 1243.1.

The estimated hour burden for filling this report is six hours per report.

The Board uses the information in this report to ensure competitive, efficient, and safe transportation through general oversight programs that monitor and forecast the financial and operating condition of railroads, and through regulation of railroad rate and service issues and rail restructuring proposals, including railroad mergers, consolidations, acquisitions of control and abandonments. Information from the reports is used by the Board, other Federal agencies and industry groups to monitor and assess industry growth and operations, detect changes in carrier financial stability, and identify trends that may affect the national transportation system. Individual and aggregate carrier information is needed in our decision making process.

Information from these reports is compiled by the Board and published on its <u>website.www.stb.dot.gov.</u> where it may be maintained indefinitely. The compilation report is entitled <u>Class I Railroads. Selected Earnings Data</u>. In addition, paper copies of individual reports are maintained by the Board for ten years, after which they are destroyed. All information collected through this report is available to the public.

The display of a currently valid OMB control number for this collection is required by law.

Supplemental Information about the Report of Railroad Employees, Service, and Compensation (Wage Forms A & B)

This information collection is mandatory pursuant to 49 D.S.C. 11145 and 49 CFR 1245.2.

The estimated hour burden for filing this report is 30 hours per quarterly report and 40 hours per annual report.

The Board uses information in this report to forecast labor costs and measure the efficiency of the reporting railroads. The information is also used by the Board to evaluate proposed regulated transactions that may impact rail employees. These transactions include mergers and consolidations, acquisitions of control, purchases, and abandonments. Other Federal agencies and industry groups, including the Railroad Retirement Board, the Bureau of Labor Statistics, and the Association of American Railroads, depend on the information contained in the reports to monitor railroad operations.

Certain information from the reports is compiled and published on the Board's website, www.stb.dot.gov. where it may be maintained indefinitely. In addition, paper copies of individual reports are maintained by the Board for ten years, after which they are destroyed. All information collected through this report is available to the public.

The OMB control number for this collection is 2140-0004. The display of a currently valid OMB control number is required by law.

Supplemental Information about the Monthly Report of Number of Employees of Class I Railroads (Wage Form C)

This information collection is mandatory pursuant to 49 D.S.C. 11145 and 49 CFR 1246.1.

The estimated hour burden for filing this report is 1.25 hours per monthly report.

The Board uses information in this report to forecast labor costs and measure the efficiency of the reporting railroads. The information is also used by the Board to evaluate proposed regulated transactions that may impact rail employees, including mergers and consolidations, acquisitions of control, purchases, and abandonments. Other Federal agencies and industry groups, including the Railroad Retirement Board, the Bureau of Labor Statistics, and the Association of American Railroads, depend on the information contained in the reports to monitor railroad operations.

The information in this report is compiled and published on the Board's website, <u>www.stb.dot.gov</u>, where it may be maintained indefinitely. In addition, paper copies of individual reports are maintained by the Board for ten years, after which they are destroyed. All information collected through this report is available to the public.

The OMB control number for this collection is 2140-0007. The display of a currently valid OMB 'Control number is required by law.

Supplemental Information about the Annual Report of Cars Loaded and Cars Terminated (Form STB-54)

This information collection is mandatory pursuant to 49 U.S.C. 11162 and 49 CFR 1247.

The estimated hour burden for filing this report is four hours per report.

The Board uses information in this report to forecast labor costs and measure the efficiency of the reporting railroads. Information in this report is entered into the Board's URCS. In addition, many other Federal agencies and industry groups, including the Department of Transportation and the Association of American Railroads (AAR), depend on Form STB-54 for information regarding the number of cars loaded and terminated on the reporting carrier's line.

All information collected through this report is available to the public. Paper copies of individual reports are maintained by the Board for ten years, after which they are destroyed.

The OMB control number for this collection is 2140-0011. The display of a currently valid OMB control number is required by law.

Supplemental Information about the Quarterly Report of Freight Commodity Statistics (Form QCS)

This information collection is mandatory pursuant to 49 U.S.C. 11145 and 49 CFR 1248.

The estimated hour burden for filing this report is 217 hours per report.

Information in this report is entered into the Board's URCS.

All information collected through this report is available to the public. Paper copies of individual reports are maintained by the Board for ten years, after which they are destroyed.

The OMB control number for this collection is 2140-0001. The display of a currently valid OMB control number is required by law.

Year 2005

SPECIAL NOTICE

Docket No. 38559 Railroad Classification Index, (ICC served January 20, 1983), modified the reporting requirements for Class II, Class III and Switching and Terminal Companies. These carriers will notify the Board only if the calculation results in a different revenue level than its current classification.

The dark borders on the schedules represents data that are captured by the Board.

It is estimated that an average of 800 burden hours per response are required to complete this collection of information. This estimate includes time for reviewing instructions, searching existing data sources, gathering and maintaining the data needed, and completing and reviewing the collection of information. Comments concerning the accuracy of this burden estimate or suggestions for reducing this burden should be directed to the Office of the Secretary, Surface Transportation Board.

A. SCHEDULES OMITTED BY RESPONDENT

- The respondent, at its option, may omit pages from this report provided there is nothing to report or the schedules are not
 applicable.
- 2. Show below the pages excluded, as well as the schedule number and title, in the space provided below.
- 3. If no schedules were omitted indicate "NONE."

Page	Schedule No.	Title
		NONE
ĺ		
	l	
ĺ		
}		

B. IDENTITY OF RESPONDENT

Answers to the questions asked should be made in full, without reference to data returned on the corresponding page of previous reports. In case any changes of the nature referred to under Inquiry 4 on this page have taken place during the year covered by this report, they should be explained in full detail.

- 1. Give the exact name of the respondent in full. Use the words, "The" and "Company" only when they are parts of the corporate name. Be careful to distinguish between railroad and railway. The corporate name should be given uniformly throughout the report, notably on the cover, on the title page, and in the "Verification." If the report is made by receivers, trustees, a committee of bondholders, or individuals otherwise in possession of the property, state names and facts with precision. If the report is for a consolidated group, pursuant to Special Permission from the Board, indicate such fact on line 1 below and list the consolidated group on page 4.
- 2. If incorporated under a special charter, give date of passage of the act; if under a general law, give date of filing certificate of organization; if a reorganization has been effected, give date of reorganization. If a receivership or other trust, also give date when such receivership or other possession began. If a partnership, give date of formation and also names in full of present partners.
- State the occasion for the reorganization, whether by reason of foreclosure of mortgage or otherwise, according to the fact. Give date of organization of original corporation and refer to laws under which organized.

Exact Name of common camer making this report:
BNSF Railway Company
2. Date of incorporation: January 13, 1961
3. Under laws of what Government, State or Temtory organized? If more than one, name all. If in bankruptcy, give court of jurisdiction and dates
of beginning of receivership and of appointment of receivers or trustees:
Organized under the provisions of the General Corporation Law of the State of Delaware.
<u> </u>
4. If the respondent was reorganized during the year, involved in a consolidation or merger, or conducted its business under a different name, give full particulars:
STOCKHOLDERS' REPORTS
5. The respondent is required to send the Office of Economic and Environmental Analysis, immediately upon preparation, two copies of its latest annual report to stockholders.
Check appropriate box:
() Two copies are attached to this report.
() Two copies will be submitted on:(date)
(X) No annual report to stockholders is prepared.
Two copies of the Burlington Northern Santa Fe Corporation Annual Report to Shareholders are attached.
Two copies of BNSF Railway Company SEC Form 10-K are attached.

3

C. VOTING POWERS AND ELECTIONS

- 1. State the par value of each share of stock: Common \$1.00 per share; first preferred, \$ N/A per share; second preferred,
- \$ N/A per share; debenture stock, \$ N/A per share.
- 2. State whether or not each share of stock has the right to one vote; if not, give full particulars in a footnote. [X] Yes [] No
- 3. Are voting rights proportional to holdings? [X] Yes [] No. If not, state in a footnote the relation between holdings and corresponding voting rights.
- 4. Are voting rights attached to any securities other than stock? [] Yes [X] No. If yes, name in a footnote each security, other than stock, to which voting rights are attached (as of the close of the year), and state in detail the relation between holdings and corresponding voting rights, indicating whether voting rights are actual or contingent and, if contingent, showing the contingency.
- 5. Has any class or Issue of securities any special privileges in the election of directors, trustees, or managers, or in the determination of corporate action by any method?

 [] Yes [X] No. If yes, describe fully in a footnote each such class or issue and give a succinct statement showing clearly the character and extent of such privileges.
- Give the date of the latest closing of the stock book prior to the actual filling of this report, and state the purpose of such closing. <u>Stock books not closed and not required to be closed.</u>
- 7. State the total voting power of all security holders of the respondent at the date of such closing, if within one year of the date of such filing; if not, state as of the close of the year.

 1,000 votes, as of December 31, 2005.
- 8. State the total number of stockholders of record, as of the date shown in answer to Inquiry 7. One (1) stockholder.
- 9. Give the names of 30 security holders of the respondent who, at the date of the latest closing of the stock book or compilation of the list of stockholders of the respondent (if within 1 year prior to the actual filing of this report), had the highest voting powers in the respondent, showing for each his or her address, the number of votes he or she would have had a right to cast on that date had a meeting then been in order, and the classification of the number of votes to which he or she was entitled, with respect to securities held by him or her, such securities being classified as common stock, second preferred stock, first preferred stock, and other securities (stating in a footnote the names of such other securities, if any). If any such holder held in trust, give (in a footnote) the particulars of the trust. In the case of voting trust agreements, give as supplemental information and the names and addresses of the 30 largest holders of the voting trust certificates and the amount of their individual holdings. If the stock book was not closed or the list of stockholders compiled within such year, show such 30 security holders as of the close of the year.

NOTES AND REMARKS

200. COMPARATIVE STATEMENT OF FINANCIAL POSITION - EXPLANATORY NOTES (Dollars in Thousands)

n add disclo expla stopp other	diti se ini ag ra	on of the carrier. The camer shall give the particulars called for herein and where there is nothing to report, insert the word "none"; and on thereto shall enter in separate notes with suitable particulars other matters involving material amounts of the character commonly and in financial statements under generally accepted accounting principles, except as shown in other schedules. This includes statements and (1) service interruption insurance policies and indicating the amount of indemnity to which respondent will be entitled for work ge losses and the maximum amount of additional premium respondent may be obligated to pay in the event such losses are sustained by illroads; (2) particulars concerning obligations for stock purchase options granted to officers and employees; and (3) what entries the made for net income or retained income restricted under provisions of mortgages and other arrangements.
		unt (estimated, if necessary) of net income or retained income which has to be provided for capital expenditures, and for sinking funds, at to provisions of reorganization plans, mortgages, deeds of trust, or other contracts.
		nated amount of future earnings which can be realized before paying Federal income taxes because of unused and available net ng loss carryover on January 1 of the year following that for which the report is made.
		Explain the procedure in accounting for pension funds and recording in the accounts the current and past service pension costs, ng whether or not consistent with the prior year. See Note 2 on page 9 - 13
(t))	State amount, if any, representing the excess of the actuarially computed value of vested benefits over the total of the pension fund. See Note 2 on page 9 - 13
(c	:)	Is any part of the pension plan funded? Specify. Yes X No If funding is by insurance, give name of insuring company None
		If funding is by trust agreement, list trustee(s) Northern Trust Company Date of trust agreement or latest amendment June 21, 1996 If respondent is affiliated in any way with the trustee(s), explain affiliation: Not Affiliated See Note 1 on page 9
(0	-	List affiliated companies which are included in the pension plan funding agreement and describe basis for allocating charges under the agreement. See Note 2 on page 9 - 13
(6))	Is any part of the pension plan fund invested in stock or other securities of the respondent or its affiliates? Specify Yes No X If yes, give number of the shares for each class of stock or other security.
4,		Are voting rights attached to any securities held by the pension plan? Specify Yes No X If yes, who determines how stock is voted?
4. St		whether a segregated political fund has been established as provided by the Federal Election Campaign Act of 1971 (18 U.S.C. 610). Yes X No
5. (a)	The amount of employer's contribution to employee stock ownership plans for the current year was \$ None
(1	b)	The amount of investment tax credit used to reduce current income tax expense resulting from contributions to qualified employee stock ownership plans for the current year was \$ None
6. In	ref	ference to Docket 37465, specify the total amount of business entertainment expenditures charged to the non-operating expense account. \$ None

7. Give particulars with respect to contingent assets and liabilities at the close of the year, in accordance with instruction 5-6 in the Uniform System of Accounts for Railroad Companies, that are not reflected in the amounts of the respondent.

Disclose the nature and amount of contingency that is material.

Examples of contingent liabilities are items which may become obligations as a result of pending or threatened litigation, assessments or possible assessments of additional taxes, and agreements or obligations to repurchase securities or property. Additional pages may be added if more space is needed. (Explain and/or reference to the following pages.)

See Note 3 on pages 13 -15 and Note 5 on pages 15D - 15J

- (a) Changes in valuation accounts.
- 8. Marketable equity securities.

		Cost	Market	Dr. (Cr.) to Income	Dr. (Cr.) to Stockholder's Equity
(Current Yr.)	Current Portfolio	N/A	N/A	N/A	N/A
as of / /	Noncurrent Portfolio	N/A	N/A	N/A	N/A
(Previous Yr.)	Current Portfolio	N/A	N/A	N/A	N/A
as of / /	Noncurrent Portfolio	N/A	N/A	N/A	N/A

(b) At 12/31/05, gross unrealized gains and losses pertaining to marketable equity securities were as follows:

	Gains	Losses
Current	\$0	\$0
Noncurrent	\$0	\$0

(c) A net unrealized gain (loss) of \$0 on the sale of marketable equity securities was included in net income for 2005. The cost of securities was based on the N/A (method) cost of all the shares of each security held at time of sale.

Significant net realized and net unrealized gains and losses arising after date of the financial statements but prior to the filing, applicable to marketable equity securities owned at balance sheet date shall be disclosed below: None

NOTE: 12/31/05 Balance sheet date of reported year unless specified as previous year.

NOTES TO FINANCIAL STATEMENTS

Note 1

The Company

BNSF Railway Company and its majority-owned subsidiaries, (collectively, BNSF Railway or Company) is a wholly-owned subsidiary of Burlington Northern Santa Fe Corporation (BNSF). BNSF Railway operates one of the largest railroad networks in North America with approximately 32,000 route miles covering 28 states and two Canadian provinces. Through one operating transportation services segment, BNSF Railway transports a wide range of products and commodities including Consumer Products, Industrial Products, Coal and Agricultural Products.

BNSF Railway was formerly known as the Burlington Northern Railroad Company (BNRR). On December 31, 1996, The Atchison, Topeka and Santa Fe Railway Company (ATSF) merged with and into BNRR and the name of the surviving entity, BNRR, was changed to The Burlington Northern and Santa Fe Railway Company. On January 2, 1998, BNSF Railway's parent, Santa Fe Pacific Corporation (SFP), merged with and into BNSF Railway. On January 20, 2005, The Burlington Northern and Santa Fe Railway Company changed its name to BNSF Railway Company.

Note 2

Retirement Plans and Other Post-Employment Benefit Plans

BNSF sponsors a funded, noncontributory qualified BNSF Retirement Plan, which covers substantially all non-union employees, and an unfunded BNSF Supplemental Retirement Plan, which covers certain officers and other employees. The benefits under these pension plans are based on years of credited service and the highest consecutive sixty months of compensation for the last ten years of salaried employment with BNSF. BNSF's funding policy is to contribute annually not less than the regulatory minimum and not more than the maximum amount deductible for income tax purposes with respect to the funded plan.

