Re: *STB Docket No. EP 724-3 - United States Rail Service Issues- Data Collection*

Dear Chairman Miller and Vice Chairman Begeman:

I am writing to provide comment on the service data that we are filing contemporaneous herewith in response to the Board's data collection order of October 8, 2014.

CP's US network continues to be fluid and in good operating condition. Again this week, system average train speed, weekly average terminal dwell, and cars on line data are all good.

Our outstanding grain car orders remain at zero this reporting week, as they have been for the previous seven weeks. We spotted a total of 1242 grain cars this week, which total includes single cars and cars in dedicated trains, and we received 450 new grain car orders. From a grain order perspective, we continue to be current in the United States.

With respect to the Rapid City, Pierre & Eastern Railroad (RCP&E), RCP&E did not request any grain cars this week. On average there was a plus twelve locomotive balance this reporting week, meaning there were twelve more CP locomotives on RCP&E than RCP&E locomotives on CP.

Sincerely,

Robert Johnson
Senior Vice President Operations
