Correct name and address if different than shown	Full name and address of reporting carrier (Use mailing label on original, copy in full on duplicate)

To The Surface Transportation Board

For the Year Ending December 31, 2007

NOTICE

- 1. This report is required for every class I railroad operating within the United States. Three copies of this Annual Report should be completed. Two of the copies must be filed with the Surface Transportation Board, Office of Economics, Environmental Analysis, and Administration, The Mercury Building, 1925 K St. N.W., Suite 500, Washington, DC 20423, by March 31 of the year following that for which the report is made. One copy should be retained by the carrier.
- 2. Every inquiry must be definitely answered. Where the word "none" truly and completely states the fact, it should be given as the answer. If any inquiry is inapplicable, the words "not applicable" should be used.
- 3. Wherever the space provided in the schedules in insufficient to permit a full and complete statement of the requested information, inserts should be prepared and appropriately identified by the number of the schedule.
- 4. All entries should be made in a permanent black ink or typed. Those of a contrary character must be indicated in parenthesis. Items of an unusual character must be indicated by appropriate symbols and explained in footnotes.
- 5. Money items, except averages, throughout the annual report form should be shown in thousands of dollars adjusted to accord with footings. Totals for amounts reported in subsidiary accounts included in supporting schedules must be in agreement with related primary accounts. For purposes of rounding, amounts of \$500 but less than \$1,000 should be raised to the nearest thousand dollars, and amounts of less than \$500 should be lowered.
- 6. Except where the context clearly indicates some other meaning, the following terms when used in this Form have the following meanings:
 - (a) Board means Surface Transportation Board.
 - (b) Respondent means the person or corporation in whose behalf the report is made.
 - (c) Year means the year ended December 31 for which the report is being made.
- (d) Close of the Year means the close of business on December 31 for the year in which the report is being made. If the report is made for a shorter period than one year, it means the close of the period covered by the report.
- (e) Beginning of the Year means the beginning of business on January 1 of the year for which the report is being made. If the report is made for a shorter period than one year, it means the beginning of that period.
- (f) Preceding Year means the year ended December 31 of the year preceding the year for which the report is made.
- (g) The Uniform System of Accounts for Railroad Companies means the system of accounts in Part 1201 of Title 49, Code of Federal Regulations, as amended.
- 7. The ICC Termination Act of 1995 abolished the Interstate Commerce Commission and replaced it with the Surface Transportation Board. Any references to the Interstate Commerce Commission or Commission contained in this report refer to the Surface Transportation Board.
- 8. Any references to the Bureau of Accounts or the Office of Economics contained in this report refer to the Office of Economics, Environmental Analysis, and Administration of the Surface Transportation Board.
- 9. NOTE An additional line has been added to Schedule 755 (Line 134) effective with the 2004 R-1. Also note that the instructions for completion of Schedule 755 now have two additional items (Instructions U and V).
- 10. NOTE The columns in Schedule 710-Distribution of Locomotive Units In Service of Respondent At Close Of Year, Disregarding Year Of Rebuilding have been revised to reflect new five year periods.
- 11. NOTE The following supplemental information about STB information collections is provided in compliance with OMB requirements and pursuant to the Paperwork Reduction Act of 1995, 44 U.S.C. 3501et seq.:

10. PENSION AND OTHER EMPLOYEE BENEFITS

SOO participates in a noncontributory defined benefit pension plan covering substantially all SOO nonunion employees. Benefits are based on final average pay and years of service. Benefits are funded by SOO contributions and plan earnings consistent with funding requirements of federal law and regulations. Plan assets consist principally of a domestic stock fund, fixed income securities and an international stock fund.

In addition, SOO has a noncontributory defined benefit pension plan for eligible United Transportation Union ("UTU") employees who elected a buyout of certain compensation based work rule payments as of December 31, 1995. Under terms of the plan, upon retirement, eligible employees may elect payments in either a lump sum or an annuity. Payment is based on the eligible employee's total Annual Benefit Credits when they terminate employment with SOO and its affiliates. Benefits are funded by SOO contributions and plan earnings consistent with minimum funding requirements of federal law and regulations. Plan assets consist principally of mutual funds and temporary cash investments.

SOO also provides certain post retirement benefits other than pensions for both union and nonunion employees, consisting of major medical coverage to age 65 and life insurance, both based on age and service requirements. During 2007, six unions representing approximately 900 active employees ratified changes to their collective bargaining agreements, which resulted in their postreturement healthcare benefits being administered by a multi-employer plan. As a result of the ratifications, SOO is now only required to recognize as net postretirement benefit cost the required contributions for the period for the unions that ratified the change. Therefore, in 2007, SOO reduced its liability by \$10,155.

SOO previously adopted the recognition and disclosure requirements of SFAS No. 158 as of December 31, 2006. As a result of the adoption of SFAS No. 158, SOO has recorded a cumulative effect adjustment as a component of Accumulated Other Comprehensive Income (Loss) within Shareholder's Equity SOO's disclosures for the year ended December 31, 2006, also reflect the revised accounting and disclosure requirements fo SFAS No. 158. The following illustrates the status of each of these benefit plans as of SOO's December 31 financial statement date. The measurement for the Postretirement Other than Pension Benefit Plans is December 31. SOO continues to use a November 30 measurement date for the pension plans and will adopt a December 31 measurement date for these plans in a future period as permitted by SFAS No. 158.

A reconciliation of the changes in benefit obligations and fair value of assets of SOO's plans is as follows:

In 2007 and 2006, SOO made contributions to the management pension plan after the measurement date of November 30, but prior to December 31. The December 2007 contribution was \$2.9 million and the December 2006 contribution was \$3.9 million. The December 2006 contribution is included in the 2007 employer contribution in the change in plan assets table above. The December 2007 contribution is not included in the change in plan assets table above.

Amounts recognized in accumulated other comprehensive income (pre-tax) consist of:

10. PENSION AND OTHER EMPLOYEE BENEFITS (Continued)

Plan assets for the management pension plan as of the measurement date, were as follows:

	1	Percentage
	Amount	Total
Cash and receivables	. \$2,407	2%
U.S. government bonds	21,209	22%
Corporate bonds	14,633	15%
Listed equity securities	418	0%
Listed equities undex funds	59,543	61%
	\$98,210	100%

Assets are invested to balance the goals of maximizing long-term return and minimizing risk in a prudent manner. Target asset allocation on a long-term central tendency basis is 60% equities and 40% fixed income. Plan assets do not include any SOO or Canadian Pacific Railway Company stock.

SOO presently estimates \$7.3 million in pension fund contribution requirements in 2008.

The following benefit payments which reflect expected future service, as appropriate, are expected to be paid:

			rostrettrement
	Management	UTU	Other Than Pension
	Pension Plan	Pension Plan	Benefit Plans
2008	8,041	152	3,498
2009	8,263	214	3,749
2010	8,466	317	3,712
2011	8,760	201	3,960
2012	9,048	102	3,826
2013-2017	48,472	1,305	23,240

Assumed health care cost trends have a significant effect on the amounts reported for health care plans. The 2008 health care cost inflation rate is estimated to be 8% dropping to 5% by year 2011. A one-percentage point change in assumed health care cost trend rates would have the following effects:

	1-PERCENTAGE Point Increase	1-PERCENTAGE Point Decrease
Effect on total of service and interest cost components	\$461	(\$400)
Effect on postretirement benefit obligation	\$4,240	(\$3,775)

SOO provides defined contribution savings plans to several groups of employees. Participants may contribute certain percents of their annual compensation to the plans and SOO in some cases will also make a contribution on the participant's behalf. Participants are fully vested in SOO's contribution. The total annual expense for all such plans for 2007 and 2006 was \$725 and \$731, respectively.

SOO participates in certain stock-based compensation plans of Canadian Pacific Railway Company (CPRC). Under CPRC's stock option plan, options are granted to eligible employees and directors of SOO to purchase common stock of CPRC at a price equal to the market value of the shares at the grant date. Options vest between 24 and 36 months after the grant date and expire ten years after the grant date. One-half of the options may be exercised in the form of Share Appreciation Rights, whereby the employee receives a cash payment in lieu of stock. Operating expenses associated with these plans in 2007 and 2006 was \$6 and \$1,121, respectively.

In 2006, SOO adopted on a prospective basis SFAS No. 123R, Share-Based Payment, which replaces SFAS No. 123 and supersedes APB Opinion No. 25, Accounting for Stock Issued to Employees. SFAS No. 123R requires that the cost of all share-based payments to employees, including grants of employee stock options, be recognized in the financial statements based on their fair values. That cost will be recognized as an expense over the vesting period of the award. The expense recognized in accordance with SFAS No. 123R in 2007 and 2006 was \$689 and \$381, respectively.

SOO also participates in CPRC's employee share purchase plan whereby both employee and SOO contributions are used to purchase CPRC shares on the open market for employees. SOO's contributions are expensed over the 15-month vesting period. Operating expense associated with the program in 2007 and 2006 was \$816 and \$765, respectively.