Certain salaried employees of BNSF Railway that have met age and years of service requirements are eligible for life insurance coverage and medical benefits, including prescription drug coverage, during retirement. The retiree medical plan is contributory and provides benefits to retirees, their covered dependents and beneficiaries. Retiree contributions are adjusted annually. The plan also contains fixed deductibles, coinsurance and out-of-pocket limitations. The basic life insurance plan is noncontributory and covers retirees only. Optional life insurance coverage is available for some retirees; however, the retiree is responsible for the full cost. BNSF Railway's policy is to fund benefits payable under the medical and life insurance plans as they come due. Generally, employees beginning salaried employment with BNSF Railway subsequent to September 22, 1995, are not eligible for medical benefits during retirement.

Components of the net cost (benefit) for these plans were as follows (in millions):

	 Pe	nsion	Benefits	 	н	ealth a	nd We	Ifare B	enefits	<u> </u>
Year Ended December 31,	2005		2004	2003		2005		2004		2003

 \$ (6)
 \$ \$

The expected long-term rate of return is the return the Company anticipates eaming, net of plan expenses, over the period that benefits are paid. It reflects the rate of return on present investments and on expected contributions. In determining the expected long-term rate of return, BNSF Railway considered: 1) forward looking capital market forecasts, 2) historical returns for individual asset classes and 3) the impact of active portfolio management.

The assumptions used in accounting for the BNSF plans were as follows:

Assumptions used to determine net cost	Pension Benefits			Health and	Welfare Ber	efits
(benefit) for fiscal years ended December 31,	2005	2004	2003	2005	2004	2003
Discount rate	5.75%	6.00%	6.50%	5.75%	6.00%	6.50%
Expected long-term rate of return on plan						
assets	8.00%	8.25%	8.50%	-	-	-
Rate of compensation increase	3.90%	3.90%	3.90%	3.90%	3.90%	3.90%

Assumptions used to determine benefit	Pension Be	nefits	Health and We	
obligations at September 30,	2005	2004	2005	2004
Discount rate	5.25%	5.75%	5.25%	5.75%
Rate of compensation increase	3.90%	3.90%	3.90%	3.90%

The following table presents assumed health care cost trend rates:

December 31,	2005	2004	2003
Assumed health care cost trend rate for next year	10.50%	10.00%	11.00%
Rate to which health care cost trend rate is expected to decline and remain	5.00%	5.00%	5.00%
Year that the rate reaches the ultimate trend rate	2012_	2010	2010

NOTES TO FINANCIAL STATEMENTS

Assumed health care cost trend rates have a significant effect on the amounts reported for the health care plans. A one-percentage-point change in assumed health care cost trend rates would have the following effects:

	One Percentage- Point Increase	One Percentage- Point Decrease		
Effect on total service and interest cost	\$ 2	\$ (2)		
Effect on post retirement benefit obligation	\$ 24	\$ (20)		

The qualified BNSF Retirement Plan asset allocation at September 30, 2005 and 2004 and the target allocation for 2005 by asset category are as follows:

	Target Allocation	Percentage of Pen Assets at Septen	
Plan Asset Allocation	2005	2005	2004
Equity Securities	45 – 75%	64%	60%
Fixed Income Securities	20 – 40	28	33
Real Estate	5 – 15	8	7
Total		100%	100%

The general investment objective of the BNSF Retirement Plan is to grow the Plan assets in relation to the Plan liabilities while prudently managing the risk of a decrease in the Plan's assets relative to those liabilities. To meet this objective, the Employee Benefits Committee has adopted the above asset allocation ranges. This allows flexibility to accommodate market changes in the asset classes within defined parameters.

The Company contributed \$40 million to the BNSF Retirement Plan in December 2005. The Company is not required to make any contributions to this plan in 2006. Additionally, the Company expects to make benefit payments in 2006 of approximately \$21 million and \$7 million from its OPEB and non-qualified defined benefit plans, respectively. The following table shows expected benefit payments and Medicare Part D subsidy receipts for the next five fiscal years and the aggregate five years thereafter from the defined benefit pension plans and OPEB (in millions):

Fiscal Year	Expected Pension Plan Benefit Payments*	Expected OPEB Payments	Expected Medicare Subsidy	
2006	\$ 126	\$ 21	\$ (3)	
2007	126	22	(3)	
2008	127	23	(3)	
2009 .	129	24	(3)	
2010	130	24	(3)	
2011-2015	674	131	(20)	

a Primarily consists of Qualified Defined Benefit Plan payments which are made from the Plan Trust and do not represent an immediate cash outflow to the Company.

NOTES TO FINANCIAL STATEMENTS

Defined Contribution Plans

BNSF and BNSF Railway sponsor qualified 401(k) plans which cover substantially all employees and a non-qualified defined contribution plan which covers certain officers and other employees. The Company matches 50 percent of the first six percent of non-union employees' contributions and matches 25 percent on the first four percent of a limited number of union employees' contributions, which are subject to certain percentage limits of the employees' earnings, at each pay period. Non-union employees are eligible to receive an annual discretionary matching contribution of up to 30 percent of the first six percent of their contributions. Employer contributions for all non-union employees are subject to a five-year length of service vesting schedule. The Company's 401(k) matching expense was \$20 million, \$17 million and \$16 million in 2005, 2004 and 2003, respectively.

Other

Under collective bargaining agreements, BNSF Railway participates in multi-employer benefit plans which provide certain post-retirement health care and life insurance benefits for eligible union employees. Insurance premiums paid attributable to retirees, which are generally expensed as incurred, were \$43 million, \$33 million and \$31 million, in 2005, 2004 and 2003.

Note 3

Contingent Assets And Liabilities

Guarantees

Debt and other obligations of non-consolidated entities guaranteed by the Company as of December 31, 2005 are as follows (dollars in millions):

•			(Guarant	ees					
	BNSF Railway Ownership Percentage		cipal ount nteed	Maxir Fu Paym	ture	Maxin Recor	ırse	Remainin g Term (in years)	Capitali Obligati

Kinder Morgan Energy Partners, L.P.

Santa Fe Pacific Pipelines, Inc. (SFPP), an indirect, wholly owned subsidiary of BNSF Railway, has a guarantee in connection with its remaining special limited partnership interest in SFPP, L.P., a subsidiary of Kinder Morgan Energy Partners, L.P. to be paid only upon default by the partnership. All obligations with respect to the guarantee will cease upon termination of ownership rights which would occur upon a put notice issued by BNSF Railway or the exercise of the call rights by the general partners of SFPP, L.P.

Kansas City Terminal Intermodal Transportation Corporation

BNSF Railway and another major railroad jointly and severally guarantee \$62 million of debt of Kansas City Terminal Intermodal Transportation Corporation, the proceeds of which were used to finance construction of a double track grade separation bridge in Kansas City, Missouri, which is operated and used by Kansas City Terminal Railway Company (KCTRC). BNSF Railway has a 25 percent ownership in KCTRC, accounts for its interest using the equity method of accounting, and will be required to fund a portion of the remaining obligation upon default by the original debtor.

Westside Intermodal Transportation Corporation And The Unified Government Of Wyandotte County/Kansas City, Kansas

BNSF Railway has guaranteed \$57 million of debt, the proceeds of which were used to finance construction of a bridge that connects BNSF Railway's Argentine Yard in Kansas City, Kansas, with the KCTRC mainline tracks in Kansas City, Missouri. The bridge is operated by KCTRC, and payments related to BNSF Railway's guarantee of this obligation will only be called for upon default by the original debtor.

Residual Value Guarantees (RVG)

In the normal course of business, the Company enters into leases in which it guarantees the residual value of certain leased equipment. Some of these leases have renewal or purchase options, or both, that the Company may exercise at the end of the lease term. If the Company elects not to exercise these options, it may be required to pay the lessor an amount not exceeding the RVG. The amount of any payment is contingent upon the actual residual value of the leased equipment. Some of these leases also require the lessor to pay the Company any surplus in the actual residual value of the leased equipment over the RVG. These guarantees will expire between 2006 and 2011.

The maximum future payments, as disclosed in the Guarantees table above, represent the undiscounted maximum amount that BNSF Railway could be required to pay in the event the Company did not exercise its renewal option and the fair market value of the equipment had significantly declined. BNSF Railway does not anticipate such a large reduction in the fair market value of the leased equipment. As of December 31, 2005, the Company has recorded a \$68 million asset and corresponding liability for the fair value of the RVGs.

All Other

As of December 31, 2005, BNSF Railway guarantees \$8 million of other debt and leases. BNSF Railway holds a performance bond and has the option to sub-lease property to recover up to \$4 million of the \$8 million of guarantees. These guarantees expire between 2006 and 2014.

Other than as discussed above, there is no collateral held by a third party which the Company could obtain and liquidate to recover any amounts paid under the above guarantees.

Other than as discussed above, none of the guarantees are recorded in the Consolidated Financial Statements of the Company. The Company does not expect performance under these guarantees to have a material effect on the Company in the foreseeable future.

NOTES TO FINANCIAL STATEMENTS

Indemnities

In the ordinary course of business, BNSF Railway enters into agreements with third parties that include indemnification clauses. In general, these clauses are customary for the types of agreements in which they are included. At times, these clauses may involve indemnification for the acts of the Company, its employees and agents, indemnification for another party's acts, indemnification for future events, indemnification based upon a certain standard of performance, indemnification for liabilities arising out of the Company's use of leased equipment or other property, or other types of indemnification. Due to the uncertainty of whether events which would trigger the indemnification obligations would ever occur, the Company does not believe that these indemnity agreements will have a material adverse effect on the Company's results of operations, financial position or liquidity. Additionally, the Company believes that due to lack of historical payment experience, the fair value of indemnities cannot be estimated with any amount of certainty and that the fair value of any such amount would be immaterial to the financial statements. Accordingly, no fair value liability related to indemnities has been recorded in the financial statements.

Note 4

Hedging Activities

The Company uses derivatives to hedge against increases in diesel fuel prices. The Company formally documents the relationship between the hedging instrument and the hedged item, as well as the risk management objective and strategy for the use of the hedging instrument. This documentation includes linking the derivatives that are designated as cash flow hedges to specific assets or liabilities on the balance sheet, commitments or forecasted transactions. The Company assesses at the time a derivative contract is entered into, and at least quarterly thereafter, whether the derivative item is effective in offsetting the changes in cash flows. For derivative instruments that are designated and qualify as cash flow hedges, the effective portion of the gain or loss on the derivative instrument is recorded in accumulated other comprehensive income (AOCI) as a separate component of stockholder's equity and reclassified into earnings in the period during which the hedge transaction affects earnings.

BNSF Railway monitors its hedging positions and credit ratings of its counterparties and does not anticipate losses due to counterparty nonperformance.

Fuel

Fuel costs represented 20, 15 and 14 percent of total operating expenses during the years 2005, 2004 and 2003, respectively. Due to the significance of diesel fuel expenses to the operations of BNSF Railway and the historical volatility of fuel prices, the Company has entered into hedges to partially mitigate the risk of fluctuations in the price of its diesel fuel purchases. The fuel hedges include the use of derivatives that are accounted for as cash flow hedges. The hedging is intended to protect the Company's operating margins and overall profitability from adverse fuel price changes by entering into fuel-hedge instruments based on management's evaluation of current and expected diesel fuel price trends. However, to the extent the Company hedges portions of its fuel purchases, it may not realize the impact of decreases in fuel prices. Conversely, to the extent the Company does not hedge portions of its fuel purchases, it may be adversely affected by increases in fuel prices. Based on fuel consumption during 2005 and excluding the impact of the hedges, each one-cent increase in the price of fuel would result in approximately \$14 million of additional fuel expense on an annual basis.

Total Fuel-Hedging Activities

As of December 31, 2005, BNSF Railway's total fuel hedging activities covered approximately 26 percent and 3 percent of estimated fuel purchases for 2006 and 2007, respectively. Hedge positions are closely monitored to ensure that they will not exceed actual fuel requirements in any period.

NOTES TO FINANCIAL STATEMENTS

The amounts recorded in the Consolidated Statements of Income for fuel-hedge transactions were as follows (in millions):

Year Ended December 31,	2005		 2004	_	 2003
Hedge benefit	\$	535	\$ 337		\$ 65
Ineffective portion of unexpired hedges		(4)	1		3
Tax effect		(203)	(130)		(26)
Hedge benefit, net of tax	\$	328	\$ 208		\$ 42

The amounts recorded in the Consolidated Balance Sheets for fuel hedge transactions were as follows (in millions):

December 31,	 2005	 2004
Short-term fuel-hedging asset	\$ 303	\$ 264
Long-term fuel-hedging asset	33	105
Ineffective portion of unexpired hedges	-	(4)
Tax effect	(129)	(140)
Amount included in AOCI, net of tax	\$ 207	\$ 225
Settled fuel-hedging contracts receivable	\$ 143	\$ 131

BNSF Railway measures the fair value of hedges from data provided by various external counterparties. To value a swap, the Company uses the forward commodity price for the period hedged. The fair values of costless collars are calculated and provided by the corresponding counterparties.

Nymex #2 Heating Oil Hedges

As of December 31, 2005, BNSF Railway had entered into fuel swap and costless collar agreements utilizing New York Mercantile Exchange (NYMEX) #2 heating oil (HO). The hedge prices do not include taxes, transportation costs, certain other fuel handling costs and any differences which may occur between the prices of HO and the purchase price of BNSF Railway's diesel fuel. Over the twelve months ended December 31, 2005, the sum of all such costs averaged approximately 16 cents per gallon.

During 2005, the Company converted approximately 19 million gallons of 2006 West Texas Intermediate (WTI) collars into HO swaps at an average price of \$1.08 per gallon. The following table provides fuel hedge data based upon the quarter being hedged for all HO fuel hedges outstanding at December 31, 2005.

WTI Crude Oil Hedges

In addition, BNSF Railway enters into fuel swap and costless collar agreements utilizing WTI crude oil. The hedge prices do not include taxes, transportation costs, certain other fuel handling costs, and any differences which may occur between the prices of WTI and the purchase price of BNSF Railway's diesel fuel, including refining costs. Over the twelve months ended December 31, 2005, the sum of all such costs averaged approximately 45 cents per gallon.

No additional WTI hedges were entered into during 2005. However, the Company converted approximately 19 million gallons of WTI collars into HO swaps as stated in the NYMEX #2 Heating Oil Hedges section. The following tables provide fuel hedge data based upon the quarter being hedged for all WTI fuel hedges outstanding at December 31, 2005.

Nymex #2 Heating Oil Refining Spread Hedges

During 2005, the Company entered into fuel swap agreements utilizing the HO refining spread (HO-WTI) to hedge the equivalent of approximately 57 million gallons of fuel with an average swap price \$15.69 per barrel. HO-WTI is the difference in price between HO and WTI; therefore, a HO-WTI swap in combination with a WTI swap is equivalent to a HO swap. The following table provides fuel hedge data based upon the quarter being hedged for all HO-WTI fuel hedges outstanding as of December 31, 2005.