240. STATEMENT OF CASH FLOWS

(Dollars in thousands)

Give the information as requested concerning the cash flows during the year. Either the direct or indirect method can be used. The direct method shows as its principal components operating cash receipts and payments, such as cash received from customers and cash paid to suppliers and employees, the sum of which is net cash flow from operating activities. The indirect method starts with net income and adjusts it for revenues and expense items that were not the result of operating cash transactions in the current period to reconcile it to net cash flow from operating activities. If the direct method is used, complete lines 1-41. If the indirect method is used, complete lines 10-41. Cash for the purpose of this schedule shall include cash and cash equivalents which are short-term, highly liquid investments readily convertible to known amounts of cash and so near their maturity that they present insignificant risk of changes in value because of changes in interest rates. Information about all investing and financing activities which do not directly affect cash shall be separately disclosed in footnotes to this schedule. They shall clearly relate the cash (if any) and noncash aspects of transactions. Examples of noncash investing and transactions include converting debt to equity acquiring assets by assuming directly related liabilities, such as purchasing a building by incurring a mortgage to the seller; obtaining an asset by entering into a capital lease; and exchanging noncash assets or liabilities. Some transactions are part cash and part noncash; only the cash portion shall be reported directly in the statement of cash flows. Refer to FAS Statement No. 95, Statement of Cash Flows, for further details.

GENERAL INSTRUCTIONS CONCERNING RETURNS IN SCHEDULES 310, 310A

- 1. Schedule 310 should give particulars of stocks, bonds, other secured obligations, unsecured notes, and investment advances of affiliated companies held by respondent at the close of the year. Also, disclose the investments made, disposed of, and written down during the year and the applicable dividends and interest credited to income as a result of those investments. They should exclude securities issued or assumed by respondent. For definition of affiliated companies, see the rules governing Account No. 721, "Investments and Advances, Affiliated Companies", in the Uniform System of Accounts for Railroad Companies
- List the investments in the following order and show a total for each group and each class of investments by accounts in numerical order:
 - (A) Stocks
 - (1) Carriers-active
 - Carriers unactive Noncarriers-active
 - (4) Noncarriers-inactive
 - Bonds (including U.S. Government bonds)
 - Other secured obligations
 - (D) Unsecured notes
 - Investment advances
- The subclassification of classes (B), (C), (D) and (E) should be the same as that provided for class (A).
- The kinds of industry represented by respondent's investments in the securities of other companies should be shown by symbol opposite the names of the issuing corporation. The symbols and industrial classification are as follows: Symbol

Kind of Industry Agriculture, forestry, and fisheries

Mining П

FII Construction

10

Manufacturing Wholesale and retail trade

Finance, insurance, and real estate VI

VII Transportation, communications, and other public utilities

VIII Services

ΙX Government

- By carriers, as the term is used here, is meant companies owning or operating railroads, facilities auxiliary thereto such as bridges, ferries, union depots, and other terminal facilities, sleeping cars, parlor cars, dining cars, freight cars, express service and facilities, electric railways, highway motor vehicles, steamboats and other manne transportation equipment, pipe lines (other than those for transportation of water), and other instrumentalities devoted to the transportation of persons or property for hire. Telegraph and telephone companies are not meant to be included.
- Noncarrier companies should, for the purpose of these schedules, include telephone companies, telegraph companies, mining companies, manufacturing companies, hotel companies, etc. Purely holding companies are to be classified as noncarrier companies, even though the securities held by such companies are largely or entirely issued or assumed by carriers.
- By an active corporation is meant one which maintains an organization for operating property or administering its financial affairs. An inactive corporation is one which has been practically absorbed in a controlling corporation and which neither operates property nor administers its financial affairs. If it maintains an organization it does so only for the purpose of complying with legal requirements and maintaining title to property or franchises.
- Combine in one account investments in which the original cost or present equity in total assets is less than \$10,000.
- Include investments in unincorporated entities such as lessee organizations. Exclude amounts normally settled on a current basis.
- 10. Do not include the value of securities issued or assumed by respondent.
- For affiliates which do not report to the Surface Transportation Board and are jointly owned, disclose in footnotes the name and extent of control of the other controlling entities.

310. INVESTMENTS AND ADVANCES AFFILIATED COMPANIES

- Give particulars of investments in stocks, bonds, other secured obligations, unsecured notes, and investment advances of companies affiliated with respondent, from accounts 715 (Sinking Funds), 716 (Capital Funds), 721 (Investments and Advances Affiliated Companies), and 717 (Other Funds).
- 2. Entries in this schedule should be made in accordance with the definitions and general instructions given on Page 25, classifying the investments by means of letters, figures, and symbols in columns (a), (b), and (c)
- Indicate by means of an arbitrary mark in column (d) the obligation in support of which any security is pledged, mortgaged, or
 otherwise encimbered. Give names and other important particulars of such obligations in footnotes.
- 4. Give totals for each class and for each subclass and a grand total for each account.
- 5. Entries in column (d) should show date of maturity of bonds and other evidences of indebtedness. In case obligations of the same designation mature serially, the date in column (d) may be reported as "Serially _____ to ____". Abbreviations in common use in standard financial publications may be used to conserve space.

INSTRUCTIONS CONCERNING RETURNS TO BE MADE IN SCHEDULE 330

- 1. Give particulars of balances at the beginning and close of the year and of all changes during the year in Account No. 731, "Road and Equipment Property", and Account No. 732, "Improvements on Leased Property", classified by primary accounts in accordance with the Uniform System of Accounts for Railroad Companies. The balances, by primary accounts, should insofar as known, be stated in column (b) and all changes made during the year should be analyzed in columns (c) to (f), inclusive. Column (g) should be the net of the amounts in columns (c) through (f). Column (h) is the aggregate of columns (b) through (f), inclusive. Grand totals of columns (b) and (h) should equal the sum of Accounts 731 and 732 for the respective periods; if not, a full explanation should be made in a footnote.
- In column (c), show disbursements made for the specific purpose of purchasing, constructing, and equipping new lines, and for the extension of old lines, as provided for in Instruction 2-1, "Items to be charged", in the Uniform System of Accounts for Railroad Companies for such items
- In column (d), show the cost of a railway or portion thereof, acquired as an operating entity or system by purchase, merger, consolidation, reorganization, receivership sale or transfer, or otherwise
- Columns (c) and (e) should include all entries covering expenditures for additions and betterments, as defined, whether or not replacing other property.
- 5. All credits representing property sold, abandoned, or otherwise retires should be shown in column (1).
- 6. Both the debit and credit involved in each transfer, adjustment, or clearance, between road and equipment accounts, should be included in the column in which the item was initially included. Also the transfer of prior years' debits or credits from investment in road and equipment to operating expenses or other accounts, or vice versa, should be included in the column applicable to current items of like nature
 Each such transfer, adjustment, or clearance should be fully explained when in excess of \$100,000.
- 7 If during the year an individual charge of \$100,000 or more was made to Account No. 2, "Land for Transportation Purposes", state the cost, location, area, and other details which will identify the property in a footnote.
- 8. Report on line 29, amounts not included in the primary road accounts The items reported should be briefly identified and explained under "Notes and Remarks" below. Amounts should be reported on this line only under special circumstances, usually after permission is obtained from the Board for exceptions to prescribed accounting. Reference to such authority should be made when explaining the amounts reported Respondents must not make arbitrary changes to the printed stub or column headings without specific authority from the Board.
- 9. If during the year a segment of transportation property was acquired, state in a footnote the name of the vendor, the mileage acquired, and the date of acquisition, giving location and cost of the property to the respondent. Also furnish a statement of the amount included in each primary account representing such property acquired, referring to the column or columns in which the entries appear.
- 10 If an amount of less than \$5,000 is used as the minimum for additions and betterments to property investment accounts as provided for in Instruction 2-2 of the Uniform System of Accounts for Railroad Companies, state the amount used in a footnote.

332. DEPRECIATION BASE AND RATES - ROAD AND EQUIPMENT OWNED AND USED AND LEASED FROM OTHERS

(Dollars in thousands)

1. Show in columns (b) and (e), for each primary account, the depreciation base used to compute depreciation charges for the month of January, and in columns (c) and (f), the depreciation charges for the month of December. In columns (d) and (g) show the composite rates used in computing depreciation charges for December, and on lines 30 and 39 of these columns show the composite percentage for all road and equipment accounts, respectively, ascertained by applying the primary account composite composite percentage for all road and equipment accounts, respectively, ascertained by applying the primary account composite rates to the depreciation base used in computing the charges for December, and dividing that total by the total depreciation base for the same month. The depreciation base should not include the cost of equipment used, but not owned, when the rents are included in rent for equipment and Account Nos 31-22-00, 31-23-00, 31-25-00, 31-21-00, 35-21-00, 35-22-00, and 35-25-00 It should include cost of equipment owned and leased to others when the rents therefrom are included in the rent for equipment Accounts Nos 32-21-00, 32-22-00, 32-25-00, 36-21-00, 36-22-00, 36-23-00, and 36-25-00, inclusive. Composite rates used should be those prescribed or authorized by the Board, except that where the use of component rates has been authorized. the composite rates to be shown for the respective primary accounts should be recomputed from the December charges developed by the use of the authorized rates. If any changes in rates were effective during the year, give particulars in a footnote.

2 All leased properties may be combined and one composite rate computed for each primary account, or a separate schedule may

be included for each such property.

3. Show in columns (e), (f) and (g) data applicable to Lessor property, when the rent therefore is included in Account Nos 31-11-00, 31-12-00, 31-13-00, 31-21-00, 31-20, 31-20, and 31-23-00, inclusive.

4. If depreciation accruals have been discontinued for any account, the depreciation base should be reported, nevertheless, in support of depreciation reserves. Authority for the discontinuance of accruals should be shown in a footnote indicating the effected account(s).

5. Disclosures in the respective sections of this schedule may be omitted if either total road leased from others or total equipment leased from others represents less than 5% of total road owned or total equipment owned, respectively.

335. ACCUMULATED DEPRECIATION- ROAD AND EQUIPMENT OWNED AND USED (Dollars in Thousand)

- I Disclose the required information in regard to credits and debits to Account No. 735, "Accumulated Depreciation. Road and Equipment Property", during the year relating to owned and used road equipment Include entries for depreciation of equipment owned but not used when the resulting rents are included in the "Lease Rentals-Credit-Equipment" accounts and "Other Rents-Credit-Equipment" accounts. Exclude any entries of depreciation of equipment that is used but not owned when the resulting rents are included in "Lease Rental-Debit-Equipment" account and "other Rents-Debit-Equipment" accounts (See Schedule 351 for the accumulated depreciation to road and equipment owned and leased to others.)
 - 2 If any data are included in columns (d) or (f), explain the entries in detail.
 - 3. A debit balance in columns (b) or (g) for any primary account should be designated "Dr."
- 4 If there is any inconsistency between the credits to the reserve as shown in column (c) and the charges to operating expenses, a full explanation should be given
- 5 Finter amounts representing amortization under an authorized program other than for defense projects on lines 29 and 39

(Dollars in thousands)

- 1. Disclose the required information relating to credits and debits of Account 772, "Accrued Liability Leased Property", during the year concerning road and equipment leased from others
- 2. In column (c), enter amounts charged to operating expenses; in column (e), enter debits to account arising from retirements; in column (f), enter amounts paid to lessor.
- 3. Any inconsistencies between credits to account, charges to operating expenses and payments to lessors should be fully explained.
- 4. Required disclosure may be omitted if leased road and equipment property represents 5% or less of total property owned and used
- 5. If settlement for depreciation is made currently between lessee and lessor, and no debits or credits to Account 772 are made by the accounting company, show in column (c) the charges to operating expenses, and in column (f) show payments made to the lessor in settlement thereof

340. DEPRECIATION BASE AND RATES-IMPROVEMENTS TO ROAD AND EQUIPMENT LEASED FROM OTHERS (Dollars in thousands)

- 1. Show in column (b) for each primary account the depreciation base used in computing the depreciation charges for the month of January, and in column (c) show the depreciation base used in computing the depreciation charges for the month of December, in column (d) show the composite rates used to compute the depreciation charges for December, and on lines 30 and 40 of these columns show the composite percentage of all road and equipment accounts, respectively, ascertained by applying the primary account composite rates to the depreciation base used in computing the charges for December and dividing the total so computed by the total depreciation base for the same month. This schedule should include only improvements to leased property charged to account 732, "Improvements on Leased Property". The composite rates used should be those prescribed or otherwise authorized by the Roard, except that where the use of component rates has been authorized, the composite rates to be shown for the respective primary accounts should be recomputed from the December charges developed by the use of the authorized rates. If any changes in rates were effective during the year, give full particulars in a footnote
- 2 All improvements to leased property may be combined and one composite rate computed for each primary account, or a separate schedule may be included for each such property.
- 3 If depreciation accruals have been discontinued for any account, the depreciation base should be reported, nevertheless, in support of depreciation reserves. Authority for the discontinuance of accruals should be shown in a footnote indicating the effected account(s)
- 4 Disclosures in the respective sections of this schedule may be omitted if either total road leased from others or total equipment leased from others represents less than 5% of the total road owned or total equipment owned, respectively. However, line 41, Grand Total, should be completed

NOTES AND REMARKS FOR SCHEDULE 342	
This page intentionally left blank.	
<b></b>	

## 350. DEPRECIATION BASE AND RATES-ROAD AND EQUIPMENT LEASED TO OTHERS (Dollars in thousands)

- 1. This schedule is to be used in cases where the related depreciation reserve is carried in the accounts of the respondent and the rent therefrom is included in Accounts 32-11-00, 32-12-00, 32-13-00, 32-21-00, 32-22-00 and 32-23-00
- 2. Show in columns (b) and (c), for each primary account, the depreciation base used in computing the depreciation for the months of January and December, respectively, with respect to road and equipment owned by the respondent but leased to others, the depreciation charges for which are not includible in operating expenses of the respondent, but for which the depreciation reserve is recorded in the accounts of the respondent. If the base for road is other than the original cost or estimated original cost as found by the Board's Office of Ecomomic and Environmental Analysis, brought to a current date by the respondent from its Order No 3 records and accounts, or is other than ledger value for equipment, a full explanation should be given.
- 3. In column (d) show the composite rates used to compute the depreciation for December and on lines 29 and 38 of this column show the composite percentage for all road and equipment accounts, respectively, ascertained by applying the primary accounts composite rates to the depreciation base used to compute the depreciation for December and dividing the total also computed by the depreciation base
- 4 If depreciation accruals have been discontinued for any account, the depreciation base should be reported, nevertheless, in support of depreciation reserves. Authority for the discontinuance of accruals should be shown in a footnote indicating the account(s) affected
- 5. Disclosures in the respective sections of this schedule may be omitted if either total road leased to others or total equipment leased to others represents less than 5% of total road owned or total equipment owned, respectively. However, line 39, grand Total, should be completed.

## 351. ACCUMULATED DEPRECIATION - ROAD AND EQUIPMENT LEASED TO OTHERS (Dollars in thousands)

- 1. This schedule is to be used in cases where the related depreciation reserve is carried in the accounts of the respondent and
- the rent therefrom is included in Accounts 32-11-00, 32-12-00, 32-13-00, 32-21-00, 32-22-10, and 32-23-00

  2. Disclose credits and debits to Account 735, "Accumulated Depreciation-Road and Equipment Property", during the year relating to road and equipment leased to others, the depreciation charges for which are not included in operating expenses of the respondent (See Schedule 330 for the reserve relating to road and equipment owned and used by the respondent)
- 3. If any entries are made for column (d) "Other credits", or column (f) "Other debus", state the facts occasioning such entries on page 39 A debit balance in columns (b) or (g) for any primary account should be shown in parenthesis or designated "Dr".
- 4. Disclosures in the respective sections of this schedule may be omitted if either total road leased to others or total equipment leased from others represents less than 5% of total road owned or total equipment owned, respectively. However, line 39, Grand Total, should be completed

## 352A. INVESTMENT IN RAILROAD PROPERTY USED IN TRANSPORTATION SERVICE (By Company) (Dollars in Thousands)

1. Disclose the investment in railway property used in transportation service at the close of the year. This investment represents the aggregate of the property owned or leased by respondent and used in respondent's transportation service. Such property includes (a) investment reported in Accounts 731, "Road and Equipment Property", and 732, "Improvements on leased property", of respondent, less any 731 or 732 property leased to others for their exclusive use of road, track, or bridges (including equipment or other railway property covered by the contract). Equipment leased to others under separate distinct contracts shall not be deducted from respondent's 731 or 732 property, and (b) the investment of other companies' 731 or 732 property (including operating and lessor railroads) used by respondent when the lease is for exclusive use or control of roads, tracks, or bridges (including equipment of other railway property covered by the contract). This excludes leased equipment from operating railroads under separate distinct contracts and the investment of other carriers in property jointly used by respondent.

2. In column (a), classify each company in this schedule as: "R" for respondent, "L" for lessor railroad, "P" for inactive or proprietary company, and "O" for other leased properties.