	Qua	rter Ending
2006		March 31,

NOTES TO FINANCIAL STATEMENTS

Note 5

Commitments and Contingencies

Lease Commitments

BNSF Railway has substantial lease commitments for locomotives, freight cars, trailers and containers, office buildings and other property, and many of these leases provide the option to purchase the leased item at fair market value at the end of the lease. However, some provide fixed price purchase options. Future minimum lease payments as of December 31, 2005 are summarized as follows (in millions):

December 31,	Capital Leases	Operating Leases
2006	\$ 145	\$ 461
2007	135	536
2008	123	495
2009	95	461
2010	61	436
Thereafter	161	3,754
Total	720	\$ 6,143
Less amount representing interest	(116)	
Present value of minimum lease payments	\$ 604	

Excludes leases having non-cancelable lease terms of less than one year and per diem leases.

Lease rental expense for all operating leases was \$565 million, \$496 million and \$462 million for the years ended December 31, 2005, 2004 and 2003, respectively. Contingent rentals and sublease rentals were not significant.

Other Commitments

In the normal course of business, the Company enters into long-term contractual requirements for future goods and services needed for the operations of the business. Such commitments are not in excess of expected requirements and are not reasonably likely to result in performance penalties or payments that would have a material adverse effect on the Company's liquidity.

Personal Injury And Environmental Costs

Charge For Asbestos And Environmental Costs

During 2004, BNSF Railway recorded a \$465 million pre-tax charge to reflect changes in its estimate of unasserted asbestos liabilities and environmental liabilities. Of this amount, \$293 million and \$172 million were related to unasserted asbestos and environmental liabilities, respectively. The \$465 million pre-tax charge was recorded in materials and other expense and reduced net income by \$288 million during 2004.

Personal Injury

Personal injury claims, including asbestos claims and employee work-related injuries and third party injuries (collectively, other personal injury), are a significant expense for the railroad industry. Personal injury claims by BNSF Railway employees are subject to the provisions of the Federal Employers' Liability Act (FELA) rather than state workers' compensation laws. FELA's system of requiring the finding of fault, coupled with unscheduled awards and reliance on the jury system, contributed to increased expenses in past years. Other proceedings include claims by non-employees for punitive as well as compensatory damages. A few proceedings purport to be class actions. The variability present in settling these claims, including non-employee personal injury and matters in which punitive damages are alleged, could result in increased expenses in future years. BNSF Railway has implemented a number of safety programs designed to reduce the number of personal injuries as well as the associated claims and personal injury expense.

NOTES TO FINANCIAL STATEMENTS

BNSF Railway records a liability for personal injury claims when the expected loss is both probable and reasonably estimable. The liability and ultimate expense projections are estimated using standard actuarial methodologies. Liabilities recorded for unasserted personal injury claims are based on information currently available. Due to the inherent uncertainty involved in projecting future events such as the number of claims filed each year, developments in judicial and legislative standards, and the average costs to settle projected claims, actual costs may differ from amounts recorded. BNSF Railway has obtained insurance coverage for certain claims, as discussed under the heading "BNSF Insurance Company."

Asbestos

The Company is party to a number of personal injury claims by employees and non-employees who may have been exposed to asbestos. The heaviest exposure for BNSF Railway employees was due to work conducted in and around the use of steam locomotive engines that were phased out between the years of 1950 and 1967. However, other types of exposures, including exposure from locomotive component parts and building materials, continued after 1967, until it was substantially eliminated by 1985.

Prior to 2000, claim filings against the Company for asbestos were not numerous and were sporadic. Accordingly, while the Company had concluded that a probable loss had occurred, it did not believe it could estimate the range of reasonably possible loss because of the lack of experience with such claims and the lack of detailed employment records for the population of exposed employees. The Company believed, however, that the low end of the range of reasonably possible loss, as that term is used in FASB Interpretation No. 14 (FIN 14), Reasonable Estimation of the Amount of a Loss, was immaterial. Subsequent to this period, claim filings increased and, when they continued into 2004, the Company concluded that the low end of the range of reasonably possible loss would be material and that an estimate for unasserted asbestos exposure liability needed to be recorded. BNSF Railway then engaged a third party with extensive experience in performing asbestos studies to assist in assessing the unasserted liability exposure. The objective of the assessment was to determine the number of estimated unasserted asbestos claims and the estimated average cost per claim. The Company, with the assistance of the third party, first determined its exposed population from which it was able to derive the estimated number of unasserted claims. The estimated average cost per claim was then determined utilizing recent actual average cost per claim data.

Based on the assessment, the Company recorded an undiscounted \$293 million pre-tax charge for unasserted asbestos claims in the third quarter of 2004. The \$293 million pre-tax charge was recorded in materials and other expense and reduced net income by \$182 million for the year ended December 31, 2004.

During the third quarter of 2005, the Company obtained an update of this study which concluded that the original September 2004 study continues to represent a reasonable estimate of BNSF Railway's future asbestos exposure. Therefore, management recorded no additional expense as a result of this update. The Company plans to update the study in the third quarter of 2006. On a quarterly basis, BNSF Railway monitors actual experience against the number of forecasted claims and expected claim payments. Adjustments to the Company's estimates will be recorded when necessary.

The following table summarizes the activity in the Company's accrued obligations for both asserted and unasserted asbestos matters (in millions):

	:	2005	2004	2003
Beginning balance	_	\$ 345	\$ 60	\$ 55
Accruals		_	308	25
Payments		(19)	(23)	(20)
Ending balance at December 31,		\$ 326	\$ 345	\$ 60

NOTES TO FINANCIAL STATEMENTS

Of the obligations at December 31, 2005, \$266 million is related to unasserted claims and \$60 million is related to asserted claims. At December 31, 2005 and 2004, \$21 and \$18 million are included in current liabilities, respectively. The recorded liability is not discounted. In addition, defense and processing costs, which are recorded on an as-reported basis, are not included in the recorded liability. The Company is presently self-insured for asbestos-related claims.

The following table summarizes information regarding the number of asserted asbestos claims filed against BNSF Railway:

	2005	2004
Claims unresolved at January 1,	1,926	1,985
Claims filed	835	712
Claims settled, dismissed or otherwise resolved	(640)	(771)
Claims unresolved at December 31,	2,121	1,926

Based on BNSF Railway's estimate of the potentially exposed employees and related mortality assumptions, it is anticipated that unasserted claims will continue to be filed through the year 2050. The Company recorded an amount for the full estimated filing period through 2050 because it had a relatively finite exposed population (former and current employees hired prior to 1985) which it was able to identify and reasonably estimate and about which it had obtained reliable demographic data (including age, hire date and occupation) derived from industry or BNSF Railway specific data that was the basis for the study. BNSF Railway projects that approximately 50, 70, and 90 percent of the future unasserted asbestos claims will be incurred within the next 10, 15 and 25 years, respectively.

Because of the uncertainty surrounding the factors used in the study, it is reasonably possible that future costs to settle asbestos claims may range from approximately \$225 million to \$425 million. However, BNSF Railway believes that the \$326 million recorded at December 31, 2005, is the best estimate of the Company's future obligation for the settlement of asbestos claims.

The amounts recorded by BNSF Railway for the asbestos-related liability were based upon currently known facts. Future events, such as the number of new claims to be filed each year, the average cost of disposing of claims, as well as the numerous uncertainties surrounding asbestos litigation in the United States, could cause the actual costs to be higher or lower than projected.

While the final outcome of asbestos-related matters cannot be predicted with certainty, considering among other things the meritorious legal defenses available and liabilities that have been recorded, it is the opinion of BNSF Railway that none of these items, when finally resolved, will have a material adverse effect on the Company's financial position or liquidity. However, should a number of these items occur in the same period, it could have a material adverse effect on the results of operations in a particular quarter or fiscal year.

Other Personal Injury

BNSF Railway uses a third party actuary to assist the Company in estimating its other personal injury liability claims and expense. These estimates are based on the covered population, activity levels and trends in frequency, and the costs of covered injuries. These actuarial estimates include unasserted claims except for certain repetitive stress and other occupational trauma claims that result from prolonged repeated events or exposure. Such claims are estimated on an as-reported basis because, while the Company has concluded that a probable loss has occurred, it cannot estimate the range of reasonably possible loss due to other contributing causes of such injuries and the fact that continued exposure is required for the potential injury to manifest itself as a claim. The Company believes that the low end of the range of reasonably possible loss, as that term is used in FIN 14, is immaterial for these other occupational trauma claims.

BNSF Railway obtains quarterly actuarial updates for other personal injury liabilities and monitors actual experience against the number of forecasted claims to be received, the forecasted number of claims closing with payment and expected claims payments. Adjustments to the Company's estimates are recorded quarterly as necessary or more frequently as new events or revised estimates develop.

NOTES TO FINANCIAL STATEMENTS

The following table summarizes the activity in the Company's accrued obligations for other personal injury matters (in millions):

	2005	2004	2003
Beginning balance	\$ 459	\$ 453	\$ 441
Accruals	181	194	190
Payments	(218)	(188)	(178)
Ending balance at December 31,	\$ 422	\$ 459	\$ 453

At December 31, 2005 and 2004, \$164 million and \$170 million are included in current liabilities, respectively. BNSF Railway's liabilities for other personal injury claims are undiscounted. In addition, defense and processing costs, which are recorded on an asreported basis, are not included in the recorded liability. The Company is substantially self-insured for other personal injury claims.

The following table summarizes information regarding the number of personal injury claims, other than asbestos, filed against BNSF Railway:

	2005	2004
Claims unresolved at January 1,	4,116	4,393
Claims filed	3,758	3,632
Claims settled, dismissed or otherwise resolved	(4,257)	(3,909)
Claims unresolved at December 31,	3,617	4,116

Because of the uncertainty surrounding the ultimate outcome of other personal injury claims, it is reasonably possible that future costs to settle other personal injury claims may range from approximately \$375 million to \$525 million. However, BNSF Railway believes that the \$422 million recorded at December 31, 2005, is the best estimate of the Company's future obligation for the settlement of other personal injury claims.

The amounts recorded by BNSF Railway for other personal injury claims were based upon currently known facts. Future events, such as the number of new claims to be filed each year, the average cost of disposing of claims, as well as the numerous uncertainties surrounding personal injury litigation in the United States, could cause the actual costs to be higher or lower than projected.

While the final outcome of these other personal injury matters cannot be predicted with certainty, considering among other things the meritorious legal defenses available and liabilities that have been recorded, it is the opinion of BNSF Railway that none of these items, when finally resolved, will have a material adverse effect on the Company's financial position or liquidity. However, should a number of these items occur in the same period, it could have a material adverse effect on the results of operations in a particular quarter or fiscal year.

BNSF Insurance Company

Burlington Northern Santa Fe Insurance Company, Ltd. (BNSF IC), a wholly owned subsidiary of BNSF, provides insurance coverage for certain risks incurred after April 1, 1998, FELA claims, railroad protective and force account insurance claims incurred after January 1, 2002, and certain other claims which are subject to reinsurance. During the years ended December 31, 2005, 2004 and 2003, BNSF Railway paid and expensed premiums of \$140 million, respectively to BNSF IC for such coverage. At December 31, 2005 and 2004 there was no unamortized premium remaining on the Consolidated Balance Sheets. During 2005, 2004 and 2003, BNSF IC made claim payments totaling \$132 million, \$82 million, and \$33 million, respectively, for settlement of covered claims.

NOTES TO FINANCIAL STATEMENTS

Environmental

The Company's operations, as well as those of its competitors, are subject to extensive federal, state and local environmental regulation. BNSF Railway's operating procedures include practices to protect the environment from the risks inherent in railroad operations, which frequently involve transporting chemicals and other hazardous materials. Additionally, many of BNSF Railway's land holdings are and have been used for industrial or transportation-related purposes or leased to commercial or industrial companies whose activities may have resulted in discharges onto the property. As a result, BNSF Railway is subject to environmental cleanup and enforcement actions. In particular, the Federal Comprehensive Environmental Response, Compensation and Liability Act of 1980 (CERCLA), also known as the Superfund law, as well as similar state laws generally impose joint and several liability for cleanup and enforcement costs on current and former owners and operators of a site without regard to fault or the legality of the original conduct. BNSF Railway has been notified that it is a potentially responsible party (PRP) for study and cleanup costs at Superfund sites for which investigation and remediation payments are or will be made or are yet to be determined (the Superfund sites) and, in many instances, is one of several PRPs. In addition, BNSF Railway may be considered a PRP under certain other laws. Accordingly, under CERCLA and other federal and state statutes, BNSF Railway may be held jointly and severally liable for all environmental costs associated with a particular site. If there are other PRPs, BNSF Railway generally participates in the cleanup of these sites through cost-sharing agreements with terms that vary from site to site. Costs are typically allocated based on such factors as relative volumetric contribution of material, the amount of time the site was owned or operated, and/or the portion of the total site owned or operated by each PRP.

Liabilities for environmental cleanup costs are recorded when BNSF Railway's liability for environmental cleanup is both probable and reasonably estimable. Subsequent adjustments to initial estimates are recorded as necessary based upon additional information developed in subsequent periods. Environmental costs include initial site surveys and environmental studies as well as costs for remediation of sites determined to be contaminated.

During the first half of 2004, the Company experienced a significant increase in expense relating to environmental remediation developments at known sites for which the majority of the contamination occurred decades ago. Because of these and other developments, the Company performed an assessment in 2004 to determine if it was feasible to better estimate developments at its known sites. The Company determined that a third party actuary had proprietary data that included information from the Environmental Protection Agency (EPA) and other governmental agencies as well as information accumulated from public sources and work performed for other clients. Because of its determination that a better estimate of future development could be made with this data, BNSF Railway engaged this third party actuary, which has an extensive background in performing various studies for large companies, including environmental matters, to assist BNSF Railway in determining the Company's potential future environmental exposure at known sites. As a result of this study, the Company revised its estimate of its probable environmental losses and its accrued liabilities.

Consequently, during the third quarter of 2004, BNSF Railway recorded an undiscounted \$172 million pre-tax charge related to its change in estimated environmental liabilities on a site by site basis. The \$172 million pre-tax charge was recorded in materials and other expense and reduced net income by \$106 million for 2004. The charge did not include (i) contaminated sites of which the Company is not aware, or (ii) additional amounts for third party claims, which arise out of contaminants allegedly migrating from BNSF Railway property, due to a limited number of sites. BNSF Railway continues to estimate third party claims on a site by site basis when the liability for such claims is probable and reasonably estimable. BNSF Railway's recorded liability for third party claims as of December 31, 2005 is approximately \$24 million.

During the third quarter of 2005, the Company obtained an update of this study. Based on the results of the study, management recorded additional expense of approximately \$12 million. The Company plans to update the study in the third quarter of 2006. On a quarterly basis, BNSF Railway monitors actual experience against the forecasted remediation and related payments made on existing sites. Adjustments to the Company's estimates will continue to be recorded when necessary based on developments in subsequent periods. Additionally, environmental accruals include amounts for newly identified sites or contaminants, third-party claims and legal fees incurred for defense of third-party claims and recovery efforts.

NOTES TO FINANCIAL STATEMENTS

The Company's estimate of ultimate cost for cleanup efforts at its known environmental sites utilizes BNSF Railway's historical payment patterns, its current estimated percentage to closure ratios, and the actuary's proprietary benchmark patterns developed from data accumulated from public sources and work performed by it for other clients, including the EPA and other governmental agencies. These factors incorporate experience gained from cleanup efforts at other similar sites into the estimates for which remediation and restoration efforts are still in progress. BNSF Railway also conducts an ongoing environmental contingency analysis, which considers a combination of factors including independent consulting reports, site visits, legal reviews and analysis of the likelihood of participation in, and the ability to pay for, cleanup of other PRPs.