3. In columns (a) to (e), inclusive, first show the data requested for the respondent (R); next the data for companies whose entire properties are used in transportation service of the respondent, divided between lessor (L) and proprietary (P) companies; followed by data for carriers and others (O), portions of whose property are used in transportation service of the respondent. Show a total for each class of company in column (d) and (e). Then show as deductions, data for transportation property leased to carriers and others

4 In column (c), line-haul carriers report the miles of road used in line-haul service. Report miles in whole numbers.

5 In column (d), show the amount applicable in Accounts 731 and 732 on the books of the companies whose names appear in column (b). Values of property of other carriers segregated by estimate or otherwise should correspond in amount to deductions made by the owners in their reports. If separate value is not available, an explanation should be provided Differences between amounts shown in column (d) of this schedule and column (c), line 24, on the asset side of the general balance sheet of each individual railway should be explained in a footnote. Book values included in Accounts 731 and 732 of the owner should be reported in column (d) in reference to the investment of the respondent in the securities of the owner unless a good reason can be given for the contrary. Methods of estimating (by capitalizing rentals at 6 percent or otherwise) value of property of private owners, or portions of property of other carriers, should be explained.

6. In column (e), show the amount of depreciation and amortization accrued as of the close of the year in Accounts 733, 734, 735, 736, and 772, that is applicable to the property of the carriers whose names are listed in column (b), regardless of where the

reserves therefor are recorded.

## 352B. INVESTMENT IN RAILWAY PROPERTY USED IN TRANSPORTATION SERVICE

(By Property Accounts) (Dollars in thousands)

- 1. In columns (b) through (e) give, by primary accounts, the amount of investment at the close of the year in property of respondent and each group or class of companies and properties.
- 2. The amounts for respondent and for each group or class of companies and properties on line 44 herein, should correspond with the amounts for each class of company and property shown in schedule 352A. Continuing records shall be maintained by respondent of the primary property accounts separately for each company or property included in the schedule.
- 3. Report on line 29 amounts representing capitalization of rentals for leased property based on 6 percent per year where property is not classified by accounts by non-carrier owners, or where cost of property leased from other carriers is not ascertainable. Identify non-carrier owners, and briefly explain on page 39 methods of estimating value of property of non-carriers or property of other carriers.
- 4. Report on line 30 amounts not includible in the accounts shown, or on line 29. The items included should be briefly identified and explained. Also include here those items after permission is obtained from the Board for exceptions to prescribed accounting. Reference to such authority should be made when explaining the amounts reported. Respondents must not make arbitrary changes to the printed stub or column headings without specific authority from the Board.

## 412. WAY AND STRUCTURES (Dollars in thousands)

- 1. Report freight expenses only.
- 2. The total depreciation expense reported in column (b), line 29, should balance to the sum of the depreciation expense reported in schedule 410, column (f) lines, 136, 137 and 138.
- 3 Report in column (c) the lease/rentals for the various property categories of Way and Structures. The total net lease/rentals reported in column (c), line 29, should balance the net amount reported in schedule 410, column (f), lines 118 through 123, plus lines 130 through 135.

If an entire road or segment of track is leased and if the actual breakdown of lease/rentals by property category is not known, apportion the lease/rentals based on the percentage of the categories' depreciation bases for all categories of depreciable leased property. Use schedule 352B of this report to obtain the depreciation bases of the categories of leased property.

- 4. Amortization adjustment of each road property type which is included in column (b) shall be repeated in column (d) as a debit or credit to the appropriate line item. The net adjustment on line 29 shall equal the adjustment reported on line 29 of schedule 335
  - 5. Report on line 28, all other lease rentals not apportioned in any category listed on lines 1 through 27.
  - 6. Line 11, Account 16, should not include computer and data processing equipment reported on line 37 of schedule 415.

# 414. RENTS FOR INTERCHANGED FREIGHT TRAIN CARS AND OTHER FREIGHT-CARRYING EQUIPMENT (Dollars in thousands)

1. Report freight expenses only.

2. Report in this supporting schedule rental information by car type and other freight-carrying equipment relating to the interchange of railroad owned or leased equipment and privately owned equipment. (Reporting for leased equipment covers equipment that carrier on railroad markings).

Schedule 410, column (f), lines 231 (credits) and 230 (debits). Trailer and container rentals in this schedule are included in Schedule 410, column (f), lines 315 and 316. However, the trailer and container rentals in this schedule will not balance to lines 315 and 316 of schedule 410 because those lines melude rents for "Other Equipment" which is reported in 3. The gross amounts receivable and payable for freight-train cars (line 19, columns (b) through (d), and line 19, columns (e) through (g), respectively should balance with Schedule 415, column (f). The balancing of schedule 410, 414 and 415 "Other Equipment" is outlined in note 6 to Schedule 415.

4. Report in columns (b) and (e) rentals for private-line cars (whether under railroad control or not) and shipper-owned cars.

5. Report in columns (c), (d), (f) and (g) rentals for railroad owned cars prescribed by the Board in EX Parte no 334, for which rentals are settled on a combination mileage and time basis (basic per diem). Include railroad owned per diem tank cars on line 17.

NOTES: Mechanical designations for each car type are shown in Schedule 710.

## NOTES AND REMARKS This page intentionally left blank.

## GENERAL INSTRUCTIONS CONCERNING RETURNS TO BE MADE IN SCHEDULE 415

- 1. Report freight expenses only.
- 2 Report by type of equipment all natural expenses relating to the equipment functions (salaries and wages, materials, tools, supplies, fuels and lubricants, purchased services and general)
- 3 Report in column (b) net repair expense, excluding the cost to repair damaged equipment.
  - Schedule 415, column (b), will balance to Schedule 410, column (f), as follows.
  - (a) Locomotives, line 5 plus line 38, compared to the sum of Schedule 410, lines 202,203 plus 216 (excluding wreck repairs). Do not report in schedule 415, Equipment Damaged from Schedule 410, line 204
  - (b) Freight Cars, line 24 plus line 39, compared to the sum of Schedule 410, lines 221, 222 plus 235 (excluding wreck repairs). Do not report in Schedule 415, Equipment Damaged from Schedule 410, line 223.
  - (c) Sum of highway equipment (line 32), floating equipment (line 35), passenger and other revenue equipment (line 36), computer and data processing equipment (line 37), machinery-other equipment (line 40), and work and other non-revenue equipment (line 41) compared to Schedule 410, the sum of lines 302 through 307, plus line 320 (excluding wreck repairs). Do not report in Schedule 415, equipment damaged from Schedule 410, line 308

Note: Lines 216, 235 and 320 of Schedule 410 are credit amounts.

The allocation of freight car repair expenses reportable on Schedule 415 by car types shall be in accordance with Instruction 2-21, Freight train repair costing, 49 CFR 1201.

4. Depreciation expense for each class of equipment by car type shall be reported in columns (c) and (d). For improvements on leased property, Accounts 732 and 733, use a supplementary Schedule 415, which will relate to Schedules 340 and 342.

Depreciation charges reported on columns (c) and (d) will balance to Schedule 410, column (f), as follows:

- (a) Locomotives, line 5 and 38, compared to Schedule 410, line 213.
- (b) Freight Cars, line 24 and 39, compared to schedule 410, line 232.
- (c) Sum of highway equipment (line 32), floating equipment (line 35), passenger and other revenue equipment (line 36), computer and data processing equipment (line 37), machinery-other equipment (line 40), and work and other non-revenue equipment (line 41), compared to Schedule 410, line 317.
- 5. Amortization adjustment of each equipment type which is included in column (c) shall be reported in column (e) as a debit or credit to the appropriate line item. The net adjustment on line 43 shall equal the equipment amortization adjustment applicable to equipment used in freight service included in line 39, column (c), of Schedule 335.
- 6. Lease/rentals reported in column (f) should balance to column (f) of Schedule 410 as follows:
  - (a) Locomotives, line 5 and 38, compared with Schedule 410, lines 207, 208, 211 and 212.
  - (b) Freight cars, line 24 and 39, compared with Schedule 410, lines 226 plus 227 (note that Schedule 410, lines 230 and 231, are reported in Schedule 414 and are not to be included in Schedule 415).
  - (c) Sum of Lease/rentals for all other equipment, lines 32, 35, 36, 37, 40 and 41, will balance to Schedule 410, lines 311, 312, 315 and 316, except for the interchange rental on trailers and containers which is reported in Schedule 414. Therefore, both Schedules 414 and 415 should be used when balancing lease/rentals other equipment to Schedule 410. Do not report in Schedule 415 the trailer and container rentals reported in Schedule 414.
- 7. Investment base by types of equipment shall be reported in columns (g) and (h) and should not include the cost of equipment used but not owned when the rents therefore are included in the rent for equipment and Account Nos. 31-21-00, 31-22-00, 31-23-00, 35-21-00, 35-22-00 and 35-23-00. It should include the cost of equipment owned and leased to others when the rents are included in the rent for Equipment Account Nos. 32-21-00, 32-22-00, 36-21-00, 36-22-00, and 36-23-00.

Property used but not owned should also be included when the rent is included in Account Nos 31-12-00, 31-13-00, 31-21-00, 31-22-00 and 31-23-00, inclusive.

The grand total of each equipment account in column (h) of Schedule 330 should equal the totals of line items constituting the equipment account totals of columns (g) and (h), of Schedule 415.

8. Accumulated depreciation for each class of equipment shall be reported in columns (i) and (j) The grand total of each equipment reserve account in column (g), Schedule 335, shall equal the combined aggregate total accumulated depreciation for line items constituting the corresponding equipment accounts reported in columns (i) and (j), on Schedule 415.

### B. Adjustments to Federal Income Taxes

- 1. In column (a) are listed the particulars which most often cause a differential between taxable income and pretax accounting income. Other particulars which cause such a differential should be listed under the caption Other (Specify), including State and other taxes deferred if computed separately. Minor items, each less than \$100,000, may be combined in a single entry under Other (Specify)
- 2 Indicate in column (b) the beginning of the year total of Accounts 714, 744, 762 and 786 applicable to each particular item in column (a).
- 3 Indicate in column (c) the net change in Accounts 714, 744, 762 and 786 for the net tax effect of timing differences originating and reversing in the current accounting period
- 4 Indicate in column (d) any adjustments, as appropriate, including adjustments to eliminate or reinstate deferred tax effects (credits or debits) due to applying or recognizing a loss carry-forward or loss carry-back.
- 5 The total of line 19 in columns (c) and (d) should agree with the total of the contra charges (credits) to Account 557, Provision for Deferred Taxes, and Account 591, Provision for Deferred Taxes Extraordinary Items, for the current year.
- 6 Indicate in column (e) the cumulative total of columns (b), (c) and (d). The total of column (e) must agree with the total of Accounts 714, 744, 762 and 786

SOO adopted the provisions of FIN 48 on January 1, 2007. The implementation of FIN 48 had no impact on the liability for unrecognized tax benefits.

SOO files income tax returns in the U.S. federal jurisdiction and various U.S state jurisdictions. SOO is no longer subject to federal income tax examinations by the Internal Revenue Service for years prior to 2004. Unrecognized tax benefits are not expected to significantly increase or decrease within the next 12 months. SOO is no longer subject to state income tax examinations by tax authorities for years before 2003.

A reconciliation of the beginning and ending amount of gross unrecognized tax benefits is as follows:

\$109
249
635
0
0
\$993

Included in the balance at January 1, 2007 and December 31, 2007, are \$.9 million of tax positions that would not affect the annual effective tax rate.

SOO recognizes both penalties and interest accrued related to unrecognized tax benefits in SOO's provision for income taxes. SOO had approximately \$.1 million and \$ 7 million for the payment of interest and penalties accrued at December 31, 2007 and 2006, respectively.

The computation of deferred taxes under FAS 109 provides for the inclusion of judgments about future taxable income, other than temporary item reversals, in the determination of the valuation allowance required.

SOO is included in a federal consolidated tax return with Parent. As of December 31, 2007, SOO had no federal tax operating loss carryforwards as allocated under Internal Revenue Service rules, but still had certain state tax net operating loss carry forwards available.

As of December 31, 2007, SOO had federal and state minimum tax credit carryforwards in the amount of \$3.6 million. These credits are available to be carried forward indefinitely without expiration. During 2007, \$.6 million of minimum tax credits were generated and \$12.7 million minimum tax credits were used.

Give a brief description for all items, regardless of amount, included during the year in Accounts 555, Unusual or Infrequent Items, 560, Income or Loss From Operations of Discontinued Segments; 562, Gain or Loss on Disposal of Discontinued Segments; 570, Extraordinary Items; 590, Income Taxes on Extraordinary Items; 592, Cumulative Effect of Changes in Accounting Principles; 603, Appropriations Released; 606, Other Credits to Retained Earnings, 616, Other Debits to Retained Earnings; 620, Appropriations for Sinking Funds, 621, Appropriations for Other Purposes. If appropriations released reflect appropriations provided during the year, each account should not be reported.

For Accounts 519, Miscellaneous Income, and 551, Miscellaneous Income Charges, if the total in either account exceeds 10% of net income before extraordinary items, describe the three largest items in the account and any other items in excess of 10% of net income

## 502. COMPENSATING BALANCES AND SHORT-TERM BORROWING ARRANGEMENTS

67

(Dollars in thousands)

Using the following notes as a guideline, show the requirements compensating balances and short-term borrowing agreements. Footnote disclosure is required even though the arrangement is not reduced to writing.

- 1. Disclose compensating balances not legally restricted, lines of credit used and unused, average interest rate of short-term borrowings that are outstanding at balance sheet date, maximum amount of outstanding borrowings during the period and the weighted average rate of those borrowings.
  - 2. Time deposits and certificates of deposit constituting compensating balances not legally restricted should be disclosed.
  - 3 Compensating balance arrangements need only be disclosed for the latest fiscal year.
- 4. Compensating balances included in Account 703, Special Deposits and in Account 717, Other Funds, should also be separately disclosed below.
- 5. Compensating balance arrangements are sufficiently material to require disclosure in footnotes when the aggregate of written and oral agreement balances amount to 15% or more of liquid assets (current cash balances, restricted and unrestricted plus marketable securities).
- 6. When a carrier is not in compliance with a compensating balance requirement, that fact should be disclosed, along with stated and possible sanctions, whenever such possible sanctions may be immediate (not vague or unpredictable) and material.

Short-term debt obligations at December 31, 2007 and 2006, were as follows:

	<u>2007</u>	<u>2006</u>
Line of credit	15,000	0
Other obligations	<u>14,978</u>	<u>0</u>
Total short-term debt	29,978	0

The line of credit is with a bank and is not to exceed \$15.0 million. The line of credit bears interest at an annual rate of LIBOR plus 75 basis points. The amount outstanding at December 31, 2007, is due January 15, 2008. As of December 31, 2007, the interest rate was 5.61%, including the 75 basis points. The other obligations represent negotiated bank overdrafts for which SOO pays a daily rate with no specific due date. As of December 31, 2007, the interest rate was 7.75%. There are no additional covenants required for either of these short-term obligations.

# INSTRUCTIONS CONCERNING RETURNS TO BE MADE IN SCHEDULE 512

1. Furnish the information called for below between the respondent and the affiliated companies or persons affiliated with the respondent, including officers, directors, stockholders, owners, partners or their wives and other close relatives, or their agents. Examples of transactions are, but are not restricted to, management, legal, accounting, purchasing or other type of service including the furnishing of materials, supplies, purchase of equipment, leaving of structures, land and equipment, and agreements relating to allocation of officers' salanes and other common costs between affiliated

To be excluded are payments for the following types of services:

- (a) Lawful tariff charges for transportation services.
- (b) Payments to or from other carriers for interline services and interchange of equipment.
- (c) Payment to or from other carriers which may reasonably be regarded as ordinarily connected with routine operation or maintenance, but any special or unusual transactions should be reported.
- (d) Payments to public utility companies for rates or charges fixed in conformity with government authority.
- 2. In column (a) enter the name of the affiliated company, person, or agent with which respondent received or provided services aggregating \$50,000 or more during the year. If an affiliated company provides services to more than one affiliate, and the aggregate compensation amounts to \$50,000 or more for the year, list all the affiliates included in the agreement and describe the allocation of charges. If the respondent provides services to more than one affiliate, and the aggregate compensation amounts to \$50,000 or more for the year, reference to this fact should be made and the detail as to the allocation of charges should be stated. For those affiliates providing services to the respondent, also enter in column (a) the percent of affiliate's gross income derived from transactions with the respondent.

The respondent may be required to furnish as an attachment to Schedule 512 a balance sheet and income statement for each affiliate with which respondent carrier had reportable transactions during the year, or alternatively, attach a "Pro forma" balance

spect and income statement for that portion or entity of each affiliate which furnished the agreed to services, equipment, or other reportable transaction. The statements, if required, should be prepared on a calendar year basis in conformity with the prescribed schedules for the balance sheet and income statement in Annual Report Form R-1, and should be noted (1) to indicate the method used for depreciating equipment or other property furnished the carrier, and (2) whether the affiliate's Federal income tax return for the year was filed on a consolidated basis with the respondent carrier.

- 3. In column (b) indicate nature of relationship or control between the respondent and the company or person identified in column (a) as follows:
- (a) If respondent directly controls affiliate, insert the word "direct".
- (b) If respondent controls through another company, insert the word "indirect".
- (c) If respondent is under common control with affiliate, insert the word "common".
- (d) If respondent is controlled directly or indirectly by the company listed in column (a), insert the word "controlled".
- (e) If control is exercised by other means such as a management contract or other arrangement of whatever kind, insert the word "other" and provide a foomote to describe such arrangements.
- 4 In column (c), fully describe the transactions involved such as management fces, lease of building, purchase of material, etc. When the affiliate listed in column (a) provides more than one type of service in column (c), list each type of service separately and show total for the affiliate When services are both provided and received between the respondent and an affiliate they should be listed separately and the amounts shown separately in column (e).
- In column (d), report the dollar amounts of the transactions shown and the effect of any change in the method of establishing the terms from that used in the preceding period.
- 6. In column (e), report the dollar amounts due from or to related parties and, if not otherwise apparent, the terms and manner of settlement. Insert (P) paid and (R) received by the arrount in column (e).