BNSF Railway is involved in a number of administrative and judicial proceedings and other mandatory cleanup efforts for 369 sites, including Superfund sites, at which it is participating in the study or cleanup, or both, of alleged environmental contamination.

The following table summarizes the activity in the Company's accrued obligations for environmental matters (in millions):

	 2005	2004	2003
Beginning balance	\$ 385	\$ 199	\$ 196
Accruals	33	258	59
Payments	 (48)	(72)	(56)
Ending balance at December 31,	\$ 370	\$ 385	\$ 199

At December 31, 2005 and 2004, \$55 million and \$60 million are included in current liabilities, respectively. BNSF Railway's environmental liabilities are not discounted. BNSF Railway anticipates that the majority of the accrued costs at December 31, 2005 will be paid over the next ten years and no individual site is considered to be material.

The following table summarizes the environmental sites:

	BNSF Railw	Superfund sites		
	2005	2004	2005	2004
Number of sites at January 1,	384	402	24	22
Sites added during the period	24	34	-	5
Sites closed during the period	(39)	(52)	(4)	(3)
Number of sites at December 31,	369	384	20	24

Liabilities recorded for environmental costs represent BNSF Railway's best estimate of its probable future obligation for the remediation and settlement of these sites and include both asserted and unasserted claims. Unasserted claims are not a material component of the liability. Although recorded liabilities include BNSF Railway's best estimate of all probable costs, without reduction for anticipated recoveries from third parties, BNSF Railway's total cleanup costs at these sites cannot be predicted with certainty due to various factors such as the extent of corrective actions that may be required, evolving environmental laws and regulations, advances in environmental technology, the extent of other parties' participation in cleanup efforts, developments in ongoing environmental analyses related to sites determined to be contaminated, and developments in environmental surveys and studies of contaminated sites.

Because of the uncertainty surrounding these factors, it is reasonably possible that future costs for environmental liabilities may range from approximately \$300 million to \$600 million. However, BNSF Railway believes that the \$370 million recorded at December 31, 2005, is the best estimate of the Company's future obligation for environmental costs.

White the final outcome of these environmental matters cannot be predicted with certainty, it is the opinion of BNSF Railway that none of these items, when finally resolved, will have a material adverse effect on the Company's financial position or liquidity. However, an unexpected adverse resolution of one or more of these items could have a material adverse effect on the results of operations in a particular quarter or fiscal year.

NOTES TO FINANCIAL STATEMENTS

Other Claims And Litigation

In addition to asbestos, other personal injury, and environmental matters discussed above, BNSF Railway and its subsidiaries are also parties to a number of other legal actions and claims, various governmental proceedings and private civil suits arising in the ordinary course of business, including those related to disputes and complaints involving certain transportation rates and charges (including complaints seeking refunds of prior charges paid for coal transportation and the prescription of future rates for such movements). Some of the legal proceedings include claims for punitive as well as compensatory damages, and a few proceedings purport to be class actions. While the final outcome of these matters cannot be predicted with certainty, considering among other things the meritorious legal defenses available and liabilities that have been recorded along with applicable insurance, it is the opinion of BNSF Railway that none of these items, when finally resolved, will have a material adverse effect on the Company's financial position or liquidity. However, an unexpected adverse resolution of one or more of these items could have a material adverse effect on the results of operations in a particular quarter or fiscal year.

Note 6

Stock Plans

On April 15, 1999, BNSF shareholders approved the BNSF 1999 Stock Incentive Plan and authorized 20 million shares of BNSF common stock to be issued in connection with stock options, restricted stock, restricted stock units and performance stock. On April 18, 2001, April 17, 2002, and April 21, 2004, BNSF shareholders approved the amended BNSF 1999 Stock Incentive Plan, which authorized additional awards not to exceed 29 million, 35 million and 42 million shares, respectively, of BNSF common stock to be issued in connection with stock options, restricted stock, restricted stock units and performance stock. Approximately three million common shares were available for future grant at December 31, 2005.

Additionally, on April 18, 1996, BNSF shareholders approved the non-employee director's stock plan and authorized 900,000 shares of BNSF common stock to be issued in connection with this plan. Approximately 500,000 common shares were available for future grant at December 31, 2005.

Stock Options

Under BNSF's stock plans, options may be granted to directors, officers and salaried employees at the fair market value of the Company's common stock on the date of grant. Stock option grants awarded after April 2001 generally vest ratably over three years and expire within ten years after the date of grant. Shares issued upon exercise of options may be issued from treasury shares or from authorized but unissued shares.

The Company applies APB Opinion 25 and related interpretations in accounting for its stock options (see Note 8 for the Company's pro forma net income determined based on the fair value at grant dates consistent with SFAS No. 123).

NOTES TO FINANCIAL STATEMENTS

A summary of the status of stock options as of December 31, 2005, 2004 and 2003, and changes during the years then ended, is presented below (options in thousands):

Year Ended December 31,	2	2005			2004			2003		
	Options	Weighted Average Exercise Prices		Options	Weighted Average Exercise Prices		Options	Weighted Average Exercise Prices		
Balance at beginning of year	25,122	\$	29.42	38,320	\$	28.72	39,323	\$	28.31	
Granted	2,676	\$	50.08	2,547	\$	33.20	2,957	\$	27.88	
Exercised	(9,349)	\$	29.30	(15,455)	\$	28.29	(3,222)	\$	22.68	
Cancelled	(168)	\$	35.48	(290)	\$	30.09	(738)	\$	30.16	
Balance at end of year	18,281	\$	32.45	25,122	\$	29.42	38,320	\$	28.72	
Options exercisable at year end	13,718	\$	29.75	20,164	\$	29.18	31,465	\$	28.83	

The following table summarizes information regarding stock options outstanding at December 31, 2005 (options in thousands):

	Op	Options Outstanding			Options Exercisable			
Range of Exercise Prices	Number Outstanding	Weighted Average Remaining Life	Weighted Average Exercise Prices	Number Exercisable	Weighted Average Exercise Prices			
\$24.08 to \$27.97	5,649	5.67 Years	\$ 26.91	4,774	\$ 26.76			
\$28.34 to \$29.44	5,182	3.73 Years	\$ 29.12	5,182	\$ 29.12			
\$29.78 to \$34.59	4,663	5.26 Years	\$ 32.86	3,303	\$ 32.92			
\$34.87 to \$71.03	2,787	7.97 Years	\$ 49.15	459	\$ 45.09			
\$24.08 to \$71.03	18,281	5.37 Years	\$ 32.45	13,718	\$ 29.75			

Other Incentive Programs

BNSF has other long-term incentive programs in addition to stock options as shown in the following table (shares in thousands):

Other Incentive Programs	Generally Vested	Shares Outstanding as of December	Shares Granted For Year Ended December 31,		
	(in years)	31, 2005	2005	2004	2003
Restricted shares/units:					
Time-based	3–5	1,464	346	639	558
Performance-based	3	550	316	251	_
BNSF Incentive Bonus Stock Program	3	1 ,12 7	601	227	329
BNSF Discounted Stock Purchase Program	N/A	70	33	18	19

200. COMPARATIVE STATEMENT OF FINANCIAL POSITION-EXPLANTORY NOTES-Continued

NOTES TO FINANCIAL STATEMENTS

Time-based awards are granted to senior managers within BNSF primarily as a retention tool and to encourage ownership in the Company and generally vest over three years and are contingent on continued salaried employment. The weighted-average grant date fair market values of time-based awards granted in 2005, 2004 and 2003 was \$49.23, \$32.72 and \$27.88, respectively.

Performance-based awards are granted to senior managers within BNSF to encourage ownership in the Company and to align management's interest with those of shareholders. Performance-based awards generally vest over three years and are contingent on the achievement of certain predetermined corporate performance goals (e.g., return on invested capital (ROIC)) and continued salaried employment. The weighted-average grant date fair market values of performance-based awards granted in 2005 and 2004 was \$49.21 and \$32.72, respectively, with no performance-based awards granted in 2003.

Additionally, related to the 2005 performance-based grant, eligible employees may also earn performance stock that will be granted in 2008 contingent upon achievement of higher ROIC goals and continued salaried employment. The Company has committed to a maximum grant of approximately 316,000 shares.

Certain eligible employees may exchange through the BNSF Incentive Bonus Stock Program (IBSP) the cash payment of their bonus for restricted stock. The grant date fair market values of IBSP awards granted in 2005, 2004 and 2003 was \$47.58, \$31.97 and \$25.52, respectively. In September 2005, the program was amended so that no awards will be granted after 2006.

Salaried employees not eligible to participate in the IBSP may participate in the BNSF Discounted Stock Purchase Program (DSPP) and use their bonus to purchase BNSF common stock at a discount from the market price. These shares immediately vest but are restricted for a three-year period. The grant date fair market values of DSPP awards granted in 2005, 2004 and 2003 was \$46.91, \$31.84 and \$25.38, respectively.

Shares awarded under the plans may not be sold or used as collateral and are generally not transferable by the holder until the shares awarded become free of restrictions. Compensation expense, net of tax, recorded under the BNSF Stock Incentive Programs in accordance with APB Opinion 25 is shown in the following table (in millions):

	2005	2004	2003
Awards vesting based on service conditions	15	12	11
Awards vesting based on performance			
and service conditions	8	7	-
Total	23	19	11

Note 7

Accounting Pronouncements

Stock-Based Compensation

The FASB issued SFAS No. 123R, Share-Based Payment, which originally required implementation for interim or annual reporting periods beginning after June 15, 2005. However, in April 2005, the Securities and Exchange Commission adopted a new rule to amend the compliance date to the beginning of the Company's next fiscal year (January 1, 2006, for the Company). SFAS No. 123R requires the Company to recognize the cost of employee services received in exchange for the Company's equity instruments. Currently, in accordance with APB Opinion 25, the Company records the intrinsic value of stock based compensation as expense. Accordingly, no compensation expense is currently recognized for fixed stock option plans as the exercise price equals

200. COMPARATIVE STATEMENT OF FINANCIAL POSITION-EXPLANTORY NOTES-Continued

NOTES TO FINANCIAL STATEMENTS

the stock price on the date of grant. Under SFAS No. 123R, BNSF Railway will be required to measure compensation expense over the options' vesting period based on the stock options' fair value at the date the options are granted. SFAS No. 123R allows for the use of the Black-Scholes or a lattice option-pricing model to value such options. The Company has determined that it will use the Black-Scholes option-pricing model to calculate the fair value of its options. Based on a study performed by the Company's management, the fair values obtained from each of the two pricing models were not substantially different. Additionally, the Company has elected to adopt SFAS No. 123R on a modified prospective basis.

Note 8

Stock-Based Compensation

Under various stock incentive plans, BNSF has granted options to BNSF Railway employees to purchase BNSF common stock at a price not less than fair market value at the date of grant. Certain employees of the Company also participate in BNSF's other long-term incentive plans including, among other things, restricted stock and a discounted stock purchase program. The Company applies Accounting Principles Board (APB) Opinion 25, Accounting for Stock Issued to Employees, and related interpretations in accounting for its participation in these stock plans. In accordance with APB Opinion 25, the Company records the intrinsic value of stock-based compensation as expense. Accordingly, no compensation expense has been recognized for the fixed stock options as the exercise price equals the stock price on the date of grant. Stock-based compensation expense related to restricted stock and restricted stock units has been recognized as compensation expense.

The following table illustrates the effect on net income if the Company had applied the fair value recognition provisions of SFAS No. 123, Accounting for Stock-Based Compensation, to stock-based employee compensation (in millions):

Year Ended December 31,	2005		2004	2003
Net income, as reported	\$ 1,778	,\$	1,000	\$ 1,023
Stock-based employee compensation expense included				
in reported net income, net of related tax effects	23		19	11
Total stock-based compensation expense determined				
under fair value method for all awards, net of related tax effects	(42)		(41)	(36)
Pro forma net income	\$ 1,759	\$	978	\$ 998

220. RETAINED EARNINGS

(Dollars in Thousands)

- Show below the items of retained earnings accounts of the respondent for the year, classified in accordance with the Uniform System
 of Accounts for Railroad Companies,
- 2. All contra entries should be shown in parentheses.
- 3. Show in lines 22 and 23 the amount of assigned Federal income tax consequences for accounts 606 and 616.
- Segregate in column (c) all amounts applicable to the equity in undistributed earnings (losses) of affiliated companies based on the
 equity method of accounting.
- 5. Line 3 (line 7 if a debit balance), column (c), should agree with line 26, column (b), in Schedule 210. The total of columns (b) and (c), lines 3 and 7, should agree with line 61, column (b) in Schedule 210.
- 6. Include in column (b) only amounts applicable to retained earnings exclusive of any amounts included in column (c).

240. STATEMENT OF CASH FLOWS (Dollars in Thousands)

Give the information as requested concerning the cash flows during the year. Either the direct or indirect method can be used. The direct method shows as its principal components operating cash receipts and payments, such as cash received from customers and cash paid to suppliers and employees, the sum of which is net cash flow from operating activities. The indirect method starts with net income and adjusts it for revenues and expense items that were not the result of operating cash transactions in the current period to reconcile it to net cash flow from operating activities If the direct method is used, complete lines 1 through 41. If the indirect method is used complete lines 10 through 41. Cash, for the purpose of this schedule, shall include cash and cash equivalents which are short-term, highly liquid investments readily convertible to known amounts of cash and so near their maturity that they present insignificant risk of changes in value because of changes in interest rates. Information about all investing and finance activities which do not directly affect cash shall be separately disclosed in footnotes to this schedule. They shall clearly relate the cash (if any) and noncash aspects of transactions. Examples of noncash investing and transactions include converting debt to equity, acquiring assets by assuming directly related liabilities, such as purchasing a building by incurring a mortgage to the seller; obtaining an asset by entering into a capital lease; and exchanging noncash assets or liabilities for other noncash assets or liabilities.

Some transactions are part cash and part noncash; only the cash portion shall be reported directly in the statement of cash flows. Refer to FAS Statement No. 95, Statement of Cash Flows, for further details.