### 515. RAILS LAID IN REPLACEMENT

(Dollars in thousands)

Give particulars of all rails applied during the year in connection with replacement of rail in previously constructed tracks maintained by the respondent

In column (a) classify the kind of rail applied as follows:

- (1) New steel rails. Bessemer process.
- (2) New steel rails, open-hearth process.
- (3) New rails, special alloy (describe more fully in a footnote).
- (4) Relay rails

Returns in columns (c) and (g) should be reported in whole numbers. Fractions of less than one-half should be disregarded, and fractions of one-half or more should be counted as one.

### INSTRUCTIONS CONCERNING RETURNS TO BE MADE IN SCHEDULE 700.

State particulars of all tracks operated by the respondent at the close of the year, according to the following classification.

- (1) Line owned by respondent
- (2) Line owned by proprietary companies
- (3) Line operated under lease for a specified sum, lessor being (A) an affiliated corporation, or (B) independent or not affiliated with respondent.
- (4) Line operated under contract or agreement for contingent rent, owner being (A) an affiliated corporation, or (B) independent or not affiliated with respondent.
  - (5) Line operated under trackage rights.

Give subtotals for each of the several numbered classes, in the order listed above, as well as the total for all classes

Lengths of track should be reported to the nearest WHOLE mile adjusted to accord with footings; i.e., counting one-half mile or over as a whole mile and disregarding any fraction less than one-half mile.

In Column (a) insert the figure (and letter, if any) indicating its class in accordance with the above list of classifications.

In Column (b) give the various proportions of each class owned or leased by respondent, listing each proportion once in any grouping. Canadian mileage should be segregated and identified on separate lines in the various groupings. For each listing, in Column (d) give its entire length (the distance between terminals of single or first main track), and in the following columns the lengths of second main track, all other main tracks, passing tracks, cross-overs and turn-outs; way switching tracks; and yard switching tracks. These classes of tracks are defined as follows:

RUNNING TRACKS - Running tracks, passing tracks, cross-overs, etc., including turn-outs from those tracks to clearance points.

WAY SWITCHING TRACKS - Station, team, industry and other switching tracks for which no separate service is maintained.

YARD SWITCHING TRACKS - Yard where separate switching services are maintained, including classification, house, team, industry and other tracks switched by yard locomotives.

The returns in Columns (h) and (i) should include tracks serving industries, such as mines, mills, smelters, factories, etc Tracks belonging to an industry for which no rent is payable should not be included.

Tracks leading to and in gravel and sand pits and quarries, the cost of which is chargeable to a clearing account and which are used in getting out material for the respondent's use, should not be included.

Class (1) includes all lines operated by the respondent at the close of the year to which it has title in perpetuity.

Class (2) includes each line, full title to which is in an inactive proprietary corporation of the respondent (i.e. one all of whose outstanding stocks or obligations are held by or for the respondent, and which is operated by the respondent or an affiliated system corporation without any accounting to the said proprietary corporation). It may also include such line when the actual title to all of the outstanding stocks or obligations rests in a corporation controlled by or controlling the respondent. But in the case of any such inclusion, the facts of the relationship to the respondent of the corporation holding the securities should be fully set forth in a footnote. An inactive corporation is one which has been practically absorbed in a controlling corporation, and which neither operates property nor administers its financial affairs. If it maintains an organization, it does so only for the purpose of complying with legal requirements and maintaining title to property or franchises.

Class (3) includes all tracks operated under a lease or formal conveyance of less than the grantor's interest in the property, with a specific and unconditional rent reserved. The fact that the lessor does or does not maintain an independent organization for financial purposes is immaterial in this connection

Class (4) is the same as Class (3), except that the rent reserved is conditional upon earnings or some other fact.

Class (5) includes all tracks operated and maintained by others, but over which the respondent has the right to operate some or all of its trains. In the road of this class the respondent has no proprietary rights, but only the rights of a licensee. Include in this class, also, on main tracks, industrial tracks and sidings owned by noncarrier companies and individuals when the respondent operates over them but does not have exclusive possession of them

Road held by the respondent as joint or common owner or a joint lessee or under any joint arrangement should be shown in its appropriate class, and the entry of length should be the entire length of the portion jointly held. The class symbol should have the letter (j) attached.

Road operated by the respondent as agent for another carrier should not be included in this schedule

# 702. MILES OF ROAD AT CLOSE OF YEAR - BY STATES AND TERRITORIES (SINGLE TRACK)

should be shown in column (f). Respondent's proportion of road jointly owned but not operated should be shown in column (h), as appropriate. Mileage which has been permanently Give particulars, as of the close of the year, of all road operated and of all owned but not operated. The respondent's proportion of operated road held by 1t as joint or common owner, or under a joint lease, or under any joint arrangement, should be shown in columns (b), (c), (d) or (c), as may be appropriate. The remainder of jointly operated mileage abandoned should not be included in column (h).

Mileage should be reported to the nearest WHOLE mile adjusted to accord with footings; i.e., counting one-half mile and over as a whole mile and disregarding any fraction less than one-half mile.

# INSTRUCTIONS CONCERNING RETURNS TO BE MADE IN SCHEDULE 710

Instructions for reporting locomotive and passenger-train car data.

- Give particulars of each of the various classes of equipment which respondent owned or leased during the year.
- In column (c) give the number of units purchased new or built in company shops.
   In column (d), give the number of new units leased from others. The term "new" means a unit placed in service for the first time on any railroad.
- 3. Units leased to others for a period of one year or more are reportable in column (1). Units temporarily out of respondent's service and rented to others for less than one year are to be included in column (h). Units rented from others for a period less than one year should not be included in column (i).
- 4. For reporting purposes, a "locomotive unit" is a self-propelled vehicle generating or converting energy into motion, and designed solely for moving other equipment. An "A" unit is the least number of wheel bases with superstructure designed for use singly or as a lead locomotive unit in combination with other locomotive units. A "B" unit is similar to an "A" unit but it is not equipped for use singly or as a lead locomotive unit. A "B" unit may be equipped with hostler controls for independent operation at terminals.
- 5 A "self-propelled car" is a rail motor car propelled by electric motors receiving power from a third rail or overhead, or internal combustion engines located on the car itself. Trailers equipped for use only in trains of cars that are self-propelled are to be included as self-propelled equipment.
- 6. A "diese!" unit includes all units propelled by diesel internal combustion engines regardless of final drive or whether power may at times be supplied from an external conductor. Units other than diesel-electric, e.g., diesel-hydraulic, should be identified in a footnote giving the number and a brief description. An "electric" unit includes all units which receive electric power from a third rail or overhead contact wire, and use the power to drive one or more electric motors that propel the vehicle. An "other self-powered unit" includes all units other than diesel or electric, e.g., sitean, gas turbine. Show the type of unit, service and number, as appropriate, in a brief description sufficient for positive identification. An "auxiliary unit" includes all units used in conjunction with locomotives, but which draw their power from the "mother" unit, c.g., boosters, slugs, etc. For reporting purposes, indicate radio-controlled self-powered diesel units on lines 1 through 8, as appropriate. Radio-controlled units that are not self-powered, i.e., those without a diesel, should be reported on line 13 under "auxiliary units".

7. Column (k) should show aggregate capacity for all units reported in column (j), as follows: For locomotive units, report the manufacturers' rated horsepower (the maximum continuous power output from the diesel engine or engines delivered to the main generator or generators for tractive purposes). Exclude capacity data for steam locomotives. For passenger-train cars report the number of passenger seats available for revenue service, counting one passenger to each berth in sleeping cars

8. Passenger-train car types and service equipment car types correspond to AAR Mechanical Division designations. Descriptions of car codes and designations are published in The Official Railway Equipment Register.

Instructions for reporting freight-train car data

Instructions for reporting freight-train car data

1. Give particulars of each of the various classes of equipment which respondent owned or leased during the year.

2. In column (d) give the number of units purchased or built in company shops. In column (e) give the number of new units leased from others. The term "new" means a unit placed in service for the first time on any railroad.

3. Units leased to others for a period of one year or more are reportable in column (n). Units temporarily out of respondent's service and rented to others for less than one year are to be included in column (i). Units rented from others for a period less than one year should not be included in column (j).

4. Column (m) should show the aggregate capacity for all units reported in columns (k) and (l) as follows. For freight-train cars, report the nominal capacity (in tons of 2,000 lbs.) as provided for in Rule 86 of the AAR Code of Rules Governing Cars in Interchange. Convert the capacity of ank cars to capacity in tons of the commodity which the car is intended to carry customarily. 5. Time mileage cars refer to freight cars, other than cabooses owned or held under lease arrangement, whose interining rental is settled on a per diem and line hauf mileage basis under "Code of Car Hire Rules" or would be so settled if used by another

NOTES AND REMARKS

### 710S. UNIT COST OF EQUIPMENT INSTALLED DURING THE YEAR (Dollars in thousands)

1. Give particulars as requested, separately, for the various classes of new units and rebuilt units of equipment installed by respondent during the year. If information regarding the cost of any units installed is not complete at time of filing of report, the units should be omitted, but reference to the number of units omitted should be given in a footnote, the details as to cost to be given in the report of the following year. The cost of units under construction at the close of the year should not be reflected in this schedule even though part of the cost appears in the property account for the year. Indicate in column (e) whether an installation represents equipment purchased (P), built or rebuilt by contract in outside railroad shops (C), or built or rebuilt in company or system shops (S) including units acquired through capitalized leases (L).

2. In column (a) list each class or type of locomotive unit, car or TOFC/COFC equipment on a separate line. By class is meant the standard classification used to distinguish types of locomotive units, freight cars or other equipment adopted by the Association of American Railroads, and should include physical characteristics requested by Schedule 710. Locomotive units should be identified as to power source, wheel arrangement, and horsepower per unit, such as multiple-purpose diesel locomotive A units (B-B), 2500 HP. Cars should be identified as to special construction or service characteristics, such as aluminum-covered hopper car (LO), steel boxcars-special service (XAP), etc. For TOFC/COFC show type of equipment as enumerated in Schedule 710.

3. In column (c) show the total weight in tons of 2,000 pounds The weight of the equipment acquired should be the weight empty.

4. The cost should be the complete cost as entered on the ledger, including foreign line freight charges and handling charges.

5. Data for this schedule should be confined to the units reported in Schedule 710, columns (c) and (c) for incomprise units.

5. Data for this schedule should be confined to the units reported in Schedule 710, columns (c) and (c) for locomotive units, passenger-train cars and company service cars and columns (d) and (f) for freight train cars, floating equipment and highway revenue equipment. Disclose new units in the upper section of this schedule and in the lower section disclose rebuilt units acquired or rewritten into the respondent's accounts. The term "new" as used herein shall mean a unit or units placed in service for the first time on any railroad.

6. All unequipped boxcars acquired in whole or part with incentive per diem funds should be reported on separate lines and appropriately identified by footnote or sub-heading.

# GENERAL INSTRUCTIONS CONCERNING RETU:RNS TO BE MADE IN SCHEDULES 720, 721, 723 AND 726

- For purposes of these schedules, the track categories are defined as follows:
- A Freight density of 20 million or more gross ton-miles per track mile per year (include passing tracks, turnouts and crossovers)
- B Freight density of less than 20 million gross ton-miles per track mile per year, but at least 5 million (include passing tracks, turnouts and crossovers).
  - C Freight density of less than 5 million gross ton-miles per track mile per year, but at least 1 million (include passing tracks, turnouts and crossovers).
    - D Freight density of loss than 1 million gross ton-miles per track mile per year (include passing tracks, turnouts and crossovers).
- E Way and yard switching tracks (passing tracks, crossovers and turnouts shall be in category A, B, C, D, F and potential abandonments, as apprropriate).
  - F Track over which any passenger service is provided (other than potential abandonments). Mileage should be included within track categories A through E unless there is dedicated entirely to passenger service F.

Potential abandonments - Route segments identified by railroads as potentially subject to abandonment as required by Section 10903 of the Interstate Commerce Act of 1995.

- This schedule should include all class 1, 2, 3 or 4 track from schedulo 700 that is maintained by the respondent (class 5 is assumed to be maintained by others).
- If, for two consecutive years, a line segment classified in one track category maintains a traffic density which would place it in another, it shall be reclassified into that category as of the beginning of the second year. બં છ
  - Traffic density related to passenger service shall not be included in the determination of the track category of a line segment.

## 20. TRACK AND TRAFFIC CONDITIONS

Disclose the requested information pertaining to track and traffic conditions. _;

### 721. TIES LAID IN REPLACEMENT

- 1. Furnish the requested information concerning ties laid in replacement.
- 2. In column (j), report the total board feet of switch and bridge ties laid in replacement.
- 3. The term "spot maintenance" in column (k) means repairs to track components during routine inspections, as opposed to programmed replacements aimed at upgrading the general condition of the tracks. "Percent of spot maintenance" refers to the percentage of total ties or board feet laid in replacement considered to be spot maintenance.

4. In line 9, the average cost per tie should include transportation charges on foriegn lines, tie trains, loading, inspection and the cost of handling ties in general supply storage and seasoning yards, and in the case of treated ties, also the cost of handling at treating plants and the cost of treatment. The cost of unloading, hauling over carrier's own lines, and placing the ties in tracks and of train service other than that necessary in connection with loading or treatment should not be included in this schedule.

# 722. TIES LAID IN ADDITIONAL TRACKS AND IN NEW LINES AND EXTENSIONS (Dollars in thousands)

Give particulars of ties laid during the year in new construction during the year.

In column (a) classify the ties as follows:

T - Wooden ties treated before application. U - Wooden ties untreated when applied.

Report new and second-hand (relay) ties separately, indicating in colurm (h) which ties are new. S - Ties other than wooden (steel, concrete, etc ). Indicate type in column (h).

In columns (d) and (g) show the total cost, including transportation charges on foriegn lines, tie trains, loading, inspection, and the cost of handling ties in general supply, storage and seasoning yard. In the case of treated ties, also show the cost of handling at treating plants and the cost of treatment. The cost of unloading, hauling over carrier's own lines and placing the ties in tracks, and of train service, other than that necessary in connection with loading and treatment, should not be included in this schedule.

## 723. RAILS LAID IN REPLACEMENT

- Furnish the requested information concerning rails laid in replacement.
   The term "spot maintenance" in colurm (h) means repairs to track components during routine inspections, as opposed to programmed replacements aimed at upgrading the general condition of the tracks. "Percent of spot maintenance" refers to the percentage of total rails laid in replacement considered to be spot maintenance.
   In line 9, the average cost of new and relay rail should include the cost of loading at the point of purchase ready for shipment, the freight charges paid on foreign lines and the
- cost of handling rails in general supply and storage yards. The cost of unloading, hauling over carrier's own lines and placing the rails in tracks and of train service in connection with the distribution of rails should not be included in this schedule.

### 724. RAILS LAID IN ADDITIONAL TRACKS AND IN NEW LINES AND EXTENSIONS

(Dollars in thousands)

- 1. Give particulars of all rails applied during the year in connection with the construction of new track. In column (a) classify the kind of rail applied as follows
  - (1) New steel rails, Bessemer process.
  - (2) New steel rails, open-hearth process.
  - (3) New rails, special alloy (describe more fully in a footnote).
  - (4) Relay rails.
- 2. Returns in columns (c) and (g) should be reported in WHOLE numbers. Fractions of less than one-half should be disregarded, and fractions of one-half or more should be counted as one.
- 3. The returns in columns (d) and (h) should include the cost of loading at the point of purchase ready for shipment, the freight charges paid foreign lines, and the cost of handling rails in general supply and storage yards. The cost of unloading, hauling over carrier's own lines, and placing the rails in tracks as well as train service in connection with distribution of the rail should not be included in this schedule.

### 725. WEIGHT OF RAIL

Give the particulars called for below concerning the road and track operated by the respondent at the close of the year. Only the respondent's proportion of jointly owned mileage should be included. Under "Weight of rail" the various weights of rails should be given. Road and track occupied under trackage rights or other form of license should not be included herein, but all road and track held under any form of lease (granting exclusive possesion to the lessee) should be included.

* Show cost of fuel charged to train and yard service (function 67-Loco. Fuels). The cost stated for diesel fuel should be the total charges in the accounts specified, including freight charges and handling expenses. Fuel consumed by mixed and special trains that are predominantly freight should be included in freight service, but where the service of mixed or special trains is predominantly passenger, the fuel should be included in passenger service.

### INSTRUCTIONS CONCERNING RETURNS TO BE MADE IN SCHEDULE 755

Unit Train, Way Train, and Through Train data under Items 2, 3, 4, 6, and 12 shall be obtained from conductor's wheel reports (freight) or similar records. Unit train service is a specialized scheduled shuttle type service in equipment (railroad or privately owned) dedicated to such service, moving between origin and destination. The applicable tariffs and/or contracts generally require that a specific minimum tonnage or quantity of carloads be tendered as a unit for shipment on one bill of lading or other shipping document in a solid train for movement between origin and destination. Such tariffs and/or contracts generally contain restricted detention provisions and are subject to time-volume requirements which reflect the approximate capacity of the unit trains for the stated period. Way trains are defined as trains operated primarily to gather and distribute cars in road service and move them between way stations or way points. Through trains are those trains operated between two or more major concentration or distribution points. Do not include unit train statistics in way and through train statistics. A Work train is a train operated solely or preponderantly for the purpose of transporting company freight, work equipment or company employees. Statistics for work trains should be reported under Item 11 only. Statistics related to company equipment, company employees and company freight moving in transportation trains are not to be reported in Item 11, but are to be reported in Items 4-17, 6-04, 7-02, and 8-04 and 8-05 as instructed in notes, I, K, and L.