GENERAL INSTRUCTIONS CONCERNING RETURNS IN SCHEDULES 310, 310A

- 1. Schedule 310 should give particulars of stocks, bonds, other secured obligations, unsecured notes, and investment advances of affiliated companies held by respondent at close of year. Also, disclose the investments made, disposed of, and written down during the year and the applicable dividends and interest credited to income as a result of those investments. They should exclude securities issued or assumed by respondent. For definition of affiliated companies, see the rules governing Account No. 721 "Investments and Advances; Affiliated Companies", in the Uniform System os Accounts for Railroad Companies.
 - 2. List the investments in the following order and show a total for each group and each class of investments by accounts in numerical order:
 - A) Stock
 - (1) Carriers-active
 - (2) Carners-inactive
 - (3) Noncarriers-active
 - (4) Noncarriers-inactive
 - (B) Bonds (including US government bonds)
 - (C) Other secured obligations
 - (D) Unsecured notes
 - (E) Investment advances
 - 3. The subclassification of classes (B), (C), (D), and (E) should be the same as that provided for class (A).
- 4. The kinds of industry represented by respondent's investments in the securities of other companies should be shown by symbol opposite the the names of the issuing corporations, the symbols and industrial classifications to be as follows:

Symbol	Kind of Industry
ı	Agriculture, forestry, and fisheries
H	Mining
tii	Construction
IV	Manufacuring
V	Wholesale and retail trade
VI	Finance, insurance, and real estate
VII	Transportation, communications, and other public utilities
VIII	Services
IX	Government
x	All other

- 5. By carriers, as the term is used here, is meant companies owning or operating railroads, facilities auxiliary thereto such as bridges, ferries, union deposts, and other terminal facilities, sleeping cars, parlor cars, dining cars, freight cars, express service and facilities, electric railways, highway motor vehicles, steamboats and other marine transportation equipment, pipe lines (other than those for transportation of water), and other instrumentalities devoted to the transportation of persons or property for hire. Telegraph and telephone companies are not meant to be included.
- 6. Noncarrier companies should, for the purpose of these schedules, include telephone companies, telegraph companies, mining companies, manufacturing companies, hotel companies, etc. Purely "holding companies" are to be classed as noncarrier companies, even though the securities held by such companies are largely or entirely those issued or assumed by carriers.
- 7. By an active corporation is meant one which maintains an organization for operating property or administering its financial affairs. An inactive corporation is one which has been practically absorbed in a controlling corporation and which neither operates property nor administers its financial affairs. If it maintains an organization it does so only for the purpose of complying with legal requirements and maintaining title to property or franchises.
 - 8. Combine, in one amount, investments in which the original cost or present equity in total assets is less than \$10,000.
 - 9. Include investments in unincorporated entities such as lessee organizations. Exclude amounts normally settled on a current basis.
 - 10. Do not include the value of securities issued or assumed by respondent.
- 11. For affiliates which do not report to the Surface Transportation Board and are jointly owned, disclose in footnotes the name and extent of control of the other controlling entities.

310. INVESTMENTS AND ADVANCES AFFILIATED COMPANIES Dollars in Thousands

- Give particulars of investments in stocks, bonds, other secured obligations, unsecured notes, and investment advances of companies affiliated with respondent from accounts 715 (sinking funds), 716 (capital funds), 721 (investments and advances affiliated companies), and 717 (other funds).
- 2. Entries in this schedule should be made in accordance with the definitions and general instructions given on page 25, classifying the investments by means of letters, figures, and symbols in columns (a), (b) and (c).
- Indicate by means of an arbitrary mark in column (d) the obligation in support of which any security is pledged, mortgaged, or otherwise encumbered. Give names and other important particulars of such obligations in footnotes.
- 4. Give totals for each class and for each subclass and a grand total for each account.
- 5. Entries in column (d) should show date of maturity of bonds and other evidence of indebtedness. In case obligations of the same designation mature serially, the date in column (d) may be reported as "Serially ______ to _____." Abbreviations in common use in standard financial publications may be used to conserve space.

310. INVESTMENTS AND ADVANCES AFFILIATED COMPANIES - (Continued) (Dollars in Thousands)

- If any of the companies included in this schedule are controlled by respondent, the percent of control should be shown in column (e), In case
 any company listed is controlled other than through actual ownership of securities, give particulars in a footnote. In case of joint control, give names
 of other parties and particulars of control.
- 7. If any advances reported are pledged, give particulars in a footnote.
- 8. Investments in companies in which neither the original cost or present equity in total assets are less than \$10,000 may be combined in one figure.
- 9. Also include investments in unincorporated entities such as lessee organizations (exclusive of amounts nominally settled on a current basis).
- 10. This schedule should not include securities issued or assumed by respondent.
- 11. For affiliates which do not report to the Surface Transportation Board and are jointly owned, give names and extent of control by other entities by footnotes.

Railroad Annual Report R-1

### INSTRUCTIONS CONCERNING RETURNS TO BE MADE IN SCHEDULE 330

- 1. Give particulars of balances at the beginning and close of the year and of all changes during the year in Account No. 731, Road and Equipment Property" and Account No. 732, "Improvements on Leased Property" classified by primary accounts in accordance with the Uniform System of Accounts for Railroad Companies. The balances, by primary accounts, should, insofar as known, be stated in column (b) and all changes made during the year should be analyzed in columns (c) to (f), inclusive. Column (g) should be the net of the amounts in columns (c) through (f). Column (h) is the aggregate of columns (b) through (f), inclusive. Grand totals of columns (b) and (h) should equal the sum of Accounts 731 and 732 for the respective periods; if not, a full explanation should be made in a footnote.
- In column (c), show disbursements made for the specific purpose of purchasing, constructing, and equipping new lines, and for the extension
  of old lines, as provided for in Instruction 2-1, :Items to be charged* in the Uniform System of Accounts for Railroad Companies for such
  items.
- 3. In column (d), show the cost of a railway or portion thereof, acquired as an operating entity or system by purchase, merger, consolidation, reorganization, receivership sale or transfer, or otherwise.
- 4. Columns (c) and (e) should include all entries covering expenditures for additions and betterments, as defined, whether or not replacing other property.
- 5. All credits representing property sold, abandoned, or otherwise retires should be shown in column (f).
- 6. Both the debit and credit involved in each transfer, adjustment, or clearance, between road and equipment accounts, should be included in the column in which the item was initially included. Also, the transfer of prior years' debits or credits from investment in road and equipment to operating expenses or other accounts, or vice versa, should be included in the column applicable to current items of like nature. Each such transfer, adjustment, or clearance should be fully explained when in excess of \$100,000.
- 7. If during the year an individual charge of \$100,000 or more was made to Account No. 2, "Land for Transportation Purposes," state the cost, location, area, and other details which will identify the property in a footnote.
- 8. Report on line 29, amounts not included in the primary road accounts. The items reported should be briefly identified and explained under Notes and Remarks," below. Amounts should be reported on this line only under special circumstances, usualfy after permission is obtained from the Board for exceptions to prescribed accounting. Reference to such authority should be made when explaining the amounts reported. Respondents must not make arbitrary changes to the printed stub or column headings without specific authority from the Board.
- 9. If during the year a segment of transportation property was acquired, state in a footnote the name of the vendor, the mileage acquired, and the date of acquisition, giving location and cost of the property to the respondent. Also furnish a statement of the amount included in each primary account representing such property acquired, referring to the column or columns in which the entries appear.
- 10. If an amount of less than \$5,000 is used as the minimum for additions and betterments to property investment accounts as provided for in Instruction 2-2 of the Uniform System of Accounts for Railroad Companies, state the amount used in a footnote.

### 332. DEPRECIATION BASE AND RATES - ROAD AND EQUIPMENT OWNED AND LEASED FROM OTHERS (Dollars in Thousands)

1. Show in columns (b) and (e), for each primary account, the depreciation base used to compute depreciation charges for the month of January, and in columns (c) and (f), the depreciation charges for the month of December. In columns (d) and (g) show the composite rates used in computing depreciation charges for December, and on lines 30 and 39 of these columns show the composite percentage for all road and equipment accounts, respectively, ascertained by applying the primary account composite rates to the depreciation base used in computing the charges for December, and dividing that total by the total depreciation base for the same month. The depreciation base should not include cost of equipment used, but not owned, when the rents are included in rent for equipment and account nos. 31-22-00, 31-23-00, 31-25-00, 31-21-00, 35-21-00, 35-23-00, 35-22-00, and 35-25-00. It should include cost of equipment owned and leased to others when the rents therefrom are included in the rent for equipment, accounts nos. 32-21-00, 32-22-00, 32-23-00, 32-25-00, 36-21-00, 36-22-00, 36-23-00, and 36-25-00. inclusive. Composite rates used should be those prescribed or authorized by the Board, except that where the use of component rates has been authorized, the composite rates to be shown for the respective primary accounts should be recomputed from the December charges developed by the use of the authorized rates. If any changes in rates were effective during the year, give particulars in a footnote.

- 2. All leased property may be combined and one composite rate computed for each primary account, or a separate schedule may be included for each such property.
- 3. Show in columns (e), (f), and (g) data applicable to lessor property, when the rent therefore is included in accounts nos. 31-11-00, 31-12-00, 31-13-00, 31-21-00, 31-22-00, and 31-23-00, inclusive.
- 4. If depreciation accruals have been discontinued for any account, the depreciation base should be reported, nevertheless, in support of depreciation reserves. Authority for discontinuance of accruals should be shown in a footnote, indicating the effected account(s).
- 5. Disclosures in the respective sections of this schedule may be omitted if either total road leased from others or total equipment leased from others represents less than 5% of total road owned or total equipment owned, respectively.

# 335. ACCUMULATED DEPRECIATION - ROAD AND EQUIPMENT OWNED AND USED

(Dollars in Thousands)

- 1. Disclose the required information regarding credits and debits to Account No. 735, "Accumulated Depreciation: Road and Equipment Property." during the year relating to owned and used road and equipment. Include entries for depreciation of equipment owned but not used when the resulting rents are included in the "Lease Rentals Credit Equipment" accounts and "Other Rents Credit Equipment" accounts. Exclude any entries for depreciation of equipment that is used but not owned when the resulting rents are included in "Lease Rental Debit Equipment" accounts and "Other Rents Debit Equipment" accounts. (See Schedule 351 for accumulated depreciation to road and equipment owned and leased to others.)
- 2. If any data are included in columns (d) or (f), explain the entries in detail.
- 3. A debit balance in columns (b) or (g) for any primary account should be designated "Dr."
- 4. If there is any inconsistency between credits to reserves as shown in column (c) and charges to operating expenses, a full explanation should be given.
- 5. Enter amounts representing amortization under an authorized amortization program other than for defense projects on lines 29 and 39.

### Notes and Remarks

2003 beginning balance includes a reallocation of the purchase accounting balances between property, plant and equipment (PPE) and accumulated depreciation (AD).

# 339. ACCRUED LIABILITY - LEASED PROPERTY

The second section in the second

(Dollars in Thousands)

- Disclose the required information relating to credits and debits of Account 772, "Accrued Liability Leased Property," during the year concerning road and equipment leased from others.
- In column (c), enter amounts charged to operating expenses. In column (e), enter debits to accounts arising from retirements. In column (f), enter amounts paid to lessor.
- 3. Any inconsistencies between credits to account, charges to operating expenses, and payment to lessors should be fully explained.
- 4. Required disclosure may be omitted if leased road and equipment property represents 5% or less of total property owned and used.
- 5. If settlement for depreciation is made currently between lessee and lessor, and no debits or credits to Account No. 772 are made by the accounting company, show in column (c) the charges to operating expenses, and in column (f) show payments made to the lessor in settlement thereof.

# 340. DEPRECIATION BASE AND RATES-IMPROVEMENTS TO ROAD AND EQUIPMENT LEASED FROM OTHERS (Dollars in Thousands)

- 1. Show in column (b) for each primary account the depreciation base used in computing the depreciation charges for the month of January, and in column (c) show the depreciation base used in computing the depreciation charges for the month of December, and on lines 30 and 40 of these columns show the composite percentage of all road and equipment accounts, respectively, ascertained by applying the primary account composite rates to the depreciation base used in computing the charges for December and dividing the total so computed by the total depreciation base for the same month. This schedule should include only improvements to leased property charged to Account 732, "Improvements on Leased Property." The composite rates used should be those prescribed or otherwise authorized by the Commission, except that where the use of component rates has been authorized, the composite rates to be shown for the respective primary accounts should be recomputed from the December charges developed by the use of authorized rates. If any charges in rates were effective during the year, give full particulars in a footnote.
- 2. All improvements to leased properties may be combined and one composite rate computed for each primary account, or a separate schedule may be included for each such property.
- 3. If depreciation accruals have been discontinued for any account, the depreciation base should be reported, nevertheless, in support of depreciation reserves. Authority for the discontinuance of accruals should be shown in a footnote indicating the account(s) affected.
- 4. Disclosures in the respective sections of this schedule may be omitted if either total road leased from others or total equipment leased from others represents less than 5% of total road owned or total equipment owned, respectively. However, line 41, Grand Total, should be completed.

# 342. ACCUMULATED DEPRECIATION - IMPROVEMENTS TO ROAD AND EQUIPMENT LEASED FROM OTHERS (Dollars in Thousands)

- Enter the required information concerning debits and credits to Account 733, "Accumulated Depreciation Improvements on Leased Property,"
  during the year relating to improvements made to road and equipment property leased from others, the depreciation charges for which are included
  in operating expenses of the respondent.
- 2. If any entries are made for column (d) "Other credits" or column (f) "Other debits," state the facts occasioning such entries on page 39. A debit balance in columns (b) or (g) for any primary account should be shown in parenthesis or designated "Dr."
  - 3. Any inconsistency between credits to the reserve as shown in column (c) and charges to operating expenses should be fully explained on page 39.
  - 4. Show in column (e) the debits to the reserve arising from retirements. These debits should not exceed investment, etc.
- 5. Disclosures in the respective sections of this schedule may be omitted if either total road leased from others or total equipment leased from others represents less than 5% of total road owned or total equipment owned, respectively. However, line 39, Grand Total, should be completed.

# 350. DEPRECIATION BASE AND RATES - ROAD AND EQUIPMENT LEASED TO OTHERS

(Dollars in Thousands)

- 1. This schedule is to be used in cases where the related depreciation reserve is carried in the accounts of the respondent and the rent therefrom is included in Accounts 32-11-00, 32-12-00, 32-13-00, 32-22-00, and 32-23-00.
- 2. Show in columns (b) and (c), for each primary account, the depreciation base used in computing the depreciation for the months of January and December, respectively, with respect to road and equipment owned by the respondent but leased to others, the depreciation charges for which are not included in operating expenses of the respondent, but for which the depreciation reserve is recorded in the accounts of the respondent. If the base for road is other than the original cost or estimated original cost as found by the Board's Office of Economic and Environmental Analysis, brought to a current date by the respondent from its Order No. 3 records and accounts, or is other than ledger value for equipment, a full explanation should be given.
- 3. In column (d) show the composite rates used to compute depreciation for December, and on lines 29 and 38 of this column show the composite percentage of all road and equipment accounts, respectively, ascertained by applying the primary account composite rates to the depreciation base used to compute depreciation for December and dividing the total also computed by the depreciation base.
- 4. If depreciation accruals have been discontinued for any account, the depreciation base should be reported, nevertheless, in support of depreciation reserves. Authority for discontinuance of accruals should be shown in a footnote, indicating the effected account(s).
- 5. Disclosures in the respective sections of this schedule may be omitted if either total road leased to others or total equipment leased to others represents less than 5% of total road owned or total equipment owned, respectively. However, line 39, Grand Total, should be completed.

# 351. ACCUMULATED DEPRECIATION - ROAD AND EQUIPMENT LEASED TO OTHERS

(Dollars in Thousands)

- 1. This schedule is to be used in cases where the related depreciation reserve is carried in the accounts of the respondent and the rent therefrom is included in Accounts 32-11-00, 32-12-00, 32-21-00, 32-22-00, and 32-23-00.
- 2. Disclose credits and debits to Account 735, "Accumulated Depreciation Road and Equipment Property," during the year relating to road and equipment leased to others, the depreciation charges for which are not included in operating expenses of the respondent. (See Schedule 330 for the reserve relating to road and equipment owned and used by the respondent.
- 3. If any entries are made for column (d) "Other credits" or column (f) "Other debits," state the facts occasioning such entries on page 39. A debit balance in columns (b) or (g) for any primary account should be shown in parenthesis or designated "Dr."
- 4. Disclosures in the respective sections of this schedule may be omitted if either total road leased to others or total equipment leased to others represents less than 5% of total road owned or total equipment owned, respectively. However, line 39, Grand Total, should be completed.