- (A) Report miles of road operated at close of year, excluding industrial tracks, yard tracks, and sidings.
- (B) A train-mile is the movement of a train a distance of one mile. In computing train-miles, fractions representing less than one-half mile shall be disregarded and other fractions considered as one mile. Train Miles-Running shall be based on the actual distance run between terminals and/or stations and shall be computed from the official time tables or distance tables. Train-miles shall not be increased to cover the running of locomotives from shops to terminals, doubling hills, switching, or other work at way stations, or for the service of helper or pusher locomotives or of extra locomotives on double-head or triple-head trains. When the carner's trains are detoured over foreign roads, the miles shall be computed on the basis of the miles actually run and in accordance with the service performed. Train-miles shall be kept separately for trains hauled by locomotives and trains moved by motorcars.
- (C) A motorcar is a self-propelled unit of equipment designed to carry freight or passenger traffic, and is not considered a locomotive.
- (D) A locomotive is a self-propelled unit of equipment designed solely for moving other equipment. A locomotive unit-mile is a movement of a locomotive unit a distance of one mile under its own power. Include miles made by all locomotive units. Exclude miles made by motorcars. Miles of locomotives in helper service shall be computed on the basis of actual distance run in such service.
- **(E)** All locomotives unit-miles in road service shall be based on the actual distance run between terminals and/or stations. Follow instructions (B) regarding fractions and official time tables for computing locomotive-miles.
- (F) Train switching locomotive-miles shall be computed at the rate of six miles per hour for the time actually engaged in such service. Include miles allowed train locomotives for performing switching service at terminals and way stations.
- (G) Yard switching locomotive-miles shall be computed at the rate of six miles per hour for the time actually engaged in yard switching service. Include miles allowed for yard locomotives for switching service in yards where regular switching service is maintained and in terminal switching and transfer service.
- (H) A car-mile is a movement of a unit of car equipment a distance of one mile. Use car designations shown in Schedule 710. Under Railroad Owned and Leased Cars, Items 4-01 and 4-11, report both foreign cars and respondent's own cars while on the line of the respondent railroad. In Items 4-13 and 4-15, report private-line cars and shipper owned cars. Loaded and empty miles should be reported whether or not the railroad reimbursed the owner on a loaded and/or empty mile basis. Report miles made by flatcars carrying empty highway trailers that are not moving under revenue billings as empty freight car-miles. Do not report miles made by motorcars or business cars.
- **(I)** Exclude from Item 4-01, 4-11, 4-13, and 4-15 car-miles of work equipment, cars carrying company freight, and non-revenue private line cars moving in transportation trains. Include such car-miles in Items 4-17, 4-18, and 4-19. If private line cars move in revenue service, the loaded and empty miles should not be considered no-payment or non-revenue car-miles.
- **(J)** Report miles actually run by passenger-train cars in transportation service. Passenger-train car-miles include miles run by coaches and cars in which passengers are carried at regular tariff fares without extra charge for space occupied; miles run by combination passenger and baggage, passenger and mail, passenger and express; miles run by sleeping, parlor and other cars for which an extra fare is charged; miles run by dining, cafe, and other cars devoted exclusively to the serving of meals and other refreshments and by club, lounge, and observation cars; and miles run by other passenger-train cars where services are combined such as baggage, express and mail.
- (K) From conductor's or dispatcher's train reports or other appropriate source's, compute weight in tons (2,000 lbs). Item 6-01 includes weight of all locomotive units moved one mile in transportation trains. Ton-miles of motorcars should be excluded. Items 6-02 and 6-03 represent tons behind locomotive units (cars and contents, cabooses) moved one mile in transportation trains (excluding non-revenue gross ton-miles). Non-revenue gross ton-miles in transportation trains include work equipment and cars carrying company freight (and their contents). Use 150 lbs. as the average weight per passenger, and four tons as the average weight of contents of each head-end car.

### INSTRUCTIONS CONCERNING RETURNS TO BE MADE IN SCHEDULE 755 - Concluded

- (L) From conductor's train reports or other appropriate sources, compute ton-miles of freight. Ton-miles represent the number of tons of revenue and non-revenue freight moved one mile in transportation train. Include net ton-miles in motorcar trains. Exclude 1 c.l. shipment of freight handled in mixed baggage express cars. Total ton-miles of revenue freight should correspond to the ton-miles reported on Form CBS.
- (M) Road service represents elapsed time of transportation trains (both ordinary and light) between the time of leaving the initial terminals and the time at final terminals, including trains switching at way stations and delays on road as shown by conductors' or dispatchers' train reports. Include time of motorcar service performed by train locomotives at terminals and way stations. Report in Item 9-02 train switching hours included in Item 9-01. Train switching is the time spent by the train while performing switching service at terminals and way stations where no regular yard service is maintained. A train hour is independent of the number of locomotives in the train
- (N) Yard switching hours are hours expended in switching service performed by yard crews in yards where regular switching service is maintained, including switching and transfer service in connection with the transportation of revenue and incidentally of company freight. Hours in yard switching are independent of the number of locomotives used.
- Work-train miles include the miles run by trains engaged in company service such as official inspection, inspection trains for railway commissioners for which no revenue is received, trains running special with fire apparatus to save carrier's property from destruction, trains run for transporting the carrier's employees to and from work when no transportation charge is made, wrecking trains, trains run solely for the purpose of transporting company material, trains run for distributing material and supplies for use in connection with operations, and all other trains used in work-train services. Exclude miles run by locomotives which engaged incidentally in switching company materials in company shops or material yards in connection with regular yard switching service or in switching equipment for repairs between yards and shops.
- (P) The number of loaded freight cars shall be obtained from the conductors' wheel report and shall be the sum of all loaded cars handled by each train. For example, if a car moves loaded (1) in a way train from the origination points, (2) in two through trains, and (3) in a way train to the destination point, the total count of loaded cars would be four: two counts for the movements in the way trains and two counts for the movements in through trains. Therefore, each car originated or received from a connecting carrier receives an initial count, plus one count for each subsequent physical transfer between trains on respondent's lines. No additional count is given because of crew change or changes in track identification number unless there is a physical transfer of the car between trains. Each car moving under revenue billing shall be considered as a loaded car.
- (Q) Report vehicle (TOFC trailers/containers, automotives and trucks) loaded and unloaded to and from TOFC and multiple level freight cars when the work is performed at the railroad's expense.
- (R) Report the number of loaded revenue trailers/containers picked up, plus revenue trailers/containers delivered in TOFC/COFC and in highway interchange service, when the work is performed at the railroad's expense. (Performed at railroad's expense means that railroad employees perform the service or that the railroad hires a subsidiary or outside contractor to perform the service.) Do not include those trailers/containers which are picked up or delivered by a shipper or motor carrier, etc., when a tariff provision requires the shipper or motor carrier, etc., and not the railroad, perform that service. Note: The count should reflect the trailer/containers for which expenses are reported in Schedule 417 line 2 column (b).
- (S) Report under Marine Terminals, Item 16, the tons loaded onto and unloaded from marine vessels at the expense of the reporting railroad
- (T) Report the total number of foreign railroad cars on line at the end of the year (except surplus cars, see below). Foreign railroad cars refers to freight cars owned by other railroads, whose interline rental is settled on time (by hour) and actual line-haul mileage charges under the Code of Car Hire Rules.

Carriers will be governed by local conditions in determining whether a car at an interchange point should be considered "on-line". Unserviceable cars include cars on repair tracks undergoing or awaiting repairs. They include cars on repair tracks repaired and awaiting switching, cars on repair tracks undergoing or awaiting repairs switching, cars awaiting movement to repair tracks held in train yard (excluding cars which are to be repaired in train yard without loss of time), car moving empty in trains en route to shop, and cars stored awaiting disposition.

Surplus cars are cars which are in serviceable condition available for loading on the last day of the year, but have not been placed for loading within 48 hours. This count can be an annual average based on weekly count of cars that have not been placed for loading within 48 hours.

- (U) Flat-TOFC/COFC Car-miles reported in lines 25 (4-020), 41 (4-120), 57 (4-140), and 75 (4-160) will be computed using cars rather than constructed container platforms. For example, an articulated car consisting of five platforms moved one mile will be counted as one car-mile, not five car-miles.
- (V) The intermodal Load Factor reported on Line 134 will be calculated for the average number of intermodal (TOFC/COFC) units loaded on the average intermodal car. Units are to be calculated in the same manner as Line 123 (13 TOFC/COFC No. of Revenue Trailers & Containers Loaded and Unloaded (Q)). Intermodal cars will be calculated in accordance with instruction U for reporting Flat-TOFC/COFC Car-miles. Both intermodal (TOFC/COFC) units and intermodal cars are to be calculated using actual units and not constructed intermodal (TOFC/COFC) units or cars.