# 352A. INVESTMENT IN RAILROAD PROPERTY USED IN TRANSPORTATION SERVICE (By Company) (Dollars in Thousands)

- 1. Disclose the investment in railway property used in transportation service at the close of the year. This investment represents the aggregate of property owned or leased by respondent and used in respondent's transportation service. Such property includes (a) investment reported in Accounts 731, "Road and Equipment Property" and 732, "improvements on Leased Property" of respondent, less any 731 or 732 property leased to others for their exclusive use of road, track, or bridges (including equipment or other railway property covered by the contract). Equipment leased to others under separate distinct contracts shall not be deducted from respondent's 731 or 732 property, and (b) the investment of other companies' 731 or 732 property (including operating and lessor railroads) used by respondent when the lease is for exclusive use or control of roads, tracks, or bridges (including equipment or other railway property covered by the contract). This excludes leased equipment from operating railroads under separate distinct contracts and the investment of other carriers in property jointly used by respondent.
- In column (a), classify each company in this schedule as: "R" for respondent, "L" for lessor railroad, "P" for inactive or proprietary company or "O" for other leased properties.
- 3. In columns (a) to (e), inclusive, first show the data requested for respondent (R); next show data for companies whose entire properties are used in transportation service of the respondent, divided between lessor (L) and proprietary (P) companies; followed by data for carriers and others (O), portions of whose property are used in transportation service of respondent. Show a total for each class of company in columns (d) and (e). Then show, as deductions, data for transportation property leased to carriers and others.
  - 4. In column (c), line-haul carriers report the miles of road used in line-haul service. Report miles in whole numbers.
- 5. In column (d), show the amount applicable to Accounts 731 and 732 on the books of companies whose names appear in column (b). Values of property of other carriers segregated by estimate or otherwise should correspond in amount to deductions made by the owners in their reports. If separate value is not available, an explanation should be provided. Differences between amounts shown in column (d) of this schedule and column (c), line 24, on the asset side of the general balance sheet of each individual railway should be explained in a footnote. Book values included in Accounts 731 and 732 of the owner should be reported in column (d) in reference to the investment of respondent in securities of the owner unless a good reason can be given for the contrary. Methods of estimating (by capitalizing rentals at 6% or otherwise) value of property of private owners, or portions of property of other carriers, should be explained.
- In column (e), show the amount of depreciation and amortization accrued as of the close of the year in Accounts 733, 734, 735, 736, andthat is applicable to the property of the carriers whose names are listed in column (b), regardless of where reserves therefor are recorded.

# 352B. INVESTMENT IN RAILROAD PROPERTY USED IN TRANSPORTATION SERVICE (By Property Account) (Dollars in Thousands)

- In columns (b) through (e) give, by primary accounts, the amount of investment at the close of the year in property of respondent and each group or class of companies and properties.
- 2. The amounts for respondent and for each group or class of companies and properties on line 44 should correspond with the amounts for each class of company and property shown in Schedule 352A. Continuing records shall be maintained by respondent of the primary property accounts separately for each company or property included in this schedule.
- 3. Report on line 29 amounts representing capitalization of rentals for leased property based on 6% per year where property is not classified by accounts by noncarrier owners, or where the cost of property leased from other carriers is not ascertainable. Identify noncarrier owners, and briefly explain on page 39 the methods of estimating value of property on noncarriers or property of other carriers.
- 4. Report on line 30 amounts not included in the accounts shown, or on line 29. The items reported should be briefly identified and explained. Also include here those items after permission is obtained from the Board for exceptions to prescribed accounting. Reference to such authority should be made when explaining amounts reported. Respondents must not make arbitrary changes to the printed stub or column headings without specific authority from the Board.

Railroad Annual Report R-1

### **412. WAY AND STRUCTURES**

(Dollars in Thousands)

- 1, Report freight expenses only.
- 2. The total depreciation expense reported in column (b), line 29, should balance to the sum of the depreciation expense reported in Schedule 410, column (f), lines 136, 137, and 138.
- 3. Report in column (c) the lease/rentals for the various property categories of way and structures. The total lease/rentals reported in column (c), line 29, should balance the net amount reported in Schedule 410, column (f), lines 118 through 123, plus lines 130 through 135. If an entire road or segment of track is leased and if the actual breakdown of lease/rentals by property category is not known, apportion the lease/rentals based on the percentage of the categories' depreciation bases for all categories of depreciable leased property. Use Schedule 352B of this report to obtain the depreciation bases of the categories of leased property.
- 4. Amortization adjustment of each road property type which is included in column (b) shall be repeated in column (d) as a debit or credit to the appropriate line item. The net adjustment on line 29, shall equal the adjustment reported on line 29 of Schedule 335.
- 5. Report on line 28, all other lease rentals not apportioned in any category listed on lines 1 through 27.
- 6. Line 11, Account 16, should not include computer and data processing equipment reported on line 37 of Schedule 415.

6.	Line 11, 2	CCCOGIN TO	, should not include computer and data p	rocessing equipment repo	rica on line or or ochean	Amortization	$\neg \neg$

# 414. RENTS FOR INTERCHANGED FREIGHT TRAIN CARS AND OTHER FREIGHT CARRYING EQUIPMENT

(Dollars in Thousands)

Report in this supporting schedule rental information by car type and other freight-carrying equipment relating to the interchange of railroad owned or leased equipment and privately owned equipment. (Reporting for leased equipment covers equipment with the camer's own railroad markings.)

The gross amounts receivable and payable for freight-train cars (line 19, columns (b) through (d), and line 19, columns (e) through (g), respectively) should balance with Schedule 410, column (f) lines 231 (credits) and 230 (debits). Trailer and container rentals in this schedule are included in Schedule 410, column (f) lines 315 and 316. However, the trailer and container rentals in this က

schedule will not balance to lines 315 and 316 of Schedule 410 because those lines include rents for "Other Equipment" which is reported in Schedule 415, column (f). The balancing of Schedules Report in columns (b) and (e) rentals for private-line cars (whether under rallnad control or not) and shipper owned cars.

Report in columns (c), (d), (l), and (g) rentals for railroad owned cars prescribed by the Board in Ex Part No. 334, for which rentals are settled on a combination mileege and time basis (basic per diem). Include railroad owned per diem tank cars on line 17.

NOTE: Mechanical designations for each car type are shown in Schedule 710. 410, 414, and 415 "Other Equipment" is outlined in note 6 to Schedule 415. 4, 10,

### GENERAL INSTRUCTIONS CONCERNING RETURNS TO BE MADE TO SCHEDULE 415

- 1. Report freight expenses only.
- Report by type of equipment all natural expenses relating to equipment functions (salaries and wages, materials, tools, supplies, fuels and lubricants, purchased services, and general).
- 3. Report in column (b) net repair expense, excluding the cost to repair damaged equipment.
  - Schedule 415, column (b) will balance to Schedule 410, column (f) as follows:
  - (a) Locomotives, line 5 plus line 38, compared to the sum of Schedule 410, lines 202, 203, and 216 (excluding wreck repairs). Do not report in Schedule 415, Equipment Damaged from Schedule 410, line 204.
  - (b) Freight cars, line 24 plus line 39, compared to the sum of Schedule 410, lines 221, 222, and 235 (excluding wreck repairs). Do not report in Schedule 415, Equipment Damaged from Schedule 410, line 223.
  - (c) Sum of highway equipment (line 32), floating equipment (line 35), passenger and other revenue equipment (line 36), computer and data processing equipment (line 37), machinery-other equipment (line 40), and work and other non-revenue equipment (line 41), compared to Schedule 410, the sum of lines 302 through 307, plus line 320 (excluding wreck repairs). Do not report in Schedule 415, equipment damaged from Schedule 410, line 308.

Note: Lines 216, 235, and 320 of Schedule 410 are credit amounts.

The allocation of freight car repair expenses reportable on Schedule 415 by car types shall be in accordance with Instruction 2-21, Freight train repair costing, 49 CFR 1201.

- 4. Depreciation expense for each class of equipment by car type shall be reported in columns (c) and (d). For improvements on leased property, Accounts 732 and 733, use a supplementary Schedule 415, which will relate to Schedules 340 and 342. Depreciation charges reported in columns (c) and (d) will balance to Schedule 410, column (f) as follows:
  - (a) Locomotives, lines 5 and 38, compared to Schedule 410, line 213.
  - (b) Freight cars, lines 24 and 39, compared to Schedule 410, line 232.
  - (c) Sum of highway equipment (line 32), floating equipment (line 35), passenger and other revenue equipment (line 36), computer and data processing equipment (line 37), machinery-other equipment (line 40), and work and other non-revenue equipment (line 41), compared to Schedule 410, line 317.
- 5. Amortization adjustment of each equipment type which is included in column (c) shall be reported in column (e) as a debit or credit to the appropriate line item. The net adjustment on line 43 shall equal the equipment amortization adjustment applicable to equipment used in freight service included in line 39, column (c), of Schedule 335.
- 6. Lease/rentals reported in column (f) should balance to column (f) of Schedule 410 as follows:
  - (a) Locomotives, lines 5 and 38, compared to Schedule 410, lines 207, 208, 211, and 212.
  - (b) Freight cars, lines 24 and 39, compared to Schedule 410, lines 226 and 227 (note that Schedule 410, lines 230 and 231, are reported in Schedule 415, and are not included in Schedule 415).
  - (c) Sum of lease/rentals for all other equipment, lines 32, 35, 36, 37, 40, and 41, will balance to Schedule 410, lines 311, 312, 315, and 316, except for the interchange rental on trailers and containers which is reported in Schedule 414. Therefore, both Schedules 414 and 415 should be used when balancing lease/rentals other equipment to Schedule 410. Do not report in Schedule 415, the trailer and container rentals reported in Schedule 414.
- 7. Investment base by types of equipment shall be reported in columns (g) and (h) and should not include the cost of equipment used but not owned when rents therefore are included in the rent for equipment and Account Nos. 31-21-00, 31-22-00, 31-23-00, 35-21-00, 35-22-00, and 35-23-00. It should include the cost of equipment owned and leased to others when the rents are included in the rent for Equipment Account Nos. 32-21-00, 32-22-00, 32-23-00, 36-21-00, 36-22-00, and 36-23-00.
  - Property used but not owned should also be included when the rent is included in Account Nos. 31-12-00, 31-13-00, 31-21-00, 31-22-00, and 31-23-00, inclusive.
  - The grand total of each equipment account in column (h) of Schedule 330 should equal the totals of line items constituting the equipment account totals of columns (g) and (h) of Schedule 415.
- 8. Accumulated depreciation for each class of equipment shall be reported in columns (i) and (j). The grand total of each equipment reserve account in column (g), Schedule 335, shall equal the combined aggregate total accumulated depreciation for line items constituting the corresponding equipment accounts reported in columns (i) and (j), on Schedule 415.

⁽¹⁾ Data reported on lines 38, 39, and 40 in columns (g) and (h) are investment recorded in property account 44, allocated to locomotives, freight cars, and other equipment.

⁽²⁾ Depreciation reported on lines 38, 39, and 40 in column (c) is calculated by multiplying the investment in each element by the effective composite rate for property account 44, and then adding or subtracting the adjustment reported in column (e). This calculation should equal the amount shown in column (c), Schedule 335.

### 417. SPECIALIZED SERVICE SUBSCHEDULE - TRANSPORTATION

(Dollars in Thousands)

- Report freight expenses only.
- Report in lines 1, 2, 3, 4, and 10 the total of those natural expenses (salaries and wages, material, tools, supplies, fuels and lubricants, purchased services, and general) incurred in the operation of each ype of specialized service facility. This schedule does not include switching services performed by train and yard crews in connection with or within specialized service facilities.
- When it is necessary to apportion expenses, such as administrative expenses to two or more services, they shall be apportioned on the most equitable basis available to the respondent and only to the services they support. The total expenses in column (j) should balance with the respective line items in Schedule 410, Railway Operating Expenses.
- delivery, or highway interchange service. Report in column (b), line 3, the expenses incurred in operating facilities for handling trailers and/or containers, including storage expenses. See Schedule 755, note R. Report in column (b), line 2, the expenses incurred in highway movements of trailers and containers performed at the expense of the reporting railroad within a terminal area for the purpose of pick-up, 5. The operation of floating equipment in line-haul service (between distinct terminals) should be reported in column (c) on line 2.. Floating operations conducted within a general terminal or harbor area 4.
  - 6. Report in column (g), line 3, the expenses incurred by the railroad in loading and unloading automobiles, trucks, etc., to and from bi-level and tri-level auto rack cars. Report on line 2, column (g), the expense incurred by the railroad in moving automobiles, etc., between bi-level and tri-level loading and unloading facilities over the highway to shippers, receivers, or connecting carriers. Report in should be reported in column (c), line 3.
- Report on line 4, column (b), the expenses relating to heating and refrigeration of TOFC/COFC trailers and containers (total debits and credits). The expenses on line 4, column (h) relate to refrigerator column (f) operating expenses for land facilities in support of floating operations, including the operation of docks and wharves.
- Report in column (i) total expenses incurred in performing rail substitute service, other highway revenue service, LCL terminal operations, warehouse operations, freight car transloading, grain elevator terminal operations, and livestock feeding operations only cars only.

### 418. SUPPORTING SCHEDULE - CAPITAL LEASES

(Dollars in Thousands)

Instructions:

This schedule will show the investment in capitalized leases in road and equipment by primary account.

### Column

(a) = primary account number and title for which capital lease amounts are included therein.

(b) = the total investment in that primary account.

(c) = the investment in capital leases at the end of the year.

(d) = the current year amortization.

(e) = the accumulated amortization relating to the leased properties.

			Capital Leases	
Primary Account	Total investment	Investment at	Current Year	Accumulated

### B. Adjustments to Federal Income Taxes

- In column (a) are listed the particulars which most often cause a differential between taxable income and pretax accounting income. Other
  particulars which cause such a differential should be listed under the caption "Other (Specify)," including state and other taxes deferred if
  computed separately. Minor items, each less than \$100,000, may be combined in a single entry under "Other (Specify)."
- 2. Indicate in column (b) the beginning of year totals of Accounts 714, 744, 762, and 786 applicable to each particular item in column (a).
- Indicate in column (c) the net changes in Accounts 714, 744, 762, and 786 for the net tax effect of timing differences originating and reversing in the current accounting period.
- Indicate in column (d) any adjustments, as appropriate, including adjustments to eliminate or reinstate deferred tax effects (credits or debits)
  due to applying or recognizing a loss carry-forward or a loss carry-back.
- The total of line 19 in columns (c) and (d) should agree with the total of the contra charges (credits) to Account 557, Provision for Deferred Taxes, and Account 591, Provision for Deferred Taxes - Extraordinary Items, for the current year.
- Indicate in column (e) the cumulative total of columns (b), (c), and (d). The total of column (e) must agree with the total of Accounts 714, 744, 762, and 786.

(Dollars in Thousands)

Give a brief description for all items, regardless of amount, included during the year in Accounts 555, Unusual or Infrequent Items; 560, Income or Loss From Operations or Discontinued Segments; 562, Gain or Loss on Disposal of Discontinued Segments; 570, Extraordinary Items; 590, Income Taxes on Extraordinary Items; 592, Cumulative Effect of Changes in Accounting Principles; 603, Appropriations Released; 606, Other Credits to Retained Earnings; 616, Other Debits to Retained Earnings; 620, Appropriations for Sinking and Other Funds; and 621, Appropriations for Other Purposes. If appropriations released reflect appropriations provided during the year, each account should not be reported.

For Accounts 519, Miscellaneous Income, and 551, Miscellaneous Income Charges, if the total in either account exceeds 10% of net income before extraordinary items, describe the three largest items in the account and any other items in excess of 10% of net income.

### 501. GUARANTIES AND SURETYSHIPS

(Dollars in Thousands)

1. If the respondent was under obligation as guarantor or surety for the performance by any other corporation or association of any agreement or obligation, show the particulars of each contract of guarantee or suretyship in effect at the close of the year or entered into and expired during the year. This inquiry does not cover the case of ordinary commercial paper maturing on demand or not later than two years after the date of issue. Items of less than \$50,000 may be shown as one total.

### 502. COMPENSATING BALANCES AND SHORT-TERM BORROWING AGREEMENTS

(Dollars in Thousands)

Using the following notes as a guideline, show the requirements of compensating balances and short-term borrowing agreements. Footnote disclosure is required even the arrangement is not reduced to writing.

- 1. Disclose compensating balances not legally restricted, lines of credit used and unused, average interest rate of short-term borrowings that are outstanding at balance sheet date, maximum amount of outstanding borrowings during the period and the weighted average rate of those borrowings.
- 2. Time deposits and certificates of deposit constituting compensating balances not legally restricted should be disclosed.
- 3. Compensating balance arrangements need only be disclosed for the latest fiscal year.
- 4. Compensating balances included in Account 703, Special Deposits, and in Account 717, Other Funds, should also be separately disclosed below.
- 5. Compensating balance arrangements are sufficiently material to require disclosure in footnotes when the aggregate of written and oral
- agreement balances amount to 15% or more of liquid assets (current cash balances, restricted and unrestricted, plus marketable securities).
- 6. When a carrier is not in compliance with a compensating balance requirement, that fact should be disclosed, along with stated and possible sanctions, whenever such possible sanctions may be immediate (not vague or unpredictable) and material.

12		Total debt related to road and equipment	Lines 10 and 11	1,528,001
13		Percent directly related to road	Line 10 /Line 12	
			Whole % + 2 decimals	33.15%
14		Percent directly related to equipment	Line 11 /Line 12	
			Whole % + 2 decimals	66.85%
15		Debt not directly related to road and equipment	Line 9 - Line 12	206,903
16		Road property debt (Note 2)	(Line 13 x Line 15) + Line 10	575,182
17		Equipment debt (Note 2)	(Line 14 x Line 15) + Line 11	1,159,722

### II. Interest Accrued During the Year

Line	Account	Title	Source	Balance
No.	No.			Close of Year
	(a)	(b)	(c)	(d)
18	546-548	Total interest and amortization (fixed charges)	Sch. 210, Line 42	121,357
19	546	Contingent interest on funded debt	Sch. 210, Line 44	
20	517	Release of premium on funded debt	Sch. 210, Line 22	
21		Total interest (Note 3)	(Line 18 + Line 19) - Line 20	121,357
22		Interest directly related to road property debt	Note 4	29,862
23		Interest directly related to equipment debt	Note 4	74,420
24		Interest not directly related to road or equipment property debt	Line 21 - (Lines 22 + 23)	17,075
25		Interest on road property debt (Note 5)	Line 22 + (Line 24 x Line 13)	35,522
26		Interest on equipment debt (Note 5)	Line 23 + (Line 24 x Line 14)	85,835
27		Embedded rate of debt capital - road property	Line 25 / Line 16	6.18%
28		Embedded rate of debt capital - equipment	Line 26 / Line 17	7.40%

Note 1: Directly related means the purpose which the funds were used for when the debt was issued.

Note 2: Line 16 plus Line 17 must equal Line 9.

Note 3: Line 21 includes interest on debt in Account 769 - Accounts Payable; Affiliated Companies.

Note 4: This interest relates to debt reported on Lines 10 and 11, respectively.

Note 5: Line 25 plus Line 26 must equal Line 21.

### INSTRUCTIONS CONCERNING RETURNS TO BE MADE IN SCHEDULE 512

Furnish the information called for below between the respondent and the affiliated companies
or persons affiliated with the respondent, including officers, directors, stockholders, owners,
partners, or their wives and other close relatives, or their agents. Examples of transactions are, but
are not restricted to, management, legal, accounting, purchasing, or other types of service
including the furnishing of materials, supplies, purchase of equipment, leasing of structures, land
and equipment, and agreements relating to allocation of officers' salaries and other common costs
between affiliated companies.

To be excluded are payments for the following types of services:

- (a) Lawful tariff charges for transportation services.
- (b) Payments to or from other carriers for interline services and interchange of equipment.
- (c) Payment to or from other carriers which may reasonably be regarded as ordinarily connected with routine operation or maintenance, but any special or unusual transactions should be reported.
- (d) Payments to public utility companies for rates or charges fixed in conformity with government authority.
- 2. In column (a) enter the name of the affiliated company, person, or agent with which respondent received or provided services aggregating \$50,000 or more during the year. If an affiliated company provides services to more than one affiliate, and the aggregate compensation amounts to \$50,000 or more for the year, list all the affiliates included in the agreement and describe the allocation of charges. If the respondent provides services to more than one affiliate, and the aggregate compensation amounts to \$50,000 or more for the year, reference to this fact should be made and the detail as to the allocation of charges should be stated. For those affiliates providing services to the respondent, also enter in column (a) the percent of affiliate's gross income derived from transactions with respondent.

The respondent may be required to furnish as an attachment to Schedule 512 a balance sheet and income statement for each affiliate with which respondent carrier had reportable transactions during the year, or alternatively, attach a "Pro Forma" balance sheet and income statement for that portion or entity of each affiliate which furnished the agreed to services, equipment, or other reportable transaction. The statements, if required, should be prepared on a calendar year basis in conformity with the prescribed schedules for the balance sheet and income statement in this Annual Report Form R-1, and should be noted (1) to indicate the method used for depreciating equipment or other property furnished to the carrier, and (2) whether the affiliate's Federal Income tax return for the year was filled on a consolidated basis with the respondent carrier.

 In column (b) indicate the nature of the relationship or control between the respondent and the company or person identified in column (a) as follows:

- (a) If respondent directly controls the affiliate, insert the word "direct."
- (b) If respondent controls through another company, insert the word "indirect."
- (c) If respondent is under common control with affiliate, insert the word "common."
- (d) If respondent is controlled directly or indirectly by the company listed in column (a), insert the word "controlled."
- (e) If control is exercised by other means, such as a management contract or other arrangement of whatever kind, insert the word "other" and provide a footnote to describe such arrangements.
- 4. In column (c), fully describe the transactions involved such as management fees, lease of building, purchase of material, etc. When the affiliate listed in column (a) provides more than one type of service in column (c), list each type of service separately and show the total for the affiliate. When services are both provided and received between respondent and an affiliate they should be listed separately and the amounts shown separately in column (e).
- in column (d), report the dollar amounts of transactions shown and the effect of any change in the method of establishing the terms from that used in the preceding period.
- 6. In column (e), report the dollar amounts due from or to related parties and, if not otherwise apparent, the terms and manner of settlement. Insert (P) for paid or (R) for received by the amount in column (e).

### INSTRUCTIONS CONCERNING RETURNS TO BE MADE IN SCHEDULE 700

State particulars of all tracks operated by the respondent at the close of the year, according to the following classifications:

- (1) Line owned by respondent.
- (2) Line owned by proprietary companies.
- (3) Line operated under lease for a specified sum, lessor being (A) an affiliated corporation, or (B) independent or not affiliated with the respondent.
- (4) Line operated under contract or agreement for contingent rent, owner being (A) an affiliated corporation, or (B) independent or not affiliated with the respondent.
  - (5) Line operated under trackage rights.

Give subtotals for each of the several numbered classes, in the order listed above, as well as the total for all classes.

Lengths of track should be reported to the nearest WHOLE mile adjusted to accord with footings; i.e., counting one-half mile or over as a whole mile and disregarding any fraction less than one-half mile.

In Column (a) insert the figure (and letter, if any) indicating its class in accordance with the above list of classifications.

In Column (b) give the various proportions of each class owned or leased by respondent, listing each proportion once in any grouping. Canadian mileage should be segregated and identified on separate lines in the various groupings. For each listing, in Column (d) give its entire length (the distances between terminals of single or first main track), and in the following columns the lengths of second main track, all other main tracks, passing tracks, cross-overs and tum-outs, way switching tracks, and yard switching tracks. These classes of tracks are defined as follows:

RUNNING TRACKS - Running tracks, passing tracks, cross-overs, etc., including turn-outs from those tracks to clearance points.

WAY SWITCHING TRACKS - Station, team, industry, and other switching tracks for which no separate service is maintained.

YARD SWITCHING TRACKS - Yard where separate switching services are maintained, including classification, house, team, industry, and other tracks switched by yard locomotives.

The returns in Columns (h) and (i) should include tracks serving industries, such as mines, mills, smelters, factories, etc. Tracks belonging to an industry for which no rent is payable should not be included.

Tracks leading to and in gravel and sand pits and quarries, the cost of which is chargeable to a clearing account and which are used in getting out material for the respondent's use, should not be included,

Class (1) includes all lines operated by the respondent at the close of the year to which it has title in perpetuity.

Class (2) includes each line, full title to which is in an inactive proprietary corporation of the respondent (i.e., one all of whose outstanding stocks or obligations are held by or for the respondent, and which is operated by the respondent or an affiliated system corporation without any accounting to the said proprietary corporation). It may also include such line when the actual title to all of the outstanding stocks or obligations rests in a corporation controlled by or controlling the respondent. But in the case of any such inclusion, the facts of the relationship to the respondent of the corporation holding the securities should be fully set forth in a footnote. An inactive corporation is one which has been practically absorbed in a controlling corporation, and which neither operates property nor administers its financial affairs. If it maintains an organization, it does so only for the purpose of complying with legal requirements and maintaining title to property or franchises.

Class (3) includes all tracks operated under a lease or formal conveyance of less than the grantor's interest in the property, with a specific and unconditional rent reserved. The fact that the lessor does or does not maintain an independent organization for financial purposes is immaterial in this connection.

Class (4) is the same as Class (3), except that the rent reserved is conditional upon earnings or some other fact.

Class (5) includes all tracks operated and maintained by others, but over which the respondent has the right to operate some or all of its trains. In the road of this class, the respondent has no proprietary rights, but only the rights of a licensee. Include in this class, also, on main tracks, industrial tracks and sidings owned by noncarrier companies and individuals when the respondent operates over them but does not have exclusive possession of them.

Road held by respondent as a joint or common owner or a joint lessee or under any joint arrangement should be shown in its appropriate class and the entry of length should be the entire length of the portion jointly held. The class symbol should have the letter (J) attached.

Road operated by the respondent as an agent for another carrier should not be included in this schedule.

## 702. MILES OF ROAD AT CLOSE OF YEAR - BY STATES AND TERRITORIES (SINGLE TRACK)

Give particulars, as of the close of the year, of all road operated and of all road owned but not operated. The respondent's proportion of operated road held by it as a joint or common owner, or Respondent's proportion of road jointly owned but not operated should be shown in column (h), as appropriate. Mileage which has been permanently abandoned should not be included in column (h). under a joint lease, or under any joint arrangement, should be shown in columns (b), (c), (d), or (e), as may be appropriate. The remainder of jointly operated mileage should be shown in column (f).

Mileage should be reported to the nearest WHOLE mile adjusted in accord with footings; i.e., counting one-half mile and over as a whole mile and disregarding any fraction less than one-half mile.

		Railroad Annua	al Report R-1

## INSTRUCTIONS CONCERNING RETURNS TO BE MADE IN SCHEDULE 710

Instructions for reporting locomotive and passenger-train car data.

- Give particulars of each of the various classes of equipment which respondent owned or leased during the year.
- In column (c), give the number of units purchased new or built in company shops. In column (d), give the number of new units leased from others. The term "new" means a unit placed in service for the first time on any railroad.
- 3. Units leased to others for a period of one year or more are reportable in column (I). Units temporarily out of respondent's service and rented to others for less than one year are to be included in column (I). Units rented from others for a period less than one year should not be included in column (I).
- 4. For reporting purposes, a "locomotive unit" is a self-propelled vehicle generating or converting energy into motion, and designed solely for moving other equipment. An "A" unit is the least number of wheel bases with superstructure designed for use singly or as a lead locomotive unit in combination with other locomotive units. A "B" unit is similar to an "A" unit but it is not equipped for use singly or as a lead locomotive unit. A "B" unit may be equipped with hostler controls for independent operation at terminals.
- 5. A 'self-propelled' car is a rail motor car propelled by electric motors receiving power from a third rail or overhead, or internal combustion engines located on the car itself. Trailers equipped for use only in trains of cars that are self-propelled are to be included as self-propelled equipment.
- 6. A "diesel" unit includes all units propelled by diesel internal combustion engines regardless of final drive or whether power may at times be supplied from an external conductor. Units other than diesel-electric, e.g., diesel-hydraulic, should be identified in a footnote, giving the number and a brief description. An "electric unit includes all units which receive electric power from a third rail or overhead contact wire, and use the power to drive one or more electric motors that propel the vehicle. An "other self-powered unit" includes all units other than diesel or electric, e.g., gas turbine, steam. Show the type of unit, service, and number, as appropriate, in a brief description sufficient for positive identification. An "Auxiliary unit" includes all units used in conjunction with locomotives, but which draw their power from the "mother" unit, e.g., boosters, slugs, etc. For reporting purposes, indicate radio-controlled self-powered diesel units on lines 1 through 8, as appropriate. Radio-controlled units that are not self-propelled, i.e., those without a diesel, should be reported on line 13 under "auxiliary units."

- 7. Column (k) should show aggregate capacity for all units reported in column (j), as follows: For locomotive units, report the manufacturer's rated horsepower (the maximum continuous power output from the diesel engines or engines delivered to the main generator or generators for tractive purposes). Exclude capacity data for steam locomotives. For passenger-train cars, report the number of passenger seats available for revenue service, counting one passenger to each berth in sleeping cars.
- 8. Passenger-train car types and service equipment car types correspond to AAR Mechanical Division designations. Descriptions of car codes and designations are published in The Official Railway Equipment Register.
  - 9. Cross-checks

Schedule 710	Line 11, column (I)	Line 12, column (I)	Line 13, column (I)	Line 14, column (I)	Line 15, column (I)	Line 16, column (I)
	11	11	IL	II	"	II
Schedule 710	Line 5, column (j)	Line 6, column (j)	Line 7, column (j)	Line 8, column (j)	Line 9, column (j)	Line 10, column (j)

When data appear in column (j), lines 1 through 8, column (k) should have data on the same lines.

When data appear in columns (k) or (l), lines 36 through 53, and 55, column (m) should have data on the same lines.

# Year 2005 710. INVENTORY OF EQUIPMENT - Continued

4. Column (m) should show aggregate capacity for all units reported in Columns (k) and (l), as follows. For freight-train cars, report the norminal capacity (in tons of 2,000 lbs) as provided for in Rule 86 of the AAR Code of Rules Governing Cars in Interchange. Convert the capacity of tank cars to capacity in tons of the commodity which the car is intended to customarily carry.

5. Time-mileage cars refers to freight cars, other than cabooses, owned or held under lease arrangement, whose interline rental is settled on a per diem and line haul mileage basis under "Code of Car Hire Rules" or would be so settled if used by another railroad.

# 710S. UNIT COST OF EQUIPMENT INSTALLED DURING THE YEAR

(Dollars in Thousands)

- 1. Give particulars as requested, separately, for the various classes of new units and rebuilt units of equipment installed by respondent during the year. If information regarding the cost of any units installed is not complete at time of filing of report, the units should be omitted, but reference to the number of units omitted should be given in a footnote, the details as to cost to be given in the report of the following year. The cost of units under construction at the close of the year should not be reflected in this schedule even though part of the cost appears in the property account for the year. Indicate in column (e) whether an installation represents equipment purchased (P), built or rebuilt by contract in outside railroad shops (C), or built or rebuilt in company or system shops (S) including units acquired through capitalized leases (L).
- 2. In column (a) list each class or type of locomotive unit, car, or TOFC/COFC equipment on a separate line. By class is meant the standard classification used to distinguish types of locomotive units, freight cars or other equipment adopted by the Association of American Rallroads, and should include physical characteristics requested by Schedule 710. Locomotive units should be identified as to powar source, wheel arrangement, and horsepower per unit, such as multiple-purpose diesel locomotive A units (B-B), 2,500 HP. Cars should be identified as to powar source on the control of the characteristics, such as aluminum-covered hopper car (LO), steel boxcars-special service (XAP), etc. For TOFC/COFC show type of equipment as enumerated in Schedule 710.
- 3. In column (c) show the total weight in tons of 2,000 pounds. The weight of the equipment acquired should be the weight empty.
- 4. The cost should be the complete cost as entered on the ledger, including foreign line freight charges and handling charges.
- 5. Data for this schedule should be confined to the units reported in Schedule 710, columns (c) and (e) for locomotive units, passenger-train cars and company service cars and columns (d) and (f) for freight train cars, floating equipment and highway revenue equipment. Disclose new units in the upper section of this schedule and in the lower section disclose rebuilt units acquired or rewritten into the respondent's accounts. The term "new" as used herein shall mean a unit or units placed in service for the first time on any rallroad.
- 6. All unequipped boxcars acquired in whole or in part with incentive per diem funds should be reported on separate lines and appropriately identified by footnote or sub-heading.

# GENERAL INSTRUCTIONS CONCERNING RETURNS TO BE MADE IN SCHEDULES 720, 721, 723, AND 726

For purposes of these schedules, the track categories are defined as follows:

Track category 1 A - Freight density of 20 million or more gross ton miles per track mile per year (include passing tracks, turnouts and crossovers)

B - Freight density of less than 20 million gross ton miles per track mile per year, but at least 5 million (include passing tracks, turnouts and crossovers)

C - Freight density of less than 5 million gross ton miles per track mile per year, but at least 1 million (include passing tracks, turnouts and crossovers)

D - Freight density of less than 1 million gross ton miles per track mile per year(include passing tracks, tumouts and crossovers)

E - Way and yard switching tracks (passing tracks, crossovers and turnouts shall be included in category A, B, C, D, F, and Potential abandonments, as appropriate).

F - Track over which any passenger service is provided (other than potential abandonments). Mileage should be included within track categories A through E unless there is dedicated entirely to passenger service F.

Potential abandonments - Route segments identified by railroads as potentially subject to abandonment as required by Section 10904 of the Interstate Commerce Act

2. This schedule should include all class 1, 2, 3, or 4 track from schedule 700 that is maintained by the respondent (class 5 is assumed to be maintained by others).

3. If, for two consecutive years, a line segment classified in one track category maintains a traffic density which would place it in another, it shall be reclassified into that category as of the beginning of the second year.

4. Traffic density related to passenger service shall not be included in the determination of the track category of a line segment.

# 720. TRACK AND TRAFFIC CONDITIONS

Disclose the requested information pertaining to track and traffic conditions.

# 724. RAILS LAID IN ADDITIONAL TRACKS AND IN NEW LINES AND EXTENSIONS

(Dollars in Thousands)

1. Give particulars of all rails applied during the year in connection with the construction of new track.

In Column (a) classify the kind of rail applied as follows:

- (1) New steel rails, Bessemer process.
- (2) New steel rails, open-hearth process
- (3) New rails, special alloy (describe more fully in a footnote).
- (4) Relay rails.
- 2. Returns in Columns (c) and (g) should be reported in WHOLE numbers. Fractions of less than one-half should be disregarded and fractions of one-half or more should be counted as one.
- 3. The returns in Columns (d) and (h) should include the cost of loading at the point of purchase ready for shipment, the freight charges paid to foreign lines, and the cost of handling rails in general supply and storage yards. The cost of unloading, hauling over carrier's own lines, and placing the rails in tracks, as well as train service in connection with the distribution of the rail, should not be included in this schedule.

# 725. WEIGHT OF RAIL

Give the particulars called for below concerning the road and track operated by respondent at the close of the year. Only the respondent's proportion of jointly owned mileage should be included. Under "Weight of rail," the various weights of rail should be given. Road and track occupied under trackage rights or other form of license should not be included herein, but all road and track held under any form of lease (granting exclusive possession to the lessee) should be included.

2	COST OF FUEL \$(000)*	\$ 1,959,895	5
9	Work Train	637,738	9

*Show cost of fuel charged to train and yard service (function 67-Logo. Fuels). The cost stated for diesel fuel should be the total charges in the accounts specified, including freight charges and handling expenses. Fuel consumed by mixed and special trains that are predominantly freight should be included in freight service, but where the service of mixed or special trains is predominantly passenger, the fuel should be included in passenger service.

# INSTRUCTIONS CONCERNING RETURNS TO BE MADE IN SCHEDULE 755

Unit Train, Way Train, and Through Train data under items 2, 3, 4, 6, and 12 shall be obtained from conductor's wheel reports (freight) or similar reports. Unit train service is a specialized scheduled shuttle type service in equipment (railroad or privately owned) dedicated to such service, moving between origin and destination. The applicable tariffs and/or contracts generally require that a specific minimum tonnage or quantity of carloads be tendered as a unit for shipment on one bill of lading or other shipping document in a solid train for movement between origin and destination. Such tariffs and/or contracts generally contain restricted detention provisions and are subject to time-volume requirements which reflect the approximate capacity of the unit trains for the stated period. Way trains are defined as trains operated primarily to gather and distribute cars in road service and move them between way stations or way points. Through trains are those trains operated between two or more major concentration or distribution points. Do not include unit train statistics in way or through train statistics. A work train is a train operated solely or preponderantly for the purpose of transporting company freight, work equipment, or company employees. Statistics for work trains should be reported under Item 11, only. Statistics related to company equipment, company employees, and company freight moving in transportation trains are not to be reported in Items 4-17, 6-04, 7-02, 8-04, and 8-05, as instructed in notes I, K, and L.

- (A) Report miles of road operated at close of year, excluding industrial tracks, yard tracks, and sidings.
- (B) A train-mile is a movement of a train a distance of one mile. In computing train-miles, fractions representing less that one-half mile shall be disregarded and other fractions shall be considered as one mile. Train Miles-Running shall be based on the actual distance run between terminals and/or stations and shall be computed from the official time tables or distance tables. Train-Miles shall not be increased to cover the running of locomotives from shops to terminals, doubling hills, switching, or other work at way stations, or for the service of helper or pusher locomotives or of extra locomotives on double-head or triple-head trains. When the carrier's trains are detoured over foreign roads, the miles shall be computed on the basis of the miles actually run and in accordance with the service performed. Train-miles shall be kept separately for trains hauled by locomotives and trains moved by motorcars.
- (C) A motorcar is a self-propelled unit of equipment designed to carry freight or passengers, and is not considered a locomotive.
- (D) A locomotive is a self-propelled unit of equipment designed solely for moving other equipment. A locomotive unit-mile is a movement of a locomotive unit a distance of one mile under its own power. Include miles made by all locomotive units. Exclude miles made by motorcars. Miles of locomotives in heliper service shall be computed on the basis of actual distance run in such service.
- (E) All locomotive unit-miles in road service shall be based on the actual distance run between terminals and/or stations. Follow instruction (B) regarding fractions and official time tables for computing locomotive miles.
- (F) Train switching locomotive-miles shall be computed at the rate of six miles per hour for the time actually engaged in such service. Include miles allowed for train locomotives for performing switching service at terminals and way stations.
- (G) Yard switching locomotive-miles shall be computed at the rate of six miles per hour for the time actually engaged in yard switching service. Include miles allowed for yard locomotives for switching service in yards where regular switching service is maintained and in terminal switching and transfer service.
- (H) A car-mile is a movement of a unit of car equipment a distance of one mile. Use car designations shown in Schedule 710. Under Railroad Owned and Leased Cars, items 4-01 and 4-11, report both foreign cars and respondent's own cars while on the line of the respondent railroad. In Items 4-13 and 4-15, report private-line cars and shipper owned cars. Loaded and empty miles should be reported whether or not the railroad reimbursed the owner on a loaded and/or empty mile basis. Report miles made by flatcars carrying empty highway trailers that are not moving under revenue billigs as empty freight cars-miles. Do not report miles made by motorcars or business cars.
- (I) Exclude from Items 4-01, 4-11, 4-13, and 4-5, car-miles of work equipment, cars carrying company freight, and non-revenue private line cars moving in transportation trains. Include such car-miles in Items 4-17, 4-18, and 4-19. If private line cars move in revenue service, yhe loaded and empty miles should not be considered n0-payment or non-revenue car-miles.
- (J) Report miles actually run by passenger-train cars in transportation service. Passenger-train car-miles include miles run by coaches and cars in which passengers are carried at regular tariff fares without extra charge for space occupied; miles run by combination passenger and baggage, passenger and mail, passenger and express; miles run by sleeping, parlor, and other cars for which an extra fare is charged; miles run by dining, cafe, and other cars devoted exclusively to the serving of meals and other refreshments and by club, lounge, and observation cars; and miles run by other passenger-train cars where services are combined, such as baggage, express, and mail.
- (K) From conductor's or dispatcher's train reports or other appropriate sources, compute weight in tons (2,000 pounds). Item 6-01 includes weight of all locomotive units moved one mile in transportation trains. Ton-miles of motorcars should be excluded. Items 6-02 and 6-03 represent tons behind locomotive units (cars and contents, cabooses) moved one mile in transportation trains (excluding non-revenue gross ton-miles). Nonrevenue gross ton-miles in transportation trains include work equipment and cars carrying company freight and their contents. Use 150 pounds as the average weight per passenger and four tons as the average weight of contents of each head-end car.
- (L) From conductor's train reports or other appropriate sources, compute ton-miles of freight. Ton-miles represent the number of tons of revenue and nonrevenue freight moved one mile in a transportation train. Include net ton-miles in motorcar trains. Exclude I.c.I. shipment of freight handled in mixed baggage express cars. Total ton-miles of revenue freight should correspond to the ton-miles reported on Form CBS.

# INSTRUCTIONS CONCERNING RETURNS TO BE MADE IN SCHEDULE 755 - (Concluded)

- (M) Road service represents elapse time of transportation trains (both ordinary and light) between the time of leaving the initial terminals and the time at final terminals, including trains switching at way stations and delays on road as shown by conductor's or dispatcher's train reports. Include time of motorcar service performed by train locomotives at terminals and way stations. Report in Item 9-02, train switching hours included in Item 9-01. Train switching is the time spent by the train while performing switching service at terminals and way stations where no regular yard service is maintained. A train hour is independent of the number of locomotives in the train.
- (N) Yard switching hours are hours expended in switching service performed by yard crews in yards where regular switching service is maintained, including switching and transfer service in connection with the transportation of revenue and incidentally of company freight. Hours in yard switching are independent of the number of locomotives used.
- (O) Work-train miles include the miles run by trains engaged in company service such as official inspection; inspection trains for railway commissioners for which no revenue is received; trains running special with fire apparatus to save carrier's property from destruction: trains run for transporting the carrier's employees to and from work when no transportation charge is made; wrecking trains run solely for the purpose of transporting company material; trains run for distributing material and supplies for use in connection with operations; and all other trains used in work-train services. Exclude miles run by locomotives while engaged incidentally in switching company materials in company shops or material yards in connection with regular yard switching service or in switching equipment for repairs between yards and shops.
- (P) The number of loaded freight cars shall be obtained from the conductors' wheel report and shall be the sum of all loaded cars handled by each train. For example, if a car moves loaded (1) in a way train from the origination points, (2) in two through trains, and (3) in a way-train to the destination point, the total count of loaded cars would be four: two counts for the movements in the way trains and two counts for the movements in through trains. Therefore, each car originated or received from a connecting carrier receives an initial count, plus one count for each subsequent physical transfer between trains on respondent's lines. No additional count is given because of crew change or changes in track identification number unless there is a physical transfer of the car between trains. Each car moving under revenue billing shall be considered as a loaded car.
- (Q) Report vehicles (TOFC trailers/containers, automobiles and trucks) loaded and unloaded to and from TOFC and multiple level freight cars when the work is performed at the railroad's expense.
- (R) Report the number of loaded revenue trailers/containers picked up, plus revenue trailers/containers delivered in TOFC/COFC and in highway interchange service, when the work is performed at the railroad's expense. (Performed at railroad's expense means that railroad employees perform the service or that the railroad hires a subsidiary or outside contractor to perform the service.) Do not include those trailers/containers which are picked up or delivered by a shipper or motor carrier, etc. when a tariff provision requires that the shipper or motor carrier, etc., and not the railroad, perform that service. Note: The count should reflect the trailers/containers for which expenses are reported in Schedule 417, line 2, column (b).
- (S) Report under Marine Terminals, Item 16, the tons loaded onto and unloaded from marine vessels at the expense of the reporting railroad.
- (T) Report the total number of foreign railroad cars on line at the end of the year (except surplus cars, see below). Foreign railroad cars refers to freight cars owned by other railroads whose interline rental is settled on time (by hour) and actual line-haul mileage charges under the Code of Car Hire Rules.

Carriers will be governed by local conditions in determining whether a car at an interchange point should be considered "on-line."
Unserviceable cars include cars on repair tracks undergoing or awaiting repairs. They include cars on repair tracks repaired and awaiting switching, cars on repair tracks undergoing or awaiting repairs switching, cars awaiting movement to repair tracks held in train yards (excluding cars which are to be repaired in the train yard without loss of time), cars moving empty in trains en route to shop, and cars stored awaiting disposition.

Surplus cars are cars which are in serviceable condition for loading on the last day of the year, but have not been placed for loading within 48 hours. This count can be an annual average based on weekly count of cars that have not been placed for loading within 48 hours.

- (U) Flat-TOFC/COFC Car-miles reported in lines 25 (4-020), 41 (4-120), 57 (4-140), and 75 (4-160) will be computed using cars rather than constructed container platforms. For example, an articulated car consisting of five platforms moved one mile will be counted as one car-mile, not five car-miles.
- (V) The intermodal Load Factor reported on Line 134 will be calculated for the average number of intermodal (TOFC/COFC) units loaded on the average intermodal car. Units are to be calculated in the same manner as Line 123 (13 TOFC/COFC - No. of Revenue Trailers & Containers Loaded and Unloaded (Q)). Intermodal cars will be calculated in accordance with instruction U for reporting Flat-TOFC/COFC Car-miles. Both intermodal (TOFC/COFC) units and intermodal cars are to be calculated using actual units and not constructed intermodal (TOFC/COFC) units or cars.
